Eagle Point (Texas): Line 10 in. Max. quantity acceptable, no limit. Rate 1,000 t.p.h. Clean ballast may be pumped overboard.

Girard Point (Gulf): Line 8 in. Max. quantity acceptable, no limit. Rate 500 t.p.h. Clean ballast may be pumped overboard.

General: Lighterage of deep drafted tankers effected at anchorage inside the Capes and before entering the main Ship Channel, i.e. at Big Stone Reach Anchorage, etc.

The holding ground in the upper river anchorages, such as Reedy Point, Marcus Hook, Mantua Creek, etc. is reported to be poor, whilst considerable siltation is also reported in these areas. Masters are therefore advised to take suitable precautions when having to use these anchorages.

Loading Fresh Water: This is effected at Mantua Creek anchorage only.

LNG/LPG: COAST GUARD REGULATIONS:
REQUIREMENTS FOR THE TRANSPORT AND TRANSFER OF LNG/LPG:

The following requirements are issued in the interest of port safety to supplement existing local, State, and Federal Regulations.

A. GENERAL REQUIREMENTS.

1. *Pre-arrival Conference:* Prior to a vessel's initial port call, or when such a vessel has not been to the port within six months, and is laden with LNG or LPG enroute to a facility in the Captain of the Port, Philadelphia zone, as defined in 33 CFR 3.15-25, a pre-arrival conference shall be held with all personnel concerned in the delivery and operation of the facility. The purpose of this conference is to disseminate and explain Captain of the Port requirements, local regulations, and establish emergency procedures for that vessel during the initial and subsequent port calls. The conference will include representatives of the Coast Guard, the vessel's Agent and charterer or operator, terminal owner/operator, and local authorities including the fire department.

2. *Notification:* The Captain of the Port must be notified:

a. At least 72 hours in advance of a vessel's arrival at the Delaware Breakwater with confirmation 12 hours in advance, and certification upon arrival.

b. Of the vessel's ETA at Ship John Shoal Light.

c. Of the intended length of port call and estimated time of departure.

d. Of any changes in the intinerary.

B. VESSEL DOCUMENTS: Prior to proceeding past the Delaware Breakwater at Cape Henlopen, the Master of the vessel shall ensure the following documents are valid and can be produced on demand:

1. A Certificate of Financial Responsibility issued by the Federal Maritime Commission.

2. If U.S. Flag, a Certificate of Inspection endorsed for the product(s) carried.

3. If foreign flag, a Letter of Compliance (LOC) for the carriage of the product(s) carried.

a. Vessels not holding a valid LOC shall be boarded by a joint COTP/OCMI inspection party at the Breakwater Anchorage prior to proceeding upriver. The vessel shall be examined in accordance with 46 CFR, part 154. If the examination is satisfactory, the vessel will be permitted to proceed upriver to the facility. Compliance with part C of this chapter will be strictly observed.

C. TRANSIT RESTRICTIONS FOR VESSELS LADEN WITH LNG/LPG CARGO:

1. *Vessel Movement:* Vessel movement will be conducted only with prior approval of the Captain of the Port.

2. *Propulsion and Machinery Status Report:* No vessel may proceed past the Delaware Breakwater unless the Master sends a message to the Captain of the Port within 12 hours before arrival stating that "To the best of my knowledge and belief there are no known casualties to this vessel or its machinery and all cargo handling and gas detection equipment is in proper operating condition". Should any condition be present that precludes the sending of this message, the vessel shall be boarded by the Coast Guard at the Breakwater Anchorage so that a determination can be made as to the vessel's seaworthiness and repairs necessary prior to transiting the river.

3. *Daylight Transits:* LNG/LPG laden vessels may only transit the Delaware Bay/River past Ship John Shoal Light during the hours of daylight and only then if the visibility is two miles or greater. After discharging, a vessel empty of LNG/LPG cargo may depart at any time.

4. *Intra-Harbour Movement:* An LNG/LPG carrier should submit 24 hours' advance notice of intra harbour movement to the Captain of the Port, and in any event, except in case of emergency, at least 2 hours' advance notice must be given.

5. *Radio Guards:* Continuous radio guard must be maintained on Channel 13 (156.65 MHz) and Channel 16 (156.8 MHz) during transit.

6. *Tug Escort:* No LNG/LPG laden vessels shall transit the Delaware River above Ship John Shoal Light without at least one commercial tug escorting.

7. *Coast Guard Escort:* Unless specifically authorised by the Captain of the Port, no vessel may transit the Delaware River above Ship John Shoal Light without a Coast Guard escort vessel.

8. *Meeting and Overtaking:* While transiting the river, the vessel will not overtake river traffic; nor will river traffic be allowed to overtake the vessel. The vessel shall be navigated so as not to meet other vessels at bends in the river channel. During meeting situations, neither vessel shall proceed in such a manner that they will meet at a relative speed greater than 12 knots. Under normal conditions, each vessel should proceed at 6 knots. However, circumstances may require that 1 vessel travel faster than 6 knots. For example, under some tidal current conditions a vessel may find it necessary to proceed up to 8 knots in order to maintain steerage way. In this situation and in any other situation requiring increased speed by one vessel, the second vessel must reduce its speed. In no case should the relative speed exceed 12 knots.

9. *Emergency Situations:* In the event of an emergency situation, the Captain of the Port must be promptly notified of the vessel's position, draft, nature of emergency, time required to restore normal operations and future intentions. The vessel's Master or Agent shall have the authority to immediately enlist commercial assistance in an emergency situation or when the COTP deems that commercial assistance is required to prevent an emergency.

10. *Speed Restriction Under Bridges:* Vessels laden with LNG/LPG cargoes shall not proceed at a speed greater than 6 knots through the water under bridges of the Delaware River when proceeding with the current, nor at a speed greater than 6 knots over the bottom when stemming the current.

D. ANCHORAGE RESTRICTIONS AND REGULATIONS:

1. Transfer of product at anchorage is not permitted except in the event of an emergency such as to warrant, in the opinion of the Captain of the Port, specific authorisation.

2. A live bridge watch shall be maintained by a qualified watch officer. A round of bearings and/or ranges fixing the vessel's position shall be taken hourly followed by a report on the hour to COTP Philadelphia on Channel 16 FM reporting anchor holding and operations normal or any significant change in position or deviation from the norm. In addition to these requirements, during periods of sustained winds in excess of 25 knots, but less than 40 knots, the vessel must maintain the capacity of having engines on line within 30 minutes; if sustained winds are 40 knots or over, the main propulsion plant must be on line.

3. A continuous radio guard shall be maintained on Channel 16 FM while at anchor.

4. Vessels anchored in Mantua and Marcus Hook Anchorages may be required by the Captain of the Port to have tug assistance during the change of tide.

E. VESSEL TRANSFER OPERATIONS: (The Master shall be responsible for compliance with this section): Prior to the commencement of transfer operations, a Coast Guard boarding party will examine the vessel. Cargo transfer shall commence only after satisfactory completion of the inspection and issuance of Coast Guard Form 4260, Permit to Handle Dangerous Cargo.

1. The following is a partial list of items inspected by the Coast Guard boarding party:
   a. Relief valve records and data.
   b. Gas detection system/alarms operation and records.
   c. Remote shutdown operation.
   d. Firefighting equipment.
   e. Boiler burn off system (if installed).
   f. Condition of piping, flanges, expansion joints, relief valves, cargo valves, and gauges.
   g. Intrinsically safe equipment.
   h. Automatic controls.

2. In addition to the above, the inspection party will ensure the following requirements are complied with:

a. Person-in-Charge: The Master shall ensure a licensed officer or qualified supervisor is aboard the vessel throughout the entire cargo discharge/loading operation.

b. Other Vessel Activities: Only such activities as bunkering, loading of stores, repairs i.e., normal ship maintenance and support activities as approved by the Captain of the Port at the pre-arrival conference, will be permitted – under such conditions as stipulated – while vessels are transferring LNG/LPG. No cutting, burning, welding or other hot work is allowed on the vessel without specific approval from the Captain of the Port.

c. Smoking Areas: Smoking areas shall be designated by the Master and posted at the gangway.

d. Bonding: The terminal manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended. The Master shall not commence hookup until this action is taken.

e. Mooring Requirements: The vessel shall, when possible, moor bow to seaward, and be prepared to get underway on short notice. It may be required to have a live tug standing by during operations. A wire rope towing hawser shall be made ready forward, amidships, and aft with the bight at water's edge.

f. Operations During Storms: Cargo transfer operations shall cease if an electric storm occurs and at any time lightning is observed or thunder heard; cargo transfer connections may be maintained.

g. Language Requirements: Ship's supervisory personnel directly involved in supervision of cargo transfer operations must be able to read, speak and understand the English Language.

h. Transfer Connections: Each flange in the overall transfer operation will be secured with all bolts and properly gasketed, or with a Coast Guard approved quick disconnect device.

i. Venting: Venting of boil off vapours is prohibited. LNG vessels must demonstrate the ability to contain or consume boil off vapours for a minimum of 21 days.

j. Fire System: The Master shall ensure the vessel's fire main is linked to the waterfront facility fire fighting system so that the vessel will maintain a firefighting capability, even if its fire pumps are inoperative. The bonding hose shall never be charged unless in use during a fire.

k. Personnel Aboard: A minimum number of personnel to be retained aboard the vessel shall be established during the pre-arrival conference or dockside inspection.

l. Barge Personnel: In operations involving barges. a tankerman possessing an appropriate certificate for the product being handled shall be present during cargo operations.

F. FACILITY OPERATIONS: (The Terminal Manager shall be responsible for compliance with this section).

A pre-arrival conference shall be held in accordance with para A so that the following regulations may be explained and disseminated prior to the initial operation of a facility. Drawings indicating cargo routing from the dock to all storage tanks shall be provided to Coast Guard representatives. A current list of qualified cryogenic supervisors shall be maintained with copies provided to the COTP. The following regulations shall be complied with during all transfer operations.

1. *Facility Security:* All facility/terminal security zone areas are to be posted and restricted to personnel authorised by the terminal manager. Adequate physical security shall be provided, including a guard force to allow on authorised personnel, i.e., those persons who have an official need for presence on the facility, during operations.

2. *Equipment Inspections:* Immediately prior to handling cargo, the shore piping which is to be used in the operation shall be inspected for proper operation of automatic controls, gas detection, and instrumentation. If any of the system contains air, it shall be purged prior to handling the product by an inert gas, in special circumstances, by using low pressure LNG/LPG vapour. Care shall be taken in purging to minimise the volume of flammable mixtures present at *anytime*. Following the purging, piping shall be so cooled as to prevent excessive thermal stress.

3. *Supervisor and Personnel:* A designated cryogenics supervisor shall be in attendance at the waterfront facility in the proximity of and during all cargo operations. During all periods of cargo transfer, the terminal shall have one man on board the vessel and one man at the tank car or storage tank loading stations who shall be able to communicate with each other at all times with intrinsically safe equipment.

4. *Language Requirements:* All shore supervisory personnel directly involved in supervision of cargo operations must be able to readily read, speak and understand the English language.

5. *Smoking:* No smoking shall be permitted except in designated areas determined by the facility operator, subject to the approval of the COTP.

6. *Hot Work:* Hot Work will not be permitted without prior authority of the COTP.

7. *Notification:* The COTP shall be notified one hour in advance of the commencement and termination of the cargo transfer operations at the waterfront facility.

8. *Fire Equipment:* The terminal manager will ensure currently tested and inspected fire hoses are laid out and connected to hydrants in tank car and storage tank loading areas unless otherwise provided with approved, permanently installed facilities. The international shore connection shall be connected in accordance with para. E, Vessel Transfer Operations. Hydrants shall be tested for satisfactory flow prior to connecting hoses. In addition to portable equipment, the offshore mooring area or waterfront facility area shall have any combination of semi-portable dry chemical extinguishers totalling 600 pounds. A fire main water source and spray equipment must be available as well. It will be the terminal manager's responsibility to have his fire marshall and fire equipment present at the connecting and disconnecting stages of the operation.

9. *Lighting:* Adequate shoreside lighting in conformance with the National Electric Code shall be provided.

10. *Hoses:* Each hose used to handle cargo shall have been designed for handling such products and shall be tested at 1 – 1.5 times its maximum allowable working pressure or 250 psi, whichever is greater, prior to commencing the transfer operation.

11. *Vessel Protection:* Vessels moored to existing facilities and marginally to a channel, or when otherwise deemed necessary by the COTP, must be afforded protection through the use of barges or camels. Any such protection shall have specific approval of the COTP.

12. *Inspection of Reception Facilities:* All tank cars, tank trucks, barges and storage tanks shall be inspected prior to loading. Time of their last test shall be verified. Operability of overpressure protection devices shall be verified by a person designated by the terminal manager.

13. *Remote Shutdowns:* Remote cargo shutdowns shall be certified satisfactory by a person designated by the terminal manager.

14. *Transfer Completion:* Upon completion of all cargo transfers, the product line from pier head to tank car and/or storage loading stations in the type of operations where this applies, shall be unloaded into closed containers and not vented into the atmosphere. Where the operation of the LNG/LPG terminal is such that the product will be circulated continuously, it need not be unloaded – thus there will be no delay at the start of each cargo transfer operation while bringing the piping down to

operating temperature, and a resultant reduction in cycling of thermal stresses. However, the unloading arms shall be drained, using nitrogen purge and left in a nitrogen atmosphere with the shipboard end of the unloading arm blanked off until ready for the next transfer operation.

15. *Bonding:* The terminal manager shall ensure the vessel is electrically bonded to the shore ground prior to commencing transfer operations. The connection shall be maintained until transfer operations are secured. An approved connection shall be used for securing, i.e., alligator clamps are not acceptable. "C" clamps would meet minimum requirements, bolted connections are recommended.

DENSITY: Philadelphia ports are fresh-water ports.

GANGWAY/DECK WATCHMEN: These services are left to the discretion of the Master. It is often recommended by ship's P & I club that watchmen be engaged when seamen are detained by U.S. Immigration. Ship is subject to fines by U.S. Government if any detained seaman deserts vessel.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Ship's Register and Load-Line Certificate are mandatory. If vessel is carrying passengers from the U.S. they will require a U.S. Coast Guard Certificate. This can easily be obtained in about 1 or 2 days subject to meeting the requirement for life-saving equipment.

CUSTOMS ALLOWANCES: No set rule. Reasonable amount allowed for personal use.

CARGO GEAR: For exceptionally heavy lifts, Sun Shipbuilding and Dry Dock Co. has a floating derrick with 800 tons lifting capacity.

CONSULS: The following countries are represented in Philadelphia:

- Austria
- Canada
- Colombia
- Costa Rica
- Denmark
- Dominican Republic
- Ecuador
- El Salvador
- Finland
- France
- Germany F.R.
- Great Britain
- Guatemala
- Haiti
- Honduras
- Israel
- Italy
- Japan
- Lesotho
- Mexico
- Monaco
- Netherlands
- Norway
- Panama
- Portugal
- Spain
- Sweden
- Switzerland
- Venezuela

REPAIRS: All types of ship repairs can be effected.

SURVEYORS: American Bureau of Shipping, Tel: WA 5-2693 (after hours: 896-7586).
Caleb Brett, Tel: 521-1725.
National Cargo Bureau, Tel: WA 5-3546.
W. Saybolt, Tel: 727-1050.
Bureau Veritas, Tel: KI 3-5884.

Hueber Launch Service. Tel: (215) 872-3544, (215) 425-3155.

GENERAL: If garbage removal is required while in port, it must be done under supervision of the plant quarantine service.

DEVELOPMENTS: Cibro to build coal terminal at Port Richmond.

AUTHORITY: Philadelphia Port Corporation, 1020 Public Ledger Building, 6th and Chestnut Streets, Philadelphia, Pennsylvania 19106. *Tel:* (215) 928 – 9100. *Telex:* WUT 834 – 652.

AGENT: Rice, Unruh Co., 232 South Fourth Street, Philadelphia, Pennsylvania 19106. Tel: 215-629-1711 (11 lines) (Note: Answering service in attendance outside normal working hours). Telex: TWX 710-670-0171, TWX 710-670-0172. "Riceunruh Ph". Cables: "Riceunruh Philadelphia".

PINEY POINT, Maryland: 38.08 N. 76.32 W.

(See Plan Book)

Steuart Petroleum Company Terminal on East bank of Potomac River, 82 miles from sea.

DOCUMENTS/PILOTAGE: Refer to "Baltimore".

ANCHORAGE: Unlimited, available in Chesapeake Bay.

RESTRICTIONS: Berthing 24 hours a day with max. draft of 37 ft. Vessels exceeding 725 ft. or 36 ft. draft, 2 tugs required docking and 1 sailing. Vessels under, 1 tug docking, none sailing.

MAX. SIZE: Limited by depth at berth, 37 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: WMH Baltimore Radio. VHF channel 26.

TUGS: 2 tugs available for berthing, join vessel off berth. Tugs despatched from Baltimore.

BERTHING: 1 tanker berth only operated by Steuart Petroleum Company. Long lines required for first ashore.

FRESH WATER: Available at berth.

FUEL: Bunker "C" only, available at berth.

AIRPORT: Washington National (80 miles) or Baltimore-Washington (100 miles).

TIME: GMT minus 6 hours.

SHORE LEAVE: Allowed.

GENERAL: Nearest city with full services is Washington, 65 miles distance and Baltimore 110 miles.

AUTHORITY: Maryland Ports Administration, The World Trade Centre Baltimore, Baltimore, Maryland 21202.
Operator: Steuart Petroleum Co., Piney Point, Maryland 20674.

PORT ADAMS, Texas: 29.45 N. 95.11 W.

Refer to "Houston" for all general information.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

PORT ANGELES, Washington: 48.08 N. 123.25 W.

(See Plan Book)

DOCUMENTS, etc.: Refer to "Tacoma".

PILOTAGE: Compulsory for all vessels except those in coasting trade. Pilot station at Ediz Hook serves all vessels bound for Puget Sound ports. Pilot boards off Port Angeles.

APPROACHES: Depth at entrance 100 ft. – 160 ft. No bar.

ANCHORAGE: In harbour, depth at least 42 ft. MLLW.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available from Foss Launch and Tug Co.

BERTHING: 3 pier berths and 2 dolphin berths, depth up to 45 ft. MLLW. One electric gantry crane, capacity 5 tons. Forklifts with capacity to 10 tons.

STEVEDORES: 8 local gangs, additional gangs may be imported if required.

MEDICAL: All medical facilities available. Local hospital.

DENSITY: Salt water.

FRESH WATER: Available at all wharves.

FUEL: Barge delivery only.

REPAIRS: Minor repairs only.

HOLIDAYS: See "Tacoma".

GANGWAY/DECK WATCHMEN: Required only if detainees aboard.

CUSTOMS ALLOWANCES: No definite quantities specified; reasonable allowance at discretion of Custom's Inspector.

AIRPORT: William R. Fairchild International Airport 3.5 miles from the harbour.

AUTHORITY: Port of Port Angeles, P.O.Box 1350, Port Angeles, Washington 98362. *Tel:* (206) 457-8527. *Telex:* 469230. *Contact:* D. G. Hendricks, Executive Director.

PORT ARTHUR, Texas: 29.52 N. 93.56 W.

(See Plan Book)

DOCUMENTS:

Entrance Direct from a Foreign Port:
Master's Oath on entry on vessel in Foreign trade, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).
Ship's Stores Declaration, Customs Form 1303 (2 copies).
Crew Effects Declaration, Customs Form 1304 (2 copies).
Clearance from last Port.
Inward Foreign Manifest, Customs Form 1302 (2 copies)
Passenger/Crew List. Form I-418 (3 copies).

In event import cargo is onboard, an additional copy of each of the above Forms is required for travelling Manifest. A copy of the Manifest for each port is also required.

Entrance from Domestic Port:
Clearance from Last Port.
Crew Effect Declaration, Customs Form 1304 (2 copies).
Stores List, Customs Form 1303 (2 copies).
Crew List, Customs Form I-418 (2 copies).
Master's Oath, Customs Form 1300 (2 copies).
General Declaration, Customs Form 1301 (2 copies).

RADIO: For a vessel in the Gulf of Mexico, and en route to Port Arthur, the best way to route an ETA message is to radio "Port Arthur Radio" (Radio Marine Corporation of America) whose call sign is WPA. Port Arthur Radio will then either send the message through Western Union via its telefax machine or via telex if the receiver of the message has a telex machine. There are also radio stations located in Galveston, Texas (Mackay Radio, call sign KLC) and in Mobile, Alabama (call sign WLO).

PILOTAGE: Come up in vicinity of the sea buoy. 24 hours notice of ETA should be given and revised if ship is delayed 1 hour or more. Telegraphic address is "Sabine Pilots, Port Arthur, Texas". Pilot station keeps 24 hour continuous watch on VHF Channel 12 – 156.6 MHz and on 2738 kHz. Pilot boat is motor vessel with black hull, white housing flying Pilot insignia by day and Pilot light by night. Location of Pilot boat is in general vicinity of Sabine Pass sea buoy. Pilot ladder only on lee side of vessel.

Pilot will, upon request and at extra cost, board incoming vessels at buoy marked "SB" in position Lat. 29° 25′ N., Long. 93° 40′ W.

RESTRICTIONS: The Port Arthur ship channel is in operation 24 hours per day. The only restrictions that might hamper vessel traffic would be the draft of the vessel (Port will be able to handle vessels taking up to 40 ft. of water) or extremely bad weather conditions such as fog or high winds. Also, vessels of the 85,000 ton or more class can only be moved during daylight hours.

MAX. SIZE: Port Arthur ship channel will be authorised to 40 ft. in depth and will vary from 400 to 800 ft. in width. Turning basin, which is located at mile 19 (only about 0.5 miles upstream from existing port facility) is 900 ft. in width. Bulk carriers going to grain elevator at Port Arthur or to one of the oil refineries would only be restricted by draft which would vary from 30 ft. to 40 ft. depending on load/discharge berth the vessel is en route to. See "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: The exact position that the tug meets the vessel varies with each vessel but usually they meet just below Texaco Island. In some cases they meet as far up as Great Lakes Carbon (usually when vessel is in ballast and going to Gulf Oil Docks). Whether or not the tug uses the vessel's lines or its own lines depends entirely on the circumstances involved but the tugs usually use the ships lines. Port Arthur is served by 2 towing companies, (1) Moran Towing of Texas and (2) Sabine Towing & Transportation Company, Inc.

VHF: Pilot office on Channel 20. Pilot boat on Channels 12, 13, 16 and 65A.

BERTHING: The first procedure for obtaining a berth at Port Arthur is to submit a Berth Request Form. The Berth Request will contain the following information and will be submitted, in duplicate, to P.O. Box 1428, Port Arthur, Texas: Date of request; type and name of vessel; loading ports; registry or flag; where vessel is to arrive from; ETA; where vessel is to sail for; estimated date of departure; what inbound cargo, if any, consists of; what outbound cargo, if any, consists of; date you expect to begin receiving outbound cargo. The Form must be signed by the Agent or Owner of the vessel. (Berth Request Form will be made available by the Port.) Upon receipt of a Berth Request from the Agent or Owner, the Port will then, upon determining availability of berth, return one copy of the initial Berth Request to the Owner or Agent as an assignment of berth. Berths are assigned on a first come first served basis at all times. All changes in vessel's ETA must be given to the Terminal Office immediately. All mooring and unmooring will be done by the Port. Procedure may differ at the various private terminals which are not under the jurisdiction of the Port Arthur Navigation District.

Also see "Developments".

BULK HANDLING FACILITIES: *Texas Oklahoma Port Company:* Bulk Marine Terminal in the Port's deepwater industrial park is located at Mile 26, handles dry bulk commodities from rail cars to storage to vessels at rates up to 3,000 t.p.h. and has space available for shipper storage tanks on pads, with open storage for 300,000 tons. The terminal also includes a 750 ft. wharf and is located directly on the Sabine-Neches Waterway which presently offers an authorized channel depth of 40 ft. All terminals described above are served by subject waterway and limitations of depth will vary at the face of dock at individual terminals. The Texas-Oklahoma Bulk Terminal maintains 40 ft. depth at the face of their facility.

Great Lakes Carbon Co.: Length of berth 300 m. Max. LOA 210 m. Max. draft 10.5 m. 2 loaders with total loading capacity 500 tonnes/p.h. Petroleum, coke and coal handled.

CRANES: 1×75 ton Diesel electrical crane services berths No. 1 – 3.

BRIDGES: There are no bridges that would require a vessel to arrive at any certain time at Port Arthur, however, the first bridge approached involves a vertical clearance of 136 ft. MHW.

STEVEDORES: Advance order for longshore gangs varies as to contract held by ILA (International Longshoremen's Association). In Port Arthur, gangs have to be ordered as follows: Order by 1900 hrs. for the next morning (either 0700 or 0800 hrs.); order by 1100 hrs. for 1300 hrs.; order by 1600 hrs. for 1900 hrs. Must order by 1900 hrs. day before for any starting time Sunday or Holiday.

MEDICAL: It is not usually required that the Agent be given advanced notice of required medical attention but in some instances it is helpful in arranging transportation to a hospital and in obtaining a bed in the event the hospitals are near full. Port Arthur is served by 2 hospitals; (1) St. Mary's Hospital and (2) Park Place Hospital, both of which are very well staffed and have adequate facilities for almost any emergency. Also, advance notice is helpful when vessel is scheduled to dock late in evening or during night, as doctors are not in their offices and have to be located.

Particular inoculations required by the Public Health Department vary as to the vessel's last foreign port of call. Any crew members who have not had the required inoculations can usually be given these inoculations on board either by the Public Health Officer or a Physician. This is usually arranged by the Agent or Owner.

DENSITY: Varies from fresh water (1000) to pure salt water (1025) depending on amount of rainfall and tide variations. According to figures obtained from the National Cargo Bureau, average density is 50% salt water or (1012.5).

FRESH WATER: The Port has 4 ships service outlets for fresh water, each of which is served by a 4 in. water line. Watering barges are available in the area for facilities which are not equipped to provide watering services.

TANKERS: There are 3 major Oil Companies: Gulf Oil Corporation; Texaco Oil Company, Inc.; and Petrofina Company. Gulf Oil Corporation and Texaco Oil Co., Inc. are 2 of the largest oil refineries in the country. The diameter of load/discharge lines range anywhere from 4 in. to 12 in. depending on the grade of the petroleum product being loaded. As far as slop discharge facilities are concerned, ballast tanks at all major oil companies. Gulf Oil has 3,400 linear feet of berth accommodations and Texaco Oil Co. has 5,299 linear feet of berth accommodations together enough to accommodate 11 supertankers plus barges. Petrofina Co., being the smaller of the 3 oil companies, has berth accommodations for 3 vessels.

FUEL: Almost any grade of fuel or marine diesel is available. In some instances there are fuel lines running directly to docks, but if not, bunkering barge is available. An advance notice is usually required by bunkering barge depending on number of vessels awaiting bunkering.

FIRE PRECAUTIONS: The Port has, in each of 4 equally spaced indentations along the front of its transit shed, a fire hose outlet fed by an 8 in. water line and there are numerous fire hose boxes throughout the transit shed. In addition to this a 24 hour guard service is constantly on the watch and is in direct communication with the Port Arthur Fire Department which is only seconds away. Authorized on-dock smoking areas are clearly defined for proper safety controls.

GANGWAY/DECK WATCHMEN: Under normal conditions a watchman is not necessary on most vessels. Under certain conditions such as a communicable disease or a malafide crewman a watchman would be feasible but the decision is left up to Master or owner of the vessel. There is a $1,000 fine if a malafide crewman disembarks from the vessel.

OPENING/CLOSING HATCHES: Paragraph 2, Rule No. 1 of the Deep Sea Longshore and Cotton Agreement for Texas ports and Port of Lake Charles, Louisiana, states as follows: "When vessel is in loading or unloading berth, loading and laying of dunnage and the opening and closing of hatches, when in connection with the handling of general cargo and/or cotton, is longshore work and will not be done by ship's crew." This agreement, however expired in 1978.

CUSTOMS ALLOWANCES: Tobacco: Each crewman is allowed to keep 300 cigarettes out of bond while in port. Wine and/or Spirits; Each crewman is allowed to keep 1 quart of spirits out of bond while in port.

CARGO GEAR: A current certified Gear Certificate is required to be on board at all times and is to be kept up to date.

IDENTIFICATION CARDS: American crewman do not need any identification card. Foreign crewman need only the landing permit from Immigration Department in order to go ashore.

CONSULS: The nearest Consul-Generals are in Houston, Texas. Port Arthur has only 2 honorary Vice-Consuls, which are: Norwegian and Spanish. Houston is approximately 90 miles from Port Arthur.

REPAIRS: All types of deck and engine repairs can be accomplished. Main ship repairers are: Gulfport Shipbuilding Corp., Burton Ship Yards, Inc., Sabine Propeller Company and Sabine Neches Shipbuilding Corporation, Coastal Marine Service, all of which are located in Port Arthur.

SURVEYORS: American Bureau of Shipping, Goodhue Building, Beaumont, Texas.

Captain Van. Inc., 550 Fifth Street, Port Arthur, Texas 77640. Tel: (713) 982-2911

E.W. McCarthy & Associates, 3912 Lakeshore Dr., Port Arthur, Texas 77640. Tel: (713) 985-5467

National Cargo Bureau, 821 Petroleum Bldg., Beaumont, Texas 77701. Tel: (713) 839-4581

Sabine Surveyors. Inc., 6477 39th Street, Groves. Texas 77619. Tel: (713) 962-3500

Soutex Surveyors, Inc., 3727 Doctors Drive, Port Arthur, Texas 77640. Tel: (713) 983-2004

Triangle Marine, Inc., 8700 Ninth Avenue, Port Arthur, Texas 77640. Tel: (713) 722-1922

Underhill Adjustment Agency, 1335 Proctor Street, Port Arthur, Texas 77640. Tel: (713) 985-9329

World Marine Associates, Inc., 580 Fannin, Suite 718, Beaumont, Texas 77701. Tel: (713) 838-9980.

DRY DOCKS: 2 dry docks, largest being Gulfport Shipbuilding Co., which occupies 50 acres with 3,300 ft. of frontage on The Port Arthur Ship Channel. Yard designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops and 4 floating dry docks with lifting capacities of 500, 1,800, 4,000 and 4,200 tons. The smaller dry dock is Burton Shipyards, Inc., which occupies 60 acres with 3,200 linear ft. of frontage on Port Arthur Ship Channel. This yard also designs, constructs and repairs barges, tugs and other vessels. It has fully equipped shops, 2 marine railways with haul-out capacities of 1,000 and 1,500 tons and 1 floating dry dock of 3,000 ton capacity.

REPATRIATION: There are facilities for effecting crew changes and repatriation.

AIRPORT: Port Arthur is served by Mid-Jefferson County Airport which is located approximately 10 miles North of Port Arthur on Highway 69. The Mid-Jefferson County Airport is served by TIA (Texas International Airlines) and Delta Airlines.

TIME: Central Standard Time during Winter. Beginning April 28th until October 27th Central Daylight Time (clocks are moved ahead 1 hour). Central Standard Time is GMT minus 6 hours.

SHORE LEAVE: The question of whether shore leave is allowed is entirely up to the ship's Master. The only requirements being; each crewman on shore leave must have a landing permit issued by the Immigration Department and no malafide crewman may be granted shore leave. Port Arthur has no restrictions pertaining to shore leave.

POLICE/AMBULANCE/FIRE: Police Department 983 – 5101; Fire Department 985 – 5511; Ambulance Service 985 – 5504 or 983 – 5666.

EMERGENCY CO-ORDINATION CENTRE: Coast Guard Captain of the Port, Federal Building, Port Arthur, Texas 77640. Tel: (713) 983-8278.

TELEPHONES: Facilities for placing a telephone on a vessel by request. There is a coin-operated telephone on the dock for anyone's use.

SERVICES: Tank cleaning done in port must be done by longshore labour. All major oil companies have facilities for removing tank washings.

HOLIDAYS: Longshore Holidays are: Columbus Day (Second Monday in Oct.), Veterans Day (Nov. 13th), Thanksgiving Day (Fourth Thursday in Nov.), Christmas Day (Dec. 25th), New Year's Day (Jan. 1st), Martin Luther King's Birthday (Jan. 15th), Lincoln's Birthday (Feb. 12th), Washington's Birthday (Third Monday in Feb.), Texas Independence Day (March 2nd), Good Friday, Memorial Day (Last Monday in May), June 19th, July 4th, Labour Day (First Monday in September). At Lake Charles, LA., Mardi Gras Day to be substituted for Texas Independence Day. No work shall be performed on Labour Day or Christmas Day, except in case of fire or where property is in danger.

When holidays come on Saturday or Sunday, the following Monday to be recognized as the holiday. No work to be performed between 1600 hrs. and 1900 hrs. on election days. When Christmas falls on Saturday or Sunday, Monday will be an overtime day and gangs will work as ordered.

BANKS: Allied Merchants Bank, 441 Austin Avenue, Port Arthur, Texas 77640. Tel: (713) 985-8851.

First Bank & Trust, 4000 Twin City Highway, Groves, Texas 77619. Tel: (713) 963-1141.

First National Bank of Port Arthur, 700 Procter Street, Port Arthur, Texas 77640. Tel: (713) 983-5601.

Sabine Bank, 3723 Gulfway Drive, Port Arthur, Texas 77640. Tel: (713) 982-5741.

STORING: See "Prelims", page viii.

1. Vessels are generally stored by truck in the area but barge storing does occur on rare occasions.
2. There are no specific regulations covering barge storing while vessel is working other than what the individual terminal may deem proper.
3. Trucks normally deliver at shipside at the Ports' facilities but this will vary from terminal to terminal.
4. Fork lift trucks are never used on the jetty to handle stores.
5. None other than Bonded Warehouse products.
6. Can but are seldom used. Generally handled by ships crew or other less costly labour that is available in the area.

DELAYS: Delays in berthing usually arise from vessels ETA being delayed and thereby causing a berth conflict. The port is on a first come, first serve basis.

GENERAL: On vessels arriving directly from a foreign port there are 3 Government Agency Representatives that must board. Already mentioned and explained are Customs and Immigrations. The remaining one, Animal and Plant Inspection Services. The Meat Quarantine representative boards the vessel to seal up all meat with the exception of what will be needed while in port. In the event a vessel is detained in port for some reason and more meat is needed the Meat Quarantine Rep. must return to the vessel and personally break the seal and then re-seal the remaining meats. This representative boards all vessels entering the port whether from foreign or coastwise.

The Plant Quarantine Rep. boards all vessels entering from a foreign port to check all fresh fruits and vegetables for any foreign insects such as the Khapra Beetle.

NOTICE:

Notice from U.S. Coast Guard (dated May, 1983).

Liquified Gas Vessels.

This is to clarify U.S. Coast Guard policy regarding liquified gas vessels operating in the Calcasieu waterway that seems to be causing some confusion. Synopsis of each is as follows:

(1) The Captain of the Port (COTP), Port Arthur, Texas, needs to be informed of the arrivals and departures of all liquified gas vessels, whether loaded or in ballast, a minimum of 4 hours advance notice is required to ensure that a Notice to Mariners is broadcast. The vessel is reminded to have a Calcasieu River Pilot's confirmation of movements prior to notifying the COTP at (409) 724-4330.

(2) The COTP has determined that it is an unsafe practice to bunker a loaded or partially loaded liquified gas vessel at anchor from a barge alongside. If you have a loaded vessel arriving that needs bunkering, make your arrangements so that the vessel is offloaded prior to bunkering. If an empty vessel arrives, make arrangements to have the vessel bunkered prior to loading.

If there are any questions concerning these guidelines, please contact Port Arthur (Tel: (409) 724-4337 or 724-4339) or Lake Charles, La (Tel: (318) 433-3765).

Signed: Captain, U.S. Coast Guard, Capt. of the Port, Port Arthur, Texas.

DEVELOPMENTS: Located only 19 miles from sea, the new Public Ocean Terminal of the Port is located on the Sabine-Neches Waterway, presently 40 ft. deep with a minimum bottom width of 400 ft. The initial facility encompasses 360,000 sq.ft. including 1 transit shed 180 ft. × 600 ft. or 108,000 sq.ft. Rail trackage totals 120 car-spots at dockside with a 150-car storage yard behind the wharves. The facility includes a Gantry Crane (handling dry bulk, magnet, container and heavy lift cargoes) which straddles 2 of the 3 marginal tracks, travelling the entire 1,200 ft. length of dock. Crane will lift 75 tons a distance of 75 ft. off the face of docks, with all areas brilliantly lighted for 24 hour cargo operations. In addition to the 25 acre facilities described above, the District owns a total of 73 acres or 1 mile of frontage for future development. The master plan calls for a total of 4 Transit Sheds, additional open-dock wharves and Roll-on/Roll-off facilities.

AUTHORITY: Port of Port Arthur Navigation District of Jefferson County, Texas, 430 Austin Avenue, P.O. Box 1428, Port Arthur, Texas 77640. *Tel:* (713) 983-2011. *Telex:* 779-421. *Contact:* Dow Wynn, Port Director.

PORT CANAVERAL, Florida: 28.25 N. 80.35 W.

(See Plan Book)

DOCUMENTS: Vessels arriving in the Customs Territory of the United States, Bureau of Customs Documentary Requirements:

1. The vessel's Register, Load-line International Certificate, Tonnage Tax Certificates, Clearance from last Foreign Port, and Certificate of Financial Responsibility (Oil Pollution).

2. Additional Documents required:

(a) Original Manifest (lists) of:
All Cargo on Board – Customs Form 1302.
All Passengers on Board.
Stores List.
Crew Purchase List.
Crew List.
Narcotic List.

(b) All items listed in Nos. 1 and 2 *(a)* must be presented to the boarding Customs Inspector and later at the Customhouse for entry. In addition a Customs Form 1300 (Master's Oath) and Customs Form 1301 (General Declaration) must be presented at the Customhouse.

(c) Duplicate Manifest (lists) of:
1. All Cargo for discharge at this port.
2. All Passengers for discharge at this port.
3. Stores List.
4. Crew Purchase List.
5. Crew List.
6. Narcotic List.
7. CF3171 – Permit to Lade or Unlade (this will usually be furnished by the vessel's Agent prior to the arrival of the vessel).

(d) If vessel is proceeding coastwise from Port Canaveral with residue foreign cargo on board, prepare a Traveling Manifest which is a true copy of everything listed in the Original Manifest (2*(a)*). This must be presented to the boarding Customs Inspector and later at the Customhouse.

3. Other Documentary requirements: The Immigration Officer will require the original certificate crew list on Form I-418. The same for passengers. He will also require the presentation of all passports and documents of seamen and passengers as to their immigration status for entry into the United States. A supply of Seaman's Landing Permit Form No. I-95A and passenger Permit No. I-94 should be maintained and they should be typed and ready for landing.

The Immigration Officer will want to inspect the entire crew. The Customs and Agriculture Officers will want to inspect the food storage areas and the quarters of the crew. The Agriculture Officer will also require a stores list. The Customs Officer will place a seal on the Bonded Stores Locker.

PILOTAGE: Pilotage is compulsory for all foreign vessels and for United States vessels under register in the foreign trade. Pilotage is optional for United States coastwise vessels who have on board a Pilot licensed by the Federal Government. Vessel applies for Pilot through Agent or Port Authority. May also call Pilot Office direct, 305 – 783 – 4645. Pilot will board at Buoys 7 and 8 (Lat. 28° 23.8′ N., Long. 80° 33.4′ W.). Pilot boat is 37 ft. long with black hull, white house and buff deck, has "Pilot" painted on sides. Standard day/night pilot signals are displayed. Pilot boat stations itself 1 mile S.E. of Buoys 7 and 8, 0.5 hour before ETA of vessel. Vessels may anchor anywhere in area. Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz), but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given.

ANCHORAGES: Within the harbour itself, none. Vessels may anchor anywhere in the area of the Pilot Station, Buoys 7 and 8.

RESTRICTIONS: Docking and undocking carried on day and night. Draft restrictions – if draft exceeds 34.6 ft. vessel must await rising tide to enter port.

MAX. SIZE: Length and draft at Tanker Berth No. 1 and No. 2, 600 ft., with 35 ft. draft. Cargo dock, length unlimited – 35 ft. draft.

HEALTH: See "Health: All Ports" before first U.S.A. ports (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Pilot boat is equipped with VHF Channels 12 (156.60 MHz) and 16 (156.80 MHz) but no continuous radio watch is maintained. Advance notice of at least 24 hours should be given. Best to route ETA cables through Western Union Telegraph. Port Canaveral is equipped with VHF Port Operations frequency 156.6

TUGS: There are 2×1,800 h.p. tugs at Port Canaveral; most ships use the tugs for docking and undocking. Tugs normally join vessel inside jetties and tugs lines are used.

BERTHING: All vessels unless prevented by conditions will be turned around upon entering turning basin and will be berthed headed seaward. No berthing permitted without Port Pilot aboard.

Northside:

Cruise terminal No. 1: 35 ft. draft, cruise ships, water available.

N-2: 35 ft. draft, bulk cement, general cargo, water available.

N-3: 35 ft. draft, general cargo, scrap, water available.

Southside:

East Marginal Wharf: 660 ft. length, 35 ft. draft, general cargo, bunkers, water available.

West Marginal Wharf: 440 ft. length, 35 ft. draft, general cargo, bunkers, water available.

Ro/Ro Ramp No. 1: 30 ft. width, el. + 3 ft. MLW.

Tanker Berth No. 1: Dolphin Type, 35 ft. draft, petroleum products, cement, bunkers, water available.

Tanker Berth No. 2: Dolphin type, 35 ft. draft, petroleum products.

Cruise Terminals Nos. 2 & 3: Combined length 1,200 ft.

Also see "Tankers".

STEVEDORES: Important vessel gives accurate ETA at least 24 hours in advance to enable Agent to order gangs.

MEDICAL: Advance notice for Agents not required, but if available is appreciated. No Public Health Clinic in area, but there are good hospital facilities available. A contract physician's office of the U.S. Public Health Service is in Cocoa Beach, just South of the port.

TANKERS: Tanker Berth Nos. 1 and 2 available at present for discharge operations, with 35 ft. draft limit. No oil to be pumped overboard. Heavy fines imposed for oil pollution, however slight. The ship or ship's Agent will immediately report any spillage of oil on the wharf or on the water and the extent of the spill to the Port Manager and the Harbour Master. If spillage is considerable all cargo operations must stop and vessel prepare to undock.

FRESH WATER: All wharves have facilities for supplying fresh water, delivered by 4 in. water line.

FUEL: The general cargo wharf and Tanker Berth No. 1 have facilities for supplying fuel. 24 hours' notice requested. Fuelling by truck available at other berths.

FIRE: Ships discovering fire on board or close by on shore will sound repeated long whistle blast signals and use every other available means to report the fire.

Gasoline Tankers: All deck scuppers must be plugged before starting to discharge cargo. Supply of sand or sawdust must be on hand near the discharge headers. Static cable must be connected to wharf. Minimum 100 lb. pressure must be on water main and fire hose connected. Discharging must be stopped during severe lightning. Deck Officers must keep close check on hose connections for gasket leaks. Emergency Ship Movement Policy of Port Canaveral must be observed.

GANGWAY/DECK WATCHMEN: Not usually employed, this service left to discretion of Master.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES:
Ship's Register.
Load Line Certificate.
Tonnage Tax Certificate.
Derat Certificate or Derat Exemption Certificate.

CUSTOMS ALLOWANCES: 300 cigarettes per crew member. Wine and/or spirits: 1 quart per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: None – nearest port would be Jacksonville.

SURVEYORS: Surveyors are available on request.

REPATRIATION: All facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Two airports available, serviced by regular airlines, Orlando International Airport, Orlando, Florida, approximately 50 miles from the Port, Melbourne Regional Airport at Melbourne, Florida, approximately 35 miles from Port. Also Ti-Co Airport approximately 25 miles from the Port, but this airport has only limited service.

TIME: GMT minus 5 hours normal, GMT minus 4 hours Daylight Saving Time.

HOLIDAYS: Numerous holidays do not effect operation of port, which operates 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Police/Fire, Tel. 783 – 7800; Ambulance, Tel. 452 – 1444.

EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard Station, Port Canaveral. Tel: (305) 853-7601.

TELEPHONES: Arrangements are not available for placing on board.

GENERAL: All vessels, civilian and military, will provide wire ropes from the bow and stern with eyes that can be reached by tugs coming alongside. Pilots will make sure wires are in proper position before leaving vessel. All vessels will undock and proceed to outer anchorage when so ordered by Port Manager and/or Harbour Master in the event of: *(a)* a severe oil spillage; *(b)* fire is discovered on board a vessel laden with petroleum, explosives or a quantity of dangerous cargo; *(c)* vessel is in jeopardy due to conditions on shore. Emergency movement of ships will be made with an able sea watch without awaiting for return of other ships personnel.

SHORE LEAVE: Crew allowed ashore.

BANKS: The American Bank, 326 E. Merritt Island Causeway, Merritt Island, Florida.

Barnett Bank, 430 Brevard Avenue, Cocoa, Florida.

The First Bankers of Florida, N.A., 111 George King Boulevard, Port Canaveral, Florida 32920.

The First National Bank of Brevard, 15 E. Merritt Island Causeway, Merritt Island, Florida.

United National Bank, 82 N. Atlantic Avenue, Cocoa Beach, Florida 32931.

Numerous other banks are available in this area.

STORING: See "Prelims", page viii.
1. Vessels stored by truck only.
2. N/A.
3. Yes.
4. No.
5. Usual.
6. Yes, if required.

SHIP SUPPLY SERVICE: No ship supply services operate at the port.

In times of emergency, launch or tug service could be arranged through the Port Authority, and helicopter evacuation provided through the United States Coast Guard.

REGULATIONS: All radio frequency radiations from ships in Port Canaveral must be scheduled to prevent any possible interference to missile tests conducted on the Cape Canaveral Missile Test Annex. The only exception is standard ship/shore HF harbour control frequencies. Vessels desiring to radiate will request permission from the Port Manager and/or Harbour Master.

DEVELOPMENTS: Beginning in 1984, to meet the future shipping needs of Central Florida, Port Canaveral will embark upon an expansion programme which will effectively triple the deepwater berth capacity. The Western Turning Basin Project includes additional Ro/Ro berths, general cargo wharves, passenger terminals, increased warehousing, storage and marshalling areas.

Facts:
16 berths to be constructed over 10 years.
Accommodation for container, Ro/Ro, passenger and general cargo operations.
Land and pier areas for container operations.
Basin designed for maximum ship manoeuvrability.
800 ft. floating dry dock in planning stages.
West Basin and connecting channel dredged to 31 ft. MLW.

AUTHORITY: Canaveral Port Authority, P.O.Box 267, Cape Canaveral, Florida 32920. *Tel:* (305) 783-7831. *Contact:* Charles M. Rowland, Port Director.

PORT EVERGLADES (including Fort Lauderdale), Florida: 26.05 N. 80.05 W. (See Plan Book)

DOCUMENTS:
3 copies Cargo Manifest (Form 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (Curio list).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).

Customs Boarding Officer will also examine Ship's Register and Loadline Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.

PILOTAGE: Pilot boards at Port Everglades sea buoy, located Lat. 26° 05′ 30″ N., Long. 80° 04′ 45″ W. Pilot available 24 hours a day.

ANCHORAGE: The prescribed anchorage area at Port Everglades is outside the harbour and North of the channel. Vessels desiring to anchor off harbour of Port Everglades are required to do so in this area to avoid possible damage to cables laid on ocean floor South of the channel.

South of the channel, immediately offshore, there is a Government Restricted Area.

North of the channel, immediately offshore, there is a spoil bank visible at low water.

RESTRICTIONS: Entrance to Port Everglades is by a straight channel running in a due Westerly direction for a distance of 1.7 miles from the 50 ft. contour of the ocean to the turning basin. The channel is 500 ft. wide to turning basin. The water depth is 42 ft. including the turning basin. All depths are at Mean Low Water.

BASIN: The main turning basin is 1,200 ft. East and West and 2,450 ft. North and South with a depth of 42 ft. The North extension of turning basin is 620 ft. wide East and West on the North limits and 900 ft. wide East and West on the South limits and 1,150 ft. North and South, with a depth of 31 ft. The South extension of turning basin is 1,300 ft. wide East and West by 1,300 ft. North and South, with a depth of 37 ft. All depths are at Mean Low Water.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: The following radio channels are available to communicate with facilities at Port Everglades:
Ship calling and safety: Channel 16, 156.8 MHz.
Harbour Master and operations: Channel 14, 156.7 MHz.; 7A, 156.35 MHz.; 18A; 156.9 MHz.
Port Everglades Bar Pilot: Channels 16, 13, 14, 18A, 19A, 77.
Port Everglades Towing Co.: Channels 16, 13, 77.

TUGS: 3 tugs available to assist berthing with up to 4,200 h.p. Available 24 hours a day.

BERTHING:

Berth	*Length in feet*	*31 ft. depth*	*37 ft. depth*	*38 ft. depth*	*42 ft. depth*
1 – 2 – 3	1,601	1,300	301		
4	900				900

11	500		500		
12 – 13	1,225		1,225		
14 – 15	1,225		1,225		
16 – 17 – 18	1,648		1,648		
19 – 20	1,300		1,300		
21 – 22			1,325		
23	240			240	
24 – 25	1,369			1,369	
26 – 27	1,337			1,337	

Ro-Ro facilities at Berth Nos. 4 and 5.

CRANES: Paceco, modified A and Kone modified A, 30 long ton container cranes located at berths 16, 17 and 18 adjacent to marshalling facility. Up to 260 ton mobile cranes available for hire.

STEVEDORES: These services are provided by licensed stevedoring firms. Arranged by Agent.

FRESH WATER: Available.

FUEL: Fuel oil and diesel oil available.

REPAIRS: Shipyard equipped with a 350 ft. Syncrolift dry dock with a capacity of 4,200 tons, 1×1,000 ton floating dry dock, complete machine-shop and all supporting facilities.
IDENTIFICATION CARDS: Standard U.S. Immigration Form I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95 if issued for the same vessel.
CUSTOMS ALLOWANCE: At the discretion of Customs officers. Normal allowance is 200 cigarettes or 2 lb. tobacco and 1 quart wine or spirits per man. Additional allowances may be given if considered necessary, due to length of vessel's stay in port.
HOLIDAYS: New Year's Day (January 1st); Martin Luther King's Birthday (January 15th); Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday; Memorial Day (May 30th); Independence Day (July 4th); Labour Day; Columbus Day (October 12th); Veteran's Day (November 11th); Thanksgiving Day; Christmas Day (December 25th).

When any of the above holidays fall on a Sunday, they will be observed on the Monday following. Work on these holidays is by special arrangement only.
TIME: Eastern Standard Time, GMT minus 5 hours. Daylight saving time, GMT minus 4 hours, from April to October.
DEVELOPMENTS: Berth No. 29 under construction.
AUTHORITY: Port Everglades Authority, P.O.Box 13136, Fort Lauderdale, Florida 33316. *Tel:* (305) 523 – 3404. *Telex:* 514 – 462. *Cables:* Portglades. *Contact:* J. J. Connolly, Port Director.
AGENT: Strachan Shipping Company, P.O.Box 13131, Port Everglades, Florida 33316. Tel: 305-523-6563. Telex II: 510-955-9861. Cables: "Strachan".

PORT HURON, Michigan: 42.59 N. 82.26 W.

Refer to St. Lawrence Seaway for important general information.
PILOTAGE: Compulsory, by Seaway Pilots.
ANCHORAGES: Near head of St. Clair River at Sarnia. Vessels should anchor as close to shore as safely possible to keep channel clear for passing vessels.
RESTRICTIONS: Navigation season from mid-March to end-December approx. Dock channel depth – 25 ft. Vessel's size restricted by Seaway locks.
MAX. SIZE: 730 ft. length; 26 ft. draft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Master must give at least 24 hours notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours notice of ETA at first U.S. discharge port is required. Port can be contacted through Marine Operator, Sarnia.
TUGS: Available. Not compulsory, but sometimes necessary in bad weather.
BERTHING: Port Terminal Co. Dock: 700 ft. long 26 ft. – 31 ft. depth.
DENSITY: Fresh water.
MEDICAL: All facilities available.
FRESH WATER: Obtainable by pipe-line at all docks.
FUEL: All grades available by pipe-line at all docks.
REPAIRS: Machine shops available for limited deck and machinery repairs.
AUTHORITY: *Managers:* Port Huron Seaway Terminal Co., 2336 Military Street, Port Huron, Michigan 48060. *Contact:* W. R. Neal, President.

PORTLAND, Maine: 43.39 N. 70.14 W. **(See Plan Book)**

DOCUMENTS:
1 Crew List.
1 Passenger List.
2 Stores Lists.
2 Foreign Purchases Lists.
2 Inward Foreign Manifests uniform cargo.
Original Bill of Lading.
1 Form 1300 Master's Oath on entry of vessel.
2 Form 1374 Outward Foreign Manifest.
PILOTAGE: Ship's Agents usually notify Pilot approximately 48 hours in advance of arrival then changes are made at 24 and 12 hours. Pilot boat usually called on Channel 16 and then switched to Channel 11 to continue conversation. Pilot goes aboard ship in vicinity of lightship using ladder on lee side. When weather bad, suggest vessel anchors approximately 1 mile North of lightship.

Portland Pilots Inc. Tel: 774-5623. Docking Pilots: McDuffie Pilots Inc. Tel: 781-3954.

ANCHORAGES:
Anchorage A (General)

Beginning at Eastern corner of Grand Trunk Railway Company Pier No. 3; thence approximately 90°, 1,700 yd. to Brooklyn Ledge Buoy 16; thence 330°, 350 yd.; thence 25°, 780 yd.; thence 303°, 750 yd.; thence 254°, 560 yd.; thence 186°, 750 yd.; and thence to the point of beginning.
Anchorage B (General and Quarantine)

Beginning at Brooklyn Ledge Buoy 16, thence 58° to Little Diamond Island thence along the S.W. shore to the pier on the Southern end of Little Diamond Island; thence 143°, 1,200 yd.; thence 270.25° to House Island Light; thence along the Western shore of House Island to Fort Scammel Point Light; and thence 329°, 1,620 yd. to the point of beginning. Anchorage B is intended for general purposes, but especially for use by oil tankers and other deep-draft ships entering the harbour at night and intending to proceed to the dock allotted at daylight the following morning, or as soon as practicable. This area also is to be used for quarantine anchorage. Any vessel anchored in this area shall be ready to move on short notice.
Anchorage C

Bounded on the N.W. by House Island; on the North by a line running 90° from House Island Light to Peaks Island; on the East by the Western shore of Peaks Island, by a line running 198° from the Westernmost point on Peaks Island to Cushing Island, and by the shore of Cushing Island to its Westernmost point; and on the Southwest by a line running from the Westernmost point on Cushing Island to Fort Scammel Point Light. Anchorage C is intended for use only by small vessels and for temporary anchorage.
Anchorage D

Southerly and Westerly of a line beginning at Lighthouse Channel Buoy 1; thence 35° to Anchorage Buoy E; and thence 145° to the mainland. Anchorage D is for use only by small yachts and pleasure craft, and small, light draft coastwise freighters.
RESTRICTIONS: No entry restrictions at night. Deep draft vessels brought in on high water only.
MAX. SIZE: Size of vessel restricted to 45 ft. draft in harbour area. No outside installations at port at present.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tugs in Portland Harbour use Channel 07. Vessels arriving at Portland go through radio station in Chatham, Mass., RCA installations, or call station WOU via radio-telephone. VHF Harbour Control at Portland.
VHF: Voluntary reporting system in effect on Channel 13.
TUGS: Tugs join vessel at Spring Point in Portland Harbour. Tugs use own lines at no additional charge. Docking Pilots not supplied by Company but are available.
BERTHING: Tidal conditions govern arrivals and departures. Depth alongside up to 35 ft.
BRIDGES: No undocking on ebb tide through bridge.
STEVEDORES: 4 hours notice on ordering gangs.
MEDICAL: No advance notice required by Agent. 2 hospitals, Maine Medical Center and Mercy Hospital, who take bed patients.
TANKERS: Tankers arriving at Portland Pipe Line, Pier 2, make preparations for 2×10 in. and 12 in. hoses.

Berth	*Depth Alongside*
American Oil Terminal	30 ft. MLW
Chevron Terminal	32 ft. MLW
Portland Pipe-line Pier No. 1	35 ft. MLW
Portland Pipe-line Pier No. 2	48 ft. MLW
Texaco Terminal	30 ft. MLW

Shore Storage: Due to shore storage difficulties the Portland Pipe-line Authorities have requested vessels leaving Venezuelan ports for discharge at Portland to provide the following information in order to avoid ship delays at this terminal:
(a) Vessel's expected time of arrival at Portland.
(b) Quantity and grade of cargo loaded.
(c) In case of split cargoes, intended order of discharge.

The above mentioned information should be radioed to Portland Agent for forwarding to Pipe-line Authorities immediately on sailing from the final Venezuelan loading port.
DENSITY: Average density 1024.
FRESH WATER: Available by tug for boilers only at rate of tug hire. Drinking water available at piers.
FUEL: No. 6 diesel oil and blended intermediate fuel oils. Delivery is via barge only and 24 hours notice required.
FIRE PRECAUTIONS: None – except at certain oil piers where information given to Shipmaster upon arrival at pier. Ample fire protection, salt water lines, sprinkler system on pier, local fire department.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Ship's crew open hatches.
CERTIFICATES:
Load-line certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. Tonnage Tax Certificate of previous trip if available.
Radio Operator's Licence.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wine and/or Spirits, 1 bottle per person.
CARGO GEAR: No additional cargo gear necessary.
IDENTIFICATION CARDS: Form I-95 must be filled-out on arriving unless seaman has had a prior one made out for a previous arrival on same ship.
SURVEYORS: National Cargo Bureau, Tel: 781-4467.
REPATRIATION: Arrangements must be made with Agent in advance by telegram.

CONSULS:

Norwegian: Allan Kjos-Hanse, 30 Mayer Road, Portland, Maine, Vice-Consul.

French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.

Finnish: Frank W. Bjorklund, 163 Main Street, Norway, Maine.

Italian: Dr. Domenico A. Santoro, 43 Deering Street, Portland, Maine.

Panamanian: Mary Navarro de Cerrillo, Lafayette Town House, Portland.

Swedish: Martin Johnson, Vice Consul, 443 Congress Street, Portland.

REPAIRS: Repair facilities for all types of machinery available.

DRY DOCKS: 3 basins divided into 7 berths which can handle a vessel up to 455 ft. long and 62 ft. wide (not currently activated). Also 3 other smaller marine slipways.

80,000 ton lift floating dock. Depth over keel blocks 14 m. Length 257 m. Clear width 40.7 m.

New Bath Ironworks: New dry dock in operation.

Specifications:	Clear Width:	134 ft.
	Draft:	46 ft. over 4 ft. keel blocks
	Max. Lift:	90,000 long tons
	Dock Length:	747 ft. without outriggers 797 ft. with one outrigger.

AIRPORT: Portland Municipal Airport 3.5 to 4 miles distant.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriots Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas and Veterans' Day. Possible to get gangs to work all days except Labour Day and Christmas.

POLICE/AMBULANCE/FIRE: Police 773 – 5651; Ambulance 772 – 5463; Fire 772 – 6531.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

GENERAL: Discussions underway with Coast Guard and other officials to install fixed lighthouse stations to replace lightships at entrance.

DEVELOPMENTS: Plans under way for redevelopment of waterfront. Plans call for deepening Fore River from 35 ft. to 45 ft. and studies also under-way to provide offshore unloading of giant super-tankers. Plans to construct a $140 million oil transfer facility. In order to complete project, existing 40 ft. ledge will be removed to 90 ft. and dredging in the inner harbour of Hussey Sound will be done. No date set for final completion.

AUTHORITY: State of Maine, Department of Transportation, Ports and Marine Transportation Division, Station No. 16, Augusta, Maine 04333. *Tel:* (207) 289-2841. *Contact:* R. Elder, Director.

Port of Portland, City Hall, Portland, Maine 04101. *Tel:* (207) 775-5451. *Contact:* The Waterfront Director.

PORTLAND, Oregon: 45.30 N. 122.40 W.

PORT LIMITS: The seaward boundary of the Port of Portland is Astoria, 96 miles N.W. of Portland.

DOCUMENTS:

- 3 Cargo Manifests.
- 3 Store Lists.
- 3 Crew Curio Lists.
- 3 Crew Lists.
- 1 Clearance from Last Port.
- 1 Tonnage Tax Certificate.
- 1 Copy of Vessel's Register.
- 1 Itinerary of Vessel, port by port.

PILOTAGE: Compulsory. ETA Bar Pilot Astoria at least 12 hours before arrival giving deepest draft. Bar pilotage covers from sea to the Port of Astoria, river pilotage covers from Astoria to Portland. They change from launch while steaming in channel off Astoria buoy No. 37.

Warning: Due to heavy swells on bar during stormy Winter conditions, crossings may be temporarily suspended, therefore Masters should attempt earliest VHF radio contact on Channel 16 with Pilots or coastguard station "Cape Disappointment" for latest bar conditions.

During Summer months Masters should use extreme caution in poor visibility as many small fishing craft will be encountered near mouth of Columbia River.

Also see "General – Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Vessels may anchor to await berths at various locations on the Columbia River. Usual spots are at Tongue Point Astoria, Longview and at Vancouver, Washington.

RESTRICTIONS: All vessels Masters or their Agents to obtain Coast Guard clearance at least 24 hours before arrival. Captain of Port may impose movement restrictions if any hazardous cargo. Under 36 ft. draft no movement restrictions, 36 ft. and over up to maximum permissible draft of 38 ft. on Pilot's recommendations.

No size restrictions length and beam, however, Corps of Engineers maintain only 600 ft. wide channel, therefore, deep laden vessels over 600 ft. in length to use extreme caution when turning.

Columbia River Navigation Advisory: (Dated September 1980).

Dredging activity at the Mt. St. Helens Shoal Area of the Columbia River is progressing on schedule.

Phase 4: The dredging of the North half of the channel to 300 ft. wide by 40 ft. deep at the mouth of the Cowlitz River will be completed by 30th September, 1980.

Phase 5: The completion of the dredging of the South Channel to at least 40 ft. by 300 ft. will then get underway. This removal of the last 2 ft. of shoaling (from 38 ft. to 40 ft.) to the dimensions of at least 40 ft. by 300 ft. will be completed by at least 30th November, 1980.

Thus by 30th November the river in that area will be 600 ft. wide with a minimum depth of 40 ft.

Necessary maintenance dredging in other parts of the river between Portland and the sea is being performed by the Corps of Engineers Hopper Dredge Fleet and will continue on an as needed basis, to maintain the published 40 ft. channel.

Dredging projects in the Cowlitz and Toutle river areas are underway as safeguards to prevent future impact of any Winter run off on the Columbia River Channel. This will be intensified on completion of Phase 4 as dredge equipment is released from Columbia River work. Starting immediately night navigation for inbound vessels will be automatically sanctioned by U.S. Coast Guard, subject only to vessel peculiarities as determined by the River Pilots. Outbound vessels will continue to be restricted to daylight (1 hour before sunrise to 1 hour after sunset) navigation. Requests for a variance will be handled on a case by case basis by Columbia River Pilots.

Agent's Note:

(Columbia River Navigation Advisory). The above is the latest information put out by the Corps of Engineers & Coast Guard. They are constantly monitoring situation so things change from day to day. We have been notifying vessel's Masters to arrive at pilot station at given time so that they can come right on through. Some waiting will be encountered in case of deep draft ships so it is best to adjust speed and conserve fuel.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Portland/Vancouver maintained at 40 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Portland.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

Master to radio with ETA state of crew health noting any sickness. Agent will report sickness to Seattle Quarantine Station for clearance instructions.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KLBITT Seattle, Washington.

Marine Exchange of the Columbia River District (Merchants Exchange): 24 hour marine reporting. Call sign "KDO 759". Call on Channel 16 VHF. Working (Astoria – Longview and 50 miles out to sea) on Channel 9 and (Longview – Portland) on Channel 11 and 18A.

Marine Exchange (Tel: 503 – 228 – 4361) pass messages to vessels from Agents and vice-versa. Coverage is good in river and 50 miles to seaward.

TUGS: Tugs normally join vessel at designated berth. Tugs' lines used at no charge.

BERTHING: The port operates 5 public ocean cargo terminals containing 28 deepwater berths, including 5 container berths with 6 high-speed container cranes. Present depths alongside berths is 40 ft. min. at MLLW.

There are general cargo berths and berths for commodities which require special handling. Port facilities include 21 transit sheds, and 5 warehouses with 2.2 million sq.ft. of sprinkler protected storage area.

BRIDGES: No arrival times designated if coming from sea and in excess of 750 tons gross. Departures regulated, with bridge closures during peak traffic flow (0700 to 0900 hrs. and 1615 to 1815 hrs.) unless permission granted by Harbour Master.

SPECIALISED CARGO HANDLING FACILITIES: As well as the 6 container cranes, there are 6 Whirley cranes, a 150 ton shear leg crane and a 175 ton mobile crane, largest of its kind on the Pacific Coast.

At Terminal Two is a 1,341 ft. container/general cargo pier with a 40 ton and a 50 ton straight line crane and 2×65 ton gantry cranes. Terminal Two contains a Roll-on/Roll-off berth. Pier has a 25 acre open storage yard with rail and truck service. 4 straddle carriers, capable of stacking 20 ft. containers 3 high, or 40 ft. 2 high, serve the yard. Pierside warehouse and container freight station 90,000 sq.ft.

At Terminal Four there is an 8.1 million bushel capacity grain elevator, with box car tipper, truck dumper and barge unloading facility. Log dock is equipped with 2 Whirley cranes. There is a Dravo bulk unloader with digging capacity of 900 t.p.h. Tanks are available for special cargoes such as petroleum, molassses, tallow and ore concentrates. Also available is a 120 acre open storage area and floating dock for import of automobiles. Ro/Ro ramp to be built in order to accommodate large vessels.

The Terminal 5 elevator is the most modern grain outloading facility in the lower Columbia River and is operated under sub-lease by Columbia Grain Inc.

The elevator has a storage capacity of 1.5 million bushels and is the fastest on the river, with an outloading capability of 2,100 tonnes/p.h. The facility can receive grain by rail, truck and barge. The barge leg operates at 1,000 t.p.h., trucks are unloaded at 225 t.p.h. and about 65 railcars can be unloaded in an 8-hour shift.

Terminal Six has a container pier, length 1,800 ft., with 3×50 ton straight line cranes and a 60,000 sq.ft. container freight station. Also a 60 acre open storage area and floating dock for import of automobiles.

STEVEDORES: Allocation for gangs Monday to Saturday must be confirmed at 1100 hrs. to longshore hiring hall. Allocation for gangs Sunday and Monday made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. in afternoon if night gangs are to work.

MEDICAL: Any type medical treatment provided and hospital facilities available.

TANKERS:

	Max. Size Vessel	
Berth	*Length*	*Draft*
Shell Oil Company	575 ft.	32 ft.
Standard Oil	660 ft. – 700 ft.	35 ft.
Texaco Inc.	650 ft.	30 ft.
Phillips Petroleum Co.	No maximum	30 ft.
Time Oil Co.	600 ft.	38 ft.
Mobil Oil Corp.	550 ft.	31 ft.
Richfield	600 ft.	30 ft.
Union Oil Co.	550 ft.	30 ft.

DENSITY: Fresh water at all times.
FRESH WATER: Available at all berths delivered through pier-side connections.
FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential. Also see "Notice" No. 2.
FIRE PRECAUTIONS: Fire precautions respecting tankers administered by U.S. Coast Guard, which enforces shipboard regulations under the Code of Federal Regulations, Part 46, Sub-Part D, Sections 20 to 40; the Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; Fire Marshal exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

All vessels to have towing cables rigged fore and aft on the offshore side. Cables to be made fast with the eye 1 m. above the water.
GANGWAY/DECK WATCHMEN: Option of vessel Owner/Agent and available through private firms.
OPENING/CLOSING HATCHES: While ship at dock, opening and closing is work of longshoremen. Ship may open or close own hatches while underway.
CERTIFICATES: Registered tonnage certificates. Certificate of Financial Responsibility (all details must agree with vessel's register).
CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.
IDENTIFICATION CARDS: Immigration Dept. requires form No. I-95A and No. 31 (Repatriation). Changes can be effected at any U.S. Immigration Office.
CONSULS: The following countries are represented in Portland:

Austria
Belgium
Costa Rica
Denmark
El Salvador
Finland
France
Germany
Ghana
Great Britain
Iceland
Italy
Japan
Korea
Lebanon
Mexico
Netherlands
Nicaragua
Norway
Panama
Peru
Senegal
Sweden
Venezuela

REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: 4 floating docks, largest 982 ft.×188 ft. clear width, with lift capacity of 81,000 long tons.
REPATRIATION: Arrangements possible for crew changes or other repatriation.
AIRPORT: Airport 10 miles distant, served by 17 regularly scheduled passenger airlines with direct service and/or connections domestically and world wide. 13 cargo carriers also serve the area.
TIME: GMT minus eight hours. Daylight Saving Time becomes effective annually on the last Sunday in April through the last Saturday in October.
HOLIDAYS: *New Year's Day; President's Day (Feb. 21st); Memorial Day (May 30th); *Independence Day (July 4th); *Labor Day (first Monday in September); Veterans' Day (Nov. 11th); Thanksgiving Day, *Christmas Day (Dec. 25th), State-wide Election Days. Other legal holidays may be proclaimed by state or national authority. When holiday falls on Sunday, the following Monday is observed as holiday. Longshore work performed on any of above listed days is overtime, which is one and a half time rate. Days marked (*) are stop-work days, i.e. no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.
POLICE/AMBULANCE/FIRE: Police 226–7551; Fire 232–2111; Ambulance: provided by several private firms, but can be obtained through police or fire number.
TELEPHONES: Available by order from terminal superintendents at $5.00 connection charge.
SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.
SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

NOTICE No. 1:
Custom of the Port Rules and Regulations:

Pertaining to bulk grain and other bulk commodities customarily handled through regular grain elevators, recognised as the practice in the Columbia River District by the Merchants Exchange. It is not the intent of the Rules and Regulations to supersede the contractural relationship between vessel and shipper or charterers, but rather state customary trade practices for the purpose of facilitating commerce under conditions where the contractural arrangements do not cover specific local conditions, in which case these "Custom of the Port" rules and regulations will apply. These rules are applicable to vessels loading in the Columbia River District, which shall be considered as one port and includes grain berths from Astoria, Oregon, to Portland, Oregon, including Longview, Kalama and Vancouver, Washington. Loading berth(s) to be declared during regular business hours at least 24 hours before arrival at the Columbia River.

Rule 1: Subject to the exceptions enumerated below, vessels shall be assigned to a berth(s) in the order in which they file with the elevator(s) as ready to load. A vessel shall be considered ready when it has obtained Certificate of Readiness issued by the National Cargo Bureau, Inc., and an official certificate of stowage examination from the U.S. Department of Agriculture, Federal Grain Inspection Service, Inspection Division, stating the vessel is completely fit in all compartments in which it is intended to receive cargo.

EXCEPTIONS:

(a) In assigning berth to vessels at any elevator, liners shall be given preference over other vessels, except that any tramp vessel whose allowed loading laytime has expired shall assume the status of a liner vessel for purposes of berth assignment. (For the purpose of these rules, the term "Liner" is defined as a vessel sailing under an advertised Pacific Coast schedule and operated by a line maintaining regular sailings from any Pacific Coast port to named ports, and on which the total quantity of all grain to be loaded shall not exceed one-half of the total deadweight tonnage of the vessel.) A vessel which arrives and presents Notice of Readiness to load in accordance with this rule, but which cannot attain "Liner" status because the allowed loading laytime is not defined in the contract of affreightment, will not lose its berthing priority to a tramp vessel with later Notice of Readiness, that has gone on demurrage.

(b) The elevator may alter the turn of the vessels whenever confronted with the urgent necessity of receiving or loading any particular grade of grain, or to facilitate conditions at the elevator. When requested, elevator operator to supply written confirmation of such loading alteration as authorised under this rule and/or applicable tariff to owner's or charterer's representative.

Rule 2

Normal working days are Monday through Saturday from 0800 hrs. to 1700 hrs. (exceptions are Sundays, legal holidays, and July 5th). Refer to notes below.

(a) July 5th – while not a legal or longshore holiday, has not been worked by Pacific Coast Longshoremen since 1935, and is considered a holiday.
(b) Overtime – is all work over 6 hours in one day, and work between 1700 hrs. and 0800 hrs., Monday through Friday, and all work on Saturdays, Sundays, legal holidays, and overtime days as defined in the Pacific Coast Longshore Contract.
(c) Awaiting vessel – where the same holiday is observed on different days in adjoining states, a waiting vessel not knowing where it could work will observe (for laytime purposes) the holiday in the state that it first works.

Rule 3

Should the vessel refuse to work during a normal working day, or beyond a normal working day when so required in writing by the elevator in accordance with its published tariff, it shall lose its turn and vacate the berth in favour of the next vessel that is willing to work overtime. The vessel so losing its turn shall be entitled to berth as soon as the berth is next available thereafter. Should any vessel refuse to vacate its berth when ordered to do so under the above circumstances, the elevator may effect the removal of such vessel at the vessel's risk and expense.

Rule 4

The Board of Directors of the Merchants Exchange will, on an annual basis, select an abitrator for the purpose of arbitration or interpretation of the Rules and Regulations set forth herein.

Requests for arbitration or interpretation of these rules shall be submitted in writing stating the parties involved and outlining the facts in brief detail to the Manager of the Merchants Exchange. The Manager of the Merchants Exchange and the arbitrator will select the time and place for the arbitration. Failure of the parties named in the abitration to respond or acknowledge the request for arbitration will require the arbitrator to rule on the facts as presented by the requesting party.

Any requests for revisions of these rules must be submitted in writing to the Chairman of the Custom of the Port Rules and Regulations Committee with a copy to the Manager of the Merchants Exchange.

Arbitration fees payable to the Merchants Exchange shall be $50 plus any extra ordinary charges in connection therewith. The above fee shall be paid by the party requesting the arbitration or interpretation.

NOTICE No.2: Issued by the Harbour Master in August, 1980.
SUBJECT: Discontinuing Ship Repairs at Grain and Oil Docks, and Refueling at Grain Docks.

We feel after considerable deliberation that ship repair at Oil and Grain Docks is an unnecessary hazard and should be discontinued at once.

The practice of refueling ships at Grain Docks also would be considered taking an unnecessary risk, and as such, will be stopped.

After surveying numerous longshoremen and Grain Operators who reaffirmed this position, we are hereby notifying the concerned contractors that this will be our policy from now on.

DEVELOPMENTS: New coal export terminal under construction. It is expected to handle a 50,000 d.w.t. vessel in 12 hours.
AUTHORITY: Port of Portland, P.O.Box 3529, 700 Northeast Multnomah Street, Portland, Oregon 97208. *Tel:* (503) 231-5000. *Telex:* 910-464-5105. *Cables:* Portofport. *Contact:* Lloyd Anderson, Executive Director.

PORT LAVACA/POINT COMFORT, Texas: 28.40 N. 96.35 W. (See Plan Book)

DOCUMENTS:

2 Cargo Manifests.
2 Stores Lists, Form CF1303.
2 Crew's Effects Declaration, Form CF1304.
1 Clearance from last Port.
Vessel's Register, tonnage, tax receipts, etc.
2 Copies Crew List.
2 Copies Passenger List.

PILOTAGE: Ship's Agents usually notify Matagorda Bay Pilots as to vessel's ETA. Pilot boat can be contacted on VHF Channel 16, then switch to Channel 26 to continue conversation. Pilot boards at buoy 1-A at position Lat. 28° 23′ N., Long. 96° 17′ W.
ANCHORAGES: Marked on chart of Matagorda Bay and approaches.
RESTRICTIONS: Vessels may enter any time day or night. Entrance channel depth 38 ft. Bay Channel depth 36 ft.
MAX. SIZE: Public Dock – max. length approximately 750 ft. Draft controlled by channel depth of 38 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Galveston Radio (ITT Mackay Marine) and Port Lavaca Marine operator can be contacted on VHF Channel 16, then switch to Channel 26 for continued conversation.
TUGS: 1 tug available joining vessel shortly before arriving at berth.
BERTHING: Vessels berth at Public Dock.
STEVEDORES: Richard Bugg & Co. Inc.; Boyd-Campbell & Co. and Dix Shipping Company of Corpus Christi, Texas. At Alcoa's Dock all plant labour is used.
MEDICAL: No advance notice required. Several clinics and 1 hospital available in Port Lavaca.
DENSITY: Average density is 1010/1012.
FRESH WATER: Fresh water available alongside berth.
FUEL: Fuel is available from VAL-CAP located in Port Lavaca. Can be delivered by barge or truck.
OPENING/CLOSING HATCHES: At Public Dock this is done by stevedores. At Alcoa Dock this is done by ship's crew.
CERTIFICATES: Load line, foreign clearance, safety equipment, financial responsibility (oil pollution), tonnage tax receipts, will be required.
IDENTIFICATION CARDS: Immigration Crew Landing Permit I-95 required for each man.
CONSULS: Only Norwegian Vice-Consul Tel: 512-987-2311.
REPAIRS: Only minor repairs possible. No dry docks.
REPATRIATION: Arrangements are possible but preferably should be accomplished in larger ports.
AIRPORT: Nearest airport 20 miles at Victoria, Texas, served by Texas International only, Corpus Christi Airport about 90 miles; Houston Airport about 150 miles.
TIME: Central Standard Time during Winter. Beginning last Sunday in April until last Sunday in October, Daylight Saving time (clocks are moved ahead 1 hour).
HOLIDAYS: All holidays observed by contract with ILA. See "Houston".
POLICE/AMBULANCE/FIRE: Police Department, Tel: 552-6767; Fire Department, Tel: 552-2222; Ambulance Service, Tel: 552-2988.
TELEPHONES: Telephones are available ashore only. Telephone booth on Public Dock.
DEVELOPMENTS: Plans for lengthening dock and another warehouse are now being considered.
AUTHORITY: The Port of Port Lavaca/Point Comfort, The Calhoun County Navigation District, P.O.Box 397, Point Comfort, Texas 77978. *Tel:* (512) 987-2631. *Contact:* L. L. Froelich, Port Manager.

Private Dock owned by Aluminium Company of America with its Agent being Alcoa Steamship Company Inc., Point Comfort.

PORT NECHES, Texas: 30.00 N. 93.57 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs used for docking, 1 for undocking.
BERTHING: Jefferson Chemical Co.: Distance from sea 30 miles, depth at berth 36 ft. Max. LOA 800 ft.

Texaco Terminal: Distance from sea 34 miles, depth at berth 38 ft. Max. LOA 810 ft.

MEDICAL: All facilities available.
DENSITY: Fresh water.
FRESH WATER: Available by barge.
FUEL: Bunker C not available ex-wharf at Texaco Terminal, only by barge from Port Arthur or Beaumont.
GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.
CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.
IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.
CONSULS: Nearest at Houston.
REPAIRS, DRY DOCKS: See "Port Arthur".
AIRPORT: 15 minutes from docks. Several flights a day 0600 hrs. – 2200 hrs. to Houston International Airport.
AUTHORITY: *Operators:* Texaco Inc., P.O.Box 1028, Port Arthur, Texas 77640.

Jefferson Chemical Company.

PORT ST. JOE, Florida: 29.49 N. 85.19 W.

DOCUMENTS:

All documentation must be on United States forms.
At least: 3 Passenger Lists.
3 Crew Lists (1 for visa crew list).
3 Curio Lists.
3 Stores Lists.
2 Complete Manifests.
Clearance Papers from last port.

PILOTAGE: Apply for Pilot through ship's Agent – address is "Port St. Joe, Pilots" and advance ETA 18 hours. "VHF – Channel 16". Pilot boat station is at Sea Buoy, Port St. Joe only and location of anchorage for vessel awaiting a Pilot is 1 mile West of Sea Buoy.
ANCHORAGES: Local harbour charts indicate safe anchorage.
MAX. SIZE: Draft 32 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Call sign WLO, Mobile, Alabama.
TUGS: None presently available.
STEVEDORES: ETA must be received by 1800 hrs. in order to have gangs at 0800 hrs. following day.
MEDICAL: No notice required. Hospital facilities available. Inoculations required same as public health U.S. Government requirements.
TANKERS: Discharge lines 8 in. No residue discharge allowed. 2 tanker berths 32 ft. draft.
DENSITY: Salt water – heavy concentration.
FRESH WATER: Available in unlimited quantities by hose connection from dock to ship, 1.5 in. to 2.5 in. size at 60 p.s.i.
GANGWAY/DECK WATCHMEN: Only when requested by ship.
OPENING/CLOSING HATCHES: Work can be performed by either stevedores or crew.
CUSTOMS ALLOWANCES: 1 carton of cigarettes per week per crew member permitted. Further allowances would depend on circumstances. Wine and/or Spirits 1 bottle per crew member as allocated by Customs.
CARGO GEAR: Must be in compliance with "U.S. Government Longshoremen Safety Codes".
CONSULS: None.
REPAIRS: None.
DRY DOCKS: None.
REPATRIATION: Can be accomplished by Agent and Immigration but should be accomplished in larger ports if possible.
AIRPORT: Served by regular airlines. (Southern Airways, National Airways). 6 combined flights a day. Distance 40 miles.
TIME: Saving time from first Sunday in May to last Sunday in October. GMT minus 5 hours Standard Time. GMT minus 4 hours daylight saving time.
HOLIDAYS: *No Work Holidays:* No work performed New Year's Day, Fourth of July, Labour Day, Christmas Day, or December 24th & December 26th, and Easter Sunday, except handling of mail, baggage and perishables (except bananas) or unless a ship is in distress, such as fire or leaking bottom, or, other causes that would damage cargo or vessel. In event work done on New Year's Day, Fourth of July, Labour Day, Christmas Day, December 24th & December 26th, or Easter Sunday, rate of pay for such ship work shall be double the normal time rate. Should above holidays fall on Sunday, double time will be paid. Following Monday will be paid at time and one-half.
Working Holidays: Armistice Day, Thanksgiving Day and Memorial Day are to be paid for at overtime rate – one and one-half times straight-time rate. Should any of above holidays, except Sunday fall on Sunday, the following Monday will be observed.
POLICE/AMBULANCE/FIRE: Police 229-8265; 227-4526; Ambulance 227-1115 (Comforter), 277-1818 (St. Clair), 229-8111; Fire 227-1115.
TELEPHONES: Available for placing aboard.
GENERAL: In sending ETA when ship is going to arrive over weekends (Saturday and Sunday), an ETA notice should arrive prior to 1700 hrs. Friday.
SHORE LEAVE: Shore leave allowed when cleared by Immigration.
REGULATIONS: Normal working hours of longshoremen from 0800 to 2230 hrs. only, 7 days a week.
DELAYS: Only when due to port congestion.
AUTHORITY: Port St. Joe Port Authority, P.O.Box 280, Port St. Joe, Florida 32456. *Tel:* (904) 227-1111. *Contact:* George Tapper.

PORT SAN LUIS, California: 35.10 N. 120.45 W.

ANCHORAGE: The best anchorage in the Harbour is in the starboard side, coming from the sea, being the area between No. 3 Pier and the second, Union Oil Terminal, pier. Anchorage be outside of the existing mooring area and the holding ground is primarily sandy bottom.
APPROACHES: The approach channel, directly off the end of the Harbour District's Pier is an entrance channel, which is unlit and identified by large green or red buoys.

The tanker channel runs North/South to Pier No. 2 (Union Oil) and small vessels using Pier No. 3 (Harford) run a course of approx. SE-NW.

MAX. SIZE: Tankers up to 750 ft. length and 26ft. draft.

48,000 d.w.t. tankers may not use Pier No. 3 (Harford). Vessels wishing to use Pier No. 3 must give prior notice in writing, except commercial fishing vessels.

HEALTH: See "Health: All Ports„ before first U.S.A. port (Albany). Illness reports made to Los Angeles Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Vessels should contact Union Oil Company through Marine Operator. "Walkie-talkie" sets used for communication with terminal. VHF station KTD 411, Channels 10 and 16.
VHF: Harbour Office, call sign "KYZ 664", on VHF Channel 16 throughout 24 hours, working Channels 10 and 12.
TANKERS: Tanker berths only at Union Oil Company Pier. Vessels tie off pier at berth No. 4. Depth alongside 32 ft. MLW.

1×12 in. and 1×16 in. load/discharge lines. No ballast discharge allowed.

DENSITY: Salt water, 1025.
MEDICAL: Services available.
FRESH WATER: Available.
FUEL: The Harbour District maintains and operates a diesel fuel facility, capacity 12,000 gallons. The facility is at the end of the District's 1,400 ft. pier. Limited use restricted to small vessels up to 300 d.w.t.
CONSULS: Nearest consuls situated at Los Angeles and San Francisco.

REPAIRS: Facilities available for all vessels.
AIRPORT: County Airport, San Luis Obispo, situated 12 miles distant. 6 flights daily to Los Angeles and to San Francisco.
HOLIDAYS: Christmas and New Year.
GENERAL: Port San Luis is an official Port of Entry with U.S. Customs. The Port Director is on duty Monday to Friday from 0900 hrs. to 1600 hrs.

There is a boat yard with a 50 ton mobile hoist.

WEATHER: The mean tidal range in San Luis Obispo Bay is 3.6 ft., the Spring range is 5.3 ft. and the maximum range is approximately 9.8 ft. The highest observed tide was 7.5 ft. above MLLW mark in January, 1948. The lowest tide of −2.3 ft. MLLW mark occured on January 7th, 1951. Tidal level above the MHHW or MLLW will occur approximately 20% of the time during severe storms. The existing breakwater gives partial protection from waves approaching from the Western part of the San Luis Bay. The bay is exposed to open sea from the South to Southwest. Northwesterly winds are predominant, except during the Winter months, October through April, when these storms from the South generate waves that approach from the Southwest to Southeast. The magnitude of the surge is usually less than 0.5 ft. However, 1.0 ft. waves are common.

The prevailing wind is from the Northwest and averages 5 to 15 knots and, during a Southerly storm, can go up to 60 knots.

The climate and weather are typically mild and favourable. The rainy season, including the storm season, is generally from November 15th to April 15th. Occasionally, brisk winds or fog make it temporarily difficult to navigate within the Port. Rain and heavy winds are not usually experienced at other times of the year. Normally, the temperature is from the low 50's to the high 70's.

AUTHORITY: Port San Luis Harbour District, Pier No. 3, P.O.Box 249, Avila Beach, California 93424. *Tel:* (805) 595-2381 *Contact:* William S. King, Harbour Master. J. K. Elder, Marine Coordinator.

PORTSMOUTH, New Hampshire: 43.03 N. 70.45 W. (See Plan Book)

PILOTAGE: Pilot boards at entrance.
TUGS: The Port of Portsmouth is serviced by 3 regular tugs, one of 1,200 h.p. and two of 1,600 h.p. operated by the Portsmouth Navigation Division of the Central Wharf Towboat Company, Inc. Tel: 1-603-436 1209 (radio frequency 1316). Additional tugs are available in the area if needed.

The rates for moving vessels from the anchorage (1 mile South of Sea Buoy KR2) to berths in the harbour vary according to distance, conditions and tonnage of vessels. Tonnage referred to is s.d.w.t. or Coastwise, whichever greater.

BERTHING:

New Hampshire Port Authority:

Operator:	J. T. Clark & Son of N.H. Inc. Tel: (603) 431-8500.
Location:	3 miles from Outer Anchorage (Buoy KR2).
Depth at Dock:	35 ft. (MLW).
Type of Pier:	Length 600 ft. Concrete and steel pile with precast concrete deck.
Products Handled:	General cargo, bulk and containerised.
Dry Storage:	50,000 sq.ft. in two sheds.
Dockside:	Potable water, power, telephone and marine bunkers. Modern fork-lift trucks, bucket loaders, tractors and heavy lift cranes are permanently stationed at the facility to prevent any delays in servicing all types of vessels. The 4 cranes range in size from 35 tons to a 165 ton mobile container crane. Additional mobile cranes of 150 ton capacity are readily available. A certified weighing system is located in the centre of the freight marshalling area for easy access to trucks and containers entering or leaving the terminal.

Fuel Storage Inc.:

Operator:	Dorchester Sea-3.
Address Terminal:	Avery Road, Newington, N.H. 03801. Tel: (603) 431-5990.
Office:	144 Washington Street, Portsmouth, N.H. 03801. Tel: (603) 436-6225.
Type of Pier:	Steel piled cells offshore 125 ft.
Depth Alongside:	38 ft. (MLW).
Normal ship side to dock:	Port.
Line Handling boat required:	Motorised shore bollards.
Access to vessel (for stores and repairs):	Trucks to shoreside, cart or hand to shipyard.
Product handled:	LPG.
Size and number of pipe-lines:	16 in. liquid line, 8 in. vapour return.
Bbls. per hour Discharge capacity:	12,420 bbls.p.hr.
Maximum vessel dimensions:	59,000 c.b.m.
Storage capacity:	400,000 bbls.
Other dock users:	Belcher Oil, Dorchester Sea – 3 Products Inc., U.S. Government, Global, Trimont International, Cyro.

Also see "Shipmaster's Report".

Public Service Co. of N.H. Schiller Station:

Operator:	Mobil Oil Corp.
Address:	Gosling Road, Newington, N.H. 03801.
Depth Alongside:	34 ft. (MLW).
Normal ship side to dock:	Port.
Access to Vessels (for stores and repairs):	Limited.
Products handled:	Gasoline and distillates.
Size and number of pipe-lines:	Various.
Discharge capability of bbls.:	6,000 bbls.p.hr.
Average distance to storage tanks:	Tank farm adjacent to dock.

Simplex Wire & Cable:

Operator:	Simplex Wire & Cable.
Address:	Old Dover Road, Newington, N.H. 03801. Tel: 436-6100.
Type of Pier:	T-Shape (permanent).
Depth Alongside:	28 ft. (MLW).
Normal ship side to dock:	Port (bow upstream).
Line handling boat required:	Yes.
Access to vessel (for stores and repairs):	Yes.
Product handled:	Ocean cables.

Public Service Co. of N.H. Schiller Station:

Operator:	C. H. Sprague & Son.
Location:	1.5 miles above the Interstate Bridge.
Distance seabuoy to dock:	7.1 miles.
Controlling depth in approaches:	35 ft.
Controlling depth at dock – MLW:	37 ft., ledge bottom.
Rise and fall of tide:	8 ft.
Docking and undocking conditions:	Docking is restricted to a high water operation – Pilot starting ship in from anchorage area at high water only. Undocking: Low water slack at the dock or 1 hour before high water slack at the dock.
Length of dock and construction:	700 ft. with dolphins. Concrete pile, concrete decked T-head wharf with a 100×20 ft. approach.
Tugs and linehandlers:	2 or 3 tugs used to dock and undock. Terminal personnel used as linesmen.
Bunkers:	Available through 6 in. line at 2,000 bbls./hr.
Water:	Supplied through 2.5 in. line.

C. H. Sprague & Son Co., Newington Terminal:

Operator:	C. H. Sprague & Son Co.
Address Terminal:	Old Dover Road, Newington, N.H. 03801. Tel: (603) 431-5131.
Office:	One Parade Mall, Portsmouth, N.H. 03801. Tel: (603) 431-1000.
Type of Pier:	Steel piled cells (2) and mooring dolphins (3) Offshore 300 ft.
Depth Alongside:	36 ft. 6 in. (MLW).
Normal ship side to dock:	Port.
Line handling:	Motorised capstans on all dolphins. Lines handled by Sprague personnel.
Lines:	6-18 depending on size of vessel.
Access to vessel (for stores and repairs):	5 ton vehicle or less to ship side, 5 ton vehicle or more, cart or hand to ship side.
Products handled:	Kerosene, diesel fuel, No. 2 home heating oil.
Size and number of pipe-lines:	1×16 in., 1×14 in., 3×10 in., 1×8 in., 1×6 in.
Discharge Rate:	7,000-20,000 bbls./hr. (varies on product and tank size).
Max. vessel size:	700 ft. overall length.
Storage capacity:	1,200,000 bbls.
Dockside:	Potable water, pay telephone, marine bunkers (light oil only).

Gold Bond Building Products Division of National Gypsum Company:

Operator:	Gold Bond Building Products.
Address Plant:	Freeman's Point, Portsmouth, N.H. 03801. Tel: (603) 436-4840.
Mailing:	P.O.Box 270, Portsmouth, N.H. 03801.
Type of Pier:	2 circular marine cells, 40 ft. dia. at shore side.
Depth alongside:	40 ft. (MLW).
Normal ship side to dock:	Port.
Line handling boat required:	Motorised shore bollards.
Access to vessel (for stores and repairs):	Trucks to shoreside.
Product handled:	Gypsum ore through a conveyor system designed for self-unloading ships.
Other Dock Users:	Northeast Petroleum Corp. N.H. Trading Corp.

BRIDGES: *Bridge Clearances:*
Memorial Bridge (lift): Horizontal 260 ft., vertical 150 ft.
ME.-N.H Bridge (lift): Horizontal 200 ft., vertical 135 ft.
1-95 Highway Bridge (fixed): Horizontal 440 ft., vertical 135 ft.
General Sullivan Bridge (fixed): Horizontal 100 ft., vertical 46 ft.
New Castle Highway Bridge (Bascule): Horizontal 29 ft., vertical 12 ft.

TANKERS: See "Berthing".

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Facilities available.

BANKS: First National Bank of Boston. Tel: (617) 434-3770.
First National Bank of Portsmouth. Tel: (603) 436-7700.
Maine National Bank. Tel: (207) 439-0451.
State Street Bank. Tel: (617) 786-3839.

GENERAL:

VESSEL ARRIVALS AND DEPARTURES

Marine Section, Federal Building, Room 103, Portsmouth. Tel: (603) 436-7620, ext. 737.

District Office (Portland, ME): Tel: (207) 780-3328.

COMMERCIAL VESSELS, ARRIVALS & ENTRY

Report of Arrival: These vessels must report arrival to a U.S. Customs Officer within 24 hours (19 U.S.C. 1433):

A. Vessels arriving at any port or place in the U.S. from any foreign port or place (refers to domestic and foreign vessels);

B. Domestic vessels arriving at any port or place in the U.S. from another U.S. location with bonded merchandise or foreign merchandise for which entry has not been made. Failure to report results in penalties.

Entrance: Within 48 hours of arrival from a foreign port, the Master is required to make entry of his vessel, even though the vessel may be at anchor awaiting berth. Foreign flag vessels arriving in ballast from another U.S. port must also make entry within 48 hours of arrival. When vessels which have residue foreign cargo and/or passengers on board arrive from another U.S. port, entry should be made within 24 hours.

Vessels arriving from a foreign port must have made either Preliminary or Formal entry prior to transacting any type of business or permitting anyone on board other than Customs, Immigration, Agriculture, Public Health, and Agent's personnel. Vessels arriving from another U.S. port to discharge cargo must make Preliminary or Formal entry prior to discharging cargo.

Foreign non-commercial vessels are also required to make entry. In Portsmouth this will be done on board at the time of boarding by Customs. The Officer will provide necessary forms and assistance. Non-commercial vessels may contact the New Castle Coast Guard Station for assistance in obtaining a Customs Officer.

WARNING REGARDING SEA STORES

(U.S. Dept. of Agriculture, Animal & Plant Health Inspection Service)

You are hereby warned that WHILE YOUR VESSEL IS IN THE TERRITORIAL WATERS OF THE U.S., regulations of the Department of Agriculture **prohibit** the unloading for any purpose of:

1. Fresh, chilled or frozen meats;
2. Undrawn poultry carcasses;
3. Plants or plant products, including fruits or vegetables;
4. Garbage, consisting or contaminated with scraps, parts or other waste of meats, plants, fruits, and vegetables.

DEVELOPMENTS: The Port Authority has developed a comprehensive plan for maximum utilisation of existing space on a phased basis. An integral part of that plan is another docking facility, 600 ft. long with a depth of 35 ft. alongside at MLW. This new docking facility will provide additional berthing space for new users as well as prevent costly delays due to terminal congestion. The Port Authority is also planning to develop approximately 10 acres of new land from a tidal basin adjacent to the present facility. This area will be used for open as well as enclosed throughput storage.

SHIPMASTER'S REPORT: February 1983.

Dorchester Sea-3 Terminal:

The vessel arrived off Portsmouth N.H. on the 2nd February, at the entrance to which port the Pilot boards, to take vessels up river to Newington. At the arrival time a S.E. gale was in force, so the passage was ended at 2400 hrs. and the vessel stood some 20 miles off the coast waiting for the weather to abate, as I considered it unwise to proceed to the waiting area to anchor; as the holding ground is not good, and in S.E'ly winds there is no shelter. The vessel cruised around at reduced speed until the following day.

At 1450 hrs. on the 3rd February, with the weather, and sea conditions much improved, the vessel anchored 1 mile South of Kitts Rock No. 2 buoy (KR2). Two U.S. Coast Guard officers boarded from a local harbour tug after some difficulty in coming alongside, due to the ground swell that was still running. The Officers carried out an inspection of all cargo handling equipment, and shut down systems. The Coast Guard officers then granted permission for the vessel to enter the port of Newington, and disembarked at 1715 hrs.

As there is a port regulation that no LPG carrier can move during the hours of darkness, and that large vessels can only dock, and undock during slack water periods, it was necessary to wait until the following morning before docking.

At 1020 hrs. on the 4th February the Pilot boarded. At 1040 hrs. anchor aweigh, and the vessel proceeded up river. At the mouth of the river there is a shallow patch with only 35 ft. over it at low water. This left only 5 ft. clearance under the keel, and the vessel had to proceed very slowly over it. Four tugs were made fast, 2 for'd and 2 aft, and a U.S. Coast Guard cutter escorted the vessel up-river. The river is narrow, with some very sharp bends. There are 3 bridges, with the port limitations governed by the Noble Island Bridge. The vertical clearance on this bridge is 135 ft., and the horizontal distance is 200 ft. Maximum draft loaded, and on high water is 36 ft. On approaching this bridge it was necessary to let go the 2 for'd tugs, and allow them to pass through the bridge first, making them fast again when the vessel has passed through.

The vessel docked at Dorchester Sea 3 Terminal, at 1315 hrs. 4th February. The berth constructed from 3 cement and steel dolphins, joined together by a steel platform. It stands about 150 ft. out in the river, and is connected to the shore by a narrow footbridge. The mooring arrangements for a vessel of this size are poor. There is not sufficient leads on the head lines or stern lines due to the way the mooring bollards are placed on the shore, and all the weight is taken on the spring lines. Recommended mooring arrangements as supplied by the Port Authority (see "Plan Book"). On the full run of the tide the water runs at up to 4 knots alongside, and because of this there is a port regulation that a tug must stand-by at all times while the vessel is alongside. The cost of this tug, on this call was U.S.$300 per hour, which can add a considerable amount to the overall cost of calling at Newington.

Before loading commenced, a liquid and vapour return line were connected. At 1530 hrs. on the 4th February loading commenced. The vapour return line proved very important as it appeared there was a large percentage of impurities in the product received judging by the performance of the vessel's reliquification plant. It was necessary to return a considerable amount of vapour to the shore tank during loading operations. I issued a Letter of Protest, to the Terminal Manager, protesting the quality of the product.

On docking, the vessel was again boarded by the U.S. Coast Guard, and further inspections were carried out. The Coast Guard personnel remained on board throughout the loading operation; sometimes as many as 6 Officers, but never less than 3 at any one time. It was explained to me by their Commanding Officer that some of the personnel had no experience of LPG vessels, and were on board to learn. In this respect the ship's Officers gave all assistance possible in showing them around. The loading rate was slow, only reaching an average of 400 tonnes/p.h. on full rate, and the shore installations could not supply the product any faster. Loading was completed at 0730 hrs. on Monday, 7th February when the cargo loaded was estimated as follows:

Ship's figure:	23,965.127 tonnes
Surveyor's figure:	23,901.602 tonnes
Shore figure:	23,828.614 tonnes (taken from shore tank gauge reading)

The draft on completion was 33 ft. 00 in. for'd., 34 ft. 08 in. aft.

Owing to port regulations the vessel had to remain alongside until the next daylight high water which was at 0800 hrs. on the 8th February. The vapour return line remained connected during this time, as regulations prohibit releasing uncondensables to the atmosphere, and in view of the impurities in the product it was found necessary to use this vapour return line.

At 0745 hrs. on the 8th February while the vessel was preparing to sail, a Coast Guard Officer boarded and informed me that the visibility in the river was less than 2 miles, and the U.S. Coast Guard would not grant permisson for the vessel to sail. Heavy snow had fallen throughout the previous day, but had cleared during the night, and the visibility at the vessel was over 2 miles. Evidently further down river it was still snowing, and visibility was restricted. The vessel had to remain alongside until the next daylight high water which was 0900 hrs. on the 9th February.

At 0715 hrs on the 9th February while preparing the vesel to sail, the vapour return line was disconnected, and a further survey of the product on board carried out. The result was as follows:

Loss of product as found by ship:	50.283 tonnes
Loss of product as found by Surveyor:	52.568 tonnes

At 0855 hrs. on the 9th February the vessel sailed for the Panama Canal. She was assisted by 5 tugs, as both the Pilot and the U.S. Coast Guard insisted on an additional tug being employed for the down-river passage as the vessel was deep loaded. There was no difficulty in leaving the berth. All stern lines were let go, and the vessel's stern allowed to swing out into the river, while still made fast for'd, with all weight coming on the for'd spring lines. When the vessel was at right angles to the dock all lines were let go, and the tugs pushed her around until she was heading down river. The river passage went without incident, and the Pilot disembarked at 1037 hrs. when approaching Kitts Rock No. 2 (KR2) buoy. The passage commenced at 1100 hrs on the 9th February, 1983.

AUTHORITY: New Hampshire State Port Authority, 555 Market Street, Box 506, Portsmouth, New Hampshire 03801. *Tel:* (603) 436 8500. *Contact:* The Director.
Harbour Master: *Tel:* (603) 436-6421.

PORT SULPHUR, Louisiana: 29.28 N. 89.41 W.

(See Plan Book)

DOCUMENTS, etc: Refer to "New Orleans".

PILOTAGE: A vessel coming into port from sea can arrange to pick up a Bar Pilot (Associated Branch Pilots) by furnishing ETA to the ship's Agents, radio contact by VHF Channel 9 and AM Channels 2738 and 2182. Bar Pilot is exchanged for river Pilot at Head of Passes, Pilot town, Louisiana. River Pilot (Crescent River Port Pilot's Association) can be arranged through ship's Agent in New Orleans and radio contact as above. Vessel awaiting Pilot for departure may remain at dock until Pilot arrives. Advance notice of 3 hours is required for departing Pilots. This can be arranged by the ship's Master with the shipping foreman.

ANCHORAGES: Anchorage is available on East bank of river opposite to Freeport Sulphur Company dock. Depth of water at anchorage is 40 ft., the controlling depth in the river.

RESTRICTIONS: No restrictions for entry because of time of day, nor conditions of tide or draft except the controlling depth of Mississippi River to Port Sulphur (35 ft. – 40 ft. as published in reports by U.S. Army Corps of Engineers).
MAX. SIZE: Max. permissible length – 750 ft., breadth not limited, draft equal to controlling depth of river.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Tropical Radio WNU New Orleans.
TUGS: Tugs not normally required. Shore crews usually handle ship's lines. Tug may join the vessel opposite the dock. Charges for handling ship's lines.
STEVEDORES: Not normally required. When requested, stevedoring services can be obtained from Port of New Orleans; contact ship's Agents for particulars.
MEDICAL: Advance notice for personnel requiring medical service is required through ship's Agents. Hospital facilities are available.
TANKERS: 1 tanker berth, permitted draft equal to or greater than controlling depth of Mississippi River. Diameter of loading/discharge lines are 12 in. and 16 in. respectively.
DENSITY: Density in port not affected by tide. Fresh water.
FRESH WATER: Not available.
FUEL: Fuel may be loaded by barge with vessel at anchor. Fuel transfer is not permitted at dock.
FIRE PRECAUTIONS: No welding repair permitted at dockside. Fuel transfer is not permitted. No other specific precautions observed except for "no smoking" precautions, etc.
GANGWAY/DECK WATCHMEN: Services of watchmen desirable but not required. Port does not furnish this service.
CERTIFICATES: Certificate of condition of cargo handling gear required when use of gear is necessary.
IDENTIFICATION CARDS: Immigration Form I-95.
CONSULS: Consuls offices are located in New Orleans, Louisiana.
REPAIRS: Engine and deck repairs are possible when the dock is not otherwise occupied.
AIRPORT: New Orleans International Airport, served by most major airlines. 55 miles from Port Sulphur.
TIME: Local time is Central Standard Time, except from May/October, Daylight Saving Time is in effect.
HOLIDAYS: Vessels are loaded on all holidays except Christmas Day.
POLICE/AMBULANCE/FIRE: Port Sulphur, Louisiana, 564 – 2525; 564 – 2525; 564 – 3231, respectively.
TELEPHONES: Jacks for telephones are provided at no additional cost to tankers loading at port.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Loading will not commence until all holds are clean of scale and other foreign matter.
AUTHORITY: Freeport Sulphur Company, P.O.Box 1025, Port Sulphur, Louisiana 70083. *Contact:* A. J. P. Launey, Operations Manager.

Freeport Sulphur Company, P.O.Box 925, Port Sulphur, LA 70083. *Tel:* (504) 568-4393.

PORT WENTWORTH, Georgia: 32.09 N. 81.08 W.

PILOTAGE: Compulsory. Pilot boards at Savannah Sea Buoy. 48, 24 and 12 hours notice required through Agent.
RESTRICTIONS: Vessels can enter and leave port during hours of darkness and at any stage of the tide, however, depth of water at River Bends controls draft.
MAX. SIZE: See "Berthing".
VHF: Pilot on Channels 16, 14 and 13.
TUGS: Tugs from Savannah assist with berthing and unberthing.
BERTHING: *Continental Can & Paper Co.:* Port Wentworth is the most inland berth up the Savannah River and is 29 miles from the entrance. Max. size of vessel so far to berth was LOA 628 ft. Pilots would accept vessels of 700 ft. LOA but would be unable to swing with this length. The berth is dredged to approximately 40 ft. for a length of 700 ft. Least depth of water in channel from sea to berth 28 ft.

Mean tidal range at berth 8 ft. to 9 ft. Nature of bottom – mud.

Vessel is able to dock at any stage of the tide, however, vessels undock on the flood to swing off berth. (Approximately one hour's flood tide required). The berth is a timber faced concrete wharf of length 240 ft.

Facilities: There are no bulk handling facilities or quay cranes. Three mobile cranes used. There are no Ro-Ro facilities or floating cranes available. Fork lifts are available for handling reels of linerboard. There are no facilities for handling containers as berth is only used by Paper Mill.
DENSITY: 1001.
STEVEDORES: Savannah labour used (Experts on loading paper reels).
FRESH WATER: Not available.
FUEL: Bunker fuel oil available by barge. Diesel oil and lubricating oils also available.
MEDICAL: Doctor and hospital available.
SERVICES: (Available locally or from Savannah). Fresh provisions, repairs, dry dock, airport, surveyors and laundry service.
AUTHORITY: Continental Forest Industries, P.O.Box 4068, Port Wentworth, Georgia 31407. *Tel:* (912) 964-1271. *Telex:* TWX 810-784-5635. *Contact:* J. R. Knight, Traffic Dept.

PROVIDENCE, Rhode Island: 41.48 N. 71.23 W.

PILOTAGE: Compulsory. Pilot boards 1 mile South of Brenton Reef Light Tower (position: Lat. 41° 25′ N., Long. 71° 23′ W.). Send ETA to Agent 24 hours prior to arrival. Pilots (call sign "Rhode Island Pilots") on Channels 16, 12 and 18A.
ANCHORAGES: There is no port anchorage for dry cargo vessels. It was reported that tankers can discharge into barges off Newport.
RESTRICTIONS: Vessels can enter and leave at any stage of the tide, day or night.
MAX. SIZE: Pilot advised max. draft is 38 ft., however, Agent recommends 35 ft. No keel clearance was stated.
TUGS: 9 tugs available 1,600 h.p. – 3,200 h.p. Vessels may dock and undock without tugs, however, they are required for turning in the harbour.

Providence Steamboat Company serving Ports of Providence, Narragansett Bay, Fall River and New England Electric at Brayton Point. 4 tugboats – 24 hour dispatching service. 2×3,000 h.p. tugboats.
RADIO: Station WCC.
VHF: Port Authority on Channels 16 and 18A. Agent on 16, 18A, 13 and 9. Also see "Pilotage".
BERTHING: *No. 6 Municipal Pier:* The berth is the first port hand berth when entering Providence. Distance from entrance to berth 25 miles. Length and beam no limit. Max. draft 35 ft. Least depth of water in channel from sea to berth reported to be 40 ft. Mean tidal range at berth 4.5 ft. Also see "General".
Cargo Handling Facilities: Mobile cranes only available for handling bulk steel and scrap cargoes. 6 mobile cranes, capacity 100 tons to 250 tons. No Ro-Ro facilities. No floating cranes. There are facilities for handling 20 ft. and 40 ft. containers, also sufficient storage space. There is also adequate storage space for breakbulk and palletised cargoes.
DENSITY: 1016.
FRESH WATER: Available, rate 15 t.p.h. – 30 t.p.h.
FUEL: Bunker fuel oil available if vessel has contract. Diesel oil not available. Lubricating oils available.
MEDICAL: Doctor and hospital available.
TANKERS: LPG/LNG carriers – see "Shipmaster's Report" dated February 1985.
REPAIRS: Minor repairs possible, machine shop available.
AIRPORT: At Boston and Green Airport, Providence, R.I.
SURVEYORS: At Boston.
GENERAL: *Quay:* Granite slab construction with a wooden pile facing. A large number of the piles are missing but there are still sufficient to land on. Surface of quay looks very rough and covered in sand and earth but it is metaled under this and will take heavy mobile crawler cranes.
Ship Chandler: Satisfactory, prices reasonable.
Laundry: Satisfactory and prices reasonable. Laundry collected Saturday 1430 hrs. and returned Sunday morning.

SHIPMASTER'S REPORT: September 1982.
Documents: The same as for other U.S. ports.
Pilotage: (Serving all ports in the Narraganset Bay area).

Pilot boards near Brenton Reef Light structure. There is a 24 hour service. Cable address for Pilots is "Rispilot Providence". Pilot launch as well as their shore establishment have VHF and operate on Channels 16 and 10.

Anchorages: There are a number en-route to Providence. Our vessel anchored off Jamestown for 3 days in a well sheltered place and good holding. Max. draft allowed I was informed is about 36 ft.
Berths: There are a number of isolated tanker berths in and around Providence, details of which are found in the Sailing Directions.

A total of 6 berths comprise the Municipal Docks. Most of these are in a poor state of repair although some major work is in progress on repairs. There are 2 cargo storage sheds one of recent construction. There are no quayside cranes but mobile cranes can be hired through the stevedores. These are only suitable for small vessels because of their outreach.

Fresh Water: Fresh water is laid on to the quay.
Stevedores: Normal cargo working is from 0800 hrs. – 1700 hrs. (Monday to Friday), overtime can be worked until 1900 hrs. and also weekends.
Cargo-Imports: Mainly automobiles from Europe and Japan, containers from feeder vessels, steel from Europe by regular liner trade.
Cargo-Exports: Scrap steel, logs, timber and latterly wastepaper.

Our vessel loaded a full cargo of wastepaper (cardboard) of almost 12,000 tons. Stowage factor was 135 C.F./metric ton. 1,400 tons were stowed on deck suitably lashed and covered. The whole cargo was loaded in 27 working days using ship's cranes. Sizes of paper bales varied immensely with weights ranging from 500 kg. to 800 kg.

Bunkers: Not available.
Repairs: Main repair facilities are at Boston (e.g. Bethlehem Steel).
General: It was found difficult to bring the vessel alongside the quay nearer than 4 ft. during the whole stay in port. This was due to strong water outlets on the quay face from the adjacent sewage works.

Vessel should be amply moored to compensate for strong off-shore winds which are quite common even in Summer.

Do not forget the rat guards as huge rats were seen prowling the quay at night!

SHIPMASTER'S REPORT: February 1985.
Port Limits: Entrance to Narraganset Bay, Brenton Tower.
Documents: Standard for U.S.A. Customs & Immigration. Coastwise Documents are sufficient if coming from a U.S. port, no others are asked for.
Pilotage: Rhode Island Pilots, arranged via Agents, require 8 hours' notice. Board off Brenton Tower, listen VHF 16.
Anchorage: Can be obtained 1.5 miles S.E. of Brenton Tower but bottom is rock hard and holding will be doubtful in bad weather. There are allocated anchorages within Narragansett Bay.

Restrictions: Vessels can enter/leave at any time except for LNG/LPG Tankers. These must transit in/out in daylight only, whether they have cargo onboard or just cooldown 'heel' remaining. LPG Tankers are provided with a Coastguard escort vessel, which creates a Safety Zone 2 miles ahead and 1 mile astern, keeping all other traffic clear.
Max. Size: 35 ft. draft was quoted; this vessel went in at 30 ft. comfortably.
Health: Standard U.S.A. requirements.
Radio: WCC Chatham.
VHF: All Channels used as necessary, no special allocation. "Securite" messages for LPG Tanker transit are broadcast on Channels 13 and 16.
Radar: No radar surveillance or Vessel Traffic Scheme (VTS) Control.
Tugs: Join off berth, using their own lines.
Berthing: LPG (Propane) is discharged at Municipal Wharf No. 5, with empty oil drums providing a safety area around the shore manifold, as this is a Public Wharf with free access.

Moorings were adequate, 2 headlines, 1 breast line, 2 springs forward and similar aft, the berth being a continuous quay with rubber tyre fenders.
Bridges: One vertical bridge, clearance 194 ft.
Medical: All facilities available.
Tankers: LPG discharged at No. 5. Municipal wharf at a bulk rate of 750 tonnes per hour, through a 10 in. chicksan. This chicksan is a mobile one connected temporarily into an underground line, and jacked up off its wheels; thus it is rather fragile and demands precise positioning during berthing, and careful control of the list during the discharge as it is at its maximum reach when a 60,000 cu.m. vessel is in ballast.
Density: Salt.
Fire Precautions: LPG Tanker, only those imposed by the ship.
Surveyors: Saybolt attended this LPG vessel on behalf of receivers.
Gangway/Deck Watchmen: None. Ship's accommodation ladder was used to the wharf.
Customs Allowances: Usual U.S.A. allowances but no check of bond made on this visit.
Repatriation: Local Airport with services to Philadelphia for International flights, or by bus – approximately 1 hour ($7.00) to Boston International.
Airport: See above.
Time: GMT minus 5 hours. Eastern Daylight Saving Time GMT minus 4 hours in the Summer.
Emergency: U.S.C.G. "Castle Hill" on Channel 16 VHF, working 22A or 12.
Telephone: At No. 5 Municipal Wharf there is a public telephone booth within 250 ft. of the foot of the gangway, against the wall of a warehouse.
Storing: No known restrictions.
Shore Leave: Bus route into town (2 miles) about 100 yards from No. 5 Wharf.
Identification Cards: Standard U.S.A. Immigration requirements.
Regulations: All LNG/LPG Tankers have to anchor off Brenton Tower for U.S.C.G. inspection (2 – 3 hours), even those with valid letters of compliance and if no LOC then the inspection could take about 6 – 7 hours. During the discharge of LPG, 2 U.S.C.G. personnel are permanently stationed by the shore manifold, and do occasional spot checks onboard.
Delays: See above.

AUTHORITY: Port of Providence, Marine Terminal Building, Municipal Wharf, Providence, Rhode Island 02905. *Tel:* 401-781-4717/8. *Contact:* Eugene G. Neary, Port Director.

REDWOOD CITY, California: 37.50 N. 122.28 W.

(See Plan Book)

DOCUMENTS, PILOTAGE and all general information refer to "San Francisco".
RESTRICTIONS: Though a natural deep water channel extends down the bay to Redwood City there is controlled depth channel 500 ft. wide and 30 ft. deep across San Bruno Shoal. The entrance channel to the port is 2 miles long and 30 ft. deep (all depths are at MLLW) and 300 ft. to 350 ft. wide. There are 2 large turning basins at either end of the port harbour channel.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
BRIDGES: The San Mateo Hayward Highway Bridge with a vertical clearance of 138.5 ft. and horizontal of 500 ft. crosses the ship channel.
BERTHING:
Port of Redwood City:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
No. 1	500	35	General cargo and bulk cement through pneumatic pipelines.
No. 2	355	35	
No. 3	450	35	General cargo, heavy lifts and scrap metal.
No. 4 (New Berth)	450	35	General cargo USGS facility.
No. 5	500	36	Designed to accommodate large tankers, general cargo and heavy lift cargoes.

Private Facilities:

Berth	*Length* (ft.)	*Depth* (ft.)	*Remarks*
Ideal Cement Co.	649	12	Barge unloading dock. Used for storage (not in use).
Lone Star Industries	496	18	Barge dock for loading cement.
Lone Star Industries	20	16	Oil berth. Not in use.
Leslie Salt Co.	200	33	Elevator berth used for loading crude bulk salt.

Capabilities include complete facilities to handle LASH (Lighter Aboard Ship) system.
DEVELOPMENTS: See "Plan Book".
AUTHORITY: Port of Redwood City, 475 Seaport Boulevard, Redwood City, California 94063. *Tel:* (415) 365-1613. *Telex:* WUT 172251 Portrdcy. *Contact:* Fred J. Di Pietro, Port Manager.

RICHMOND, California: 37.56 N. 122.25 W.

(See Plan Book)

(A) STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.
(B) OTHER TERMINALS AT RICHMOND.

(A) STANDARD OIL COMPANY OF CALIFORNIA TERMINAL.

DOCUMENTS and all general information, refer to "San Francisco".
LOCATION: Richmond Long Wharf and Point Orient Wharf are situated on N.E. side of San Francisco Bay, a protected harbour. The refinery and storage tanks are near the wharves.

The exact position of the Long Wharf is Lat. 37° 55′ 20″ N. Long. 122° 24′ 35″ W. Wharf heading is 324° to 144°.

The exact position of the Point Orient Wharf is Lat. 37° 57′ 20″ N., Long. 122° 25′ 39″ W. Wharf heading is 356° to 176°.

There is adequate anchorage and room for manoeuvring in the bay.
DOCUMENTS: To clear vessel for entry, the Custom House requires the following documents:

Last Foreign Port Clearance.
Vessel's Register.
Vessel's Tonnage Tax Receipts.
Master's Oath of Entry.
Certificate of Financial Responsibility.
General Declaration.

If vessel is arriving from (or departing for) a foreign port, Master must also furnish:

6 Copies Crew List.
3 Copies Store List.
3 Copies Passenger List.
3 Copies Curio List.
4 Copies Cargo Manifest.

The Boarding Inspectors may require additional information.
PILOTAGE: Federal and/or State Regulations require licensed pilotage in and out of San Francisco Bay. Make arrangements for this ahead of time with the Ship's Agent.

Pilots may be picked up near the Light Buoy, 9 miles W.S.W. of the entrance to San Francisco Bay: Lat. 37° 45.0′ N., Long. 122° 41.5′ W.

To signal for Pilots:
In Fog – Approach, San Francisco approach Lighted Horn Buoy "SF", lay to, and blow four long blasts.
When Clear – By day, hoist International Code Flag "G".
By night, make four long flashes on signal light.

When necessary, Pilots may be contacted on 2182 kHz or VHF Channels 10 (156.5 MHz) and 16 (156.8 MHz). The Pilot boats may also be contacted by radio telephone.

The Pilot will serve as the Mooring Master until the ship is berthed.

If vessel goes to anchorage, a licensed Bay Pilot will be required before vessel can proceed to berths.
MAX. SIZE: The main ship channel into San Francisco has a project depth of 50 ft. However, the 35 ft. depth of the Southampton Shoal channel restricts the size of ships to wharves.
LIGHTENING: When a lightening operation is necessary the terminal management will direct the ship to Anchorage No. 9. The ship to be lightened will install fenders before the lighter ties alongside. The terminal will provide the fenders. The lightening Supervisor and ship's officer will hold a meeting to discuss the cargo transfer. During transfer, follow the same precautions and safety regulations that apply to cargo transfer at the wharf. The transfer rate will be regulated by the lightening vessel. The lightening Supervisor will observe all the lightening operations. The terminal will provide oil spill recovery equipment during lightening.
HEALTH: See "Health: All Ports" before first U.S.A port (Albany). Illness reports made to San Francisco Quarantine Station.
Quarantine and Pratique: Vessels are not required to pass a quarantine inspection. It is necessary that vessels notify their Agents at least 2 days in advance of arrival in San Francisco Bay if sickness or disease is on board. The Agent shall notify Public Health for further action if necessary.

All vessels arriving from foreign ports will require clearance by the following U.S. Government Agencies: Customs House, Immigration Service, Department of Agriculture.

The vessel's Agent should make arrangements for the inspectors to board dockside or at anchorage.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO/VHF: The official language of the terminal is English. Therefore, vessel must have personnel on duty at all times who can communicate in English with the wharf personnel.

San Francisco Harbour Advisory Radar System, designated bridge-to-bridge frequency: VHF Channel 13 (156.65 MHz).

Federal communication regulations require that at any time VHF radio is in operation, Channel 16 must be monitored (156.8 MHz distress and calling frequency).

The U.S. Coast Guard requires all vessels anchored in San Francisco Bay to maintain a radio listening watch on VHF-FM Channel 13 (156.65 MHz) when the wind is 20 knots or greater. Any ship not equipped with Channel 13 shall maintain the listening watch on Channel 16 (156.8 MHz).

The 2-3 MHz radio telephone call letters for the San Francisco Bay area are KLH.

Richmond Long Wharf (radio call KCE 373 – Chevron Shipping) is equipped with VHF radio, manned 24 hours per day. Channel 10 (156.5 MHz) is the operating frequency. While at anchor, in San Francisco Bay, vessels should maintain normal listening watches on VHF Channel 10.

ETA Requirements:

The Master of a vessel bound for San Francisco Bay is requested to advise Chevron Shipping (Cables address: Chevronship Richmond Sanfrancisco) of ETA, 7 days, 3 days and again 1 day (24 hours) before arrival at the wharf. First ETA message should include:

Estimated time of arrival at the wharf (local time).
Last port of call.
Estimated deep draft on arrival.
Quantity of ballast to be discharged.
Quantity and grade of cargo to be transferred.
Distance from bow to cargo and bunker manifolds.
Size and type of cargo and bunker connections.
Quantity and grade of bunkers and lubes required.
Quantity of fresh water required.
Number of crew replacements expected.
Amount of provisions and stores to be loaded.
Repair work anticipated.
Make 24 hour ETA as accurate as possible and whenever arrival time changes, by 1 hour or more, send a correcting message promptly.

BERTHING: At least 1 hour before docking contact Chevron Shipping, in Richmond, by VHF radio (Channel 10, 156.5 MHz) and request a berth assignment. They will try to berth vessel as soon as it arrives. However, if no berth is available, anchor in the prescribed anchorage (as directed by the Captain of the Port) and maintain radio contact with Chevron Shipping, Richmond.

Recommended Docking Practices: The terminal require the use of adequately powered tugboats when docking at the wharves. Chevron Shipping Company has two tugs that can be hired, provided arrangements are made prior to vessel's arrival.

(a) In order to ensure maximum safety while berthing and unberthing ships at Long Wharf and Point Orient Wharf, the following minimum tug assistance is required:

			Minimum Total Horsepower Required	
Vessel Size		*No. of Tugs*	*Mooring*	*Unmooring*
Up to	20,000 d.w.t.	1 or more	1,000 h.p.	1,000 h.p.
20,001 to	50,000 d.w.t.	2 or more	2,000 h.p.	1,500 h.p.
50,001 to	80,000 d.w.t.	2 or more	3,000 h.p.	2,000 h.p.
80,001 to	100,000 d.w.t.	2 or more	3,500 h.p.	2,500 h.p.
Over	100,000 d.w.t.	2 or more	4,000 h.p.	3,000 h.p.

(b) Bow thrusters are acceptable provided the horse power rating equals or exceeds the minimum requirements.

(c) Always stem the tide when docking.

(d) If possible, avoid steep-angle approaches.

(e) In view of the strong tidal currents at both wharves, make sure vessel is moored securely. Check on the number of lines and their strength. Pay special attention to the fore and aft leads.

Gangway: Rig gangway properly and safely, with handrails and adequate illumination, suspend a safety net under gangway. If vessel does not have a gangway, the pier has some available in limited sizes. However, the Company cannot be liable for the manner in which the ship's crew rigs the gangway. Berths 1 and 4 have permanent gangways installed.

There are 2 piers that accommodate oil transfers. They are referred to as Richmond Long Wharf and Point Orient Wharf.

Long Wharf: Richmond Long Wharf, a "T"-head pier, has an overall length of 3,396 ft. It consists of concrete and wooden piles and a concrete superstructure connected to the shore, 4,200 ft. away by a piled causeway. The fender-to-fender width is 132.5 ft.

Berths 1, 2 and 3 deck level is 15.5 ft. above MLLW. Berth No. 4 deck level is 25 ft. above MLLW.

There are four deep water berths on the West side. Berth No. 1 is 950 ft. long, Berth No. 2 is 650 ft. long, Berth No. 3 is 700 ft. long and Berth No. 4 is 1,050 ft. long. They are numbered 1 through 4 from South to North. Water depth is maintained at 38 ft. at MLLW. There are two inner Berths No. 9 and No. 11 that are used primarily for barge loading or discharging. Water depth is maintained at 18 ft. at MLLW.

Point Orient: The Point Orient Wharf, an "L"-head pier, is 2.25 miles North of the Long Wharf. It is 504 ft. long and 60 ft. wide. It is supported on wooden piles and has a causeway that extends 1,200 ft. to the shore.

There is one ship berth, No. 1 where the water depth is 32 ft. at MLLW. There is also one barge berth No.2. Deck level is 14.5 ft. above MLLW.

LOADING AND UNLOADING: Berth No. 2 is fitted with 4 in., 6 in, and 8 in. hoses for cargo transfer. Berth No. 1 has two 12 in. and two 16 in. Chicksan loading arms. Berths No. 3 has two 8 in. and four 12 in. Berth No. 4 has two 12 in. and four 16 in. arms.

NOTE: All terminal flange facings are carbon steel ANSI 150 lbs. rating.

No cast iron is allowed outside of (and including) the first valve on the vessel's cargo or bunker system.

Berth vessel so that its manifold is positioned within the horizontal and vertical limits of the hoses or Chicksan arms.

Cargo Transfer:

(a) Pre-Transfer Declaration of Inspection – Before cargo transfer begins, the Wharfmaster and Vessel Co-Ordinator will board vessel. They will discuss the safe transferral of your cargo. They will also review the Declaration of Inspection and sign it with you when all items are understood and agreed upon.

(b) Inspection During Cargo Transfer – These representatives will also visit the ship during cargo transfer. With the approval of Deck Watch, they will check to ensure that safe working practices are being observed by both ship and wharf.

(c) Minimum Cargo-Handling Crew – When transferring cargo or ballast, the officer in charge of cargo transfer must have at least two assistants: one to maintain watch on the open-deck cargo transfer manifolds; the other to assist in handling valves, tank gauging, or shutdowns of transfer pumps in case of emergency. Other crew members may be needed depending on the size and complexity of ship transfer system. These requirements will be developed at the pre-cargo-transfer conference. When loading ship's bunkers and lubes, the Master and Chief Engineer will assure the terminal that this transfer will be handled in a similar manner.

Loading Rates: Several products can be loaded at each berth. Loading rates depend on a multitude of situations. These will be discussed at the pre-cargo-transfer conference.

Unloading Rates: Unloading rates also depend on many things – vessel's pumps, the size and availability of terminal lines and tanks, refinery operations, etc. The pre-cargo-transfer conference will develop the estimated unloading and deballasting rates and procedures.

To expedite cargo transfer, it may be necessary to use booster pumps. To eliminate hazards to this equipment, notify the Berth Operator 15 minutes ahead of time whenever you are going to: Stop or change any cargo transfer rate, strip any tanks, switch tanks.

Maximum Temperature and Pressure Limits: The terminal cargo-handling system is designed to comply with the 150 lbs. ANSI flange rating. For example: 275 psig at 100°F, 240 psig at 200°F, etc. Special restrictions apply for aromatic and other hazardous stocks. These will be explained during the pre-cargo-transfer conference.

Tank Gauges: To ensure proper handling of each cargo, the terminal requires U.S. flag company vessels to be gauged every *two* hours and matched with shore-tank gauges. Non-company vessels are not required to gauge, but may wish to compare their gauges against the shore gauges. Transfer operations will shut down immediately if:

— the transfer rate is over 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 20% of that transfer rate.

OR

— the transfer rate is under 1,000 b.p.h. and there is a discrepancy in the tank's gauges that amounts to more than 30% of that transfer rate.

For example: Vessel arrived with 120,000 bbls. of crude. First 2 hour gauge at 1000 hrs. Estimated rate 7,000 b.p.h.

	Ship	*Shore*	*Difference*
1000 hrs.	14,241	13,996	245
1200 hrs.	28,435	25,643	2,792

As the estimated transfer rate is 7,000 b.p.h., the allowable difference would be 1,400 bbls. The 245 bbls. difference at 1000 hrs. is OK and transfer should continue. The 1200 hrs. gauge of 2,792 bbls. difference is out of tolerance and the transfer should be discontinued until discrepancy can be resolved.

BALLAST: Ballast facilities at Richmond Long Wharf only (max. capacity 25,000 bbls. – normal capacity 15,000 bbls.). None available at Point Orient. However, arrangements for this to be made through Agent before arriving at the wharf. All ballast to be discharged must be pumped to shore while berthed at wharves.

POLLUTION: The Federal Water Pollution Control Act prohibits the discharge of oil or oily waste in the waters of San Francisco Bay which causes a film or sheen on the water or discolours it or causes a sludge or emulsion beneath the surface of the water.

Regulations enforced by the Bay Area Pollution Control District also prohibit the emission of smoke and soot. Vessel can be fined if it emits visible smoke (Ringelmann 1) for more than 3 minutes in one hour, or blows its boiler tubes enough to create a soot nuisance on shore.

In addition, the terminal has certain regulations designed to eliminate obnoxious odours. Vessel may, therefore, be required to follow special procedures before tank cleaning, loading or ballasting. If, in spite of precautions, vessel does cause such odours, loading or unloading operations may be stopped.

OIL INSPECTIONS: To control product quality, the terminal has several requirements for sampling and gauging the oil as it is being transferred. These requirements will be explained during pre-cargo transfer conferences. Outside inspection service is provided by the following independent companies:

Charles Martin & Company, 488 Wright Avenue, Richmond, California 94802. Tel. (415) 232-5270.

E. W. Saybolt Company, 889 Ensenada Avenue, Berkeley, California 94710. Tel. (415) 525-0417.

Caleb Brett U.S.A. Inc., P.O.Box 673, Station A, 310 29th Street, Richmond, California 94808. Tel: (415) 236-1733. Telex: 171-330.

S. G. S. Control Services Inc., 2917 MacDonald Avenue, Richmond, California 94804. Tel: (415) 236-3007.

MEDICAL: No facilities at wharves. Local ambulance may be reached at: Cadillac Ambulance Service (415) 234-3242; Alhambra Air-ground Ambulance Service (air) (415) 228-1096; California Aviation Service Inc. (air) (415) 569-3855.

TIME: Local time: Pacific Standard Time GMT minus 8 hours or Zone plus 8 hours.

(Note: From the last Sunday in April to the last Sunday in October, this is modified by use of Daylight Time to GMT minus 7 hours or Zone plus 7 hours)

All communications should refer to local time.

FRESH WATER: Potable water available. Make arrangements through Agent.

FUEL: Many grades of bunkers, diesel and lubricating oils are available in bulk or drum quantities. Agents order them from Supply and Distribution or Chevron International at least 48 hours before vessel arrives, otherwise, vessel may be delayed.

To take on bunkers and diesel, vessels must be able to connect to terminal's 4 in., 6 in. and 8 in. hoses in Berth 2, connect to 8 in. Chiksan in Berth 3, to 12 in. Chiksans in Berths 1 and 4.

PROVISIONS: Provisions and stores are available through ship's Agent. However, they will be loaded only at the Richmond Long Wharf, and only when the loading does not interfere with cargo or ballast transfer. No hydrocarbons, paints, detergents or other polluting materials will be allowed to go aboard the vessel by means of slings or cargo nets. If the vessel is large and is not equipped with booms, the Agent may need to supply a spark-proof crane for the loading. Stores will not be handled by wharf personnel. Contact Wharf Master for weight restriction of equipment on the wharf.

REPAIRS: There are many major repair facilities located in the San Francisco Bay Area. The Agent can probably make arrangements for use of their services.

Repairs at the terminals are not normally permitted on non-company vessels, unless it is absolutely necessary in order to move the vessel. Any repair work that would necessitate hot work must have approval from refinery management. No repairs will be allowed that would delay cargo transfer or lengthen the transfer time.

REPATRIATION: Facilities exist for repatriating of crew by sea or air. Make the arrangements through ship's Agent, and notify the terminal management.

STORING: See "Prelims", page viii.

1. Vessels cannot be stored by barge while at docks; however, they can be stored by small trucks.
2. Storing by truck requires the truck to be cleared by operations and towed into location. No paint or hydrocarbon may be lifted by net over local waters. This is described in the "Provisions".
3. Trucks can come alongside vessel (within 50 ft. of vessel).
4. There are no forklifts available at the terminal and the rental of one requires the rental of a "spark approved" forklift. Arrangements must be made with the Wharf Master.
5. All customs rules and regulations are enforced.
6. Local riggers can be employed to help get stores aboard vessel, but the vessel must make arrangements with ships Agents, and all storing of vessels must be approved by Wharf Master.

Also see "Provisions".

SHORE LEAVE: Chevron Shipping Co. provides bus service from the Long Wharf to shore and from there ship's personnel can connect with local taxi or bus service nearby. For transit – system information, call (415) 232-5665.

No ship's commercial passengers are ever allowed to board or leave a ship at the wharves.

GENERAL:

Tides and Currents: The maximum tidal range is approximately 9 ft. and the mean range is 4.2 ft.

Tidal currents in the wharf area can be very strong. They generally run in a North'ly and South'ly direction.

Winds: Winds of varying strength may come from any quarter. The normal wind, however, is from the N.W. in Summer, and S.W. in Winter.

Visibility: The visibility in this area of San Francisco Bay is generally fair to excellent, with occasional late evening fog in the Summer lasting until noon the following day. In the Winter, morning or tule fogs frequently occur. The Winter fogs are generally more dense than those of Summer.

Weather: The local weather is usually moderate, with average temperatures ranging between 40°F and 85°F.

The U.S. Coast Guard radio stations make scheduled weather broadcasts (preceded by a preliminary call on 500 kHz and 2182 kHz) at the times and on frequencies shown below:

Radio Telegraph – NMC San Francisco, Calif. 420 kHz, 2000 hrs. and 0900 hrs. PST.

Radio Telephone – NMC San Francisco, Calif. 2670 kHz, 1800 hrs. and 0600 hrs. PST.

VHF Radio – KHB 49 San Francisco, California 162.55 MHz.

Navigation: Master is required to notify the U.S. Coast Guard Captain of the Port at least 24 hours before arriving in the Bay. Master will satisfy this requirement automatically if he reports in accordance with the U.S. Coast Guard's voluntary Automated Merchant Vessel Report (AMVER) System.

On entering the Bay, follow the traffic-separation scheme shown on United States Coast and Geodetic Survey Chart 5072.

Charts and Publications: The following official charts and publications are recommended for use when entering San Francisco Bay:

United States Coast & Geodetic Survey Charts:
No. 5002 – San Diego to Point St. George.
No. 5072 – Gulf of the Farallones.
No. 5532 – San Francisco Entrance.

West Coast of North and South America Tide Tables, published by U.S. Coast and Geodetic Survey.

Tidal Current Charts – San Francisco Bay, published by U.S. Coast and Geodetic Survey.

Coastal Pilot No. 7 for West Coast of United States, published by U.S. Coastal and Geodetic Survey.

U.S. Coast Guard Regulations 33 CFR 154, 155 and 156, published by U.S. Coast Guard.

Current Edition of Operating Manual, S.F. Harbor Advisory Radar, published by U.S. Coast Guard.

Light Lists for United States and Possessions, published by U.S. Coast Guard.

Radio Navigational Aid, Pacific and Indian Oceans (Publication No. 117113), published by U.S. Hydrographic Office.

Wharf Communication: The Richmond Wharves are equipped with a positive and dedicated ship-to-terminal radio communication system. On arrival, vessel will be provided with one radio (walkie-talkie). It must be with an English-speaking person on duty at all times. Vessel will be instructed in the proper use of this radio during the pre-cargo transfer conference. If the radio is not returned, a charge of $2,500 will be levied.

Telephone: A telephone will be placed on the open deck of the ship near the gangway. It is to be used for the local calls only. the following is a partial list of commonly used numbers:

Wharf Master	4388
Vessel Co-Ordinator	4620
Head Operator (PAD) Long Wharf	4494
Terminal Superintendent	2314

There are two public telephones on the Long Wharf for outside calls, one between Berths 1 and 2 and one at Berth 3. There is also a public telephone at Point Orient Wharf.

SAFETY REGULATIONS:

A. General – Observe the following regulations AT ALL TIMES while berthed at the wharves:

1. Boiler-Tube Blowing – Do not blow boiler tubes and take every precaution to prevent sparks from escaping from the funnel. If vessel safety is at stake, stop transfer operations and move the ship to anchorage before blowing the tubes. In case vessel has boiler trouble, notify Chevron Shipping Co. who in turn will notify the Air Pollution District Control.
2. Cargo Tank Tops:
   (a) Before berthing, all tank tops, ullage plugs, and gauge tapes must be closed and dogged down unless the Master certifies that the tanks are gas free.
   (b) Cargo and bunker tank tops must be kept closed. This also applies to permanent ballast tanks.
3. Cargo Connections, Unused – blank unused cargo and bunker connections. A proper-sized bolt in *every other hole* is the minimum requirement. Offshore risers on systems being used are to be fully bolted.
4. Engines – Keep the engines ready and the vessel trimmed so it can leave the piers under short notice. If the vessel becomes unable to get underway 2 tugs of adequate size will be standing by at all times.
5. Fire Fighting – Keep fire and emergency equipment in readiness. At least 2 fire hoses to be uncoiled and laid out at the vessel's manifold area. Place two portable fire extinguishers near the manifold.
6. Gas Venting:
   (a) Ullage Holes – Keep all ullage or gauge tapes completely closed (not secured) except for intermittent periods needed to ullage or gauge ship's tanks.
   (b) Flame Screens – When open, all ullage ports must be protected by clean, well-fitted flame arrestors of wire-gauge screens: these must be of an approved type and have no defects.
7. Gas Freeing and Tank Cleaning – Do not gas-free or clean any tanks at berth without prior approval of terminal management.
8. Gangways – Tend the gangway and keep it safely rigged, secured and lighted.
9. Mooring Lines – Tend mooring lines to keep them taut and keep the vessel in position. See that tension winches are on manual brake. During ebb tide and East winds, when the ship has a tendency to drift away from the pier, tend the mooring lines with special care.
10. Portholes – Portholes and passageway hatches facing the cargo transfer area must remain closed. Portholes facing the wharf must also remain closed or be suitably screened.
11. Repairs – While at berth, do not perform any repair work, hot work, or maintenance work without prior approval from the terminal management. Hot work will require *written* approval by terminal management.
12. Radio – At all times in port, keep the radio transmitter and aerials switched off and grounded. Portable radios (walkie-talkies) that are certified intrinsically safe may be used.
13. Sea Suctions and Bilge Valves – See that all ship's sea, bilge, and overboard discharge valves connected to the cargo system are tightly closed, lashed and sealed in accordance with U.S. Coast Guard Regulation 33 CFR 155.
    The seals are *not* to be broken while berthed except in the presence of the Vessel Co-Ordinator or in case of emergency.
14. Sewage Discharge – Install deflection plate over the sewage discharge if it is capable of discharging on the wharf.
15. Smoking – Allow smoking on board only in places which the Master has personally approved. There is to be NO SMOKING ON THE WHARF OR WEATHER DECK OF THE VESSEL AT ANY TIME.
16. Stern Discharge Line – Keep the stern discharge line, if any, blanked at all times.
17. Towing Wires – Keep the towing wires (fire wires) for emergency use, lowered to the water's edge from the offshore bow and stern. Tend them to keep the "eye" near the water's edge, where they can be reached by tugs in case of emergency.

B. Cargo Transfer – Observe the following additional regulations DURING CARGO TRANSFER:

1. Air Intakes and Air Conditioning Units – Close any central air-conditioning or fresh-air intakes which might take in gas. Close all intakes within a combined total of 100 ft. vertically and horizontally of cargo tank openings and venting points. External window-type air-conditioning units that face the cargo transfer area must be kept disconnected.

2. Communication – Ship/Shore – Station a responsible member of the crew on the loading deck by the transfer connections to maintain communications or remain in visual contact with the Berth Operator. He is to advise the Operator when changes in rates are required, using radio pack sets or voice contact.
3. Passageway hatches to open weather decks facing the cargo area and wharf must be kept secured except for momentary passage.
4. Electric Lights and Cables – Use only vapour-proof electric lights of an approved type, on the open deck. Disconnect portable electrical equipment on the open deck unless certified for use in hazardous areas.
5. Galley Fires – Light no galley fires unless you can first assure the terminal that they present no hazard to the cargo transfer.
6. Hand Torches (Flashlights) – See that hand torches used during cargo transfer are of an approved type, certified as safe in hazardous locations.
7. Hoses:
   (a) Before transfer, inspect cargo-loading hoses or arms to see that they are in good condition, *fully bolted,* and properly connected.
   (b) The hoses must be supported at not more than 12 ft. intervals with a bridle or mat to minimise kinks or chafing. They must not be bent to a radius less than 12 times their diameter. Do not use single slings when taking aboard or supporting during transfer.
   (c) The hose or arm-to-riser connections must have drip pans of adequate size installed under them.
   (d) When cargo transfer has concluded, each hose/arm is to be drained via the drain valve and blank-flanged *before* being removed from the vessel. The Terminal Head Operator is to be aboard the vessel to oversee the connecting and disconnecting of the loading arms and, also, to alert crew members when passing the arms.
8. Scuppers – All deck scuppers must be plugged and cemented oil tight or sealed with a Coast Guard approved device. Do not remove the plugs until ship has departed, except when necessary to drain off rain water. In such cases, supervise the draining closely and replace the plugs immediately. Install splash boards (on dock side) over scuppers. Cement is to be supplied by the ship.
9. Special Stock Hazards:
   (a) Static-Ignition Hazards – Some kinds of stock require special precautions because of the static they accumulate. Their handling will also be fully discussed during pre-cargo transfer inspection. Lube oils may be loaded through ship's risers or connections to butterworth plates. No overall loading is permitted.
   (b) Hydrogen-Sulfide Hazards – Some kinds of crude may contain dissolved hydrogen-sulfide or mercaptans in concentrations which would cause the gases vented during tanker ballasting to be hazardous or odorous. Do not ballast or load into cargo tanks that might contain H_2S or mercaptan vapours, unless the tanks have been passed for loading by the wharfmaster. The vessel must proceed to sea for clean-up prior to loadback if the wharfmaster deems the tanks unsuitable for loadback.
   (c) Aromatic-Stock Hazards – Special precautions are required for toxic cargoes such as aromatics. It is recommended that Masters review the instructions by Owners/Charterers about toxic chemical hazards.
10. Valve Shut-off – Many new tankers have motor-operated valves, operated from a central location. Never operate these valves to close off against full oil-delivery rates unless the valve closure action takes at least 60 secs. Closure times less than 60 secs. may result in surge and hammer of sufficient force to rupture the loading arm/hoses.
11. Ventilators – Keep ventilators suitably trimmed with regard to tank vents and prevailing wind conditions to prevent entry of flammable vapours.

AUTHORITY: Standard Oil Co. of California, Richmond, California.

(B) OTHER TERMINALS AT RICHMOND

BERTHING: *Levin-Richmond Bulk Commodity Wharf:*
Owners: Levin-Richmond Terminal Co.
Operated by: Levin-Richmond Terminal Co.
Use: Receipt and shipment of various dry-bulk commodities.
Water Depth: 35 ft. - 36 ft.
Mechanical handling facilities: On wharf; 4×50 ton electric, travelling full portal gantry cranes, each with 100 ft. boom and 2×45 ton electric travelling full portal gantry cranes, each with 118 ft. boom.
Dimensions: Length of face 600 ft.
Remarks: 50,000 sq.ft. warehouse. Railroad on premises.

Santa Fe Sugar Dock:
Owned and operated by: Atchison, Topeka and Santa Fe Railway Co.
Use: Receipt of sacked sugar by inland waterway vessels for transfer to railroad cars.
Dimensions: Length of face 545 ft., lower end 51 ft.; depth alongside at MLLW 24 ft.

Levin Metals Corporation:
Owner: City of Richmond Port Commission.
Operated by: Levin Metals Corporation.
Use: Scrapping of ships, consideration of scrap and export loading of cargo.
Dimensions: Length of face 555 ft. each; Pier 1 depth 35 ft. – 38 ft., Pier 2, 17 ft.

Richmond Container Terminal No. 3:
Owners: City of Richmond.
Operated by: Matson Terminals Inc.
Use: Receipt and shipment of containerised cargo in foreign and domestic trade.
Dimensions: Length of face 1,009 ft.; depth alongside at MLLW 41 ft.
Mechanical handling facilities: Two rail-mounted dock cranes, two transfer devices and two bridge cranes. Semi-automated operation.
Remarks: Face of wharf is in line with the face of adjacent wharf, providing 1,550 ft. of continuous berthing. Area of container terminal – 16 acres plus back-up area.

Richmond Terminal No. 4 Wharf:
Owners: City of Richmond.
Operated by: Richmond Terminal Agency, Pacific Molasses Co. Ltd., & Dorward & Sons Co.
Use: Bulk Liquids.
Dimensions: Length of face 1,047 ft.; South side 175 ft.; North side 100 ft.; depth alongside at MLLW 32 ft. - 50 ft.

Canal Industrial Park:
Owner: City of Richmond Port Commission.
Operated by: Canal Industrial Park (Pasha Truckway).
Use: Import service and delivery of foreign automobiles; ship repairs.
Dimensions: Length of face 700 ft.; depth alongside at MLLW 35ft.; usable berthing space with dolphin 900 ft.
Mechanical handling facilities: Mobile handling equipment available. Complete range of crane and ship facilities for major ship repair.

TANKERS: *Atlantic Richfield Tanker Dock:*
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face approx. 250 ft.; lower and upper sides 40 ft. each; depth alongside at MLLW 35 ft.

Atlantic Richfield Barge Dock:
Owned and operated by: Atlantic Richfield Co.
Use: Receipt and shipment of petroleum products by barge; bunkering vessels.
Dimensions: Length of face 150 ft.; depth alongside at MLLW 34 ft.

Richmond Terminal No. 1 Wharf:
Owners: City of Richmond.
Operated by: Richmond Terminal Agency.
Use: Receipt and shipment of petroleum products, chemicals and petrochemicals.
Dimensions: Length of face 557 ft.; depth alongside at MLLW 35 ft.

Richmond Terminal No. 2 Liquid Cargo Wharf:
Owners: City of Richmond.
Operated by: Richmond Terminal Agency.
Use: Receipt and shipment of vegetable oils, chemicals and petrochemicals.
Dimensions: Berthing length 720 ft.; depth alongside at MLLW 35 ft.

Texaco Wharf:
Owners: Texaco Inc.
Operated by: Texaco Inc.
Use: Receipt and shipment of petroleum products.
Number of Berths: 1.
Water Depth: 35 ft.
Dimensions: Length of face 600 ft.

Time Oil Company Wharf:
*Owned and operated by:*Time Oil Co.
Use: Receipt and shipment of petroleum products.
Number of Berths: 1.
Water Depth: 35 ft.
Special Remarks: 3×10 in. pipe-lines extend to 25 steel storage tanks in rear; total capacity of 618,000 barrels.

Union Oil Co. Tanker Dock:
Owned and operated by: Union Oil Co. of California (also services GATX Terminal).
Use: Receipt and occasional shipment of petroleum products; bunkering vessels.
Dimensions: Length of face 225 ft.; lower end 45 ft.; upper end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.

Union Oil Co. Barge Dock:
Owned and operated by: Union Oil Company of California.
Use: Shipment and occasional receipt of petroleum products; bunkering vessels.
Dimensions: Length of face 150 ft. (approx.); lower end 45 ft.; depth alongside at MLLW 35 ft.
Mechanical Handling Facilities: Hose handling at wharf is by ship's gear and small tractor crane.
Remarks: Wharf and Tanker Docks are spaced about 230 ft. apart; together they provide 1 large tanker berth.

BANKS:

Bank of America, Richmond Main Office, 261 Harbour Way South, Richmond, California. Tel: 415-231-1729. Telex: TWX (San Francisco) 910 372 7720.

Central Bank, Civic Center Office, 2705 Macdonald Avenue, Richmond, California. Tel: 415-233-5710. Telex: TWX (Oakland) TLX 17-1329.

Crocker National Bank, 3900 Macdonald Avenue, Richmond, California. Tel: 415-235-6458.

Wells Fargo Bank, 1221 Macdonald Avenue, Richmond, California, Tel: 415-232-3435. Telex: TLX 34-0284 (San Francisco-International).

EMERGENCY CO-ORDINATION CENTRE: The Emergency Co-ordination Center for the Port of Richmond is the U.S. Coast Guard, San Francisco, California. CA. Tel: (415) 556-2103.

SURVEYORS: Surveyors are available from various San Francisco Bay Area companies and organisations.

STORING: See "Prelims", page viii.

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Normal U.S. Customs Regulations apply.
6. Yes.

AUTHORITY: City of Richmond, Port of Richmond, City Hall – Room 301, 27th Street and Barrett, Richmond, California 94804. *Tel:* (415) 231-2110. *Telex:* TWX 910-382-6016. *Contact:* Sal N. Bose, Port Director.

RICHMOND, Virginia: 37.32 N. 77.25 W.

(See Plan Book)

LOCATION: On the James River, 90 miles from Chesapeake Bay.

DOCUMENTS: See "Hampton Roads".

PILOTAGE: Entrance through Hampton Roads. Virginia Pilots Assn. original contact same as for Norfolk, Virginia. Pilots will arrange for change of Pilots to proceed up the James River.

ANCHORAGE: Hampton Roads anchorage, also river anchorage approximately 40 miles up river, shown as "Upper Brandon" on charts.

RESTRICTIONS: Navigation of river above Upper Brandon recommended in daylight hours, except vessels under 250 ft. length.

MAX. SIZE: Max. length recommended by Pilots 550 ft., draft 21 ft. 6 in. any tide, depth of channel 25 ft. MLW tide, change 3 ft. 5 in.

HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: See "Hampton Roads".

TUGS: Not needed for berthing unless vessel is to be turned around on arrival. Tug available at Terminal on reasonable notice.

BERTHING: Vessels berth alongside wharf 1,250 ft. long. Depth 25 ft. at MLW.

Turning Basin: 700 ft. × 1,600 ft.

CRANES: 1×10 ton electric crane, 3 additional cranes (65 ton, 35 ton and 15 ton).

BRIDGES: 2 bridges across river between Hampton Roads and Richmond. No specific time or notice required.

STEVEDORES: Arrangements to be made through Agents. 48 hours notice requested.

MEDICAL: Vessels cleared by U.S. Health Officials at Hampton Roads before proceeding up river.

DENSITY: Water considered as 100% fresh.

FRESH WATER: Available at pier.

FUEL: Bunkers only available at Hampton Roads.

GANGWAY/DECK WATCHMEN: None required, unless crew detained by U.S. Immigration.

OPENING/CLOSING HATCHES: On bulk cargo vessels, usually opened and closed by ship's crew, also steel hatches handled by ship's crew, sometimes determined by terms of Charter.

CERTIFICATES:

Ship's Register.
Load-line Certificate.
Safety Certificate.
Tonnage tax receipts.
Certificate of nationality.
Passenger Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes (1 carton for 2/3 days) if further allowance is needed Customs Officer will return on request of Master. Wine and Spirit, 1 bottle per officer, Customs Officer will return on request of Master.

IDENTIFICATION CARDS: Immigration landing permit required.

CONSULS: No consuls in Richmond, handled through Hampton Roads if needed.

REPAIRS: Only minor repairs, no shipyards.

REPATRIATION: Handled through Norfolk, Virginia.

AIRPORT: Approximately 10 miles from port, regular airline service.

TIME: Eastern time GMT minus 5 hours. Daylight saving time from first Sunday in May to last Sunday in October.

HOLIDAYS: January 1st, January 15th (Martin Luther King Day), May 30th, July 4th, Labour Day (1st Monday in September), Thanksgiving Day, Christmas Day.

POLICE/AMBULANCE/FIRE: Police 780-9461; Ambulance 780-9404; Fire 780-9191.

TELEPHONES: No arrangements for placing aboard vessels.

SHORE LEAVE: Allowed. Proper papers should be available.

AUTHORITY: Port of Richmond.

Operator: Richmond Waterfront Terminals Inc., 5000 Deepwater Terminal Road, Richmond, Virginia 23234. *Contact:* J. N. Collins, Terminal Manager (*Tel:* 275-9248).

RIVERHEAD, Long Is., New York: 41.00 N. 72.39 W.

(See Plan Book)

LOCATION: The fixed Offshore Tanker Berth is situated 1.2 miles offshore from the North shore of Long Island in Long Island Sound, 4 miles 257° true from the beacon on Mattituck Inlet breakwater and 12.7 miles 178.5° true from Falkner Island Lighthouse. The geographic position of the centre point of the Operating Platform is in Lat. 41° 00′ 01″ N., Long. 72° 38′ 50″ W. The platform has 4 navigation lights situated on each corner of the structure flashing every second. A similar navigation light is also situated on each of the East and West mooring dolphins.

DOCUMENTS: See "New York".

Terminal will provide "Declaration of Inspection" form which must be completed before cargo transfer begins.

PILOTAGE: Pilot is arranged for by ship's Agent. Vessels will pick up Pilot South of Point Judith Buoy No. "2". Pilot boarding position is Lat. 41° 18′ N., Long. 71° 29′ W. Ships with draft exceeding 50 ft. should keep Point Judith 4 miles distant to keep clear of charted wreck and shoals. Pilot boats "Northeast Pilot" or "Rhode Island Pilot" watch Channels 16, 13 and 18A. Distance to platform is approximately 65 miles. The Pilot will also perform the duties of Docking Master while vessel is at the Offshore Platform. It is required that the Pilot remain on board on standby while the vessel is moored at the Offshore Platform. Vessels with 50 ft. or deeper draft require a Pilot's assistant to assist regular Pilot in navigating the vessel into Long Island Sound and to the Offshore Platform.

ANCHORAGES: Vessels awaiting berth shall anchor to 1.5 miles North of the platform facility. Holding ground is good and 90 fathoms (6 shackles) in the water is considered safe.

Platform crew under the supervision of the Marine Supervisor will board about 1 hour prior to scheduled mooring time. Generally launch does not arrive before this time, except for emergencies.

The Marine Supervisor will board the vessel with the boarding party to provide communications and information.

RESTRICTIONS: Generally, vessels are moored on any stage of the tide and at night when weather conditions permit.

MAX. SIZE: Length in North Berth 1,150 ft. LOA and draft not to exceed 60 ft. Length in South Berth 700 ft. LOA and draft not to exceed 42 ft.

COMMUNICATIONS: Telephone at Riverhead 727-5600. (Code for station to station: Dial 516 727-5600). Cable Address "Northville Riverhead New York". Radio I.T.T. Amagansett. TWX No. 96-1415 Northville Melville and TWX No. 510-224-6443 or 510-226-7837 Northville Melville.

VHF: Communication with shore and launch via portable VHF radiophone. This equipment on continuously during vessel's stay. The Platform crew maintains radio watch and constant communication with shore for general purposes and emergencies. Shore and Platform monitor Channels 16 and 13.

VHF Marine Operators use VHF Channels: Riverhead (N.Y.) Marine Operator 28; New London Marine Operator 25 & 26; Providence Marine Operator 28; to place land calls.

BERTHING: North Berth (1): Vessels berthed during flood tide will moor starboard side to and during the ebb tide current will moor port side to. Forward and stern spring lines are secured to the breasting dolphins and bow and stern lines are made fast to mooring dolphins located to the East and to the West of the platform structure. Terminal Foreman boards vessel to provide communications and assistance during the mooring operation.

South Berth (2): Vessels berthed during flood tide current will moor port side to and during the ebb tide current will moor starboard side to. Forward and stern spring lines are secured to the breasting dolphins in the South Berth. Bow and stern lines are made fast to the mooring dolphins located to the East and West of the platform structure. Breast lines are secured to the North breasting dolphins.

Two mooring buoys are situated South of the mooring facility which were formerly used for mooring vessels in the North Berth. Mooring buoys will be used at the discretion of the Docking Master (Pilot) and/or Northville's Marine Supervisor.

Masters will note that platform is situated in an open roadstead and that all mooring equipment must be in proper working order and in good condition. If, in the opinion of the Pilot (Docking Master) or Northville's Marine Supervisor, the vessel's mooring equipment is inadequate, the vessel will not be permitted to remain in the berth.

Vessels must be equipped with 12 manilla or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms length.

Vessels having wire moorings secured on warping winches with brake are acceptable. Warping winches must be adequate to handle mooring lines under heavy strain. Efficient stopper lines must be readily available to "stop off" mooring lines for transfer from winch to bitts without loss of tension.

The Docking Master (Pilot) will assist the Master in the berthing of the vessel and supervise the mooring and unmooring operations.

No gangways are used at this terminal. Crew must use ship's ladder for launch service. Crew are forbidden to go onto the Platform, except on ship's business.

OIL TRANSFER CONNECTIONS: The Marine Supervisor and/or his crew will supervise the connecting and disconnecting of the hydraulically operated steel loading arms.

In the North Berth there are 2×16 in. and 2×12 in. steel loading arms, and in the South Berth there are 2×12 in. steel loading arms, all with appropriate reducers. The 12 in. L/U arms will connect to 8 in., 10 in., and 12 in. 150 lb. ASA flanges. When connecting 2×12 in. L/U arms the centre line of the ship's flanges must be at least 6 ft. (72 in.) apart.

The 16 in. L/U arms will connect to 10 in., 12 in., 14 in., and 16 in. 150 lb. ASA flanges. When connecting 2×16 in. L/U arms the centre line of the ship's flanges must be a minimum of 15 ft. (180 in.) apart.

The L/U arms cannot be connected directly to valve flanges. Flanged spools or reducers must be provided. Provisions must be made available for quick draining of the L/U arms.

LOADING AND DISCHARGE OF CARGO: Oil transfer operations are entirely in accord with the Rules and Regulations of the United States Coast Guard. Declaration of Inspection by the Dock person in charge and the Vessel person in charge must be completed prior to commencement of any oil transfer operations.

Discharge rates usually vary between 7,000 bbls.p.h. and 20,000 bbls.p.h. per shore line, depending on the gravity of the cargo and ability of the vessel. Wharfage is charged to vessels which discharge at less than 10,000 bbls.p.h.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Tugs are arranged by ship's Agent. Tug boats generally come from New Haven. Tug orders must be placed 24 hours in advance of docking time. Tel: (212) 840-4600. Tug horsepower requirements are determined by vessel displacement.

A tug is required for undocking all vessels.

BALLAST: No ballast disposal facilities. Long Island Sound is inland water and United States Anti-Pollution Regulations rigidly enforced. No bilge water, oil-contaminated water, garbage or any waste matter which may pollute sea water is to be discharged overboard while vessel within Long Island Sound and approaches.

Ballast suction valves must be sealed with a numbered seal on arrival. Terminal personnel will inspect seals before and after cargo transfer.
STORES/FRESH WATER: No fresh water facilities. Small quantities provisions may be purchased at local stores in Riverhead, 4 miles inland. Stores may be delivered by prior arrangement with Miller launch (Tel: (516) 654-4900).
QUARANTINE, CUSTOMS AND IMMIGRATION: New York City is port of entry for Northville. Entry and clearance must be arranged by ship's Agent. Boarding Officers board in the anchorage or upon arrival. Pertinent Government Officials should be advised in sufficient time, usually not less than 24 hours, Monday through Friday and 48 hours on Saturday and Sunday. Generally, entry and clearance can be arranged by Agent who should advise Customs well in advance of vessel's arrival, thus saving necessity of having Master go to Customs House in New York.

MEDICAL: Hospital in Riverhead equipped with all medical facilities. Medical attention must be arranged by ship's Agent. U.S. Public Health Service not available locally.
WEATHER AND TIDE: Strong winds from North and N.W. experienced during Winter and Spring. Tide during maximum ebb and flood often reaches 3.5 to 4 knots velocity.
DENSITY: Flood tide density 1025. Ebb tide density 1020.
CUSTOMS ALLOWANCES: Tobacco, wine and/or spirit allowance: Same as permitted in New York Harbour.
IDENTIFICATION CARDS: Issued by Immigration Officer.
CONSULS: All Consuls Offices located in New York City.
REPAIRS: No repair facilities are available. Vessel must remain in sailing readiness at all times while moored at the platform facilities.
DRY DOCKS: At New York Harbour.
SURVEYORS: *Inspection Companies:*
Caleb Brett – New Jersey. Tel: (201) 925-8282.
Independent Petro. Insp. Tel: (201) 925-4960.

Panama Bureau of Shipping, 104 E. 40 St., NY, NY 10016. Tel: (212) 867-4760.

REPATRIATION: Agent arranges all crew repatriation via New York.
AIRPORT: New York Airports 80 miles distant.
TIME: Standard time GMT minus 5 hours. Daylight Saving Time first Sunday of May to last Sunday of October, GMT minus 4 hours.
POLICE/AMBULANCE/FIRE: Terminal attends Police/Ambulance and Fire services.

State Police – 727-2727, Police – 911 (Emergencies only). Fire – 0 (to report fire, otherwise 727-2750). Ambulance – 911 or 298-4016.
EMERGENCY CO-ORDINATION CENTRE: United States Coast Guard at New Haven, Connecticut. Tel: (203) 773-2464; and the United States Coast Guard National Response Centre. Tel: (800) 424-8802 (toll free number).
BANKS: European American Bank, located at 209 West Main Street, Riverhead, New York, NY 11901. Tel: (516) 727-7082.

TELEPHONES: A coin telephone is located in the platform office.
SHORE LEAVE: Shore leave permissible by arrangement with local launch service.
SHIP SUPPLY SERVICE: James Miller Marine Services operate Coast Guard inspected crew boats on a charter service to vessels in the Long Island Sound area. They also have available LCMs with a 25 ton capacity for stores and equipment. These vessels are based in Port Jefferson, Long Island, New York and are on call 24 hours a day, 7 days a week. Tel: 516-654-4900.

James Miller Marine Services also operates inspected crew boats for passenger service on a per head basis in New York Harbour. The operations centre is at Pier 13, Staten Island. They can be reached on Channel 16 VHF "Miller's Launch" or call 212-727-7303 or 516-654-4900. Also available at this location are similar LCMs with 25 ton capacity for stores and equipment.

STORING: Bunkers must be taken at anchor. Stores can be loaded during transfer.

Trucks cannot proceed alongside the berth, but by launch only.
Fork lift trucks cannot be used to handle stores.
Customs Regulations regarding storing are not known by this terminal.
Local Riggers can be employed to assist with storing.
AUTHORITY: Northville Industries Corp., P.O.Box 111, Riverhead, NY 11901. *Tel:* (516) 727-5600. *Telex:* 96-1415. *Cables:* Northville, Melville. *Contact:* Captain J. R. Dudley, Director of Terminal and Marine Operations. A. Golz, Marine Supervisor.

ROCHESTER, New York: 43.17 N. 77.36 W.

(See Plan Book)

Refer to "St. Lawrence Seaway" for important general information.
See "General" below.
PILOTAGE: Not necessary.
ANCHORAGE: No anchorage available within harbour limits.
MAX. SIZE: Channel depth 23 ft. (LW). All depths in channel or alongside wharves should be checked carefully against the latest recorded elevated or lake level. This may vary from month to month. Entrance width 300 ft., turning basin depth 23 ft., 600 ft. in width.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to New York Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
TUGS: Not available.
BERTHING: Entrance piers are parallel to each other, and about 450 ft. apart. The West Pier is 3,036 ft. long and the East Pier 2,699 ft. long. Fog horn and beacon on West Pier, East pierhead lighted. Radio beacon. Port Authority Terminal located on West bank of Genesee River at end of Lake Pier. Has a quay wall of about 1,400 ft. in length. Depth of water alongside quay wall uncertain, estimated at between 15 ft. and 20 ft. Charlotte Docks located about 2 miles upstream from mouth of river on West bank.
CRANES: Not available, except through private arrangements.
BRIDGES: New York Central Railroad swing bridge near mouth of the river and upstream from Port Authority Terminal. Traffic lift bridge about 0.25 mile upstream from railroad bridge.
STEVEDORES: Vessel to make own arrangements.
DENSITY: Fresh water.
FRESH WATER: Available at both docks.
FUEL: Vessel to make own arrangements.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: Minor only.
REPATRIATION: Can be arranged.
AIRPORT: Approximately 10 miles from port.
POLICE/AMBULANCE/FIRE: Police, 428-6666; Ambulance, 454-6210; Fire, 232-2121.
SHORE LEAVE: Allowed.
GENERAL: Rochester, New York, no longer operates a commercial port. The facilities are available only for tour and cruise boats to take on and discharge passengers, and by commercial vessels in the case of an extreme emergency.

It should be stressed that emergency docking is completely the Master's responsibility. The City of Rochester and the Department of Recreation and Community Services assume no liability for any vessel docking under emergency conditions at the former Port of Rochester.
AUTHORITY: City of Rochester, Department of Recreation and Community Services, Office of the Commissioner, 222B City Hall, Rochester, New York 14614.

SACRAMENTO, California: 38.32 N. 121.30 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".
PILOTAGE: Pilots board vessel in San Francisco Bay.
RESTRICTIONS: *Ship Channel:* Distance Fort Point to Sacramento, 79 nautical miles (146 km.). Bottom width in river reach 300 ft. (91.4 m.). Bottom width in channel reach 200 ft. (61.0 m.). Min. depth at MLLW 30 ft. (9.1 m.).

Harbour: Area 60 acres (24.3 hectare). Min. depth at MLLW 30 ft. (9.1 m.). Tidal variation 5 ft. (1.5 m.) average.
MAX. SIZE: 800 ft. LOA and 106 ft. beam, 30 ft. deep at MLLW.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
MEDICAL: All normal medical facilities available.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KBA 386, 156.9 MHz (24 hours).
TUGS: Join vessel at Light 76 (turning basin).
BERTHING: Anchor – ships will have at least 1 anchor ready to let go in case of emergency, when docking or undocking. Anchor will be raised immediately upon ship being made fast to wharf.

Insurance lines are required on off-shore side, fore and aft, immediately after ship is made fast to wharf.

A cargo net shall be securely placed under gangways. Save-all nets shall be rigged abreast of holds at which general cargo is being handled.

Rat guards, at least 3 ft. in diameter, shall be placed on all mooring lines immediately after docking, and shall be maintained in place until ship's departure.

Pier 1:

Owned and operated by: Port of Sacramento.

Use: Bulk-loading rice facility.

Construction: Concrete with timber fender piles, length 600 ft. (182.9 m.).

Water depth: 32 ft. (9.8 m).

Storage capacity: 22,000 tons; 8 silos at 2,200 tons each; 6 silos at 470 tons each; 6 silos at 270 tons each.

Mechanical handling facilities: 3 loading spouts dockside, conveyor system to storage facility.

Loading rate: 600 t.p.h.

Wharf 2:

Owned and operated by: Port of Sacramento.

Use: General cargo.

Construction: Concrete with timber fender piles; apron width 60 ft. (18.3 m.); length 600 ft. (182.9).

Water depth: 30 ft. (9.1 m.).

Transit sheds: One, 86,400 sq. ft.

Pier 5:

Owned by: Port of Sacramento.

Operated by: Cargill of California, Inc., as a public utility.

Use: Bulk-grain facility.

Construction: Concrete and steel silos; concrete with timber fender piles; length 600 ft. (182.9 m.).

Water depth: 32 ft. (9.8 m.).

Storage capacity; 1,250,000 bushels (30,000 tons); 17 concrete silos; total capacity 500,000 bushels; 6 steel silos; total capacity 750,000 bushels.

Mechanical handling facilities: Bulk ship loader, conveyor belt system connects bulk storage/rail/truck.

Wharf 6:

Owned and operated by: Port of Sacramento.

Use: General cargo and containers.

Construction: Concrete with timber fender piles; length 600 ft. (182.9 m.)., apron 60 ft. (18.3 m.).

Water depth: 30 ft. (9.1 m.).

Mechanical handling facilities: 2 gantry cranes, 45 tons each.

Remarks: 6 acres of open wharf; 70,000 sq. ft. off dock warehouse.

Wharves 7-8:

Owned and operated by : Port of Sacramento.

Use: Bulk-material facility and general cargo.

Construction: Concrete with timber fender piles; apron 60 ft. (18.3 m.), length 600 ft. (182.9 m.).

Water depth: 30 ft. (9.1 m.).

Storage capacity: Covered 200,000 tons, open 750,000 tons.

Mechanical handling facilities: Conveyor-belt system from truck to storage, from ship to storage; from storage to ship, or from storage to truck; 2 gantry cranes, 45 tons each.

Loading rate: 600 t.p.h.

Transit shed: 86,400 sq. ft. Bagging facilities for bulk cargoes.

STEVEDORES: Same as San Francisco.

DENSITY: Full fresh.

FRESH WATER: Available at all berths.

FUEL: All grades available with 24 hours notice. Delivered by barge.

GANGWAY/DECK WATCHMEN: Each ship shall have a security detail in readiness on board at all times it is in port. The security detail shall perform tasks of an emergency nature and shall have information concerning cargoes aboard in case of need for fire fighting purposes.

OPENING/CLOSING HATCHES: Opening/closing hatches is stevedore work while docked in port.

IDENTIFICATION CARDS: A pass signed by the Master or his designated officer will be required for crew members, passengers and their personal property to leave the port's fenced area. Property may be subject to physical inspection before leaving the fenced area.

CONSULS: Nearest at San Francisco.

REPAIRS: Limited repair facilities available.

REPATRIATION: Can be arranged through local Agent.

AIRPORT: 16 miles from port and served by regular airlines.

TIME: GMT minus 8 hours.

HOLIDAYS: Only days not worked are 4th and 5th July, Christmas Eve and Day, New Year's Eve and Day.

POLICE/AMBULANCE/FIRE: Tel: 371-8000. Extensions 252 and 228.

TELEPHONES: Telephones are available.

SHORE LEAVE: Crew members allowed ashore subject to Immigration clearance.

REGULATIONS: Ships will not blow boiler tubes while in port. Bilge water or oil will not be discharged into harbour. Accidents will be reported immediately to the Terminal Superintendent. Splash boards will be placed over disposal vent-pipe openings on inboard side of vessel.

Garbage – United States and California State laws make it unlawful to dispose of ship's garbage except in approved ways. Port makes approved garbage disposal available – contact the Terminal Superintendent. Garbage retained on board must be kept in tightly closed containers.

Smoking – Smoking prohibited in and around cargo compartments, and on open decks except that it may be permitted in marked areas under sheltered portion of weather decks on offshore side. Smoking prohibited on wharfs and piers except in marked areas. Smoking prohibited on or near ship while it is bunkering.

Welding/Burning – Welding or burning will not be done until written approval is obtained from the Terminal Superintendent and the Fire Marshal. All requirements of both the Superintendent and Marshal will be strictly adhered to.

Fire Signal – Upon detection of a fire, regardless of location or size, the alarm of fire will be sounded. The alarm shall be sounded by telephone and/or whistle or siren blasts. 5 each, 5 second blasts repeated as necessary.

AUTHORITY: Port of Sacramento, P.O.Box 815, World Trade Centre, West Sacramento, California 95691. *Tel:* (916) 371-8000. *Telex:* TWX 910-367-3581. *Contact:* Melvin Shore, Director.

SAN DIEGO, California: 32.41 N. 117.07 W.

(See Plan Book)

PORT LIMITS: The seaward boundaries of the port of San Diego at which a vessel is considered to be an "arrived vessel" is that time when the vessel is boarded by a Port Pilot at Sea buoy No. 1 and (subject to charter party terms) lay time commences when Notification of Readiness is tendered at berth.

DOCUMENTS:

Crew Lists.
Passenger Lists.
Customs Documents.
Manifests.
Stores Lists.
Crew Curio Declaration List.

If the vessel arrives from foreign direct, 3 copies each of the above documents are required.

If the vessel movements are between U.S. ports, 2 copies each of the above documents are required.

Health Documents. Arrival from foreign direct, 1 copy only. All crew members should be in possession of valid vaccination certificates.

Manifests. Arrival from foreign direct, 1 copy of travellers manifest which remains with vessel, and 3 copies each of U.S. Customs inward foreign manifest. Bills of lading, ship's papers carried aboard vessel varies with steamship companies.

PILOTAGE: Compulsory. The San Diego Pilots do not maintain Pilots on station. Service is rendered according to ETA received from vessel. If any vessel's arrival or departure is delayed over 1 hour, an additional charge will be made. Telegraphic address of pilot station – radio ETA to "Pilots", San Diego. Advance notice of ETA required – 24 hours prior to arrival of vessel with amendments 2 hours prior to arrival. Pilot boat is 54 ft. in length, painted white. The exact area where Pilot boards the vessel is No. 1 sea buoy. Pilot on VHF Channels 16 and 12 (Tel: (714) 233-7814).

ANCHORAGE: 3 miles S.E. of Point Loma Light.

MAX. SIZE: Length, breadth – no restrictions. Max. draft alongside face of terminal, 36 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Diego Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: All radio messages go through the Los Angeles station for relay.

VHF: The Port of San Diego Harbour Police maintains a listening watch on Channels 12 and 16. Channel 11 is available after initial call-up on Channel 16.

TUGS: Tugs normally join vessel approximately 1 mile before berth. 5 available ranging from 200 h.p. – 1,700 h.p. There is no charge for the use of tug's lines.

CONTAINER FACILITY: A new generation, high-speed, all-electric container crane capable of handling 20 ft. and 40 ft. units, or single hook lifts of 40 long tons at National City Marine Terminal. This 17.4 acre facility includes 32,500 sq. ft. for a container freight station, a container steam-cleaning facility, office, maintenance shop, truck scales, railroad spur, and paved storage for 2,280 containers including electrical outlets for 45 refrigerated containers. Depth 35 ft.

SPECIALISED CARGO HANDLING FACILITIES: High-speed bulk-loading facilities exist with 800 ft. of 37 ft. deep water berthing space and bulk storage, plus a bulk loader boom that travels 500 ft. laterally and can be extended or raised enough to load nearly any size or type of ship.

High-speed bagging of bulk commodities is available for bagging of bulk materials from powder to pellets at the rate of 1,000 tons per hour.

STEVEDORES: Advance notice of 24 hours desired in order to arrange gangs.

MEDICAL: Agents should receive notification of medical attention required 24 hours prior to ETA of vessel. Complete hospital facilities available.

TANKERS: Diameter of load/discharge line 6 in. to 8 in. Slop (residue) discharge facilities available upon request. 2 tanker berths – max. draft 30 ft. There are also 2 new Tanker Berths at National City Marine Terminal with 12 in. discharge lines.

DENSITY: Salt water in bay.

FRESH WATER: Fresh water available, delivery via pipeline.

FUEL: Diesel and bunker fuel available.

GANGWAY/DECK WATCHMEN: Available if considered necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CERTIFICATES: Registered Load-line Certificate, Certificate of Inspection, Safety Certificate.

CUSTOMS ALLOWANCES: Tobacco: Per each crew member U.S. Customs allowed 2 cartons of cigarettes and 1 box of cigars. Wine and/or Spirits: Quantity allowed per each crew member – 1 quart.

CARGO GEAR: Up-to-date certification of all cargo gear required in order to comply with Pacific Coast Marine Safety Code.

IDENTIFICATION CARDS: U.S. Immigration requires completion of Form I-95, U.S. Coast Guard requires landing permits.

CONSULS:

Chile
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
Finland
France
Honduras
Italy
Mexico
Netherlands
Norway
Panama
Peru
Sweden
West Germany

REPAIRS: All types of deck and engine repairs are available.

DRY DOCKS: Largest dry dock 700 ft. length, 104 ft. width. Capability can accommodate C – 2 Mariner type or San Diego type hulls (600 ft. length, 85 ft. width) and up to and including 28,000 displacement tons. 4 additional floating dry docks with capabilities up to and including 3,500 displacement tons.

SURVEYORS: A full complement of cargo inspectors and surveyors are available locally.

AIRPORT: Distance from marine terminal approximately 5 miles. Airport is serviced by major airlines.
TIME: Local time GMT minus 8 hours. Daylight Saving Time becomes effective the last Sunday in April and continues to the last Sunday in October.
HOLIDAYS: Recognised holidays are: New Year's Day; Lincoln's Birthday; Washington's Birthday; Memorial Day, Independence Day, Labour Day, Columbus Day, Veteran's Day, Thanksgiving Day, Statewide Election Day, Christmas Day, or any other legal holiday that may be proclaimed by State or National Authority; when a holiday falls on a Sunday, the following Monday shall be observed as a holiday.
POLICE/AMBULANCE/FIRE: Police Tel: 236 – 5911; Emergency Ambulance (Paramedic) Tel: 238 – 1212; Fire Tel: 238 – 1212.
EMERGENCY CO-ORDINATION CENTRE: Local maritime emergency co-ordination is handled by the U.S. Coast Guard, San Diego Region, 2710 North Harbor Drive, San Diego, CA 92101. Tel: (714) 293-5860.
TELEPHONES: Arrangements exist for placing telephones on board. No charge for hooking up.
SERVICES: Tank-cleaning equipment. Facilities for tank washings Compass and radar adjustments, etc.
SHORE LEAVE: Permitted.
BANKS: Full banking services for both domestic and international transactions are available locally.
STORING: Storing and provisioning may be accomplished at dockside or via barge by prior arrangement. Trucks and forklifts may be used alongside and riggers are available by arrangement with the representative Agent. U.S. Customs Agents will board on arrival and seal all bonded items. Otherwise, normal procedures concerning controlled items will be observed by the vendor.
DEVELOPMENTS: Broadway and 'B' Street Piers have been reconstructed for use as a passenger vessel facility, public park, for berthing of public visit Naval vessels, and for berthing and clearance of fishing vessels. U.S. Customs has an office at the end of Broadway Pier.
AUTHORITY: Port of San Diego, P.O. Box 488, 3165 Pacific Highway, San Diego, California 92112. *Tel:* (619) 291-3900. *Telex:* 695-456. *Cables:* Sun Harbor San Diego. *Contact:* Don L. Nay, Port Director.

SAN FRANCISCO, California: 37.48 N. 122.25 W.

(See Plan Book)

DOCUMENTS:
General Declaration (arrival) on Customs Form 1301.
Cargo Manifest (Customs Form 1302). One original copy indicating all the cargo on board, used for making formal entry. One copy listing all cargo on board, to be used by the Customs Inspector. One copy indicating cargo for this port only.
2 copies of Crew's Effects Declaration on Customs Form 1304.
2 copies of Ship's Stores Declaration on Customs Form 1303.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
1 Copy "Oil Pollution Certificate", issued in Washington D.C.

Customs Boarding Officer will also examine Ship's Register and Load-Line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours of arrival from abroad, or 24 hours of arrival from a U.S. port:
(a) Health Pratique.
(b) Master's Oath (Customs Form 1300).
(c) U.S. Certificates of Payment of Tonnage Tax (Customs Form 1002).
(d) Certified Crew List (U.S. vessels only).

PILOTAGE: Pilotage in and around Golden Gate Region is provided by 3 groups of experienced, licensed ship Pilots. California Inland Pilot Association, Redstack Tugs and Independent Pilots.

The San Francisco Bar Pilots' Association, maintains a sea station 12 miles outside the Golden Gate, in the vicinity of the large navigation buoy for vessels arriving and leaving the area.

On station around-the-clock. Pilot boats are equipped with VHF radio-telephone, and maintain continuous watch for ship traffic and operate co-operatively with the Marine Exchange communication centre and lookout station. The Bar Pilots also carry portable VHF radios.

Some 8,500 ships are piloted annually into and out of the port complex, through the Golden Gate and the 2,000 ft. wide, 55 ft. deep main ship channel across the sand bar about 9 miles outside the Gate.

Considerable Summer fog is experienced on the pilot grounds. In Winter months radiation or tule fogs frequently occur. The tidal prism of hundreds of square miles of inland waters cause unusually swift and changing currents in the area. Pilotage for San Francisco Bar and entrance is compulsory and available 24 hours a day. The pilot boat is at a station 3 miles outside Main ship Bar channel about 14 miles from San Francisco, VHF Channels 18A and 10 for radio contact. Vessels with a draft of 42 ft. or more are requested to arrive at the pilot station for the inward passage about one hour before high water at the Golden Gate Bridge.

ANCHORAGES: Several anchorages available in San Francisco Bay for any type of vessel up to 50 ft. draft.

The well-protected bay affords excellent shelter and anchorage in all weather. The Captain of the Port (Coast Guard) will assign an anchorage to a vessel upon request. In San Francisco and San Pablo Bays, there are a large number of anchorages available for naval, quarantine, general and explosives.

The specific anchorages available include:
1. *General Anchorage*
(a) No. 5 – found just South of the Richmond-San Rafael Bridge, has no limitations.
(b) No. 9 – found in the South Bay, also has no limitations.
2. *Temporary Anchorage*
(a) No. 7 – found off Treasure Island, has a 12 hour limit. A ship cannot lighter nor bunker at this mooring.
No. 8 – same as No. 7 but has a 6 hour limit.
3. *Explosive Anchorage*
No. 12 – is normally not activated.
No. 13 – found off Larkspur, this mooring is activated only as the need arises.
No. 14 – found in the South Bay, this mooring is always activated.
4. *Naval Anchorage*
No. 10 and No. 21 are the most frequently utilised.

RESTRICTIONS: The San Francisco Bay region is the first on the West Coast to have sea lanes established by the Coast Guard for greater safety in its ocean approaches. Use of the lanes is not mandatory, but is strongly recommended to reduce chance of ship collisions in congested approach and departure areas. The lanes are not intended to supersede or alter applicable rules of the road.

The lanes begin within 6 miles of the San Francisco Lightship, with each lane inbound and outbound separated by a buffer zone. The headings are: North lane outbound, 305°; North lane inbound 120°, main line outbound, 247°; main line inbound, 058.5°; Southern lane outbound, 169°; Southern lane inbound 343°.

The size of the bay and the narrowness of the Golden Gate cause tricky and sometimes difficult tidal and current conditions. The flood current sets into all parts of the bay and causes swirls as far East as Alcatraz and Angel Islands. At the San Francisco-Oakland Bay Bridge there are large current eddies near the foundation piers which may require care to maintain proper course.

The bar channel is dredged to 55 ft. MLLW by the U.S. Army Corps of Engineers. Entrance channels to the various ports are dredged to 35 ft., with the exceptions of Sacramento, Stockton and Redwood City, which are 30 ft. Stockton, however, is approved for a 5 ft. deepening, and study of similar deepening for Redwood City is being completed.

MAX. SIZE: The max. permissible draft for tankers at the oil installation is 35 ft., for regular freighters and passenger ships at the San Francisco piers is 30 ft. No restrictions on length or berth. The best time to dock with max. draft is at a rising tide.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: Radio station via RCA – Radio Corporation of America – Station KPH ITT – World Communications – Station KFS.

Safe and efficient navigation for all bay vessel traffic is maintained through a Ship Location and Reporting Service operated by the Marine Exchange. U.S. Coast Guard Vessel Traffic Service on Yerba Buena Island and at Port Bonita maintains 24 hour radar surveillance of all traffic from Golden Gate on the West (with 32 mile capacity beyond) to Oakland on the East, Dumbarton Bridge on the South and Port San Pablo on the North. Vessel Movement Reporting System (VMRS) extends beyond Port San Pablo all the way to the Ports of Stockton and Sacramento. Coast Guard urgently requests that all vessels as specified below, moving anywhere within the VMRS (including all area under radar surveillance), tune to Channel 13 (156.65 MHz., VHF FM): All ships of 300 gross tons and over, passenger ferries for hire over 100 gross tons, and tugs with tows of barges or dredging rigs of over 26 ft. length.

Coastguard Regulations: Foreign tankers should give 72 hours' advance notice of arrival to ensure that U.S.C.G. has enough time to check the vessel's records for compliance or outstanding violations and to arrange for any onboard inspections required. Failure to provide 72 hours' notice may delay the commencement of cargo transfer while awaiting the required U.S.C.G. inspections. Letter of Compliance inspections must still be arranged through Washington D.C. The statutory notification remains at 24 hours. This notice applies only to the San Francisco Bay area. Any vessel required to have an inert gas system must have its tanks inerted at all times unless they are gas free.
VHF: VTS in operation. Call sign "San Francisco Vessel Traffic Centre", operates on Channels 16, 13, 12 and 18A.
TUGS: Tugs available and normally join the vessel when approaching their pier. Tug's lines are always used, with no extra charge.

BERTHING: No restriction on berthing other than draft limitation and preferable at slack water.

Alameda: (See Plan Book). (Not part of the Port of San Francisco). Alameda, an island and city across the Inner Harbour channel from Oakland, is the home of Encinal Terminals, the largest privately owned and operated steamship terminal in the United States. There are 6 berths for vessels at Encinal.

Berths 1, 2, 3 and 4: Used for general cargo and bulk liquids. Total berthing length 2,125 ft. Depth 31 ft. to 33 ft.

Berth 5: Used for general cargo. Length 750 ft. Depth 35 ft. Berth equipped with Paceco crane.

Berth 6: Used for receipt and shipment of bulk liquids. Depth 30 ft. Facility has tank storage of 12 million gallons.

Operator: Encinal Terminals, 1521 Buena Vista Avenue, P.O.Box 2453, Alameda, CA. 94501. Tel: (415) 523-8800. Telex: TWX (910) 366-7174.

BULK HANDLING FACILITIES: *Liquid Bulk Terminal, Pier 84:* Pier assigned to Granex Company. Berthing for 1 vessel. Length of face 185 ft. and 430 ft. North side 120 ft. Depth alongside face 35 ft. Facilities include 4 portable pneumatic unloaders, total capacity 180 t.p.h.

Port of San Francisco Grain Terminal, Pier 90: Berthing for 2 vessels. Length 1,285 ft. Depth alongside 40 ft. The terminal is used for receiving, storing and loading of grain, feeds, chemicals, fertilisers and storing automobiles. Facilities consist of a 2 million bushel grain elevator. Rail holding yard for 100 cars. 6 marine loading spouts with capacity of up to 1,500 tons of bulk material per hour (no shifting required).

CONTAINER HANDLING FACILITIES: *Pier 80:* Berthing for 7 vessels. Length of face 1,296 ft. North side 1,138 ft. South side 2,657 ft. Depth alongside 40 ft. Pier equipped with 3 rail-mounted container cranes (each having a 30/40 ton capacity); refrigeration outlets; container freight station and flexibilities to handle Ro-Ro, container and breakbulk cargoes.

Pier 94: One-berth (716 ft. apron) container facility with 40 ft. alongside depth, 2×30 long ton container cranes, and 16.5 acre container yard, with at least 50 acres available for expansion. Apron and crane rails are extensions of Pier 96 immediately to the South.

Pier 96: Berthing for 2 vessels. Depth alongside 40 ft. The facility is used by container ships. It also has flexibilities to handle Ro-Ro and general cargo ships. Lifting equipment consists of 2×30 ton, rail-mounted, Paceco container cranes, forklifts, straddle carriers and a mobile crane. Other features include refrigeration outlets; elevated control tower with radio and P.A. communications system; computerised container inventory control and a container freight station.

STEVEDORES: Stevedores orders must be placed 1000 hrs. for night gangs and day gangs. 2×8 hour shifts 7 days a week. Sunday and Sunday night gangs must also be ordered on Saturday 1000 hrs.

MEDICAL: Medical, and all hospital facilities available. No advance notice required.

DENSITY: Average density in the bay is 1016.

FRESH WATER: Available at all piers rate between 25 t.p.h. and 50 t.p.h.

FUEL: Fuel available by barge or at the oil companies own pier. Special blends require some advance notice.

TANKERS: All major oil companies have their own oil discharging piers which are outside the jurisdiction of the Port Authority. Reducing pieces are available. The max. drafts are 35 ft. Tankers arriving with a greater draft are partly discharged in the bay before docking.

Davis Point: Union Oil Co. Oleum Refinery Wharf, depth up to 38 ft. MLW.

Martinez: Shell Oil Co. Wharf, depth alongside 30 ft. – 42 ft. MLW. Phillips Petroleum Co. Amorco Wharf, 2 berths, depth 30 ft. – 42 ft. MLW. Phillips Petroleum Co. Avon Wharf, depth alongside 35 ft. MLW. Urich Oil Co. depth alongside 35 ft.

Ozol: Oil Wharf, depth alongside 39 ft. MLW.

Hercules; Sequoia Ref. Corp. Terminals, depth 35 ft. MLW.

FIRE PRECAUTIONS: Any special instructions are given to the Master upon docking.

GANGWAY/DECK WATCHMEN: Not required but this service available at Master's request.

OPENING/CLOSING HATCHES: Normally done by stevedores. But crew may open and close before arrival at the dock or after departure.

CUSTOMS ALLOWANCES: Each crew member may land free of duty and/or taxes articles acquired abroad not exceeding $10 in value, plus 50 cigars or 300 cigarettes or 3 lb. of smoking tobacco, and not over 1 quart of alcoholic beverages.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

CONSULS: All Maritime countries represented at San Francisco.

REPAIRS: The major yards in the Golden Gate region have fully equipped machine-shop facilities capable of handling virtually any job; welding, heavy plate construction, turning, boring, facing, grinding, milling and rolling.

The larger yards also have facilities for pipe, sheet metal, electrical, carpentry, painting, rigging, machining and boiler work.

Southwest Marine, Westwinds, Service Engineering, SFW Corp., Todd and Triple "A" Repair are all located in San Francisco and provide berth space for all types of ship repairs at plant and at any location in the San Francisco Bay area.

DRY DOCKS: Todd Shipyards San Francisco shipyard has 3 floating dry docks, 1 with 22,000 tons capacity and 654 ft. long, 1 of 11,400 tons capacity and 542 ft. long, and 1 of 6,500 tons capacity and 450 ft. long. With a recently completed pier, its tie-up and outfitting space totals 4,271 ft.

Williamette Iron and Steel Company's yard in Richmond has 5 concrete graving docks. 4 of these docks can each accommodate a vessel 600 ft. long with 83 ft. beam, and 1 dock can handle a vessel 750 ft. long by 83 ft.

Tonnage capacity is limited only by the above dimensions. Williamette's facilities include 1,500 ft. of concrete outfitting pier for in-the-water repairs. The graving docks are served by 4 gantry cranes of 60 ton capacity and 2 of 45 ton capacity, and the outfitting pier by 3×45 ton cranes. Williamette has fully equipped shops for repair and conversion work, and mobile units for out-of-yard work at all Bay Area piers.

Hunters Point Naval Shipyard: (Triple A Machine Shop) Under lease from the US Navy, graving docks and repair facilities available to all types of ships. Triple A operates 3 graving docks: (No. 4) 200 ft. beam×1,100 ft. length and 50 ft. depth; (No. 3) 150 ft.×1,000 ft. and 39 ft. depth; (No. 2) 100 ft.×800 ft. and 27 ft. depth, 17 repair berths can serve ships of any length. 12 gantry cranes of 50 ton capacity serve graving docks and repair berths. 50 ft. depth channel from Golden Gate to Hunters Point; unique to West side of San Francisco Bay.

REPATRIATION: All facilities available for crew changes by sea, air or land.

AIRPORT: Distance about 10 miles South of San Francisco and is served by most domestic and international passenger airlines plus 20 international air cargo carriers.

TIME: GMT minus 8 hours. Summertime from last Saturday in April till last Saturday in October – GMT minus 7 hours.

HOLIDAYS: New Year's Day; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Good Friday (afternoon); Memorial Day (May 30th); Independence Day (July 4th); Labour Day (1st Monday in September); Admission Day (Calif. only Sept. 9th); Columbus Day (October 12th); Veteran's Day (November 11th); Election Day (1st Tuesday after the first Monday in November); Thanksgiving Day (last Thursday in November); Christmas Day.

When any of the holidays fall on Sunday, the holiday will be observed on Monday.

On a holiday the longshoremen are working at the overtime rate (time and a half) except on the following days when no work will be performed:

1. New Year's Day;
2. Bloody Thursday (July 5th, memory of 3 longshoremen killed during the 1936 strike);
3. Labour Day;
4. Thanksgiving Day;
5. Christmas Day.

POLICE/FIRE/AMBULANCE: Police, tel. 533-0123; Fire, tel. 861-8020; Ambulance, tel. 431-2800.

TELEPHONES: On some piers telephone connections to ships are available, no extra cost for this service.

SHORE LEAVE: Crew members are allowed to go ashore after passing U.S. Immigration at first U.S. Port.

GENERAL: Vessels arrival has to be reported to the U.S. Coast Guard 24 hours prior arrival by Agent.

DEVELOPMENTS: The channel over the bar has been deepened to 55 ft. A new channel will be cut 600 ft. wide and 45 ft. deep (at low water), through the upper bay and the channel through San Pablo and Suisun Bays will be deepened to 45 ft. Manoeuvring areas near Richmond and the refinery terminals will be widened. The Stockton Deep Water Channel will be deepened to 35 ft. and the channel alignment improved.

Improvements to Pier 35 – Passenger Terminal: Improvements to the passenger boarding and unloading facilities at Pier 35, including a new Customs area have been completed.

Pier 35 is the major steamship passenger facility in the Bay Area and the point of disembarkation for tens of thousands of cruise passengers who look forward to San Francisco as a port of call or destination. An improved passenger terminal will be beneficial to our city and its tourist industry.

The area involved contains a 200,000 square foot passenger processing facility on the first floor with a 10,000 square foot visitor waiting area on the second floor.

The cost of the initial phase of the improvement is estimated at $1 million.

Expansion of Rail Capabilities to Pier 94-96: New track construction, as well as reconstruction of existing track, from the Terminal to Southern Pacific's mainline track has been designed to allow unit train access onto the Container Terminal.

The Container Terminal is composed of Piers 94-96. This 65 acre three-berth facility is serviced by 4 rail-mounted cranes and represents a $45 million capital investment. An additional 75 acres of expansion area lies adjacent to the Pier.

Direct rail access to this terminal will position San Francisco as a competitive intermodal port offering direct land-bridge and mini-bridge services through Port facilities. By being able to move containers directly from ship to rail, carriers will have the advantages of reduced costs, better control of containers and less damage.

San Francisco will be the first port in California with this capability.

This project is scheduled for completion in 1984.

(See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Store Lists.
3 Curio Lists.
3 Manifests.
3 Passenger Lists.

These documents required in order to enter vessel at U.S. Customs.

Direct Foreign Arrival – Quarantine Pratique issued by Public Health Service representative; Cargo on Customs Form 1302, in duplicate with abstract manifest of Savannah only cargo; Crew list on Form I – 418, in triplicate; Passenger List on Form I – 418, or other acceptable form, in triplicate; Crew curio list, in triplicate, with crew declaration on Customs Form 1304, or crew list on Form I–418, in triplicate, with numbers of attached Forms 5129 endorsed thereon for American vessels, List of sea stores and ship's stores Customs Form 1303, in triplicate; for American vessels, repair declaration on Customs Form 226; for American vessels, certified crew list; Clearance from last foreign port, if one issued.

Coastwise arrival with Residue Foreign Cargo or Passengers – Form 1301, "Permit to Proceed", in duplicate; Travelling Manifest; Abstract Manifest, in duplicate, of cargo to be discharged in Savannah; Stores list, in duplicate; Crew list, in duplicate; Crew purchase list, in duplicate, and any crew declarations on Customs form 5123 for Savannah for American vessels; Passenger list, in duplicate.

PILOTAGE: Savannah Pilots' Association, 550 E. York, Savannah, Georgia, 31401 (telegraphic); Pilot required all vessels; ETA 24 hours advance notice, change ETA 8 hours; VHF Channel 16 (monitored at all times), 18, 12, 13 – Radio telephone 2182 and 2738. Pilot boards vessel 1 mile outside fairway buoy.

SHIP CHANNEL: *Project depth and widths are as follows:* Sea buoy to jetties 40 ft. depth×600 ft. width; New Channel Range through Upper Flats Range 38 ft. depth×500 ft. width; The Bight Channel 38 ft. depth×600 ft. width; Fort Jackson Range to Wreck Channel 38 ft. depth×500 ft. width; City Front Channel to Kings Island Channel 38 ft. depth×400 ft. width; Whitehall Channel 36 ft. depth×400 ft. width.

ANCHORAGES: Outside fairway buoy North and N.E. of fairway buoy; no anchorages in river.

RESTRICTIONS: 31 ft. at any time; over 31 ft. on incoming tide, no restrictions day or night.

MAX. SIZE: Abbreviation OT: Ocean Terminal. Vessels berthing at OT 14 – 15 – 16 – 17. Vessels 550 to 600 ft. on slack water; vessels less than 550 ft. any time to berths 14 and 17; vessels docking or undocking at OT 15 – 16, with vessels in OT berths 14 and 17, can be docked or undocked during slack water. Vessels entering Georgia Kaolin International should not exceed 525 ft. Vessels over 500 ft. undocking from berths 35 – 37 – 41 – 42, Georgia Kaolin International, should not be undocked during strength of ebb or flood tide, but may be undocked at or near high or low water slack.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Vessels route ETA cables to Agents, etc., via Radio Lantana.

TUGS: Tugs join vessels at city front for berths above city; for berths below city, tugs usually meet vessel in vicinity of Fort Jackson or well below berth. Tugs' lines used at all times.

BERTHING: The Georgia Ports Authority operates 13 general cargo berths, 2 tanker berths, 4 container berths and 2 dry bulk cargo berths.

CRANES: Ocean Terminal – One 175 short ton gantry crane, one 100 short ton gantry crane, two 50 short ton gantry cranes, one 30 short ton gantry crane, one 100 ton mobile crane, one 30 ton mobile crane. Garden City Terminal – Two 35 short ton gantry cranes, one 100 ton mobile crane, one 30 ton mobile crane. Garden City Terminal (container port) – six 45 short ton container cranes, six 45 short ton rubber tyred bridge cranes. Other cranes, floating and mobile, are available from various private contractors.

BULK CARGO FACILITIES: Located at the Georgia Ports Authority's Garden City Terminal are 1 dry bulk cargo berth (loading). This facility is suited for the handling of various ores, grains, peanuts, meals and fertiliser materials. The storage at this facility consists of silos for the storage of grain and grain type products as well as flat floor storage for these various other materials.

SPECIALISED CARGO HANDLING FACILITIES: Located at Container Central, on the up-river end of Berth 60, is a stern Ro-Ro ramp which is situated as to allow a vessel to utilise the Ro-Ro ramp and container cranes at the same time. Accommodating side and quarter ramps also available. At the Garden City Terminal there is a modern cold storage facility. The refrigerated space consists of 3 rooms of approximately 68,000 sq. ft.

BRIDGES: *Eugene Talmadge Memorial Bridge:* 135 ft. vertical clearance for 400 ft. at MHW. Distance between fender uprights – 600 ft.

MEDICAL: Agent should be advised as far in advance as practicable for required medical attention. U.S. Public Health Clinic in Savannah, also other extensive medical facilities. Standard information required as to inoculations, vaccinations, etc.

TANKERS: Standard requirements on diameters of load/discharge lines. No facilities for slop (residue) discharge facilities except American Oil Company. A.P.I. of local types of oil is 36 gravity marine diesel fuel. 8 tanker berths in port, max. drafts range from 32 ft. – 38 ft.

DENSITY: Average density of water at 20° Centigrade in channels of Savannah Harbour are:

Savannah River Entrance	*High Water*	*Low Water*
Surface	1.0196	1.0090
Bottom	1.0196	1.0181
Port Area		
Surface	1.0022	0.99915
Bottom	1.0120	1.0075

FRESH WATER: Available at all terminals.

FUEL: Marine gas oil (No. 2 Fuel). Marine diesel oil (No. 4 Fuel Oil). All Intermediate grades from Intermediate 30 (=30 centistokes at 50°C) to Intermediate 420 (=420 centistokes at 50°C) Bunker fuel oil (No. 6 Fuel). Advance notice of 24 hours required.

FIRE PRECAUTIONS: No special fire precautions. All tanker berths have water and fire extinguishers on dock. Fire fighting equipment on dock. Fire fighting equipment on tugs.

GANGWAY/DECK WATCHMEN: Garden City and Ocean Terminals of Georgia Ports Authority, East Coast Terminal Company and Georgia Kaolin International require that a watchman, or someone in authority, will be aboard any vessel tied to their facilities at all times.

CERTIFICATES: See "Documents". Current Registry Papers, Load Line Certificates, Certificates of Inspection, etc., are required.

CUSTOMS ALLOWANCES: Tobacco, a crew member may take ashore 50 cigars, 300 cigarettes, or 2 kilos of smoking tobacco, or a proportionate amount of each. An appropriate amount of tobacco products may be held out of bond for use of passengers and crew members while aboard ship when in port. Wine and/or Spirit, a crew member may take ashore one litre of alcoholic beverages for his own use. Container should be opened, that is the seal should be broken. An appropriate amount of wine and/or spirits may be held out of bond for consumption by passengers and crew while aboard ship when in port.

CARGO GEAR: Certified in accordance with U.S. Department of Labor Regulations. Supplied by stevedores.

IDENTIFICATION CARDS: Identification required by crew members coming ashore. U.S. Immigration & Naturalisation Service issues landing permit, I-94, to any passenger; and I-95, to any crew member of a foreign vessel who is not considered a security risk. This form must be in man's possession any time he is ashore.

CONSULS:

DEVELOPMENTS: Ocean Terminal rehabilitation underway will provide one 1,000 ft. berth, 800,000 sq.ft. transit space, two 200,000 sq.ft. warehouses.

Container Berth No. 5 under design, to be completed late 1985. Facilities include a 1,000 ft. berth, 60 acres of paved storage and 3×45 ton cranes.

SHIPMASTER'S REPORT: August, 1980.

Pilotage: Because of difficulties with the port crane and large storing programme we elected to berth starboard side alongside this call.

The Pilot will only undertake this on the flood (since vessel is invariably deep, berthing will only be done on the flood in any case) but because of a delay we were off the berth very nearly at slack water. The Pilot carried out the manoeuvre in the most reassuringly competent manner and I would not hesistate to do the same again if necesary; only with a Pilot prepared to carry out the manoeuvre.

Vessel is swung downriver off the container berth, about 4 cables below the berth.

When landed on starboard side to, it is just possible to plumb the berth with the crane by making the connection to the after crossover.

Discharge: Straightforward; some slight initial delay. Capable of receiving cargo at over 1,000 t.p.h. Our rate 810 t.p.h. overall.

Connection 12 in. 150 ASA. No VRL.

Density 1000 this call.

Storage capacity about 50,000 cu.m. Storage plant only for filling road and rail tankers.

U.S.C.G.: Deck inspection before commencing. Vessel was congratulated on her 'very high standard of equipment and personnel'. Monitoring detail on board throughout. Scuppers unplugged, please.

They are aware of the draft problem at LW and boarded immediately on berthing.

General: Lloyd's surveyor easily available.

Bunkered lube oils whilst discharging with U.S.C.G. approval.

Can touch up ship's side from quay.

Movements allowed at night, dependent on draft/tide.

Chandler: Southern Marine: Poor service this time despite our cables. This is in contrast to excellent service last time. These services are entirely at the mercy of ship representative.

SHIPMASTER'S REPORT: October, 1980 (updated 1984).

Approach: From East: The coast between Sandy Point to Isle of Palms near Charleston shows up at 40 miles and South of Hunting Island near Port Royal Sound at 35 miles, on radar. Port Royal channel gives a good radar echo at 15 miles. Soundings give little indication of position until fairly close inshore. Savannah light was observed at 28 miles.

DF stations at Tybee and Charleston are useful if nothing else is available.

Anchorage: Pilots advise anchoring to N.E. of Savannah Light Beacon. Good holding ground without obstructing arriving and departing traffic.

Arrival Procedure: ETA through Agents.

For deep draft ships proceeding to Ammonia Berth No. 61 about 5 miles above town, Pilot will board between 3 hours to 1.5 hours before HW.

Under 31 ft. can berth/sail any state of tide day or night. Berthing day or night.

Can berth either side to, the generally accepted side to is port side. However, if taking stores try for starboard side as the crane plumbs better, plus the Chiksan arm is in the way of trucks.

For starboard side to, arrive well in time for earliest Pilot boarding time.

The problem is the berth has a reported 36 ft. at LW (actually by lead line we found (Oct. '80) a minimum of 33 ft. 9 in. reduced to datum along the dock face). Therefore before LW you have to pump out about 2,000 tonnes, any delay can be important.

Pilots: Boards from large fast cutter between Savannah Light and whistle buoy.

Give plenty of notice as cutter might be lying up-river at pilot station. Based at Cockspur Island in the ship channel. Call "Savannah Pilots".

Pilot ladder must be 8 ft. above water. Side dependent on wind. Berthing Pilot joins from tug using own ladder at Kings Island.

On departure from berth, Pilot requires 1.5 hours notice.

VHF: "Alpha" Channels used frequently.

U.S.C.G. uses 22A, Pilots use 18A, tugs use 19A. Otherwise use 16, 12 and 13.

Channel: The maximum draft of vessels has been 39 ft. with a 6 ft. tide. Normal maximum 37 ft. This can only take place on the flood so as to be on the berth at slack water.

Channel is narrow, less than Houston Ship Canal. Constant dredging is required. From Whistle Buoy to berth is about 3 hours.

Vessel is swung in Argyll Turning basin off the container quay. 24 hour navigation is undertaken.

From soundings from Savannah Light beacon to Berth No. 61 proceeding inwards 3 hours before Savannah HW (2.5 m.) a minimum of 1.6 m. under keel was found with draft 11.15 m.

Berth: Depth: "See plan". Minimum depth reduced to datum found to be 33 ft. 9 in. along jetty face.

Berth No. 61: Owned by Georgia Ports Authority and leased to Occidental.

Concrete jetty on piles with centre section connected by roadway to shore, and mooring dolphins either end connected to jetty by catwalk. Length of centre section 266 m. Good fendering.

The upriver dolphin is not used due to damage. Can turn gangway out before arrival.

Pilot with the aid of powerful tugs swings vessel in very competent manner at Argyll Turning Basin.

Density: 1001 to 1002.

Moorings: Basic 3, 2, 2, each end. Forward headlines (3) go to Ro-Ro dock and breastlines to dolphin with springs to main jetty. Due to damage the upriver dolphin cannot be used so all stern and breast lines go to Grain Berth No. 62.

Springs out first, last in. Mooring boat used. Port Authority mooring gang require 4 hours notice.

Tugs: Atlantic Towing Company based along town water front. Several large and powerful tugs. Two used, one each end, American style, tie up with own lines alongside. One and a half hours notice required.

U.S.C.G.: Very co-operative. Although Agent will try to get them to board in river for pre-inspecton, they board at dock. Carry out check list and inspection before cargo allowed to be worked. Takes about 30 minutes.

One U.S.C.G. rating on board at all times (8 hour shifts). Strict on pollution.

The U.S.C.G. do not seem to mind which way round the ship is berthed. Scuppers to be plugged.

Discharge: Into mobile Chiksan (as berth only leased). After manifold if starboard side too. Maximum rate about 1,200 t.p.h. but generally nearer 900 t.p.h. to 1,000 t.p.h. Connection 12 in. 150 ASA. No vapour return line. Shore tank capacity 45,000 tonnes, which fills rail and road tankers. Takes about 45 minutes to connect/disconnect. Shore labour assist. Shore personnel always in attendance. Manager very helpful.

In light ship condition we had 18 m. air draft which did not create any difficulties.

General: Lloyds Surveyor easily obtainable from Jacksonville. Fresh water from jetty, require 6 hours notice, especially at weekends.

Lube oils whilst discharging with U.S.C.G. permission. Stores lorry able to get close alongside ship.

Ship's crane (if starboard side to) will just plumb after end of jetty.

Liferaft service (Beaufort) at Southern Ship Supply – 24 hour service.

Shoreline infested with rats, snakes and big spiders.

Chandler: Southern Ship Service, good fresh produce.

Town: About 5 miles away. Can telephone for taxi – free of charge local calls, from hut at grain berth about 100 yards from gangway.

Airport 6 miles South of town centre with regular flights to Atlanta International, etc

AUTHORITY: Georgia Ports Authority. Georgia Kaolin International and East Coast Terminal. Savannah Port Authority.

The Savannah Port Authority does not operate terminals; however, is engaged in port and industrial development for the City of Savannah and Chatham County, Georgia. Harbour regulations pier and bulkhead lines, etc., come under the jurisdiction of this organisation.

Georgia Ports Authority, P.O.Box 2406, Savannah, Georgia 31402. *Tel:* (912) 964-3811. *Telex:* 804782 and TWX 810-784-5634. *Cables:* Gaports. *Contact:* John J. Powers, Jr.

AGENT: Strachan Shipping Company, P.O.Box 9667, Savannah, Georgia 31412. Tel: 912-234-6671. Telex I: 54-6415. Telex II: 810-784-5630. Cables: "Strachan".

SEARSPORT, Maine: 44.28 N. 68.56 W.

(See Plan Book)

LOCATION: The Port of Searsport is located on Penobscot Bay, approximately 112 road miles East of Portland, and 20 miles from Bangor.

DOCUMENTS:

Clearance from Last Port.

2 copies of Form 1300 (Master's Oath).

2 copies of Form 1301 (General Declaration).

3 copies of Form 1302 (Inward Foreign Cargo Manifest).

NOTE: Form 1302 will only be accepted.

2 copies of Form 1303 (Ship's Stores Declaration)
(Including Narcotic Medicines).

Form 1374 outward foreign Manifest.

2 copies of Form 1304 (Crew Effects Declaration).

2 copies of I-418 (Crew List).

Also available: Vessel Register, Safety Equipment Certificate, Load Line Certificate, Certificate of Financial Responsibility, (Oil Pollution), and U.S. Tonnage Tax Receipts.

PILOTAGE: Ship's agent notifies Pilot approximately 48 hours in advance of arrival, correcting at 24 hours. Pilot's boat called on Channel 16.

Vessels from South and West, Pilot boards at Monhegan Island (Buoy 14M). Vessels from East, Pilot boards at Matinicus (Buoy 2WB). The pilot station is located on Matinicus Rock Island. Pilot boards at Wooden Ball Light Bell Buoy "2WB." Lat. 43° 49′ N., Long. 68° 50′ W.

The pilot boat is a fishing boat with a white hull showing the international signals.

Pilot signal: 3 long and 2 short on ship's whistle.

Radio contact: VHF Channel 16 (156.8 MHz).

36 and 24 hours ETA requested, cable "Penbay – Belfast/Maine", via Chatham Radio.

ANCHORAGES: No restrictions on anchoring.

RESTRICTIONS: No restrictions at night. Deep draft vessels brought in only on high water. Draft in concurrence with docks, 32 ft. low water. 10 ft. rise in tide – approach to Searsport 35 ft. – Bay 60 ft. limit.

MAX. SIZE: Size of vessel restricted to 38 ft. draft in harbour area. No outside installations at the port yet.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Boston Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Tugs in Searsport Harbour use Channels 16 and 13. Vessels arriving Searsport go through radio station at Chatham, Mass., RCA installation, SSB station or a VHF public correspondence station.

TUGS: Penobscot Bay Towing Co., Marshall Wharf, Belfast, Maine 04915. Tel. (207) 338-3000. 24-hour service. Requested that orders for tugboat service be given during normal business hours, 24 hours in advance.

Tugs: "Patrick McAllister", 1,200 h.p.
"Brian F", diesel 1,200 h.p.
"Roderick McAllister", diesel 1,200 h.p.
"Bronx", diesel 1,800 h.p.

Radio: Ship to ship, VHF Channels 16-13-10.

Sea Pilots dock ship with tug's assistance.

BERTHING: Draft conditions govern arrival and departures.

Bangor and Aroostock Pier: Length 800 ft., width 100 ft. Depth alongside (East side) 34 ft., (West side) 30 ft.

This pier handles a wide variety of cargoes including petroleum, forest and agricultural products, such as newsprint, tapioca, long logs, dimension lumber, potatoes, etc.

Cargoes can be off-loaded or loaded directly from or to railroad cars or trucks. There are 4 warehouses on the facility available for import or export cargoes.

C.H. Sprague Dock: Length 614 ft., depth alongside East side 33.6 ft.

This facility has and can handle many bulk cargoes, including salt, coal, gypsum, potash, bauxite, liquid chemicals, and Bunker C petroleum. There are 3 towers for discharge of bulk cargoes.

Turning basin off docks, depth 34.5 ft. and 1,200 ft. width.

STEVEDORES:

Weekdays:

Order gangs by 1700 hrs. for following day 0800 start.
Order gangs by 0900 hrs. for same day 1300 start.
Order gangs by 1300 hrs. for same day 1800 start.

Weekends:

Order gangs by Saturday 1200 hrs. for a Sunday 0800 start.
Order gangs by Saturday 1200 hrs. for a Monday 0800 start.

MEDICAL: No advance notice required by Agent. 1 hospital, Waldo County, which takes bed patients.

TANKERS: 2 berths at Searsport – 2 for No. 6 oil and 1 for light oil and gas. 2×8 in. hoses. 34 ft. low water.

DENSITY: Average density 1024.

FRESH WATER: Available by tug for boilers only at rate of tug hire at anchorage. Drinking water available at piers.

FUEL: No. 6 oil at C. H. Sprague dock. Light oils delivered by tank truck at dock.

FIRE PRECAUTIONS: At certain oil piers information given to Shipmaster upon arrival at pier. Ample fire protection, salt-water lines, sprinkler system on pier, local fire department.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Ship's crew may open hatch after longshoremen boarded ship.

CERTIFICATES:

Load-line Certificate.
Certificate of Foreign Clearance.
Ship's Safety Certificate.
U.S. tonnage Tax Certificate of previous trip if have them.
Radio Operator Licence.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. Wine and/or Spirit allowance 1 bottle per person.

CARGO GEAR: No additional cargo gear necessary.

IDENTIFICATION CARDS: Form I-95 must be filled out on arriving unless seamen has had a prior one made out for a previous arrival on same ship (on plastic card).

CONSULS:

Norwegian: Allan Kjos-Hansen, 30 Mayer Road, Portland, Maine, Vice-Consul.

French: Dr. Paul O. Proudian, 776 Main Street, Westbrook, Maine.

Finnish; Frank W. Bjorklund, 163 Main Street, Norway, Maine.

Italian: Dr. Domenica A. Santoro, 43 Deering Street, Portland, Maine.

Panamanian: Mary Navarro de Carrillo, Lafayette Town House, Portland, Maine.

Swedish: Martin Johnson, Vice Consul, 443 Congress St., Portland, Maine.

REPAIRS: All types of machinery repairs.

DRY DOCKS: None.

REPATRIATION: Arrangements must be made with Agent in advance by telegram.

AIRPORT: Bangor International Airport, 30 miles, Northeast Airlines.

HOLIDAYS: New Year's Day; Washington's Birthday; Patriot's Day; Memorial Day; Independence Day; Labour Day; Thanksgiving Day; Christmas Day and Veteran's Day. Possible to get gangs to work all days except on Labor Day and Christmas.

POLICE/AMBULANCE/FIRE: Police 548-6372; Ambulance 548-2900; Fire 548-2900.

TELEPHONE: Arrangements can be made to have phone put on ship, but most docks have pay phones.

DEVELOPMENTS: Directly across from the Port of Searsport lies Sears Island. A major new cargo facility and industrial park will be constructed. Emphasis will be directed toward potential user groups of heavy machinery and equipment assembly and manufacturing, plus a full spectrum of forest products storage and shipment.

This development will feature modern container-handling facilities and breakbulk handling capability. The completion date for this new facility is early 1985.

AUTHORITY: None.

Contact: Searsport Port Committee, Searsport, Maine 04974, or Maine Department of Transportation, Division of Ports & Marine Transportation, Augusta, Maine 04333. *Tel:* (207) 289-2841.

SEATTLE, Washington: 47.36 N. 122.20 W

(See Plan Book)

PORT LIMITS: Port of Seattle limits are co-extensive with the boundaries of King County in which Seattle is situated. A vessel has "arrived" when it has tied-up to a berth.

DOCUMENTS (on arrival from foreign):

Clearance from Last Foreign Port.

2 Crew Lists on Form. I-418.

2 Passenger Lists on Form I-418 (if applicable).

Passenger Declarations if applicable.

2 Store Lists.

2 Crew Purchase (curio) Lists.

2 Manifests of Cargo for discharge on CF1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on 1302, one for Customs at this port and the other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43. (Only required if boarding on arrival is necessary) see "Health" before first U.S.A. port.

B – For U.S. Dept. of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form AIQ.43.

C – For U.S. Immigration Boarding Officer:

Crew List on Form I-418 visaed by U.S. Consul abroad.

Passenger List on Form I-418.

Attachment to Passenger List on Form I-92.

Form I-94 for each passenger.

Form I-95 or ID Card (Form 184) for each crewman. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:

3 copies Crew List (Form I-418).

3 copies Cargo Manifest on Form 1302.*

3 copies Store List – Form 1303.*

3 copies Crew Purchases or Curio List (Form 1304).*

3 Passenger Lists on Form I-418.

For U.S. Ships – Declaration re foreign repairs on Form 3415.

For U.S. Ships – Certified Crew List from last U.S. port before going foreign.

*At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those on coasting trade. Pilots may be obtained from Port Angeles Pilots' Association, Seattle, at short notice. Inward, Pilot boards vessel at pilot station off Port Angeles.

Port Angeles Pilots: Pilotage service furnished to any port or place on Puget Sound and its adjacent inland waters.

Pilot stations are located on Ediz Hook, Port Angeles and Seattle Washington.

Vessels desiring a Pilot should proceed to a position 0.25 miles East of Ediz Hook, where Pilot will board the vessel. If a Northwest wind, sea, or swell exists, vessels are requested to proceed to a position inside and South of Ediz Hook to obtain a lee and facilitate boarding.

In clear weather, vessels should indicate their desire for a Pilot by hoisting the International Code Flag "G" and by blowing the whistle signal of one long, one short and one long blasts.

In fog or thick weather, the blowing of this whistle signal will attract the attention of the pilot station and repetition of this signal will assist the pilot boat to locate the vessel.

The pilot station is located 1,200 yards, 277° from Ediz Hook Light. At night, the station will show from a mast, 3 vertical lights, the highest and lowest being red and the middle one green, to indicate that the pilot boat is en route to the ship. The pilot station is equipped with radar to locate and track vessels. The pilot boats, 'Juan de Fuca' and 'Puget Sound' are equipped with radar.

Communications: Vessels may ensure prompt service by advising their ETA, Port Angeles, 24 hrs. in advance, via radio to station KLB, addressed to Port Angeles Pilots, Seattle, Washington. A vessel may also advise the pilot station, Port Angeles, Washington, addressed to "Pilots Port Angeles" of their ETA, and amended ETA, when subsequent conditions make it necessary. The message is transmitted immediately from KLB to Port Angeles via telephone. The pilot station, Port Angeles, monitors VHF Channels 14 and 16 continuously and transmits on Channel 13.

At the time of passing Cape Flattery, inbound vessels are requested to re-affirm their ETA by calling the pilot station directly, using VHF calling Channel 16 and transmitting on Channel 13.

Channel 14 is for vessel traffic system only.

Pilot Ladder Requirements:

1. Please contact pilot boat via voice radio (Channel 13) approximately 30 minutes prior to arrival for desired lee.
2. The ladder must be kept clean and used solely for embarking and disembarking Pilots.
3. Rigging of the ladder, along with embarking and disembarking Pilot, must be under supervision of a licensed officer.
4. The ladder must be made in 1 length and not consist of 2 lengths shackled or lashed together, and should be equipped with spreaders about 10 ft. apart to comply with SOLAS Regulation 17, Chapter 5.
5. The pilot boats have their own lights to illuminate the pilot ladder, but a standby light should be ready for an emergency.
6. The area of the deck where the Pilot boards and leaves must be well lighted and the area must be clear of all obstacles to ensure a safe passage for the Pilot.
7. *No tag lines, pull-up ropes, or trailing lines may be attached to the lower ends of the ladder.*
8. Ladders must be rigged well clear of discharge and water outlets and at a place near midship which affords the best lee for the Pilot. At no time should the ladder be rigged near the stern of the vessel.
9. Means must be provided to allow the Pilot to pass safely onto the ship's deck. Where portable stanchions and bulwark steps are used for this, the portable stanchions must be rigidly attached to the ship's structure and not the steps. The bulwark steps must also be securely fastened.
10. The ladder must be in good condition, the treads must remain horizontal when used and the upper surface must have a rough nonskid quality.
11. Manropes approximately 3 in. manila in circumference, a heaving line and a ring buoy with a self-igniting light must be provided.
12. If your vessel is to take a load of logs, make sure the Agent makes arrangements to have a cat-walk to provide safe passage to and from the ladder.

Accommodation Ladders for embarking or disembarking of Pilots:

1. All vessels where the distance from sea level to the point of access of the ship exceeds 9 m. (30 ft.) at any time, should carry on each side an accommodation ladder. The ladder is to be so sited that when in use the lower end of the ladder shall rest firmly against the ship's side under all conditions of roll and heel, clear of all discharges, and within the parallel length of the ship.
2. A conventional pilot ladder should be rigged just abaft the lower platform of the accommodation ladder. The pilot ladder should be secured firmly to the lower platform to allow access between the pilot ladder and accommodation ladder. The pilot ladder should extend at least 2 m. (6 ft.) above the lower platform of the accommodation ladder. Manropes to be provided and rigged alongside the pilot ladder.

ANCHORAGES: Extensive anchorage in Eliott Bay, depths of 90 ft.

RESTRICTIONS: Overhead power cables at Burlington Northern Railroad Bridge with a vertical clearance of 155 ft.

MAX. SIZE: Controlled by depth at berth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, 2nd tug normally used.

BERTHING: Over 46 berths for ocean-going vessels. Depths alongside, 30 ft. to 73 ft. MLLW.

SPECIALISED HANDLING FACILITIES: Terminals 18 and 20 combined and now designated as Terminal 18. Pipe-lines are available to carry molasses, tallow or other non-petroleum liquid cargo, and has a tank farm for storage.

Terminal 115 – 2 berths, capacity, import steel.

Terminal 115 – Foss Alaska Barges, has specialised finger piers, to handle container-to-barge operations.

Terminal 128 – A barge terminal.

Terminals 5, 18, 25, 37, 42 and 46 – Container Terminals, equipped with large container cranes and yards to handle van shipments. Depth alongside, Terminals 18 and 25 – 50 ft. Terminals 5, 37 and 46 – 40 ft.

Pier 86 – fully automated, deep water, Grain Terminal. 1 berth, length 600 ft. (Max. LOA 1,400 ft. using dolphins). Depth of water 73 ft. at MLLW. Grain Terminal: capacity 4.2 million bushels, loading rate 3,000 t.p.h. via twin conveyor belts.

CRANES: *Terminal 5:* 4×33 ton container cranes.

Terminal 18: 9×45 ton and 2×33 ton container cranes.

Terminal 20: 2×50 ton revolving cranes and 1×200 ton sheer leg.

Terminal 25: 2×45 ton container cranes.

Pier 28: 1×50 ton gantry.

Terminals 37, 42 and 46: 5×45 ton container cranes.

Terminal 115: 1×50 ton and 1×40 ton gantry crane.

STEVEDORES: 40 local gangs available. Gang requirements must be made known to the contracting stevedore prior to 1100 hrs. on day before vessel plans to dock. Order before 1030 hrs. on Saturday for Saturday afternoon, Sunday, and Monday.
DENSITY: Salt water in Outer Port. Fresh water inside Canal Locks.
FRESH WATER: Available at all wharves.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Watchmen required if detainees aboard.
OPENING/CLOSING HATCHES: Normally carried out by stevedores while in port.
CERTIFICATES:
Certificate of Registry.
Certificates for any previous U.S. tonnage tax payments within the past year.
International Load Line Certificate.
Safety Radio Certificate.
Derat Certificate.
Cargo Gear Inspection Certificate.
Certificate of Inspection (for U.S. vessels).
CUSTOMS ALLOWANCES: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.
IDENTIFICATION CARDS: Required.

DOCUMENTS:
3 copies Cargo Manifest (Form 1302) the original showing all cargo on board, and 2 copies showing only cargo for this port.
2 copies Crew Manifest (curio list).
2 copies Stores List.
2 copies Passenger List (Form I-418).
2 copies Crew List (Form I-418).
Customs boarding Officer will also examine Ship's Register and Load-line Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:
Health Pratique.
Master's Oath (Form 1300).
All Foreign clearances.
U.S. Certificates of payment to tonnage tax (Customs Form 1002).
Certified Crew List.
PILOTAGE: Alaska Marine Pilot's Association, Box 273, Homer, Alaska 99603. 48 hours advance notice. 2182 calling frequency KC – KTE – 21. Anchorages as noted on chart. C. & G. S. 8529 Resurrection Bay.
Pilot boards at Cains Heads in Resurrection Bay.
MAX. SIZE: Harbour depth 35 ft. MLLW.
ANCHORAGE: Suitable anchorage in 30 fathoms depth available for deep draft vessels at the head of the Bay, South of marked buoy.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
RADIO: KWA 346 (AM) Alaska Railroad Dock, frequency monitored 2182 kHz. KWA 364 (SSB) Alaska Railroad Dock frequency monitored 4-6-8-12 Megs.
TUGS: Regular tug service available. Anderson Tug & Barge (907) 224-5506.
BERTHING: 24 hour berthing. Berthing permit required. Advance notice of 48 hours requested.
200 ft. by 735 ft. steel and concrete finger pier.
East Side — 600 ft. long with 35 ft. depth of water. (10 ft. out from dock face).
West Side — 600 ft. long with 35 ft. depth of water.
South End — 200 ft. long with 35 ft. depth of water.
(East and West Berths serviced by railroad spurs).
CRANES: East Berth – 2 gantry cranes. Maximum capacity – 45 short tons, maximum radius – 105 ft. Forklifts ranging up to 35 ton capacity.
STEVEDORES: Northern Stevedoring and Handling Corporation supply labour force.
MEDICAL: Fully staffed 30 bed hospital. All medical facilities available.
DENSITY: 1.0248 at Mean High Water.
FRESH WATER: Available at East and West berths. 4 in. water line; 67 lb. pressure.
FUEL: Marine Gas Oil available from pipe-line at South & West Berth. Marine Diesel Oil available from same pipe-line during Summer months only (Maritime Oil, Vancouver, B.C.).
OPENING/CLOSING HATCHES: Handled by crew, if done before berthing ship. By stevedores if tied to dock.
IDENTIFICATION CARDS: U.S.C.G. Port Security Card or Seaman's Card required.
REPAIRS: Radio, radar, welding, machining and light engine repairs can be effected.
AIRPORT: 1 mile. 1 flight daily to Anchorage.
TIME: Alaska Standard Time.
HOLIDAYS: All holidays are time and one half. Cargo can be worked on all except Christmas, New Year's and Labour Day.
POLICE/FIRE/AMBULANCE: Tel: 911.
AUTHORITY: The Alaska Railroad, P.O.Box 95, Seward, Alaska 99664. *Tel:* (907) 224-5550. *Contact:* Dock Agent.

SITKA, Alaska: 57.03 N. 135.20 W. (See Plan Book)

Located on the Western side of Sitka Sound, Baranof Island. Open all year.
APPROACHES: 3 natural channels: Western, Middle and Eastern.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilot pick-up point – close aboard vicinity Eckholm Light.
ANCHORAGE: Jamestown Bay.
MAX. SIZE: Harbour depth 22 ft. MLLW. Tides: diurnal range – 9.9 ft.
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Immigration and Customs, local.
TUGS: 7 tugs 300 h.p. to 1,200 h.p.
BERTHING: 3 wharves.
1. Conway Dock: Berthing length 160 ft., depth 30 ft. MLLW. No cranes, 3 lift-trucks; 10,000 sq. ft. covered shed space; fresh water.
2. Japonski Dock: Government dock only for limited commercial use.
3. Alaska Lumber & Pulp Co.: (Private) Berthing length 700 ft., depth 35 ft. LW. Walking cranes only. Not less than 12 lift-trucks, 30,000 sq. ft. covered shed space; fresh water. (Located at Silver Bay, Sawmill Cove, 4 miles South of Sitka). 30,000 sq. ft. open storage.
STEVEDORES: 3 gangs.
DRY DOCKS: 1×400 ton floating dock at Jamestown Bay, approximately 3 miles East of Central Sitka.
REPAIRS: Light repairs only.
FRESH WATER: Available.
FUEL: Not available.
MEDICAL: Sitka Community Hospital and U.S. Public Health Service Hospital on Japonski Island.
TRANSPORTATION: Air and ferry.
AUTHORITY: City and Borough of Sitka, 304 Lake Street, Sitka, Alaska 99835. *Tel:* (907) 747-3439, 747-3294, 747-3245. *Contact:* Richard J. Guhl, Harbour Master.

SKAGWAY, Alaska: 59.27 N. 135.18 W.

Located at the Northern end of Lynn Canal, 14 miles North of Haines.
APPROACHES: Via Lynn Canal.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pick-up point located in vicinity of Point Retreat.
MAX. SIZE: Harbour depth 30 ft. running out to 300 ft. Tides diurnal range 16.7 ft. Also see "Berthing".
ANCHORAGE: In Lutak Inlet, 14 miles South of Skagway.
HEALTH: See "Health: All ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
CUSTOMS: Quarantine, Customs and Immigration available in Skagway.
TUGS: 2 tugs available at Skagway.

BERTHING: 1. White Pass and Yukon Railroad Dock: Containerised cargo to Vancouver and Whitehorse is the principal use, also used for tankers and cruise ships. 1,240 ft. long, 100 ft. wide; depth at face varies from 20 ft. to 43 ft. Southern 400 ft. in poor condition. No covered storage. Open storage 80,000 sq.ft. 1 fork-lift is available. Containers presently loaded and unloaded with ship's gear. 2 straddle cranes for containers on dock. Deck for 400 lbs. per sq. ft. loading.

2. Skagway Terminal Co.: Ore loading facility. 1,000 ft. berth, fender dolphins, and walkway. 42.5 ft. deep at face. Sole use for bulk cargo ships. Adjacent to the berth is a warehouse of 108,000 sq.ft. Also available are 50 acres for open storage. Loading equipment consists of 1 fixed loading spout with a capacity of 1,500 t.p.h.

3. State: City joint use ferry pier – barge off-loading facility.

4. City of Skagway: Small boat harbour, approx. 100 stalls. Fuel available. Water available in temperate seasons.

STEVEDORES: 3 gangs.

REPAIRS: None.

SURVEYORS: Not available locally.

WATER: Available in small quantities in temperate seasons only.

FUEL: Available at Chevron Dock.

MEDICAL: Medical clinic and one nurse.

AIRPORT: One mile from harbour. Scheduled and charter flights available daily.

TELEPHONE: Pay phone at top of small boat harbour ramp.

POLICE/AMBULANCE/FIRE: Police 983-2301. Ambulance 983-2300. Fire 983-2300.

BANKS: National Bank of Alaska, Skagway.

EMERGENCY CO-ORDINATON CENTRE: Skagway Fire Hall, Tel: 983-2300

STORING: See "Prelims", page viii.

Storing at White Pass Railroad Dock:

1. By truck.
2. No barge storing.
3. Trucks can proceed alongside, except south 400 ft. of dock.
4. Fork lift trucks can be used.
5. Customs perform supervision of loading/unloading of all bonded stores. Customs/Immigration Tel: 983-2325
6. Local riggers are available.

GENERAL: Highways: Klondike highway open approx. May 15th to October 15th.

AUTHORITY: City of Skagway, P.O.Box 415, Skagway, Alaska. *Tel:* Harbour Master 983-2386 or 983-2555.

SMITHS BLUFF, Texas: 30.00 N. 93.59 W.

DOCUMENTS, PILOTAGE, RADIO, etc.: Refer to "Port Arthur".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Meet vessel in Neches River before arriving at berth. Normally 2 tugs required berthing/unberthing.

BERTHING:

Pure Oil Co.: Distance from sea 38 miles, depth at berth 37 ft.

Sun Oil Co.: Distance from sea 38 miles, depth at berth 39 ft. 6 in. (Also see "Beaumont" – Nederland)

MEDICAL: All facilities available.

DENSITY: Fresh water.

FRESH WATER: Available ex-wharf at Sun Oil Terminal.

FUEL: Available ex-wharf at Sun Oil Terminal.

GANGWAY/DECK WATCHMEN: Not required unless crewmen detained by Immigration.

CUSTOMS ALLOWANCES: 300 cigarettes and 1 quart wine or spirits for each man.

IDENTIFICATION CARDS: Foreign crew only require Immigration Landing Permit.

CONSULS: Nearest at Houston.

REPAIRS/DRY DOCKS: See "Port Arthur".

AUTHORITY: Port of Beaumont, Navigation District of Jefferson County, P.O.Drawer 2297, 1255 Main Street, Beaumont, Texas 77704. *Tel:* 835-5367. *Telex:* 779486. *Cables:* Portbomont. *Contact:* Mr. J. W. Martin.

STOCKTON, California: 37.57 N. 121.19 W.

(See Plan Book)

DOCUMENTS: See "San Francisco".

PILOTAGE: Pilots commissioned by Stockton Port District. Pilots obtained by contacting Secretary of California Inland Pilots' Association, located at Marine Exchange, World Trade Center, San Francisco, California (KBP 386).

ANCHORAGE: Emergency anchorage only permitted in Turning Basin, 32 ft. depth.

RESTRICTIONS: Restrictions only in effect if water at flood stage. See "San Francisco".

MAX. SIZE: Draft restrictions of 30 ft. at low tide, 32 ft. at high tide. (Also see "Developments").

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to San Francisco Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Ship to shore Radio (KBP 376) enables constant contact with Pilots who therefore aware of any problem that may develop up or down river. Arrangements also may be made for readiness of ordered gangs within 15 minutes of ship's arrival.

TUGS: Tugs join vessel 0.5 mile up river from Main Channel; generally, ship's lines used, however, tug lines may also be utillised.

BERTHING: *Port Stockton Bulk Material Wharf, Berths 12-13:*

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Shipment of dry-bulk commodities, both systems handle the following: coal, petroleum coke, clay, copper concentrates, fertiliser, soda ash, sulphur, and other dry bulk commodities; receipt of molasses and petroleum products.

Dimensions: Length of face 566 ft.; lower side 13.5 ft., upper side 13.5 ft.; depth alongside at MLLW 35 ft.; usable berthing space 566 ft.

Mechanical handling facilities: Two bulk handling systems. *One:* Max. vessel loading rate 600 short tons/p.h. Equipped with shiploader, belt conveyor, 360 degree spout trimmer, bottom drop car dump (Max. 7.5 cars per hr.) and truck unloader hopper (Max. 24 trucks per hr.) *Two:* Max. vessel loading rate 4,000 short tons/p.h. Conveyor system equipped with a 54 in. belt, rotary car dump, loop railroad for unit train.

Port Stockton Wharf, Berths 10-11:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Container-handling dock; receipt of molasses, petroleum products, bulk dry cargo, container cargo and general cargo. Delivery of scrap steel, container cargo and general cargo.

Dimensions: Length of face 810.5 ft., lower side 102 ft.; depth alongside at MLLW 32 ft.; usable berthing space 810.5 ft.

Remarks: Face of wharf is in line and continuous with face of Berth 9 providing a total of 1,455.5 ft, of berthing. This dock has 5.5 acres of open marshalling area.

Port Stockton General cargo Wharf, Berth 9:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 645 ft., upper side 75 ft.; depth alongside at MLLW: Face 37-34 ft., upper side 35 ft.; usable berthing space: Face 645 ft. upper side 110 ft. with dolphin; width of apron: Face 41.25 ft.

Mechanical handling facilities: Forklift trucks and other types of cargo-handling equipment, owned by the Port District and by stevedoring companies, are available as needed.

Port Stockton Wharf No. 8:

Owned by: Stockton Port District.

Operated by : Stockton Port District.

Use: Receipt and shipment of general cargo; Liquid sugar facility and receipt of molasses. Anhydrous Ammonia also unloaded at this dock through refrigerated pipelines.

Dimensions: Length of 396 ft.×88 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 484 ft. with trestle.

Port Stockton Wharf No. 7:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 516 ft. depth alongside MLLW 37-36 ft.: usable berthing space 516 ft.; width of apron 31 ft.

Port Stockton Wharf No. 6:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length 418 ft.; depth alongside MLLW 37-36 ft.; usable berthing space 418 ft.; width of apron 31 ft.

Port Stockton Wharf No. 5:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 428 ft.; depth alongside MLLW 34-32 ft.; usable berthing space 429 ft.; width of apron 31 ft.

Port Stockton Grain Wharf No. 4:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo, receipt of bulk phosphate rock by self-discharging vessel; and shipment of bulk fertilisers.

Dimensions: Length of face 461 ft.; depth alongside MLLW 32-35 ft.; usable space 462 ft.; width of apron 31 ft.

Port Stockton Wharf No. 3:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo.

Dimensions: Length of face 461 ft.; depth alongside MLLW 32-36 ft.; usable berthing space 461 ft.; width of apron 81 ft.

Port Stockton Open Wharf No. 2:

Owned by: Stockton Port District.

Operated by: Stockton Port District.

Use: Receipt and shipment of general cargo; shipment of logs, and handling of heavy-lift cargo. Also bulk cargo.

Dimensions: Length of face 506 ft.; depth alongside MLLW 32-36 ft.; usable berthing space 506 ft.; width of apron: open.

Remarks: Wharf has 39,000 sq. ft. of open storage area and 5 bulk cone shaped buildings for handling inbound dry bulk cargo, 2 cone shaped buildings for handling inbound cement bulk cargo, with direct belt conveyor from dock to cone buildings, with a capacity of 70,000 short tons to the rear of the dock area. At the Industrial Park approx. 104 acres of open storage area are located South of W. Washington Street: over 50 acres of this area can be used for storing logs awaiting shipment. An additional 56 acres of open storage are located North of W. Washington Street. There is a total of other warehousing with a capacity of 2.7 million sq. ft. of covered storage area comprised of 33 separate units.

Logs may be transferred to wharf by trucks and by tractors equipped with log clamps.

This dock also has two Whirley type gantry cranes with a 30 short tons capacity each at 36 ft. offshore reach. Equipped to handle bulk dry materials, containers, heavy lifts, etc. Cranes may be geared double to accommodate lifts up to 60 short tons.

Stockton Elevators Grain Elevator Main Wharf No. 1:

Owned by: Stockton Elevators Inc.

Operated by: Continental Grain Co.

Use: Shipment of grain by vessels and by ocean going and inland waterway barges; receipt of grain by self-unloading barges.

Dimensions: Length of face 564 ft., West side 20 ft., East side 20 ft.; depth alongside at MLLW 35-37 ft.; usable berthing space 564 ft.; width of apron, open end 20 ft.

Mechanical Handling Facilities: 2 towers on wharf, each with 13-in. diameter, telescopic, mechanically operated, grain-loading spout; loading rate, 900 short t.p.h. (29,877 bu.) at East tower; 800 (26,557 bu.) at West tower; combined rate, 900 short tons.

Remarks: Grain gallery connecting towers on wharf has a 30-in., electric-belt conveyor; and gallery extending from East tower to grain elevator has two 30-in. belt conveyors.

BRIDGES: Fixed-span high-level toll bridge across Carquinez Strait, with minimum clearance of 134 ft. above MHHW. Southern Pacific Railroad lift span bridge crosses Suisun Bay 6.5 miles upstream from Carquinez Bridge, with minimum clearance above MHHW of 70 ft. when closed and 135 ft. when open. Horizontal clearance on lift span 291 ft. A third bridge, 22 miles above Southern Pacific bridge, is near Antioch. It has a fixed span bridge with minimum clearance above MHW 135 ft.

STEVEDORES: *General Cargo* – For gang start at 0800 hrs., orders must be placed at 1600 hrs. of previous day; night gangs must be ordered by 1100 hrs. These times pertain to week-day gangs. For weekend gangs, 1100 hrs. Saturday for Saturday night, Saturday morning, Sunday night and Monday morning. Day shifts from 0800 to 1700 hrs. Night shifts 1700 to 0300 hrs. Arrangements can be made for a special third shift from 0300 to 0800 hrs. Rates quoted on request.

Bulk Ore and Grain Cargoes – Orders for gangs must be placed at same time as for general cargo. This operation on 24 hour basis; day shift, 0800 to 1600 hrs., night shift 1600 hrs. to midnight, swing shift, midnight to 0800 hrs. Stop work meeting first Tuesday of each month.

Also see "Radio".

MEDICAL: Arrangements with San Joaquin Medical Society for physicians, surgeons and dentists. 5 hospitals within radius of 6 miles from port. Ambulance service readily available. Telephone number for this service is 466-9535 (day or night).

TANKERS: 2 berths, 32 ft. depth available.

FRESH WATER: Available through pipelines.

FUEL: All grades of fuel available with 1 day's advance notice.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary. Available if requested.

OPENING/CLOSING HATCHES: Hatches may be opened prior arrival and closed after ship sailed from port; any opening or closing of hatches at dockside must be performed by stevedores.

CERTIFICATES: See "San Francisco".

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirit, see "San Francisco".

CARGO GEAR: Safety regulations require strict adherence to max. loading or unloading weight capacity of ship's gear.

IDENTIFICATION CARDS: Not required.

CONSULS: See "San Francisco".

REPAIRS: Minor types of repairs carried out.

DRY DOCKS: Nearest dry docks, San Francisco.

REPATRIATION: No facilities in Stockton for effecting crew changes and arranging any necessary repatriations. Special arrangements may be made through Customs.

AIRPORT: Stockton Metropolitan Airport located approx. 6 miles from port. Serviced by Frontier and Air West.

TIME: Pacific Standard Time in effect from last Sunday in October to last Sunday in April; Pacific Daylight Time goes into effect on last Sunday of April until last Sunday in October, when clocks are advanced 1 hour.

HOLIDAYS: New Year's Day; Martin Luther King's Birthday; Lincoln's Birthday; Washington's Birthday; Memorial Day; Independence Day; Harry Bridge's Birthday; Labour Day; Admission Day; Columbus Day; Veteran's Day; Thanksgiving Day; Christmas Eve Day; Christmas Day and New Year's Eve Day are all holidays. In addition to above, General Election Day, both State and National, as well as any day proclaimed by Governor of California or President of United States shall be observed as holiday. Work can be arranged for all holidays except New Year's Day, Labour Day, Thanksgiving Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Security Force on duty 24 hours a day and can be reached by dialling extension 528 for any emergency that might arise. Stockton Police Department's emergency telephone number (209) 943-9111. Stockton Fire Department (209) 464-4646. Ambulances may be secured by telephoning (209) 466-6869; 464-4846; 464-4611; 466-0223; 948-6056 and 948-5117.

TELEPHONES: Telephones placed aboard on request.

ELECTRIC CURRENT: At wharves where current available for ship's use, it is 110 volt, single phase, 60 cycle for lighting and 440 volt, 3 phase, 60 cycle for power.

SHORE LEAVE: Permitted.

REGULATIONS: Port of Stockton requests notice of ship's intent to come into port at least 7 days prior to arrival; vessels, who have made prior arrangements, will have precedence over vessels who sail into port without previous notice.

GENERAL: *Railroad Service:* Three transcontinental railroads serve the Port – Santa Fe, Southern Pacific, and Union Pacific (Western Pacific Division) with reciprocal switching privileges.

Truck Scales: Public truck scale available, operated by the Port.

DEVELOPMENTS: Deepening of channel to 35 ft. Completion expected late 1985.

AUTHORITY: Port of Stockton, 2201 West Washington Street, Stockton, California 95202. *Tel:* (209) 946-0246. Toll free outside State of California (800) 344-3213 or 344-3214. *Telex:* 35-9467 and TWX 510-765-6661. *Contact:* Alexander Krygsman, Port Director, or A.G. Beckman, Director of Operations.

TACOMA, Washington: 47.14 N. 122.28 W.

(See Plan Book)

DOCUMENTS (on arrival from foreign port):

Ship's document.
Clearance from Last Foreign Port.
2 Crew Lists on Form I-418
2 Passenger lists on Form I-418 (if applicable)
Passenger declarations if applicable.
2 Store Lists.
2 Crew Purchase (curio) Lists.
2 Manifests of cargo for discharge on C.F. 1302.

If first arrival port on an inward voyage, must also have 2 sets of Manifests of complete cargo on C.F. 1302, one for Customs at this port and other for use as a "Travelling Manifest" to go forward to other discharge ports.

A – For U.S. Public Health Quarantine Boarding Officer: "Quarantine Declaration" on Form PHS.43.

B – For U.S. Department of Agriculture Boarding Officer: "Shipmaster's Declaration and Warning Notice" on Form A1Q.43.

C – For U.S. Immigration Boarding Officer:
  Crew List of Form I-418 visaed by U.S. Consul abroad.
  Passenger List on Form I-418.
  Attachment to Passenger List on Form I-92.
  Form I-94 for each passenger.
  Form I-95 of ID Card (Form 184) for each crewmen. (These are re-usable for multiple entries, but for seamen on first trip to United States a new Form. I-95 must be ready for presentation on arrival.)

D – For U.S. Customs Boarding Officer and Agent or Broker:
  3 copies Crew List (Form I-418).
  3 copies Cargo Manifest on Form 1302.
  3 copies Store List – Form 1303.
  3 copies Crew Purchases or Curio List – Form 1304.
  3 Passenger Lists on Form I-418.
  For U.S. Ships – Declaration re foreign repairs on form 3415.
  For U.S. Ships – Certified Crew List for last U.S. port before going foreign.

* At subsequent U.S. ports of call 2 copies required of extracts Cargo Manifests of cargo for the port concerned, and 2 copies of lists of stores and curios remaining on board.

PILOTAGE: Compulsory for all vessels except those under coasting trade on West coast of the United States, including Alaska and British Columbia. Pilots board off Port Angeles Pilot Station.

ANCHORAGE: The depths as a rule are too great for convenient anchorage, but vessels occasionally anchor under the Northern shore about 1 mile Eastward of Brown's Point. Vessels may anchor in about 18.29 m., 450 yards N.N.W. of the outer end of Puyallup Waterway West Jetty.

City regulations permit anchorage in any part of the bay outside harbour lines so as not to interfere with vessels arriving or departing from their docks.

MAX. SIZE: Length over 305 m. (centre to centre dimensions of mooring dolphins), draft subject to berth depth.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available, join vessel in Commencement Bay, approx. half way between Brown's Point and the designated Dock. Tug's lines are used and there is a charge for tug's lines.

BERTHING: 32 deep water berths. Water depths: 9.15 m. to 21.34 m. below MLLW.

General Cargo: 161,000 sq.m. warehouse space, 91 hectares of open storage paved, lighted, fenced, serving all piers.

BULK HANDLING FACILITIES: 550 m. pier with 12 m. to 15 m. water depth. 5 heavy lift whirley cranes and bulk unloading crane with 750 to 1,500 t.p.h. capacity; 150,000 tons capacity alumina storage structure with load-out facility; 12.14 hectare stockpile area including holding area for 300 rail cars.

2 Bulk grain elevators: United Grain: Pier 1, 4.5 million bushel capacity; loading rate: 1,000 t.p.h.; 271.34 m. dock; 15.24 m. water depth.

Continental Grain: 3 million bushel capacity: loading rate: 2,400 t.p.h.; 137 m. dock with dolphins to 244 m.; 21.34 m. water depth.

Bulk Liquid Facility: 3.5 million gallon capacity; heated tanks and piping for both rail and truck shipping and receiving; serves vessels at Pier 1, 676 m., 10.67 m. water depth, and Pier 5, 174 m., 10.06 m. water depth.

CONTAINER HANDLING FACILITIES: *Terminal 4:* Container handling and general cargo. Container handling capability – 5,000 units per month. 2 berths, total length 378.6 m., width 42.7 m., Depth 13.7 m. MLLW. 1 warehouse 14,536 sq.m., 2×40-ton IHI container cranes, 10.12 hectares paved, lighted, fenced, back-up storage. 200 Reefer container outlets (240-480 volts). Direct rail access to pier. Intermodal yard for containers loading to rail cars.

Terminal 7: Containers and General cargo. 4 berths, total length 823 m., width 41 m., depth 13.7 m. MLLW. 2 warehouses each 9,290 sq.m. 3×40-ton Whirley cranes, 1×40-ton IHI multi-purpose crane, 1×50-ton Peiner multi-purpose crane (Containers, dry bulk). 1×40-ton IHF container crane, 17 hectares paved, lighted, fenced, back-up storage. 24 Reefer container hook-ups (240–480 volts). Direct rail access to pier.

BRIDGES: The 11th Street Bridge: All ships are required to notify for opening 2 hours in advance. The Puyallup River Bridge on 11th Street has been deactivated. The Blair and Hylebos Bridges have no restrictions. Closed periods apply to the 11th Street Bridge and the hours are as follows: 0645 – 0745 hrs., 1530 – 1730 hrs.

STEVEDORES: Jones-Washington Stevedore Company and Eagle Marine Services Ltd., and Stevedoring Services of America (SS of A).

Gang requirements must be made known to contracting stevedore prior to 1100 hrs. on day before the vessel plans to dock. (1030 hrs. on Saturdays for gangs on Saturday p.m., Sunday and Monday.)

Stowage of cargo for discharge or load determines the gang size requirements. Sufficient information for intelligent gang orders is a necessity – i.e. advance cargo plans, unusual size and/or weight, etc.

TANKERS: Loading/discharge lines 8 in. and 10 in. 150 ASA flanged connections. Slop discharge facilities not available. Fresh water available. Coast Guard regulations strictly enforced.

DENSITY: The average density in the port is 16.8 at 15° C.

FRESH WATER: Available. Delivers to vessel through portable meter hose.

FUEL: Available. Advance notice required.

Grade	*Viscosity at 122°SSF*
Bunker "C"	165 – 175
PS – 400	112 – 116
Bunker Special	50 – 60
PS – 300	32 – 35

FIRE PRECAUTIONS: Very strict precautions in force.

GANGWAY/DECK WATCHMEN: Watchmen required if detainees are aboard.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. In practice, however, the crew can perform this task while in transit.

CERTIFICATES:

- Certificate of Registry.
- Certificates for any previous U.S. tonnage tax payments within the past year.
- International Load-line Certificate.
- Safety Radio Certificate.
- Derat Certificate.
- Cargo Gear Inspection Certificate.
- Certificate of Inspection (U.S. vessels).

CUSTOMS ALLOWANCES: Tobacco: Wine/Spirit: No definite quantities prescribed; reasonable allowance at discretion of Customs Inspector.

IDENTIFICATION CARDS: Required.

REPAIRS: The largest repair yard in Tacoma can haul out vessels up to 1,000 tons for all kinds of repairs, including electronics, welding, painting and machining; shafts up to 30 ft. in length are machined here. Another plant does shipbuilding exclusively, but will perform topside repairs if needed. Wreckage and salvage facilities are available. Larger vessels go to Seattle for dry-docking. Minor repairs and services for small craft are available at marinas on the City Waterway and the N.E. shore of Commencement Bay.

AIRPORT: Seattle – Tacoma International Airport is 16 miles North from Port and Tacoma Industrial Airport 8 miles West.

TIME: Local time reference is GMT minus 8 hours. In Summertime it is GMT minus 7, or Pacific Daylight Saving Time, started the last week-end in April and finished the last week-end in October.

HOLIDAYS: New Year's Day (January 1st) no work; Lincoln's Birthday (February 12th); Washington's Birthday (February 22nd); Memorial Day (May 30th); Independence Day (July 4th) no work; Bloody Thursday (July 5th); no work; Labour Day (September 1st) no work; Columbus Day (Friday after Thanksgiving); Veterans' Day (November 11th); Thanksgiving Day (November 27th) no work; Christmas Day (December 25th) no work.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 593-4911; Fire MA 7-0151; Ambulance 473-1611.

TELEPHONES: Pay telephones available at Piers 1, 2, 4, 7, Blair Terminal, Pierce County Terminal, Grain Docks 23 and 24. There is no charge for this service.

SHIP SUPPLY SERVICE: Contact: Foss Launch and Tug, 225 East F Street, Tacoma, WA. 98421. Tel: (206) 272-0362.

SHORE LEAVE: Allowed.

AUTHORITY: Port of Tacoma, P.O.Box 1837, Tacoma, Washington 98401. *Tel:* (206) 383-5841 or Seattle (206) 838-0142. *Telex:* 32-7473 A/B Port of Tac. *Contact:* Director, Marine Terminals.

TAMPA, Florida: 27.57 N. 82.28 W. (See Plan Book)

DOCUMENTS:

- Passports and Seamen's Books.
- Vaccination Certificate for each Seaman.
- Certified Crew List: must be on American form and certified by American Consular office at foreign country from which departed.
- Crew List.
- Ship's Register.
- Load Line Certificate.
- Certificate of Financial Responsibility (Oil Pollution Certificate).
- U.S. Customs requires Inward Foreign Manifest (original and 3 copies). This must describe cargo which is to be discharged this port and/or any other port in vessel's itinerary. It must show:
  - Vessel's name and flag.
  - Master's name.
  - Last foreign port of departure.
  - Net registered tons of vessel.
  - When and where vessel built.
  - Consigned to Agent.
  - Bill of Lading Number.
  - Marks and numbers (on cargo).
  - Complete description of merchandise.
  - Weight in kilos or pounds.
  - Port of loading.
  - Port of discharge.
  - Stores Lists (original and 3 copies).
  - Crew Curio List (original and 3 copies).
  - Narcotic List (original and 3 copies).
  - *Dangerous Cargo List (original and 3 copies).
  - *This should be filled out even if nothing dangerous aboard.

Health officials will board vessel first. Bills of Lading not needed for Customs purposes.

PILOTAGE: Compulsory for all foreign vessels and U.S. vessels under register in the foreign trade. Pilotage is optional for U.S. coastwise vessels drawing over 7 ft. that have on board a Pilot licensed by the Federal government. Pilots board vessels day or night. Vessels entering by Egmont Channel are boarded between the Tampa Bay Lighted Whistle Buoy "T" (Lat. 27° 35.3′ N., Long. 83° 00.7′ W.) and Egmont Channel Lighted Bell Buoy No. 2 (Lat. 27° 35.4′ N., Long. 82° 59.0′ W.). Vessels entering by S.W. Channel are usually boarded between S.W. Channel Buoy No. 2 and Lighted Bell Buoy No. 3, or if desired, at the lighted bell buoy off the entrance to the channel.

Two pilot organisations, Tampa Bay Pilots and Tampa Tri-County Pilots (Trico Pilots), serve Tampa Bay. Tampa Bay Pilots have 4 launches, *"Egmont"*, *"Manatee"*, *"Tampa"* and *"Tampa Bay Pilot"*, each with a black hull and white deckhouse with the word "Pilot" on either side. Tampa Tri-County Pilots (Trico Pilots) have 2 launches, *"Trico Pilot"* and *"Trico II"* each with a red hull and white deckhouse with the word "Pilot" on front of the deckhouse in red. Both Pilot Associations monitor VHF-FM Channels 10 (156.50 MHz), 12 (156.60 MHz), and 16 (156.80 MHz) continuously; call-signs, Tampa Bay Pilots and Tampa Trico Pilots. The Tampa Tri-County Pilots also monitor VHF-FM Channels 11 (156.55 MHz) and 13 (156.65 MHz). Both Pilot Associations' boats are equipped with VHF-FM Channels 10, 12 and 16 and use Channel 10, 12 and 11 as working frequency. All pilot boats fly the International Code flag "H". For boarding, Pilots request that vessels maintain a speed of 6 knots or less and have the pilot ladder rigged 6 ft. above the water. Vessels are requested to give a 24-hour and a 3-hour advance notice of their time of arrival. Length, beam and max. draft of the vessel should be provided with the first notification. Vessels are normally not moved in dense fog, and during strong North/South winds vessels are boarded inside Egmont Key. In March 1984, the deepest draft entering Tampa Bay was 33 ft. 6 in. Pilots can be obtained by radiotelegraph (cable address: "Tampilot" for Tampa Bay Pilots and "Trico Pilots" for Tampa Tri-County Pilots), by telephone (813-248 3732 for Tampa Bay Pilots and 813-251-1669 for Tampa Tri-County Pilots) through the Tampa Marine Operator, or through ships' Agents.

Pilots for St. Petersburg and Port Manatee can be obtained through the Tampa Bay Pilots or Tampa Tri-County Pilots (Trico Pilots).

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Radio station "WPD" should be used by vessel to route ETA cables to Agents, receivers, etc. Station KUZ 383 on Channel 25 VHF, available for public messages.

ANCHORAGES: Vessels with good ground tackle can anchor anywhere outside Egmont Bar in depths of 35 ft. to 50 ft. Inside anchorages Southward of Mullet Key in depths of 30 ft. to 35 ft.; and S.W. of Gadsden Point in depths of 29 ft. to 36 ft.

Explosives and quarantine anchorages East of Mullet Key and South of Interbay Peninsula.

(1) Explosives anchorage East of Mullet Key. A rectangular area in Tampa Bay, approximately 4,459 yd. long and 1,419 yd. wide, beginning at Lat. 27° 38′ 30″ N., Long. 82° 39′ 09″ W., and extending N.E. to Lat. 27° 39′ 48″ N., Long. 82° 37′ 15″ W.; thence S.E. to Lat. 27° 39′ 17″ N., Long. 82° 36′ 46″ W.; thence S.E. to Lat. 27° 37′ 52″ N., Long. 82° 38′ 38″ W.; thence N.W. to point of beginning. Anchorage is used by vessels awaiting loading or unloading at Port Tampa where duration of anchorage will exceed 72 hours.

(2) Temporary explosives anchorage South of Interbay Peninsula. Beginning at a point bearing 107°, 1,750 yd. from Cut F Range Front Light; thence to a point bearing 125°, 2,050 yd., from Cut F Range Front Light; thence to a point bearing 180°, 1,725 yd., from Cut F Range Front Light; thence to a point bearing 222°, 2,180 yd., from Cut F Range Front Light; thence to a point bearing 251°, 1,540 yd., from Cut F Range Front Light; and thence to the point of beginning. Anchorage is used for vessels engaged in loading explosives when duration of the anchorage is less than 72 hours.

(3) Temporary explosives anchorage off Port Tampa. A circular area with a radius of 200 yd. with the point at Lat. 27° 50′ 22″ N., Long. 82° 34′ 15″ W.

(4) Quarantine anchorage. S.E. of the temporary explosives anchorage, beginning at a point bearing 97° true, 4,370 yd., from Cut F Range Front Light; thence to a point bearing 113° 30′, 5,370 yd., from Cut F Range Front Light; thence to a point bearing 161° 30′, 3,770 yd., from Cut F Range Front Light; thence to a point bearing 163° 30′, 2,070 yd., from Cut F Range Front Light; thence to the point of beginning.

RESTRICTIONS: Draft recommendation is 33 ft. 6 in. No tidal restrictions with exception of loaded vessels into Port Tampa.

43 ft. harbour deepening project underway. Scheduled for completion in 1986.

Existing Channels:

Name of Channel	*Width* (ft.)	*Length* (naut. miles)	*Depth MLW* (ft.)
Egmont Channel	700	3.9	45
Mullet Key Channel	600	2.9	43
Tampa Bay Channel Cuts A-F	500	13.6	43
Gadsden Point Cut	500	3.1	43
Hillsborough Bay Cut A & C	500	6.6	43
Hillsborough Bay Cut D	400	1.0	34
Seddon Channel	300	1.1	28
Garrison Channel	275	0.4	30
Ybor Channel	400	0.9	34
Sparkman Channel	400	1.2	34
East Bay Channel and Turning Basin	2,700	1.5	43
Port Tampa Channel	400	7.3	34
Port Sutton Channel	280	1.0	34
Alafia River Channel	200	3.4	32

MAX. SIZE: Max. draft 33 ft. 6 in. MLW. No limit on length and breadth. Air draft 149 ft. MHW. Skyway Bridge clearance.

TUGS: Positions are:

Main port area – right past Beacon No. 35
Port Sutton & East Bay – Beacon No. 29
Port Tampa – Cut "K"
East Tampa – Beacon No. 16

Tug's lines only.

BRIDGES: The Sunshine Skyway Bridge spans lower Tampa Bay. The twin central cantilevered span has a navigation clearance of 800 ft. and a maximum vertical clearance of 151 ft. at MLW.

STEVEDORES: Stevedoring gangs must be ordered approximately 24 hours in advance (before 1700 hrs. on day before needed).

MEDICAL: Advance notice for medical attention not required, but is preferable.

DENSITY: Density is affected by local rains due to Hillsborough River. Seasonal variances too great to allow advance prediction.

FRESH WATER: Available all over port and delivered through hoses and meters. Rates of delivery various.

FUEL: All grades and types available, including all types of blended fuel and Bunker "C". 24 hour notice required. All types of lube-oil available with delivery in bulk or drums – 24 hours' notice is required. Major oil companies (i.e. Shell, Amoco Oil, Texaco, Gulf, Chevron, Western Fuels, etc.) represented in Tampa. Delivery ex-pipe-line, barge or truck.

BERTHING: See below and page 1654. Also see "Developments".

GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Eller & Co. Inc. (Port Authority Berth No. 209)	Verger Boulevard, Holland Terminal	600 ft. Marginal Wharf	34ft.	Fork Lifts: 1×10 tons, 4×8 tons, 5×2.5 tons, 11×4 tons. Mobile shore cranes available 70 – 300 tons
Garrison Terminals Inc.	13th and Beatrice St.	1,759 ft. Marginal Wharf	30 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, shipside conveyor. Bagging: openmouth and valve baggers for bulk fertiliser materials.
Garrison West	Foot of Franklin St.	543 ft. Marginal Wharf	27 ft.	Crawler Cranes: 4 ranging from 37 to 72 tons. Fork Lifts: ranging from 1,000 to 20,000 lb. capacity. Bulk handling: 5 hoppers, clamshell buckets, portable shipside conveyor. Stationary under hopper bulk receiving system.
Spessard L. Holland Terminal (Port Authority Berth No. 202)	Verger Boulevard	2,400 ft. Marginal	34 ft.	Back land leased to Pate Stevedoring with preferential berthing rights. 15 acres Storage. The 100 ft. apron on all berths is public. Cruise Ship Terminal location.
Kreher Terminal Berths No. 223, 224	Carbide Avenue, Hookers Point	1,120 ft. Marginal Wharf	34 ft. (for 800 ft.) 14/16 ft. (for 320 ft.)	Back land leased to South State Terminals and Standard Gypsum. Wharf apron and docking area is public and subject to preferential berthing rights of one tenant.
S.E.L. Maduro (Florida), Inc.	13th and York St.	1,200 ft. Marginal Wharf	30 ft.	All sizes fork lifts including specialised newsprint handling and 52,000 lb. capacity for handling of containers; mobile shore cranes. Modern banana unloading conveyor system.
Metroport Terminals Berths 263, 264, 265, 266.	601 N. 13th Street	2,255 ft. Marginal Wharf 6 berths	30/27/25 ft.	Banana unloading conveyor system, 20 ton gasoline crane with 45 ft. – 100 ft. boom, 4 lift trucks. Mobile shore cranes available up to 70 tons. Lift truck and crane restrictions, check with Port Authority.
Southport Stevedores Inc. (Port Authority Berths Nos. 251, 252)	Foot of Grant St.	1,200 ft. Marginal Wharf	34 ft.	Cranes: 4×40 tons gantries. Fork Lifts: up to 20,000 lb., conveyor system
Harborside Refrigerated Services, Inc. (Port Authority Berths Nos. 210, 211)	Verger Boulevard	1,200 ft. Marginal Wharf	34 ft.	Fork Lifts. Mobile shore cranes available 70 – 300 tons.
Spessard L. Holland Ro/Ro	Verger Boulevard	—	34 ft.	Public facility.

SPECIALISED GENERAL CARGO FACILITIES:

Operator	*Location*	*Length*	*Depth*	*Remarks and Equipment*
Commercial Metals Transport Co.	West end of Port Sutton, East side of turning basin	530 ft. Marginal Wharf	30 ft.	Scrap metal loading facility. 4 diesel cranes 3×80 ft. boom, 1×70 ft. boom, each equipped with electric magnets.
Tampa Bay Terminal Inc.	Foot of Grant St.	700 ft. Marginal Wharf	34 ft.	Scrap metal loading facility. 2 diesel electric travelling, revolving, full-portal shipside cranes with 130 ft. boom and capacity of 40 tons. Equipped with electric magnets.
Hardaway	Port Tampa	330 ft.	6 ft.	Pre-stressed concrete products. 1×30 ton crane with 120 ft. boom.

DRY BULK FACILITIES:

Operator	Location	Depth	Max. L.O.A.	Max. Beam	Height of Vessel Waterline to bulwark	Chute Travel	Loading Rate (N)=Net (L)=Long t.p.h.
Agrico Chemical Co.	Big Bend	34 ft.	1,500 ft.	120 ft.	47 ft.	1,500 ft.	3,000 (N)
CF Industries Inc. (Port Authority Berth No. 204)	Holland Terminal	34 ft.	600 ft.	85 ft.	47 ft.	Stationary	1,100 (N)
Detsco Terminals Inc.	14th St. and Harbor	32 ft.	380 ft.*	80 ft.	40 ft.	350 ft.	1,250 (N)
Eastern Associated Terminals Co.	22nd St. Causeway Boulevard	34 ft.	850 ft.*	120 ft.	50 ft.	400 ft.	3,500 (N)
Gardinier Inc.	Highway 41 South	30 ft.	600 ft.*	80 ft.	51 ft.	335 ft.	400–900 (L)
IMC Phosphate Terminal Co.	Port Sutton	34 ft.	800 ft.*	104 ft.	43 ft.	378 ft.	1,800 (L)
Rockport	22nd St. Causeway Boulevard	34 ft.	1,450 ft.*	120 ft.	53 ft.	1,450 ft.	3,000 (N)

*Can load longer vessels by shifting during operation.

Shipmaster's Report: Bulk phosphates are loaded in Port Sutton (one berth) and in the East Bay (two berths: Rockport owned by SCL Seaboard Coast Line and Eastern Associated Terminal).

Loading rates: about 1,000 t.p.h. at Port Sutton;
about 3,000 t.p.h. at the two berths
in East Bay area.

Trimming: the loading elevators are not equipped with trimming devices. Most cargoes can be trimmed by bulldozers. The bulldozer weighs 5 long tons, and is placed on board with ship's gear. The IMC elevators at Port Sutton and the SCL elevator (Rockport) use shore gear to place the bulldozer on board. A minimum of 8 to 7.5 ft. headroom under the coaming is required for bulldozer trimming.

DRY BULK FACILITIES: Others:

Operator	Location	Depth	Berthing Space	Handling Equipment	Storage Area	Product Handled
Cargill Inc. (Port Authority Berth No. 258)	North 19th St.	32 ft.	700 ft.	Marine leg for unloading 30,000 bushels/p.h., and spout loader-rate of 600 tons	Capacity of elevator is 1,000,000 bushels; 8,000 ton bulk warehouse; 4,800 ton bulk warehouse.	Grain and dry bulk agriculture products
Detsco Terminals, Inc.	14th St. and Harbor	32 ft.	540 ft.	None.	Storage area leased out.	Cement and caustic soda
Florida Portland Cement Division	Hookers Point	34 ft.	820 ft.	Belt material handling system capable of receiving 4,000 short t.p.h. of aragonite or 1,500 short t.p.h. of gypsum 3 electric, travelling bridge cranes equipped with 2.5 and 3 cu.yd. grab buckets.	800×100 gypsum storage shed; 215,000 barrel holding tanks for fuel storage (for plant consumption) 220,000 ton capacity open storage.	Gypsum rock, aragonite
Ideal Basic Industries, Inc.	Port Sutton	34 ft.	1,038 ft.	2×8 in. pipelines to storage. 4×12 in. pipelines to storage.	8 silos with 190,000 barrel capacity. 3 bins with 5,640 ton capacity.	Cement
I.S. Joseph, Co.	Port Tampa	34 ft.	700 ft.	Belt elevator from storage to loading spout. Rate of discharge 500 t.p.h. Direct transfer from rail cars to vessels at 200 net t.p.h.	Silo capacity of 10,000 net tons.	Citrus pellets and other dry bulk products.
National Gypsum Co.	Port Tampa	34 ft.	950 ft.	Receiving hopper and conveyor–unloading rate of 2,000 net t.p.h.	Open area approx. 10 acres.	Gypsum rock
Paktank Florida, Inc.	Pendola Pt., Port Sutton	34 ft.	700 ft.	Dock crane with 80 ft. boom with unloading rate of 400 t.p.h. Loading tower with rate of 1,200 t.p.h.	Building 125 ft.×700 ft. with storage capacity of 50,000 tons. 4 silos with 8,000 ton capacity.	Potash, phosphatic products.
Standard Gypsum Corp. (Port Authority Berth No. 223)	Hooker Point	33 ft.	600 ft.	Evacuator and conveyor system; radial stacker.	4.62 acres	Gypsum and salt
Tampa Electric Co.	Big Bend	35 ft.	788 ft.	200 ft. high travelling tower-conveyors system with unloading rate of 4,000 t.p.h.	24 acres	Coal
Tampa Electric Co.	Port Sutton	30 ft.	450 ft.	2 electric travelling unloading towers equipped with straight-line boom, and receiving hopper-combined unloading capacity of 1,600 t.p.h.	Exact size unknown	Coal

Facilities available for smaller vessels.

Operator	Depth	Berthing Space	Product Handled
Morton Salt Co.	14 ft.	600 ft.	Salt
Paktank Florida, Inc.	12 ft.	500 ft.	Grain fertiliser, materials, potash, caustic soda, salt.

FIRE PRECAUTIONS: No specific precautions other than usual.

GANGWAY/DECK WATCHMEN: Watchmen not necessary, but available when required.

OPENING/CLOSING HATCHES: Longshoremen open and close hatches.

CERTIFICATES:

Documentation Papers.
Load-line Certificate.
Certificate of Safety at Sea (when carrying passengers).
Certificate of Safety Equipment.

CUSTOMS ALLOWANCES: Tobacco, 2 packs of cigarettes per day per man, wine and/or Spirit, no set amount. Each boarding officer has different views (i.e. German and Scandinavian vessels allowed 2 bottles of beer per day per man). Allowances made within reasonable bounds at Master's discretion subject to boarding officer's approval.

CARGO GEAR: No local special safety requirements. Longshoremen and U.S. Department of Labor requirements are uniform over the U.S.

IDENTIFICATION CARDS: Passports required.

CONSULS: The following countries are represented in Tampa:

Belgium
Colombia
Denmark
Finland
France
Germany
Honduras
Italy
Korea
Mexico
Netherlands
Norway
Panama
Sweden

REPAIRS: All types are possible.

DRY DOCKS: Graving dock: 900 ft. long × 150 ft. wide, 21 ft. from MLW to top of keel blocks; 525 ft. long on bottom × 80 ft. wide, and depth over keel blocks 16-18 ft. at MHW.

Dry dock: 200 ft. long × 65 ft. wide. There are 2 other dry docks besides those listed above.

Also see "Developments".

REPATRIATION: No foreign crew pools in Tampa (located in New Orleans, San Francisco and New York), but crew changes can be made when Master radios requirements to Agent who arranges with local Consul or through crew pool in nearest city named above for applicable country (if no Consul is available in Tampa). American crew pools for all unions in Tampa.

Repatriation available at Tampa International Airport and is handled by Consul or Master.

AIRPORT: Tampa International Airport served by regular airlines and located approximately 15 miles from main port area; 5 miles from Port Tampa and 16 miles from East Tampa.

TIME: Tampa normally on Eastern Standard time with Daylight Saving Time in effect from last Sunday in April to last Sunday in October.

HOLIDAYS: New Year's Day, January 1st; Martin Luther King's Birthday, January 15th; Gasparilla Day 2nd Monday in February (local); Lincoln's Birthday, February 12th; Washington's Birthday, 3rd Monday in February; Good Friday; Memorial Day, Last Monday in May; Independence Day, July 4th; Labour Day, 1st Monday in September; Columbus Day, 2nd Monday in October; Armistice Day, November 11th; National Election Day, November; Ted Gleason Birthday, November 8th; Thanksgiving Day, 4th Thursday in November; Christmas Eve, December 24th; Christmas Day, December 25th; New Year's Eve, December 31st.

When any of above holidays fall on Sunday, they will be observed on Monday following. Work on these holidays is by special arrangement only.

POLICE/AMBULANCE/FIRE: Police 223-1112; Ambulance 681-4422; Fire 223-4211.

TELEPHONES: Installation of telephone aboard can be arranged.

SERVICES: Compass adjustments available; radio direction finder; radar repairs; tank cleaning.

SHIP SUPPLY SERVICE: Captain Riley F. Bryan, Sea Taxi, P.O.Box 46618, Pass-A-Grille, Florida. Tel: (813) 381-3999.

Smith Launch Service, 241 E. Davis Blvd., Tampa, Florida 33606. Tel: (813) 251-0390.

Suncoast Helicopters, 4111 W. Columbus Drive, Tampa, Florida 33607. Tel: (813) 872-6625.

A. P. St. Philip, Inc., 1305 Shoreline Drive, Tampa, Florida 33605. Tel: (813) 248-1123.

SHORE LEAVE: Immigration authorities grant clearance after examination of passport or bona fide seaman's papers.

DELAYS: Delay can be expected in loading phosphate rock (1 or 2 days), and same delay applicable for berthing at elevators. Some delay possible in general cargo loading or unloading.

DEVELOPMENTS: The Tampa Port Authority has three new projects recently completed: a Roll-on/Roll-off dock capable of handling the largest vessels in the trade; a liquid bulk dock to accommodate vessels up to 900 ft. in length with 43 ft. drafts; and a dry dock to accommodate vessels up to 900 ft. in length.

Dredging operations are underway by: the U.S. Corps of Engineers to deepen the main harbour channels from 34 to 43 ft. Completion of the project is scheduled for 1986.

AUTHORITY: Tampa Port Authority, P.O.Box 2192, Tampa, Florida 33601. *Tel:* (813) 248-1924. *Telex:* 52441 – Port Auth Tpa. *Contact:* Emmett C. Lee, Jr., Port Director.

AGENT: Strachan Shipping Company, P.O.Box 2441, Tampa, Florida 33601. Tel: 813-228-7563. Telex II: 810-876-4149. Cables: "Strachan".

TEXAS CITY, Texas: 29.22 N. 94.53 W.

(See Plan Book)

DOCUMENTS, PILOTAGE, etc., refer to "Galveston".

RESTRICTIONS: Controlling depth in entrance channel 40 ft. Otherwise restricted by depth available at berth. Vessels enter day and night.

Industrial canal deepened from 34 ft. to 40 ft., in 1981.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Miami Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: Available if required.

Texas City Oil Docks	„	36 ft.
Union Carbide Terminal	„	34 ft.
Import Crude Terminals:		
Docks 40 – 41	depth	40 ft.
Arco Docks No. 11 – 12	„	40 ft.

MEDICAL: All medical assistance available.

DENSITY: Brackish.

FRESH WATER: Available at all wharves except Union Carbide Terminal.

FUEL: Bunker "C" available to tankers loading/discharging. All grades available by barge from Houston.

GANGWAY/DECK WATCHMEN: Required only if crewmen detained by Immigration.

CUSTOMS ALLOWANCES: Each man 300 cigarettes or 100 cigars or 1 lb. tobacco. 1 qt. wine/spirits.

CONSULS: See "Houston".

TIME: Central Standard Time. Daylight saving time effective from April to October.

SHORE LEAVE: No restrictions unless detained by Immigration.

SHIPMASTER'S REPORT: February, 1979.

Restrictions: Vessels on maximum draft must be clear of Texas City Channel before dark. There is no sailing or berthing during darkness for maximum draft vessels.

For large vessels it is necessary to ballast during discharge otherwise shore connections become too high.

VHF: Channel 13 from sea and Channel 14 for berthing.

Tugs: Usually 4-6 tugs for vessels on maximum draft.

Tankers: Large tankers dock at Docks 40 & 41 usually starboard side to. On either dock it is not easy loading stores from the dock. 2×12 in. connections.

Consuls: British Consul at Houston.

Customs Allowance: All souvenirs to be collected (items intended as presents) and sealed.

Repatriation: As with all U.S. ports must make out Form I-408 – application to pay off or discharge alien crewman.

Airport: At Houston.

Telephone: Pay telephone at bottom of gangway.

General: Will require ship's gangway abaft of manifold if bottom of gangway is more than 115.5 ft. (35.20 m.) abaft after manifold with a freeboard of 23 ft. or more.

AUTHORITY: Texas City Terminal Railway Co., P.O.Box 591, Texas City, Texas 77590. *Tel:* (713) 945-4461. *Contact:* K. L. De Maet, Vice-President. D. Holbrook, Harbour Master.

TOLEDO, Ohio: 41.42 N. 83.28 W. **(See Plan Book)**

Refer to "St Lawrence Seaway" for important general information.

PILOTAGE: By Seaway Pilots.

RESTRICTIONS: Navigation season from mid-March to end-December, approx. The port is connected to Lake Erie by an entrance channel, depth 27 ft. Vessel's size restricted by Seaway locks.

MAX. SIZE: 730 ft. length; 26 ft. draft. Height restriction of 104 ft. above water-line which applies to grain berths only.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Chicago Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Master must give at least 24 hours' notice to Commander 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also, at least 24 hours' notice of ETA at first U.S. discharge port is required. Toledo Port can be contacted through Lorain, Ohio or Port Colborne, Ontario.

TUGS: Available. Not compulsory, but sometimes necessary in bad weather.

BERTHING:

C & O Railway Dock: 2,000 ft. long, 26 ft. depth alongside.
Torco Dock: 1,200 ft. long, 26 ft. depth alongside.
Interlake Steel Corporation: 23 ft. depth alongside.
Mid States Terminals: 27 ft. depth alongside.
Cargill, Inc. Elevator: 27 ft. depth alongside.
Port Authority Facility: 4,100 ft. long, 27 ft. depth alongside.
Anderson Elevator: 27 ft. depth alongside.

CARGO HANDLING FACILITIES: 3 grain elevators at Toledo load vessels at 50,000 b.p.h. There are 3 coal-loading machines, each of which can dump 1×100-ton car per minute, also 1 machine which dumps 2 cars simultaneously, for a max. of 6,000 t.p.h.

Iron pellets are received at new Torco Dock from self-unloading lake vessels. Storage Capacity 800,000 tons.

Liquids handled include petroleum products, industrial molasses, trichlorethylene and perchlorethylene.

CRANES: Located at Port Authority Facility No. 1 – electric gantry cranes 72.5 and 110 tons. Four 25-ton gantry cranes.

BRIDGES:

UNALASKA (Dutch Harbor), Alaska: 53.54 N. 166.30 W.

DOCUMENTS:

Customs:

Masters Oath (1300).
General Declaration (1301).
Cargo Declaration (1302).
Ship's Stores Declaration (1303).
Crew Effects Declaration (1304).
Clearance from Last Port.

Immigration:

Immigration Documentation (I-418).
Crew/Passenger List.
Landing Permit (I-95).
Visa Crew List for Shore Leave (Supplied by Immigration).
Passport and (or) Seamens' Book.

PILOTAGE: Compulsory. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Unalaska/Dutch Harbor must make prior arrangements at least 12 hours before entering port. The following information must be included:

1. Name/Call Sign of vessel.
2. Nationality.
3. Length, draft and g.r.t.

Pilot Boarding Station:

Lat. 53′ 55′ 00″ N., Long. 166° 29′ 00″ W. 1 mile (1.61 km.) East of Ulakta Head. Pilots, tugboats, Harbour Master and shipping Agents standby on VHF Channel 16 (156.8 MHz).

Berthing:

(a) Pilot – Compulsory. Shifting of and EDT requires 1 hour advance notification.
(b) Berths arranged by Agent in advance.
(c) 1 small tug available annually. Circumstances may arise when other tugs are available for ship assistance.
(d) Lineman – Arranged through ship's Agent.
(e) Boatmen – Arranged through ship's Agent.

ANCHORAGE:

Outer Anchorage: Lat. 53° 54′ 00″ N. to Lat. 53° 55′ 00″ N. at Long. 166° 27′ 00″ W., Rocky, Depth 12 fathoms.

Inner Anchorages: Domestic and other vessels which have cleared customs.

1. Dutch Harbor: Lat. 53° 54′ 00″ N., Long. 166° 31′ 20″ W., mud, depth 18 fathoms.
2. Iliuliuk Bay: Lat. 53° 52′ 40″ N., Long. 166° 31′ 10″ W., mud, depth 14 fathoms.
3. Captians Bay: Lat. 53° 52′ 00″ N., Long. 166° 33′ 33″ W., mud, depth 15 fathoms.
4. Nateekin Bay: Lat. 53° 53′ 00″ N., Long. 166° 37′ 00″ W., mud, depth 17 fathoms.
5. Broad Bay:
   (a) Preferred Oil Rig Anchorage Lat. 53° 55′ 05″ N., Long. 166° 36′ 30″ W.
   (b) Alternate Oil Rig Anchorage Lat. 53° 56′ 05″ N., Long. 166° 36′ 30″ W.

Must check with the U.S. Coast Guard and the Alaska Department of Fish and Game prior to anchoring or placing an oil rig at these locations. More locations may be forthcoming.

Note: When anchoring in Dutch Harbor, no vessel may anchor in the glide path to the airport.

MAX. SIZE: No restrictions except draft at various facilities and through the East Channel 17 ft., Rocky Bottom at MLLW.

RADIO: (a) Department of Public Safety, Harbour Master, Pilots, Tugs, Shipping Agents and National Marine Fisheries Observer Transfer Station standby on Marine VHF Channel 16. 4125 A kHz.

(b) Alaska Department of Fish and Game and the Alaska Department of Fish and Wildlife, (State Troopers) standby on Marine VHF Channels 6 and 16. 4125 A kHz.

(c) Marine Operator calls vessels on Marine VHF Channel 16 and receives all radio traffic on VHF Channel 28.

(d) All other traffic stands by on Marine VHF Channel 6.

TUGS: Unimac Pacific Towing – 55 ft., 800 h.p. vessel.

Boatmen:

Victory Services – VHF Channel 16.
Ballyhoo Services – VHF Channel 16.

CRANES: 100,000 lb container lift at American President Lines. Mobile cranes at the other facilities up to 150,000 lb. at request through Shipping Agent.

BERTHING:

Berth No.	*Wharf Length (ft.)*	*Depth at MLLW (ft.)*	*Remarks*
1	450	30	City Dock – Warehouse available.
2	300	40	APL – 208, 3 ph., 60 cycle power. 100,000 lb. gantry crane.
3	300	50	Chevron Fuel Pier.
4	160	30	Magone Marine (repairs).
5	234	36	Sea Alaska Products.
6	250	26	Sea Alaska Products (barge Resoff).
7	200	26	Sea Alaska Products.
8	35	22	MarCenCo (Exxon).

13	350	30	East Point Seafoods.
14	250	30	Whitney Fidalgo Seafoods Inc. barge.
15	250	36	Pacific Pearl Fisheries – Warehouse available.
16	250	30	Universal Seafoods (barge Unisea).
17	250	30	Universal Seafoods (barge Vita).
18	90	30	Universal Seafoods (Galaxy Dock).
19	40	30	Universal Seafoods (Viceroy Dock).
22	800	18 (var.)	City Small Boat Harbor, Fishing/Pleasure.
23	78	20	Panama Marine (Repair, 300 ton haulout).
24	160	31	Pan Alaska Fisheries, Captians Bay.
25	300	70	Crowley Maritime (1st April – 30th October).
26	200	70	Off Shore Systems Inc.

FRESH WATER: Fresh water is available at most berths. Order through Agent or Dock Operator.
FUEL: Available at Chevron Fuel Pier No. 2 Diesel as well as marine lubricants.
GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway used.
OPENING/CLOSING HATCHES: Stevedores or ship's crew whichever to ship's advantage.
REPAIRS/SERVICES: Most deck, hull, engine, radar, RT, gyro, hydraulic, refrigeration and almost all types of marine electronic and electric repairs. Divers available for underwater surveys and repairs.
DRY DOCKS: Panama Marine 300 ton haulout facility.
SURVEYORS:

1. Kodiak Marine Surveyors, P.O.Box 356, Kodiak, Alaska 99615. Tel: (907) 486-5616.
2. Rocky Point Enterprizes, Inc., P.O.Box 1047, Homer, Alaska 99603. Tel: (907) 235-8967.
3. Alaska Marine Surveyors, SRA-2 Box 9312, Eagle River, Alaska 99577. Tel: (907) 694-3055.
4. The Salvage Association, 2200 6th Avenue, Suite 1110, Seattle, WA 98121. Tel: (206) 623-1578.
5. United States Salvage Association. Inc., 2256 152nd Street, N.E., Suite 1, Redmond, WA 98052. Tel: (206) 747-5398.
6. Capt. Wolslenholm, P.O.Box 3313, Anchorage, Alaska 99510. Tel: (907) 277-5109.

REPATRIATION: Crew changes and repatriation can be carried out with little difficulty.
AIRPORT: Distance 4.5 miles from any facilities. 2 flights daily (except on Sunday and on holidays 1 flight) to Anchorage with domestic and international connections. Reeve Aleutian Airways and Air Pacific, Aleutian Aire Ltd., Air charter service state wide.
TIME: GMT minus 9 hours in Winter, and GMT minus 8 hours in Summer. Last Sunday in April clocks advanced 1 hour. Last Sunday in October clocks retarded 1 hour.
POLICE/FIRE/AMBULANCE: (907) 581-1233; Emergency 911; VHF Channel 16, 24 hours a day.
EMERGENCY CO-ORDINATION CENTER: U.S. Coast Guard. Dial 0 – Ask operator for Zenith 5555 or 2182 kHz.
GENERAL: Fishing vessel's wide lights and search lights must be turned out prior to vessel entering port.
HOLIDAYS: New Year's Day, Lincoln's Birthday, Washington's Birthday (3rd Monday in February), Seward's Day (last Monday in March), Memorial Day (last Monday in May), Independence Day, Labor Day, Alaska Day (18th day in October), Veteran's Day (November 11th), Thanksgiving Day and Christmas Day and every Sunday and every day designated by public proclamation by the President of the United States or the governor of the state as a legal holiday.
AUTHORITY: City of Unalaska, P.O.Box 89, Unalaska, Alaska 99685. *Contact:* Harbour Master, Bryson M. Riordan, USN, Ret. *Tel:* (907) 581-1251 or Marine VHF Channel 16.

VALDEZ, Alaska: 61.07 N. 146.21 W.

Also see "Valdez Marine Terminal".

Located at head of Valdez Arm in Prince William Sound.
APPROACHES: Via Prince William Sound to the Valdez Pilot Station.
DOCUMENTS: See "Anchorage, Alaska".
PILOTAGE: Pilots board approx. 2 miles North of Busby Light.
MAX. SIZE: Harbour depth over 300 ft. Tides: diurnal range 12 ft. Also see "Berthing" and also see "Valdez Marine Terminal".
HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.
AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).
ANCHORAGE: Excellent, close by dock. Bay is too deep.
CUSTOMS: Quarantine, local. Immigration and Customs from Anchorage.
TUGS: Limited availability.
BERTHING: Valdez City Dock: 36 ft. MLLW. 600 ft. long by 40 ft. wide. 2 warehouses, 1 heated, 1 unheated. Stevedore provides equipment which includes fork-lifts and 2×100 ton mobile cranes and 1×150 ton mobile crane. Dock operated by North Star Stevedoring Co.
Floating Quay: Length 700 ft., width 100 ft. Mobile cranes available. Facilities for Lo/Lo and Ro/Ro.
STEVEDORES: 3 gangs.
TANKERS: *Valdez Dock Co., Petroleum Dock:* Length 200 ft., width 40 ft., depth 36 ft. at MLLW.
Also see "Valdez Marine Terminal".
REPAIRS: Minor repairs only.
FRESH WATER: Available in temperate seasons.
FUEL: Not available.
MEDICAL: 150-bed mental patient hospital; 15 beds for local use; 1 doctor, 1 dentist regularly from Anchorage.
TRANSPORTATION: Air; highway to Fairbanks and Anchorage.
AUTHORITY: Valdez Dock Co., P.O.Box 85, Valdez, Alaska 99686.

VALDEZ MARINE TERMINAL, Alaska: 61.05 N. 146.24 W. **(See Plan Book)**

OPERATORS: Alyeska Pipeline Service Company.
The terminal does not provide any tug, launch or pilotage assistance for the berthing or unberthing of tankers calling at the terminal. These services, as well as any other tanker services, must be arranged separately by tanker owners.
LOCATION: The Trans-Alaska Pipeline Valdez Marine Terminal is situated on the Southern shore of Port Valdez.

Port Valdez is a natural deep-water fjord located at the N.E. part of Prince William Sound which provides access from the Gulf of Alaska. Port Valdez is about 12 miles long and 2.5 miles wide, is surrounded by steeply rising mountains, and remains ice free throughout the year. The approach to Port Valdez is by way of Valdez Arm, a deep-water channel with a minimum width of approximately 3,000 ft.

The overland approach to the site, which is close to the mouth of the Lowe river, is by road about 6 miles long connecting the terminal with the Richardson Highway. The town of Valdez is 14 miles from the terminal by this route. The distance by boat across to Port Valdez is approx. 2.5 miles.

The terminal operates 24 hours per day, 7 days per week, throughout the year.

The administrative offices will normally be open between 0800 and 1630 hrs., Monday through Friday. The office telephone number is (907) 835-2261.
DOCUMENTS:
Certificate of Financial Responsibility.
SOLAS Safety Equipment.
SOLAS Safety Construction, or for U.S. documented vessels: U.S. Coast Guard Certificate of Inspection.
SOLAS Radiotelegraphy Certificate.
Crew Lists.
Derat Certificate.
Clearance from Last Port.
PILOTAGE: The Pilot boards off Rocky Point. Arrangements to be made by vessel's Agent.
ARRIVAL ADVICE: Masters of vessels bound for the terminal must advise the terminal as follows:
Last Port ETA: Tankers en route to the terminal, upon departure from their last port of call prior to Valdez, will send a telegram or telex to Alyeska Pipeline Service Company, Valdez, Alaska, Telex No. 090-26-564 (Answerback: Alyeska Valz) advising the estimated Alaskan local time and date of arrival.
72-hour ETA: Not less than 72 hours, unless transit time is less than 72 hours, prior to arrival at Cape Hinchinbrook, tankers will send a telex or telegram to Alyeska Pipeline Service Company providing the terminal with the following information:

a. ETA at Cape Hinchinbrook.
b. Quantity of ballast to be pumped ashore and grade of last cargo.
c. Quantity of oil to be loaded.
d. Distance from the bow to cargo manifolds.
e. Size, number and type of cargo connections.
} At first call to Terminal. Not necessary on subsequent voyages.
f. Amount of provisions and stores to be loaded.

Final ETA: Tankers will send a final ETA, 24 hours in advance of their arrival. This 24 hour ETA shall be as accurate as possible and tankers will notify the terminal whenever the arrival time changes by more than 3 hours.
Notice of Arrival: After entering the Coast Guard's Prince William Sound Vessel Traffic Service, vessels ready to commence loading or deballasting should give immediate notice to the terminal. This notice is extremely important as it can affect berthing priority.
Coast Guard Notification: Terminal will advise USCG at Valdez of all ETAs received.
AMVER Participation: The notice of arrival requirement to be given to the U.S. Coast Guard Captain of the Port in Valdez, Alaska, can be met if vessels participate in the Automated Mutual-assistance Vessel Rescue System (AMVER). Participation in AMVER will also make the Coast Guard's Prince William Sound Vessel Traffic Service aware of the tankers that will be entering the service.
Initial Radio Contact: Ship-to-shore radio telephone calls can be made to the terminal, (907)-835-2261, 24 hours a day by normal commercial Channels.

RADIO: All times are GMT – following information produced as a "guide" and subject to change.

TUGS: 2×7,000 h.p. and 1×9,000 h.p. twin-screw tugs and 2×300 h.p., single-screw mooring launches are on standby at the terminal to provide oil spill containment, cleanup and contingency services and fire fighting services as required by the terminal. The tugs are equipped with telescoping fire monitors and will be capable of providing 3,500 g.p.m. of foam or firewater at 150 p.s.i.g. at an elevation 70 ft. above the tug's waterline. The tugs are equipped with VHF-FM radio-telephone communication equipment. Should tankers desire to contact the tugs, the tugs may be reached by calling on Channel 16 (156.80 mHz).

The tugs and mooring launches are available to provide berthing and unberthing services to tankers calling at the terminal.

VHF: The Alyeska Pipeline Service Company operates a VHF – FM base station in Valdez, Alaska under the call sign "WAB – 952". This base station is maintained for the purpose of transacting company business with either inbound or outbound vessels and is open 24 hours a day. (Transmit/receive range of this station is limited to Port Valdez.) The official language for all communications shall be English.

Channel	*Frequency*	*Use*	*At*
10	156.500 MHz	Intership and Ship to Coast Guard	A – B – C
16	156.800 MHz	Distress – Safety and Calling	A – B – C
	A –	Contingency Management Centre	
	B –	Oil Contingency Warehouse	
	C –	Operational Control Centre	

The VHF – FM marine radio system utilized by the terminal is compatible with the Prince William Sound Vessel Traffic Service which is operated by the U.S. Coast Guard in Valdez, Alaska. The USCG Vessel Traffic Service will have VHF – FM radio-telephone coverage extending beyond Cape Hinchinbrook and including Prince William Sound, Valdez Arm, and Port Valdez. The tugs available at the terminal will also be equipped with VHF – FM transceivers.

TANKER REQUIREMENTS: *General:* Certain requirements of governmental agencies are in effect at the terminal in order to minimize the chances for a pollution incident. These requirements apply to all tankers calling at the terminal.

Operations at the terminal are primarily aimed toward the safe loading of tankers and the prevention of collisions and groundings of vessels that call at the terminal. These aims will be met by insisting upon and utilizing conventionally constructed tank vessels manned by skilled crews, use of positive vessel traffic control within Prince William Sound and Port Valdez, and use of all traffic advisory and communications services in West Coast ports. The purpose of the following requirements for tankers calling at the terminal is to materially enhance tanker loading and discharge operations and to increase the safety of navigation so that the danger of pollution from oil spills is substantially reduced.

Safe Navigation: Tankers will observe the rules and directions issued by the U.S. Coast Guard as operator of the Prince William Sound Vessel Traffic Service. These rules and directions will pertain to communications check points, ETAs, traffic lane separation, anchorages, one-way traffic, speed, etc.

In addition to the normal instruments used in celestial navigation and piloting (sextant, pelorus, etc.), the following electronic devices must be aboard and in good working order:

a. Fathometer/Depth Sounder.
b. Loran C Receiver.
c. Two Independent Radar Systems. (10 cm. and 3 cm.).
d. Radio Direction Finder.

All vessels must have a qualified Pilot aboard for the transit of Prince William Sound and Port Valdez.

Communications: Tankers calling at the terminal will be required to have the following communications equipment aboard and in good operating condition:

a. VHF – FM radio-telephone with sufficient Channels and speakers to comply with the Prince William Sound Vessel Traffic Service operating rules and the Bridge-to-Bridge Radiotelephone Act.
b. Radiotelegraph.
c. Portable UHF transceiver will be supplied by the terminal.
d. Single sideband radio.

The portable UHF transceiver shall have at least five Channels which are tuned to the berth frequencies listed.

Additional Equipment: Tankers calling at the terminal will be required to have the following additional equipment:

a. Tankers must carry standard 6 in. hose sufficient to make at least 50 ft. in length for emergency lightering purposes.

b. Accommodation ladders and Jacob's ladders must be of sufficient integrity and free from ice and snow to permit safe embarking and disembarking by the Pilot.

c. Mooring lines must be of sufficient size, strength, and quantity to permit safe mooring of the vessel.

d. Manifold reducers, connectors, and extensions must be made of steel. Cast iron reducers will not be permitted.

e. Tankers which call at the terminal will be required to retain all solid waste refuse aboard the vessel, or use a suitable sewage treatment plant before discharge.

f. All ullage caps will remain closed during loading except during gauging or sampling.

g. Prince William Sound emergency towing cable package.

Operational Requirements: The following procedural and operational requirements are listed in order to make tanker Owners and Masters aware of some additional safety and anti-pollution measures in effect at the terminal. These requirements will be restated in the sections pertaining to the pre-loading inspection and cargo loading.

a. No repairs to radars shall be made while a vessel is moored to the loading berth unless authorised by the Terminal Marine Supervisor.

b. The tanker's main CW wireless set must be de-energized and switched off while alongside the loading berth.

c. Tank tops shall remain closed during loading operations. Petroleum vapours shall be vented through mast risers or stand pipes at an appropriate height above the main deck.

d. Ship's crew will assist with connecting and disconnecting loading arms to and from the vessel's cargo transfer manifold. Assurance that the arms are secured properly without damage shall be observed during pre-loading inspection. However, as a convenience the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection.

e. All sea valves connected to the cargo piping system shall be sealed in the closed position prior to loading oil.

f. Prior to commencement of loading operations, a joint inspection of the vessel and a pre-transfer conference will be held by the Terminal Marine Supervisor and the tanker officer in charge.

g. No repairs that would result in immobilization of the vessel shall be carried out while alongside of the loading berths unless the Terminal Marine Supervisor specifically authorises such work.

BERTHING: *Berth Priority:* Berth priority and berthing order will be determined by the Terminal Marine Superintendent who will use the general guideline of assigning tankers and berths in the order by which tankers enter the Prince William Sound Vessel Traffic Service and are in all respects ready to discharge ballast or load.

Procedures: Tugs will be dispatched by the Marine Shift Supervisor to meet inbound tankers and to assist in berthing at the nominated berth. The Master shall remain solely reponsible, on behalf of his owners, for the safety and the proper navigation of his vessel. Manoeuvring power must be available on the main engines during berthing operations. The positioning of the tanker's loading manifold in relation to the metal loading arms has to be carried out to a proper alignment, as required by the berth operator.

Maximum Allowable Berthing Velocities: The following table gives the designed maximum allowable berthing velocities for Berth Nos. 1, 3, 4, and 5. The velocities are given in inches per second for the various size tankers in the 40% ballast condition:

	Berth No. 1	Berth Nos. 3, 4 and 5
85,000 d.w.t.	9 in./sec.	12 in./sec.
120,000 d.w.t.	8 in./sec.	11 in./sec.
265,000 d.w.t.	—	7 in./sec.

Note:

(a) 1 knot=20.2 in./sec.

(b) Velocities are given for a line normal (perpendicular) to the axis of the dock or the berthing dolphins.

Mooring Hooks and Mooring Capstans: Each berthing dolphin and each mooring dolphin will be equipped with a mooring capstan and either 2 or 3 quick-release mooring hooks. Berthing dolphins will have double quick-release hooks, and the mooring dolphins will have triple hooks.

The recommended mooring line arrangement diagrams included in the "Plan Book" show the location of these double and triple hooks. Since Berth No. 1 has no berthing dolphins, the 4 double quick-release hooks are located on the loading dock.

These mooring hooks are designed to service 1 mooring line per hook. Thus, no more than 3 lines should be led to any mooring dolphin nor should more than 2 lines be led to any berthing dolphin. These mooring hooks may be released locally.

Each mooring capstan will be mounted on, and form an integral part of, the associated double or triple quick-release mooring hook. This will provide a mooring capstan to assist in securing mooring lines at every berthing dolphin, mooring dolphin, and on the floating berth loading dock.

These mooring capstans are designed to give a minimum running pull of 2,000 kg. (4400 lb.) at a rate of 30 m. (98.4 ft.) per minute. The capstan will be positioned at a height sufficient to prevent mooring lines and messengers from becoming snarled on the quick-release hooks.

Mooring launches will be used to assist the tanker in running mooring lines to the mooring dolphins at each berth.

The terminal will provide suitable messengers for heaving in mooring lines from the launches.

Mooring Lines: Mooring arrangements shall be satisfactory to the Marine Superintendent. All critical moorings shall be of similar size and elasticity. Ropes of different material from those used to moor the ship may be used for positioning the vessel but shall not count as part of the final moorings. It is required that in ships of 90,000 d.w.t. and greater all final moorings shall be wire rope. Nylon tails may be used if fitted to all moorings. Ships should be outfitted with sufficient moorings of similar material for normal moorings. Ropes of different material may be used in emergency.

Moorings While Alongside Berth: Tankers must at all times remain adequately secured alongside the berth. Moorings must be kept at an even tension, avoiding a slack line or varying tensioning situation. Should such a situation arise and not be immediately rectified by the ship's crew after communication with the deck officer, the berth operator will suspend any transfer operation. All vessels fitted with tension winches should apply brakes once the tanker is moored and shall not leave winches in the self-tensioning position.

Emergency Towing Wires: While at a loading berth, tankers will provide emergency towing wires positioned at both the offshore bow and stern. The wires shall be in good condition, have an eye in each end, and be of adequate strength to move the vessel off the dock. The outboard eye shall be maintained at water level, and slack aboard ship shall be secured with small pieces of fibre line.

Mooring Line Arrangement Diagrams: (See "Plan Book"). The recommended mooring line arrangement diagrams are provided in the "Plan Book" as guidelines to acquaint the tanker Master with the general mooring line arrangement for the loading berths at the terminal. These arrangements are indicative of the minimum suggested number of lines and do not preclude the Master from using additional lines.

BERTHING FACILITIES: The major ship loading facilities include four independent loading berths, numbered 1, 3, 4 and 5. Berth No. 1 is a floating berth whereas Berth Nos. 3, 4 and 5 are fixed structures.

	Berth No. 1	*Berth No. 3*	*Berth No. 4*	*Berth No. 5*
	See Note 1	See Notes 1 and 2	See Notes 1 and 2	See Notes 1 and 2
Vessel Size (Design) d.w.t.	16,000 – 120,000	16,000 – 250,000	16,000 – 265,000	16,000 – 265,000
Type of Berth	Floating dock	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck Level of Berth above MLLW	32 ft. 8 in.	36 ft. 7 in.	36 ft. 7 in.	36 ft. 7 in.
Depth Alongside at MLLW (ft.)	125	85	85	80
Loading Arms (Number × Size)	4 × 12 in.	4 × 16 in.	4 × 16 in.	4 × 16 in.
Max. rate Per Loading Arm (bbls.p.h.)	20,000	27,500	27,500	27,500
Max. Design Flow Rate (per berth) (bbls.p.h.)	80,000	110,000	110,000	110,000
Loading Arm Spacing on Operating Dock (ft.)	11	11	11	11
Maximum Ship Manifold Pressure	Pressure alarm points will be set, based upon information given by ship's officers.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Emergency Shutdown	Can be initiated by berth operator or by OCC shutdown complete within 6.5 seconds after initiation.	See Berth No. 1	See Berth No. 1	See Berth No. 1
Access to Ship	42 ft. aluminium gangway	49 ft. 6 in. aluminium gangway	Telescopic Gantry	Telescopic Gantry
No. of Mooring Dolphins	4	4	6	6
No. of Berthing Dolphins	0	4	4	4
Mooring Hooks (One line per hook)	One triple hook per mooring dolphin Four double hooks on the operating dock	One triple hook per mooring dolphin One double hook per berthing dolphin	One triple hook per mooring dolphin One double hook per berthing dolphin	One triple hook per mooring dolphin One double hook per berthing dolphin
Potable Water	None	None	None	None
Bunker Facilities	None	None	None	None
Public Telephone	Available ashore in vicinity of berth	See Berth No. 1	See Berth No. 1	See Berth No. 1
Minimum Ship Manifold Spacing 1	—	—	—	—
2	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
3	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
4	—	6 ft. 9 in.	6 ft. 9 in.	6 ft. 9 in.
Quick Disconnect Coupling (QDC) Size (in.)	12	16	16	16
Manifold Size Range Acceptable to QDC (in.)	10 to 16	12 to 16	12 to 16	12 to 16

Note: (1) Although all berths are designed to handle vessels in the 16,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 10 in. in diameter. Normally, vessels less than 45,000 d.w.t. will be handled at Berth No. 1.

(2) Because of mooring dolphin limitations, vessels of more than 180,000 d.w.t. would be acceptable only if their deck machinery and mooring leads allowed an efficient bow and stern mooring line pattern. In addition to this requirement, distance from bow to manifold and prevailing weather conditions would have to be considered before berthing of such vessels would be authorised.

PRE-LOADING INSPECTION: *Pre-transfer conference and joint safety inspection:* Prior to the discharging of ballast from cargo tanks or loading of oil, a pre-transfer conference and a joint safety inspection will be conducted by the Terminal Marine Supervisor and a responsible deck officer aboard the tanker who will be in charge of bulk liquid transfers aboard the tanker.

The purpose of the pre-transfer conference and the joint safety inspection is to insure that both the terminal and the tanker are suitable and ready for safe loading and handling of oil.

The checklist is designed to meet the following requirements:

a. Section 4.4 of the International Oil Tanker and Terminal Safety Guide which relates to the agreed procedures and safety checks prior to the commencement of cargo loading.

b. Title 46, U.S. Code of Federal Regulations, Section 35.35-30 relating to a Declaration of Inspection for Tank Vessels.

c. Title 33, U.S. Code of Federal Regulations, Section 156.150, relating to a Declaration of Inspection prior to the transfer of bulk liquid cargo from a shore facility to a large vessel.

The checklist is to be taken aboard the tanker by the Terminal Marine Supervisor and shall be used during the pre-transfer conference and the joint safety inspection of the tank vessel to insure compliance with applicable regulations and safety standards. Columns are provided on the checklist for the Terminal Marine Supervisor and the tanker person-in-charge to initial, indicating that the requirements have been met. The original of the checklist shall remain aboard the tanker, and a copy shall be returned to the Terminal Marine Supervisor for subsequent delivery to the berth operator.

Terminal personnel are authorised to suspend oil transfer operations if any of the safety rules listed or on the checklist are not observed, or if any other danger is believed to exist.

The Master of the tanker or his representative has the right to shut down loading operations in the event he feels shore operations are unsafe.

During the pre-transfer conference, the Terminal Marine Supervisor shall provide the responsible ship's officer with a printed sheet detailing description and location of the fire-fighting system and the other emergency systems at the terminal in general and at the berth to which the tanker is moored in particular. The Terminal Marine Supervisor shall also advise the vessel if any unusual or dangerous weather conditions are forecast or expected.

As the shifts on the berth change, the relieving Terminal Marine Supervisor and berth operator shall assure themselves that all conditions pertinent to their responsibilities are as previously agreed to, and shall sign the copy of the Declaration of Inspection. The relieving officer aboard the tanker shall assure himself that the original conditions still exist and shall sign the original of the Declaration of Inspection aboard the tanker. These relieving personnel will then become the person-in-charge of the transfer operation for the terminal and the tanker respectively.

BALLAST: *Ballast Quantities:* The terminal is to be informed of the approximate quantities of segregated clean and dirty ballast in the Master's pre-arrival message. This message should also state where the ballast was shipped and the grade of last cargo.

Ballast Reception Facilities: The terminal facilities will include three 430,000-barrel ballast reception tanks. Discharge of dirty ballast will be by way of the four 12 in. loading arms (Chiksans) on Berth No. 1 and the four 16 in. loading arms on Berth Nos. 3, 4 and 5. These loading arms connect to 20 in. lines at the berths and lead into a 42 in. line connecting each berth to the ballast reception tanks. Although the shore lines are insulated, they are not heat traced and there are no booster pumps to assist in the discharge of dirty ballast.

No. 5 berth is situated approx. 1.25 miles from the reception tanks and has a possible head of 150 ft. Max. pressure 40 p.s.i. (approx.).

In the event of any stripping problems, it is recommended that tanks containing unpumpable ballast be stripped internally to the slop tank and that the Load-on-top procedures be adopted.

Segregated Ballast: Only segregated ballast will be permitted to be discharged overboard. Segregated ballast is defined as ballast water that is introduced into a tank which is completely separated from the cargo oil and the oil fuel system and which is permanently allocated to the carriage of ballast. The deck log book must record all times of ballast discharge and when pumps are started or stopped. This log must also indicate whether or not the segregated ballast is being dropped in the initial stages to sea level. A close watch must be maintained on the overside discharge, with a deck floodlight or portable explosion-proof light being trained on the discharge during hours of darkness. If there are any indications of discolouration or sheen, discharge must be suspended and an investigation must be carried out. If there is any doubt as to the quality of the segregated ballast, all discharge will be made into the shore reception facilities.

Dirty Ballast: All ballast contained in any compartment or tank used for the carriage of oil will be classed as dirty no matter how clean the ballast may appear to be. No ballast carried in cargo tanks may be discharged at sea or in port.

After the connection of the loading arms has been completed and the suitable valves between the arms and the ballast reception have been opened, permission to commence discharge will be given to the responsible tanker officer by the berth operator who will have received approval from the Operations Control Centre (OCC).

Contact between the tanker and the terminal will be by means of the UHF radio that will be placed on board by the Supervisor. As during all transfer operations, there will be a continuous watch near the ship's manifold. In the event of an emergency on the berth, pressing of the emergency alarm will activate the valve closing mechanism.

On hearing this signal, the Crew member at the manifold must stop the ship's ballast pumps to avoid damage by pumping against a closed valve system ashore. (See Emergency Procedures.) On commencing discharge of dirty ballast and at frequent intervals during the discharge, a watch will be kept on the area around the sea valves even though the sea valves have been inspected during the initial safety checks and a seal has been placed on them by the inspecting Terminal Marine Supervisor. Any indications of any oily sheen will necessitate a shutdown of the discharge pumps and an investigation to be carried out before any further ballast can be discharged. Thirty minutes before completion of discharge, the responsible tanker officer will inform the berth operator who will in turn advise the OCC and the duty Terminal Marine Supervisor.

On completion of the discharge and after pumps have been stopped, the loading arm(s) used for dirty ballast discharge must be drained back into the slop tank. On vessels with an inert gas system, gauging will be taken by way of the deck purge pipes to determine that tanks are empty. It is not intended that vessels will depressure cargo tanks for visual inspections, nor should tank lids be opened on any compartment that is not gas free.

All safety regulations applicable during the loading of oil will also apply during the discharge of ballast.

Governmental Ballast Discharge Requirements:

State of Alaska: The State of Alaska requires that the Master of a vessel scheduled to take on any petroleum product or cargo, complete and sign the State of Alaska Department of Environmental Conservation Ballast Water Discharge Certificate Affidavit. To support this affidavit, the Master must be prepared to produce both deck and engine room log books and a legible copy of that portion of the Oil Record Book relevant to the sea passage from last discharge port to the terminal.

Federal Requirements: Prior to loading oil on any vessel, the terminal is required by the United States Department of the Interior to obtain from the Master of the vessel a legible copy of that part of the Oil Record Book that pertains to the voyage of the vessel to the terminal from the vessel's last oil discharge port. This legible copy shall be certified under oath by the Master as being true and correct. If the vessel is not required to maintain an Oil Record Book or similar records, the Master of the vessel is required to provide the terminal with an affidavit, duly sworn to and signed, stating any and all facts bearing upon any discharge of oil or oily water from the vessel during its voyage to the terminal from its last oil discharge port.

Should the Master be unable to comply with the preceding requirement or if it appears from the Oil Record Book or other documentation that a vessel has discharged oil or oily water during its voyage to the terminal, the terminal is required to promptly notify the Department of the Interior's representative, the Authorised Officer. Tankers discharging ballast water or other oily mixtures may be subject to penalties.

OIL CHARACTERISTICS: The predominent oil to be available at the terminal is currently North Slope crude oil. The following preliminary characteristics of North Slope crude oil are given to acquaint the Master and the cargo officers of tankers that will call at the terminal with the general properties of the cargo they will load.

Specific Gravity: 0.8933 at 60° F.

API Gravity: 27.0° API.

Pour Point: + 15° F.

Viscosity: 73.5 SSU at 100° F., 169 SSU at 60° F.

Reid Vapour Pressure: 4.0-4.5 lbs.

Sulphur Content: 0.94 per cent by weight.

Waxing: 85-117° F. (begins to precipitate). 50-55° F. (bulk of wax begins to come out of solution).

Mercaptan Sulphur: approx. 14 parts per million.

Loading temperature: approx. 100° F.

Dissolved H_2S: less than 0.2 parts per million.

LOADING FACILITIES: *General:* All loading operations will be accomplished in accordance with the joint inspection pre-transfer conference. Loading operations cannot commence until the vessel has complied with all State of Alaska and Federal Requirements and all required documentation has been provided.

Crew Responsibilities: Ship's crews will be responsible for assisting with handling the loading arms on board the tanker, furnishing and making the adaptor connections, removing blind flanges, and guiding the loading arms (Chiksans) to the appropriate manifold connections. However, as a convenience, the shore crew will aid the ship's crew in connecting loading arms to the ship's manifold as the shore crew will be more familiar with the shoreside facility connection. The Chiksan loading arms and couplings are hydraulically controlled by the berth operator who will be in constant voice communication with the individual responsible for the connection by means of the UHF portable radio that will be supplied to all vessels by the Supervisor.

If required, the terminal will supply 10 in. – 16 in. reducers at Berth No. 1 and 12 in. – 16 in. at Berths Nos. 3, 4 and 5.

Checklist Requirements: After the Terminal Marine Supervisor is satisfied that all the safety requirements have been complied with, permission will be given to commence loading. All operations in connection with starting of loading, switching of tanks, and topping off will be the responsibility of the responsible ship's officers.

Before the maximum pressure or loading rates agreed to at the pre-transfer conference are reached, slow loading will be started and the responsible ship's officer will ensure that the cargo is flowing to designated tanks, thus ensuring that all block valves separating lines are open. On completion of this check and after advising the berth operator, the pressure/rate will be increased to the maximum previously agreed by the Master, or the officer in charge.

A responsible member of the crew will remain near the manifold within sight of the berth operator. This is in addition to the officer on cargo watch who, at frequent intervals, will check the state of loading with the berth operator by means of the UHF radio. This officer will also advise the berth operator when changes in the loading rate are required.

The rate of flow into the tanker can be observed on the large digital readout situated by the berth operator's control position.

Loading Suspension: Terminal: Terminal personnel will suspend loading operations if any of the safety rules are not followed, or if terminal personnel supervising loading operations believe any other danger exists, providing adequate notice is given to the responsible ship's officer.

Tanker: The master is required to shut down loading if he feels that shore operations are unsafe, provided adequate advance notice is given to berth personnel.

Emergency Shutdown: In the event of an emergency (See "Emergency Procedures") the following types of shutdown could occur:

(1) "Dangerous" shutdown.
  (a) All berth block valves close.
  (b) Metering upstream block valves close.
  (c) Berth control valves close – one for each loading arm (in 5, 5.5, 6.0, and 6.5 seconds, respectively, to prevent surge to line).
(2) Fire shutdown
  (a) The preceding valve closures plus fire alarm and start fire pumps.
(3) Emergency shutdown, one per arm, closes control valve only.
(4) Low vapour pressure on any crude tank – initiates (1) preceding.

Pushbuttons for (1) preceding are located in berth area plus one on berth operator's alarm panel.

Pushbuttons for (2) 1 on roadway; 1 on roadway at land; 1 in Power Distribution Cabinet (PDC); 1 in Berth Operator Control (BOC) alarm panel; 1 in loading arm area.

Pushbutton for (3) 1 local at each valve.

Topping Off: Near the end of loading when topping off, the responsible ship's officer will request the gradual reduction of loading rate for topping off operations. This reduction will be achieved by the berth operator slowly closing the berth loading valves. The berth operator will progressively reduce the opening of the berth control valves and will take loading arms out of service, until the point when all berth control valves and block valves are finally closed, when advised by the ship's officer "Shut Down" or "Finished Loading". The loading arms will then be drained into a ship's tank.

Disconnecting: On being satisfied that loading arms and ship's manifold are empty, the order will be given from the responsible ship's officer to the berth operator to uncouple the quick release couplings.

During the period of disconnecting, the USCG Vessel Traffic control Centre at Valdez will have been advised. Tugs will be on standby, and providing that there are no other ship movements that would interfere with sailing, the "Early Departure System" will be carried out. The actual Bill of Lading figures will be sent to the master by W/T or Telex after departure.

COMPLETION/DEPARTURE PROCEDURE: *Topping Off:* As the tanker begins the topping off stage, the responsible ship's officer shall notify the berth operator who will in turn keep the OCC informed as the cargo loading rate is reduced. When the ship's officer estimates approximately one hour remains in the loading process, he shall notify the berth operator.

Tug Assistance: After being notified by the tanker that one hour remains in the loading sequence, the berth operator shall notify the OCC and the Terminal Marine Supervisor. The OCC shall continue to monitor the topping off process and the Terminal Marine Supervisor shall place the vessel's pre-arranged tugs on standby. The tugs shall be alongside the vessel after all loading arms have been disconnected and before any mooring lines are let go.

U.S. Coastguard Vessel Traffic Service: The departure of tankers from the terminal shall be in accordance with the published standard operating procedures for the Prince William Sound Vessel Traffic Service. The Coastguard Operations Centre located in Valdez shall be the directing authority for the operation of the vessel traffic service. The Terminal Marine Supervisor will notify the USCG-VTS one hour prior to the completion of loading and again when loading is complete. When the Terminal Marine Supervisor notifies the USCG-VTS that loading is complete, he will verify the tanker's status to enter the Vessel Traffic Service and will check on any inbound vessel traffic.

SAFETY: After the tanker is secured, the Terminal Marine Supervisor will board the tanker to contact the Master or his representative to:

- provide information on terminal safety regulations.
- agree on designated smoking areas
- advise ship's personnel on "Work Permit" and "Hot Work Permit" procedures.
- present ship/shore Safety Check List.
- present printed sheet describing terminal emergency procedures and fire fighting capabilities.

The following are **some** of the safety requirements.

Warning Signs, Lights, and Signals – Upon arrival at the terminal, a tanker shall display the following notice at the gangway:

WARNING	NO SMOKING
NO OPEN LIGHTS	NO VISITORS

During transfer of oil, and when in the non-gas free condition a red signal (flag by day and electric lantern at night) shall be displayed so that it is visible from all sides.

Blowing tubes – Funnel uptakes and boiler tubes will not be blown while a tanker is berthed at the terminal.

Use of Tools – No chipping or other operation likely to produce sparks will be allowed in any designated hazardous area. The Terminal Marine Supervisor and the responsible ship's officer shall both be satisfied that there is no such activity on the vessel or on the facility.

Flashlights, Hand Torches, Lanterns – Only self-contained battery powered flashlights, hand torches, lamps and lanterns, approved by USCG will be permitted to be used aboard the vessel or on the berths.

Main Engine – While berthed at the terminal, the tanker's main engines, steering machinery, and other essential manoeuvring equipment shall be maintained on standby status to permit the tanker to move from the berth on short notice.

Communications Equipment – A tanker's main transmitter shall be turned off and the main transmitting aerials shall be grounded whenever a tanker is alongside a loading berth at the terminal.

VHF-FM radiotelephone equipment, both portable and fixed, may be used as long as the equipment is permanently installed or intrinsically safe, conforms to FCC marine requirements, USCG requirements, and operates with a power and output of 1 watt or less.

The preceding requirements do not mean that essential servicing of ship's radio equipment cannot take place while alongside a berth. However, suitable arrangements for insuring safety during this work shall be made between the tanker and the terminal, including the securing of an appropriate work permit.

Operating and servicing of radar equipment aboard a tanker berthed at the terminal shall be agreed to by the Terminal Marine Superintendent or Marine Supervisor and shall be the subject of an appropriate work permit.

Vessels Alongside – Unauthorised craft shall be prohibited from securing to a berth at which a tanker is moored.

No craft shall come alongside a tanker while the tanker is handling crude oil or deballasting without the permission of the Terminal Marine Superintendent who shall instruct personnel aboard the craft that smoking, naked light, and galley fire regulations must be observed.

Designated Smoking Areas: Smoking shall be strictly prohibited within an area enclosing all tanker berths and loading docks and on board any tanker while at a berth, except.

(a) in buildings or other shore locations specifically approved for smoking and with such approval notices posted.
(b) on board a tanker in places specified by the Master, and agreed to by the Terminal Marine Supervisor.

Places designated for smoking shall not be outside of any of the accommodation areas. Special precautions shall be taken during conditions that may suggest danger; in particular, conditions of no wind or any indication of unusually high gas concentrations.

The Master is responsible for insuring that all on board are informed of the selected places for smoking and for posting suitable notices.

Only safety matches are permitted in approved smoking areas. The use of lighters is prohibited.

Galley Fires and Cooking Appliances – Galley burners are to be adjusted to insure efficient combustion and to prevent galley stack fires and sparks from incandescent soot. Flues are to be cleaned at regular intervals. When bottled gas equipment is used, the gas shall contain an additive which will give it a distinctive odour. Sufficient fire extinguishers shall always be provided near the galley. Oily rags and fat shall not be allowed to accumulate, and the exhaust fan ventilators shall be kept clean.

While a tanker is at a berth, the use of galley stoves and other cooking appliances with non-immersed elements such as electric hot-plates and toasters shall be permitted provided that the Terminal Marine Supervisor agrees that no hazard exists and that such use is in the galley, in the pantry, or in designated smoking areas.

Work Permits – If repairs are to be carried out on a tanker alongside a berth at the terminal, the responsible ship's officer must discuss and obtain agreement from the Terminal Marine Supervisor on the details of the work to be done. Certain types of repairs will be the subject of written work permits which shall be completed by the responsible ship's officer and authorised by the Terminal Marine Supervisor at the time of the pre-loading inspection check list. These types of repairs include but are not limited to:

(a) Repairs to main engine, steering machinery, or other manoeuvring equipment which might immobilise the tanker.
(b) Repairs to tanker's radiotelephone or communications equipment.
(c) Repairs to radar equipment.
(d) Repairs to galley equipment and cooking appliances.

Hot Work Permits – Any hot work done at the terminal, either on the berth or aboard a tanker moored to a berth must be approved by the U.S. Coastguard Captain of the Port, Western Alaska. This approval will be in the form of a signed Hot Work Permit, issued by the U.S. Coastguard.

EMERGENCY PROCEDURES: Fire: The signal for a fire aboard a tanker moored at the terminal shall be 5 prolonged blasts of the ship's whistle or siren supplemented by a continuous sounding of the ship's general alarm. In the event of a fire within the terminal, the tanker shall be notified by the berth operator and, in addition, the terminal fire alarm will also be sounded.

The initial action required of tankers in the event of a fire within the terminal is to prepare for a shutdown of all loading and ballast water discharge arms. This shutdown will be initiated by the terminal and not by the tanker. In case a shutdown does occur, loading and ballast discharge will not be commenced again until the all clear notification has been received from the Terminal Marine Supervisor.

In the event of a fire aboard the tanker or on the loading berth, the initial actions will consist of shutting down all transfer operations. The standby tug, followed by the other tugs, will be dispatched by the OCC to the appropriate berth and the fire water pump shall be started. If necessary, the tanker will be towed off the berth by tugs, using the emergency tow wires. Each berth is equipped with an independent fire water system which includes a 2,000-gallon-per-minute pump and a liquid foam system. Each berth is also equipped with the following fire-fighting equipment:

(a) 2 fixed foam monitors.
(b) 2 fixed firewater monitors.
(c) 5 fire hydrants.
(d) 3 hose reels.
(e) 1 shore to ship firewater connection including 75 ft. of 2.5 in. hose.

Each berth also has the capability to be interconnected with the tugs or with fire trucks to provide increased fire-fighting capacity. The foam system is designed for coverage of fire on the berths only and is not normally interconnected for use by shipboard firefighters in the event of a fire.

Note: Regardless of any assistance the terminal may render, vessels at the berth are expected to put their own emergency procedures into effect whenever required.

Man Overboard: In the event of a man overboard from a tanker moored at the berth, rescue efforts will be implemented immediately, and the berth operator shall be advised by UHF radio. The Terminal Marine Supervisor shall also be notified by the berth operator. The standby tug and mooring boat shall be advised by the berth operator and shall get underway immediately to attempt the rescue.

Life rings will be in position around the loading berth and also on the berthing and mooring dolphins. In case of a man overboard, the medical authorities will also be alerted by the berth operator.

Oil Spills: The notification requirements for an oil spill are delineated by Federal Law. The Federal Water Pollution Control Act (FWPCA) requires persons in charge of vessels (among others) to notify the appropriate federal agency whenever an oil spill enters navigable waters or the adjoining shoreline. The appropriate agency designated to receive these reports is the U.S. Coastguard which can be contacted on Channel 16, VHF-FM.

Notification of an oil spill shall be passed by the tanker to the berth operator who in turn shall inform the Terminal Marine Supervisor.

The terminal will call other agencies that are required to be notified.

The terminal will provide any available containment and cleanup assistance for any oil spill at the terminal. The terminal will activate its oil spill response procedures upon notification of an oil spill and shall utilise all available personnel, equipment, and resources to limit and minimise pollution.

CHARTS/PUBLICATIONS: The following official charts and publications are recommended for study when planning a voyage to Valdez, Alaska and the terminal:

(a) National Ocean Survey Charts:

Chart Number		*Title*
Old System	*New System*	
8500	531	Gulf of Alaska – Strait of Juan de Fuca to Kodiak Island
8502	16013	Cape St. Elias to Shumagain Islands
8551	16700	Prince William Sound
8520	16709	Prince William Sound – Eastern Entrance
8519	16708	Prince William Sound – Port Fidalgo & Valdez Arm, Valdez.

(b) Nautical Chart Catalogue No. 3 – Alaska

(c) United States Coast Pilot No. 9, Cape Spencer to Beaufort Sea (1964) with current supplement.

(d) Tides Tables, West Coast, North and South America (current year).

(e) Tidal Current Tables, Pacific Coast of North America and Asia (current year).

(f) United States Coastguard Light List, Vol. III, Pacific Coast and Pacific Islands (current year).

(g) Weekly Notice to Mariners published by Defense Mapping Agency Hydrographic Center (DMAHC).

(h) Local Notice to Mariners issued by Commander, Seventeenth Coastguard District, Juneau, Alaska.

(i) Radio Navigational Aids, Pacific and Indian Oceans (Publication No. 117B), published by U.S. Hydrographic Office.

WEATHER: *Wind:* The mountains which surround Port Valdez tend to constrain the flow of air to either an Easterly or Westerly direction. At Valdez Narrows, the predominant directions are Northerly and Southerly.

Jackson Point experiences stronger winds than Valdez Airport; however, light winds (less than 13 m.p.h.) occur about 85 per cent of the time. The prevailing wind directions are S.W. from May through September and N.E. from October through April. The N.E. Winter winds reach gale force but usually do not prevail for long periods. The site is well protected from Southwesterly winds but is fully exposed to the Northeasterlies and to winds coming off Mineral Creek, directly North of the facility, approx. 2.5 miles away across Port Valdez.

The occurrence of winds with speed greater than 19 m.p.h. from any direction is less than 7 per cent throughout the year.

A wind chill factor chart is presented for use in conducting operations during Winter seasons. As indicated, combinations of low temperatures and high winds combine to provide extremely low equivalent temperatures. Outdoor operations under these conditions should be closely supervised to insure that personnel and crewmen do not suffer from exposure or frostbite.

Precipitation: Precipitation is abundant during all seasons with the majority falling during the months July through November. Valdez has an average annual precipitation of 62.37 in. with a mean total of 244.5 in. of snow per year. Greatest snowfall in a 24-hour period was 43 in. in February 1928. Precipitation of an amount in excess of 0.01 in. occurs an average of 170 days per year. Estimate 1 in. rain = 12-15 in. snow.

Temperature: The mean monthly annual temperature is 35.7° F. with recorded extremes of +87° F. (June 1953) and −28° F. (February 1947). The month of January is the coldest with a mean daily minimum of 11° F. and a mean daily maximum of 26° F. The month of July is the warmest with a mean daily minimum and maximum of 45.2° F. and 60.1° F., respectively.

Visibility: Snow or snow with fog are the major causes of reduced visibility during Winter months. At the Valdez Airport, visibilities of 1 mile or less occur 3.7 per cent of the time, annually. Visibilities greater than 5 miles occur 85 per cent of the time.

Tides: The tide at Port Valdez has a diurnal range of 12 ft. and a mean range of 9.7 ft.

Waves: The port is surrounded by mountains and is well protected from the open sea and the wave action within the port is limited to wind-generated waves which are constrained by the fetch available. The maximum calculated wave height is 9.4 ft. from the East with a period of 4.3 seconds. Waves in the order of 6 ft. could occur from the N.W. quarter. An important exception to this is a tsunami or seismically generated wave which can be far in excess of the heights quoted above. Investigations in 1968 showed mean wave heights 3 to 6 ft. in Winter (independent occurence 0.7 per cent of time) and 2 to 3 ft. in Summer (0.1 per cent of time). Berths at the terminal are designed to withstand waves of 12 ft. with a vessel alongside and 20 ft. when vacant.

Ice: Valdez is an ice-free port as far as tanker operation is concerned. Light ice forms along the banks and in the small boat harbour at Valdez, but this has not interfered with small-boat operations.

Currents: It appears that surface currents measured during calm wind conditions in Port Valdez often oscillate with the tide, moving generally in and out of the port with maximum speeds of 0.5 knot. The Easterly (flooding) surface current during a falling tide may or may not persist throughout the year. Although Volume 9 of the U.S. Coast Pilot for Alaskan waters describes the current in Port Valdez as "too weak and variable to be predicted", measurements of surface current speeds typically show maximums of 0.5 to 1.0 knot.

It is requested that inbound tankers keep the OCC advised of weather conditions in the Gulf of Alaska, Prince William Sound, Valdez Arm, and Valdez Narrows in order that accurate information may be passed to outbound tankers.

VISITORS: Access to the terminal is limited to terminal personnel, authorised governmental personnel and authorised visitors with valid reasons for entry onto the terminal site.

Visitors to the Valdez Marine Terminal are requested to make arrangements through the Administrative Office in advance of their arrival at the terminal. Authorised visitors shall be met at the main gate, which provides the only land access to the terminal and is located at the East end of the terminal site, and shall be escorted through the terminal area. All persons passing through the main gate shall sign in and out with the guard. Any visitor who arrives at the main gate outside normal working hours of the Administrative Office and who has not made prior arrangements shall be turned away and requested to contact the Administrative Office during normal working hours.

The guard at the main gate shall ask any visitor desiring to meet a tanker crewman to wait at the gate until the vessel is called and arrangements have been made to meet the visitor.

Small boats and other vessel traffic will not be permitted to dock at the terminal site without the approval of the Terminal Marine Supervisor. Only taxicabs with valid passes will be permitted to enter the terminal site, and any private or commercial vehicles that are permitted in the terminal area will be subject to inspection on entering and departing the area.

SHORE LEAVE: If tanker personnel return to the Valdez Marine Terminal site in such a condition that they might require assistance to insure their safe return to the ship, they shall remain at the main gate until the guard grants them admittance. Should an escort be required, it will be provided by vessel personnel.

All tanker personnel transiting the terminal area will be required to carry their United States Merchant Mariner's Document (USMMD) and company identification of tanker owner for identification. These documents shall be presented to the guard at the main gate whenever tanker personnel enter or leave the terminal site. Should a crewman present himself without these documents, he will be detained and the Master will be called to resolve the matter.

TIME: Alaska Standard Time (150th West meridian) for a zone description of +9(ZD=+9). Local time is modified from the last Sunday in April to the last Sunday in October by the use of Daylight Saving Time for a zone description of +8 (ZD = +8) for Alaska Daylight Saving Time. This time is 1 hour behind that in Seattle and California and 4 hours behind New York.

To avoid confusion, all communications regarding sailing times, sailing dates, arrival times, arrival dates, etc. are to be quoted in Alaska Local Time.

FRESH WATER: Only in cases of extreme emergency can potable water be supplied and in a very limited quantity.

FUEL: Not available.

POLLUTION: U.S. Federal Pollution Prevention Regulations and Federal Water Pollution Control Act to be strictly observed.

TELEPHONES: Pay telephones will be located in the vicinity of each loading berth for the use of ship's personnel.

Telephones will not be placed aboard tankships calling at the terminal.

AGENCY: Alyeska Pipeline Service Company will not act as Agent for tankers calling at the Valdez Marine Terminal. Any requirements for such services as ship chandler, etc. must be obtained through the Owner's appointed ship's Agent. For security, the Valdez Marine Terminal must be notified of the appointed Agent.

AUTHORITY: Alyeska Pipeline Service Company, Valdez Terminal, P.O.Box 300, Valdez, Alaska 99686. *Tel:* (907) 835-2261. *Telex:* 26564. *Contact:* Captain James K. Woodle, Marine Superintendent/Port Captain. *Tel:* (907) 835-6526 or after hours (907) 835-2606.

VANCOUVER, Washington: 45.36 N. 122.40 W.

(See Plan Book)

DOCUMENTS: 3 copies of following:
Cargo Manifest.
Store List.
Crew Cargo List.
Crew List.
One copy of following:
Clearance from last Port.
Tonnage Tax Certificate.
Copy of Vessel register and itinerary of vessel port by port.

PILOTAGE: See "General-Pilotage" before first U.S.A. port (Albany).

ANCHORAGES: Only designated anchorages on U.S. Coast and Geodetic Charts are at Tongue Point (Astoria), Oreg. 2 in number and designated on Chart 6151 Columbia River, Pacific Ocean to Harrington Point, as 1 Lower Tongue Point and 2 Upper Tongue Point. Additional locations on Columbia and Willamette Rivers where safe anchorages can be made upon advice of Columbia River Pilots. Anchorage in Vancouver harbour by permission of Harbour Master.

RESTRICTIONS: No restrictions on night entry. State of tide and draft restrictions not applicable to vessels drawing less than 40 ft.

MAX. SIZE: No restrictions length and breadth. Depth at Columbia River entry 48 ft. River channel to Vancouver maintained at 45 ft. by 600 ft. Seasonal tidal effect up to 3 ft. at Vancouver.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Seattle Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: Route ETA cables through KBLITT Seattle, Wash.

TUGS: Normally join vessel at designated berth. Tug lines used at no charge.

BERTHING: No special requirements for berthing and no special arrival times required except under particular circumstances.

4 berths. Total length 2,535 ft. Ro/Ro facilities available.

BULK HANDLING FACILITIES: The grain terminal, owned by the Port and operated by the United Grain Corporation, has about 1,000 ft. (305 m.) of dock available. The 7 vessel spouts load 1 vessel at a time at a combined loading rate of 40,000 bushels per hour. The grain terminal can off-load at 18,000 bushels per hour, and they have a storage capacity for 4,500,000 bushels.

EQUIPMENT: The Port of Vancouver has 3 whirley cranes, 1 of which is rated at 50 short tons at 60 ft. (18 m.) and 15 short tons at 130 ft. (40 m.) the other 2 whirley cranes have a capacity of 34 short tons at 60 ft. (18 m.) and 10 short tons at 130 ft. (40 m.). These 3 travelling gantry or whirley cranes operate on parallel tracks on the face of the dock in conjunction with the double direct transfer tracks.

Bulk materials make up a sizeable portion of the Port's traffic, and consequently, large crane buckets are available for handling these cargoes. In addition, the Port has a special crane bucket for the successful handling of zirconium – a very fine sand material considered a "problem" commodity for efficient and waste-free handling.

The Port maintains a full complement of support equipment. They have 42 lift trucks with 2 – 3.5 ton capacities, 9 lift trucks with 7.5 – 15 ton capacities, 1 lift truck with a 26 ton capacity, along with various straddle-carriers, conveyors, front-end loaders, jitneys – and a range of special attachments and gear for all their equipment (such as prong-lifts for steel coils, grabs and squeezers for paper rolls, push-pull slip sheets for bag goods, cartons and boxes) to handle any special situations or problem with which they might be confronted.

STEVEDORES: Allocation for gangs Mondays through Saturday must be confirmed at 1100 hrs. to the longshore hiring hall. Allocation for gangs Sunday and Monday are made at 1100 hrs. Saturday for both day and night gangs. Same procedure applies to allocation of night gangs, but night gangs may be cancelled by 1400 hrs. afternoon of night gangs are to work.

MEDICAL: Any type of medical treatment can be provided and hospital facilities available.

TANKERS: 1 berth. 3 × 6 in. pipe-lines to 21 tanks. Storage capacity 85,800 bbls.

DENSITY: Fresh water at all times.

FRESH WATER: Available at all berths delivered through pier-side connections.

FUEL: Viscosity grades of B and lower. No advance notice required. Barging essential.

FIRE PRECAUTIONS: Port fire precautions respecting tankers are administered by U.S. Coast Guard, which enforces shipboard regulations under Code of Federal Regulations, Part 46, Sub-part D, Sections 20 to 40; Police Harbour Patrol, which controls port movements, boards vessels to warn Master regarding harbour regulations, including spilling of oil, etc.; and Fire Marshal, who exercises jurisdiction regarding fire regulations at shoreside facilities serving tankers.

CERTIFICATES: Registered tonnage certificate.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantity. Wine and/or Spirit, reasonable quantity.

CARGO GEAR: Valid cargo gear certificate required, acceptable to U.S. Bureau of Labor Standards.

IDENTIFICATION CARDS: Immigration Dept. requires forms No. 595 and No. 31 (Repatriation). Changes can be effected at any U.S. Consulate and are honoured here.

CONSULS:

Austria
Belgium
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Federal Republic of Germany
Great Britain
Iceland
Italy
Japan
Lebanon
Mexico
The Netherlands
Norway
Republic of Panama
Peru
Sweden
Venezuela

GANGWAY/DECK WATCHMEN: Services at option of vessel Owner/Agent and available through private firms.

OPENING/CLOSING HATCHES: While ship is at dock, opening and closing hatches is work of longshoremen. Ship may open or close own hatches while under way.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: See "Portland, Oregon".

REPATRIATION: Any arrangements possible for crew changes or other repatriation.

AIRPORT: Airport 10 miles from town, served by 7 regularly scheduled airlines with direct service and/or connections domestically and world-wide.

TIME: GMT minus 8 hours. Daylight saving time becomes effective annually on last Sunday in April through last Saturday in October.

HOLIDAYS: Following holidays are recognised: *New Year's Day; Lincoln's Birthday (Feb. 12th); Washington's Birthday (Feb. 22nd); Memorial Day (May 30th); *Independence Day (July 4th); *Labor Day (1st Monday in September); Columbus Day (Oct. 12th); Veteran's Day (Nov. 11th); Thanksgiving Day; *Christmas Day (Dec. 25th); Statewide Election Days. Other legal holidays may be proclaimed by State or national authority. When holiday falls on Sunday, following Monday observed as holiday. Longshore work performed on any of above-listed days is at overtime, which is one-and-a-half time rate. Days marked(*) are stop-work days, viz., no ships will be worked. This also applies to July 5th, which observed locally on unilateral basis.

POLICE/AMBULANCE/FIRE: Police 693-2555; Fire 693-1441; Ambulance provided by several private firms, but can be obtained through police or fire number.

SERVICES: All services available such as compass adjusting, major or minor repairs either with work barges or at ship repair berths; lay berths available; charts available from private companies; all chandlery supplies available.

SHORE LEAVE: Crew members permitted ashore except where vessel has made first arrival from Communist-controlled port.

AUTHORITY: Port of Vancouver, P.O.Box 1180, 3103, Lower River Road, Vancouver, Washington 98666. *Tel:* (206) 693-3611. *Telex:* TWX 910-474-8673. *Contact:* Bewson Murphy, Executive Director.

WHITTIER, Alaska: 60.47 N. 148.40 W.

SHIPMASTER'S REPORT: October 1980. (Updated 1984).

GENERAL: Whittier is a small port in position Lat. 60° 47′ N., Long.148° 40′ W. The population in October 1984 was 250. There are two hotels, 3 grocery stores, a school and a post office. The port was constructed between 1941 to 1943. It was developed as a main supply depot for the storage of oil for the Anchorage area and also as a transhipment port for produce from other areas in the United States. There is regular barge traffic from Seattle and other West coast ports with ammunition, food, merchandise and motor cars. All these are carried aboard flat top railway wagons which can be loaded or discharged at any state of the tide. The port is operated by the Alaska Railroad system and there is no shore gear of any kind. Whittier is surrounded by very high mountains and there is no road or footpath in or out. There is a very short landing strip suitable for small aircraft but the normal communication is by rail which goes under the mountains in two long tunnels. The journey takes about 1.5 hours and the timetable is frequent in the Summer when a lot of people visit Whittier for boating and fishing or to get the ferry to Valdez. During Winter however the service is about four times a week, weather permitting.

APPROACHES: *Recommended Route to Whittier Pilot:* British Charts BA. 3363 and 3364.

When Smith Island bears 256° × 8 miles, vessels should leave the traffic zone and steer 277° passing 1.5 miles South of Naked Island and 1.2 miles North of Point Eleanor. Then alter course to 281° passing 1 mile South of Mears Point. After passing Mears Point, steer 350° through Ferry Passage and alter to 280° off Point Culrose Light to the pilot station. It is not locally recommended to pass North of Perry Island through the Dutch Group.

PILOTAGE: Pilotage is operated by the Southwest Alaska Pilots' Association who have an office in Valdez, telephone number (907) 835 – 2134. They also have an office in Homer, telephone (907) 235 – 8783. Both stations maintain a continuous watch on Channels 10 and 16.

In theory, Pilots embark at Hinchinbrook Entrance. This has not been the practice however, for the last year or so, due to the long sea passage for the small pilot boat and the severe weather sometimes encountered in this area. Pilots normally embark at Blight Reef near Glacier Island. The pilot boat is stationed at Rocky Point some 10 miles away. The normal pilot boat is "Bering" which is a 63 ft. long trawler, capable of 10 knots, with a blue hull and white house. A newer boat is also in attendance. This is a 43 ft. glass fibre boat called "Bernhof" capable of 20 knots. She has a white hull.

No vessel may enter Prince William Sound through the Hinchinbrook Entrance without permission from the Coast Guard at the Valdez Traffic Control Centre on Channel 13 or 16. Large vessels may only transit Prince William Sound in daylight hours.

If permission is obtained, vessels may proceed direct to the pilot station at Whittier, 1 mile South of Point Pigot. See "Approaches".

ANCHORAGE: Anchorage off Whittier may be obtained in 12 fathoms at Pigot Bay (Lat. 60° 50.4′ N., Long. 148° 22.0′ E.).

BERTHS/FACILITIES: The two railway berths are only for barges carrying flat top railway cars on which all cargo is carried. The Delong Pier is used for oil tankers. The length of the wharf is 140 m. and the maximum length of ship is about 170 m. The minimum depth alongside is 48 ft. at the West end and 80 ft. at the East end.

Tankers normally berth port side alongside. In October 1980 there was one tug "Avenger" in attendance being 2,000 h.p. A shore gangway is supplied. All manifold connections are 6 in. The ship must supply all reducers. Two lines are used for kerosene. Jet fuel, Mogas and diesel are imported. The distance to the shore tanks is 1.5 miles. All products are pumped from the storage area to Anchorage. Bunkers are not available for large ships. Provisions and supplies can be purchased in Anchorage and shipped down by rail. There is a small clinic with a physician's assistant. The nearest doctor or dentist is in Anchorage. In an emergency there is an ambulance which can run on the road or rails.

GENERAL:

Weather: The winds are very strong and variable. It is very wet in Summer and has an extremely high snowfall in the Winter months. The port is completely ice free the whole year round.

Formalities: All the usual American forms apply. Customs, Immigration and Coastguard all come from Anchorage as there are no officials at Whittier.

Joining/Leaving: Crew may sign on and off at all times. During Winter Whittier is often cut off by snow.

Accommodation: Pilot and Agent stayed aboard throughout our 36 hour stay which proved very convenient for clearance and paperwork.

Agent: North Star Terminal & Stevedoring Company, Anchorage, Alaska 95510. Cable: "Norstevco Anchorage". Telex: 26471.

AUTHORITY: Whittier Harbour, P.O.Box 608, Whittier, Alaska 99693. *Tel:* (907) 472-2330. *Contact:* Patrick Johnson, Harbour Master.

WILMINGTON, Delaware: 39.44 N. 75.32 W.

DOCUMENTS: Handled through local Agents.

PILOTAGE: See "Philadelphia".

ANCHORAGE: At Cherry Island.

MAX. SIZE: Length unlimited, breadth unlimited, draft 35 ft. MLW tide range 5.5 ft.

Chesapeake/Delaware Canal: Max. LOA 760 ft. Max. draft 29 ft. (FW). Height of mast 133 ft. Max. beam 170 ft.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

RADIO: U.S. Coast Guard, Gloucester, N.J.

TUGS: Available through Wilmington Launch Service.

BERTHING: 3,260 ft. marginal wharf. 20-100 ton crane capacity. 400-600 t.p.h. bulk unloader. Covered bulk storage of 472,000 sq.ft. Dockside freezer capacity of 1,050,000 cu.ft. at present.

Multi-purpose bulk/container crane available, capacity 40 tons, outreach 115 ft.

DENSITY: Fresh water port. Normal 12 hour tides.

FRESH WATER: Hose connection from dock.

FUEL: Available.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Optional.

IDENTIFICATION CARDS: See "New York".

CONSULS: All Consuls are located in Philadelphia, Pa.

REPAIRS: Possible.

DRY DOCKS: Major repairs and dry dock facilities – Sun Ship Yard, Chester, Pa.

REPATRIATION: Facilities are available and arranged by Agent.

AIRPORT: Philadelphia International Airport, regular service.

TIME: U.S. Eastern Standard and Daylight Time.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire, Tel: 302-654-5151.

TELEPHONES: Dock-side pay phones.

SERVICES: All services available.

SHORE LEAVE: Allowed unless restricted by Immigration.

AUTHORITY: Port of Wilmington, P.O.Box 1191, Wilmington, Delaware 19899. *Tel:* (302) 571-4600. *Telex:* TWX 510-666-2181. *Contact:* P. L. Chaples, Port Director.

WILMINGTON, N. Carolina: 34.14 N. 77.57 W.

(See Plan Book)

PORT LIMITS: A ship is considered an "arrived vessel" upon arrival at Buoy 2CF.

DOCUMENTS:

3 copies Cargo Manifest (Forms 1302), the original showing all cargo on board, and 2 copies showing only cargo for this port.
3 copies Crew Manifest (curio list) (Customs Form 1304).
3 copies Stores List (Customs Form 1303).
3 copies Passenger List (Form I-418).
3 copies Crew List (Form, I-418).

Customs Boarding Officer will also examine ship's Register and Loadline Certificate. In addition, the following documents will be required for formal entry to be made within 48 hours of arrival from abroad, or 24 hours from arrival from a United States port:

Master's oath (Customs Form 1300).
All foreign clearances.
U.S. Certificates of payment of tonnage tax (Customs Form 1002).
Certified Crew List.
Oil-Pollution Certificate.
General Declaration (Customs Form 1301).
Load Line Certificate.
Safety Equipment Certificate.

PILOTAGE: Pilots board vessels at Buoy "2CF" off the mouth of the Cape Fear River. Masters should notify local Agents by radio of their ETA at Buoy "2CF" in order that the Pilots may be on station in advance of arrival. Additionally, Masters may communicate with Pilots by radio telephone on 2738 frequency and by VHF Channel 18A. Pilots remain on board until harbour limits of Wilmington, where docking Masters normally board vessels for purposes of docking.

APPROACHES: The port terminal at Wilmington is located on the East bank of Cape Fear River, approximately 26 miles from the sea buoy at the mouth of the river. Wilmington is 150 miles S.W. of Cape Hatteras and 26 miles North of Cape Fear.

RESTRICTIONS: The approach channel and basins adjacent to the port are maintained at a depth of 38 ft. MLW.

ANCHORAGE: Vessels awaiting Pilots normally anchor in area off Buoy "2CF". There is no safe anchorage in the port of Wilmington for large vessels to be accommodated. Small vessels can be accommodated for brief periods in anchorage basin, although it is necessary to swing with the tide in order to avoid blocking channel.

MAX. SIZE: No limits on length, breadth, and draft limit is present channel project depth of 38 ft. Master should communicate with local Agent regarding stage of tide for passage of vessels drawing 34 ft. or above.

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Washington, D.C. Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

TUGS: 2 towing companies operate at Wilmington.

BERTHING: A continuous marginal wharf, 6,000 ft. long. Docking at any hour, day and night.

SPECIALISED CARGO HANDLING FACILITIES: State Port Terminal: Fully equipped to serve cellular type container ships, for bulk handling; equipped with 6 yard rehandler buckets, receiving hoppers, and paved open storage areas, 2×45 ton, 1×115 ton, 2×40 ton container cranes, 1×140 ton mobile crane and 1×225-ton gantry crane; 1 berth with tank farm for handling liquid chemicals.

Almont Shipping Company: 3 berths, open and covered bulk storage, 2×25 ton cranes and 1×85 ton derrick. No facilities for LPG carriers.

TANKERS: 10 tanker berths with drafts from 30 ft. to 40 ft. MLW. Night berthing at all berths. Fresh water available.

FRESH WATER: Available from shore connections at rates up to 50 t.p.h.

FUEL: Bunker "C" and diesel fuels available locally.

FIRE PRECAUTIONS: Normal precautions observed.

REPAIRS: Minor ship repairs available.

DRY DOCKS: 1×1,000 ton lift floating dry dock.

AIRPORT: New Hanover Country Airport, 7 miles from N.C. State Port Terminal. Served by Piedmont Airlines.

IDENTIFICATION CARDS: Standard U.S. Immigration Forms I-95 to be made up for each crew member on arrival. Not necessary for crew man already holding Form I-95, issued for the same vessel.

TIME: Eastern Standard Time, GMT minus 5 hours. Daylight Saving Time, GMT minus 4 hours from April to October.

DEVELOPMENTS: A 900 ft. extension to the South end of the wharf is under design for an addition to the container terminal. Completion of construction is anticipated by 1986.

AUTHORITY: North Carolina State Port Authority, 2202 Burnett Boulevard, P.O.Box 9002, Wilmington, North Carolina 28406. *Tel:* (919) 763-1621. *Telex:* 510-937-0330. *Contact:* William Edwards, Port Manager.

WRANGELL, Alaska: 56.28 N. 132.22 W.

(See Plan Book)

Located on Wrangell Island. Open all year.

DOCUMENTS: See "Anchorage, Alaska".

PILOTAGE: (From sea via Dixon Entrance up Clarence Strait to Guard Island.) Under pilotage from Guard Island.

ANCHORAGE: Good anchorage N.E. of Woronofski Island in 22 fathoms of water.

MAX. SIZE: Harbour depth 32 ft. MLLW. Tides: mean range 13.7 ft., diurnal range 16.1 ft. Also see "Berthing".

HEALTH: See "Health: All Ports" before first U.S.A. port (Albany). Illness reports made to Anchorage Quarantine Station.

AGRICULTURE: See "Agriculture" before first U.S.A. port (Albany).

CUSTOMS: Immigration, Guard Island or local Customs Office. Quarantine and Customs, local.

TUGS: 9 tugs up to 1,800 h.p. available with sufficient notice.

BERTHING: 4 wharves.

1. Wrangell Lumber Co. Dock: Berthing length 320 ft., 150 ft. wide, depth South end 32 ft. North end 40 ft. LW. Height of pier from zero tide 23.5 ft. Crane – 1 mobile, 8 ton, 6 lift-trucks. No shed space. 3 acres open storage.

2. Alaska Wood Products: Berthing length 300 ft., 50 ft. wide. Depth at LW 32 ft. Height of pier from zero tide 23 ft. No shed space.

3. Port of Wrangell Wharf: 35 ft. depth at both ends. Fresh water available. Lift trucks on rental from local private firms. Dock face 400 ft. with additional mooring dolphins for a total overall length of 700 ft.

4. Barge: Transfer bridge facilities, 17 ft. wide, capable of up to 70 tons (140,000 lbs.).

STEVEDORES: 4 gangs available.

REPAIRS: None.

WATER: Available.

FUEL: Small quantities available.

MEDICAL: Small but new hospital.

TRANSPORTATION: Air and ferry.

AUTHORITY: City of Wrangell, P.O.Box 531, Wrangell, Alaska 99929. *Tel:* 907-874-3624. *Contact:* Ronald O. Phillips.

Uruguay

GENERAL:

REGULATIONS: Increased fines became effective in June 1973 in respect of infringements of the Uruguayan Marine Code. There are approximately 119 Articles to the Marine Code, and Owners and Masters of vessels proceeding to Uruguayan ports are recommended to obtain a copy of the Code (which lists port regulations and amounts of fines for infringements, maximum fine being 760 U.R.) prior to arrival. We understand that copies of the Code, entitled "Reglamento Preventivo y Represivo de Infracciones Maritimas, Fluviales y Portuarias", may be obtained from Centro Navegacion Transatlantica, Colon 1486 p. 3, Montevideo.

Freely translated, we give below some extracts of Port Regulations as specifically applicable to Montevideo, but also to all Uruguayan ports in general:

Articles 1 to 8 cover respectively the reasons for setting up this preventive set of regulations; the definition of what a vessel is in terms of the legislation; the establishment and amount of fines (they may be tripled in the event of repeated offences); the fact that very small vessels may only have imposed 10 per cent of the full fine; the jurisdiction for the regulations covering the whole of the Uruguayan coast and river frontage; the stipulation whereby the General Marine Prefecture must send to the Master of the vessel a statement of the offence immediately it is observed and this in triplicate and to the local Agent for the vessel.

The actual information which the form must contain is delineated. Notification of offences can be made after a vessel has sailed, this being to the local ship's Agent by phone and confirmed within 24 hours in writing. All Masters must give written consent to their local Agent, and the Agent must accept this in writing, empowering the Agent to act in the Master's name in all cases of fine payment. The Authorities may delay the sailing of a vessel if they see fit in connection with any offence. Finally, article 8 deals with the right to appeal to the General Marine Prefecture against any fine imposed, this having to be done within 10 days dating from day following personal notification of the offence.

Articles 9 to 119 cover the specific offences subject to fine and indicate individually the full fine imposable in local pesos.

An abridged summary of each of the articles is as follows: No anchoring within 900 m. of the illuminated buoy in the port access channel.

Vessels carrying hazardous cargo must hoist flags according to the International Code of Signals.

Vessels with anyone on board with contagious diseases must hoist appropriate flag (letters QL).

Flag Q must be hoisted and maintained in position until Health Authority has given free pratique.

All vessels anchoring in the roads, bay or ante-port must take due precautions not to harm or cause damage to other vessels; the fine will be imposed notwithstanding claims for damages from third parties.

Agents of vessels which may wish to anchor in the Roads must obtain prior permission from the Marine Authority, specifying vessel's measurements and the reason. If authorised, the anchorage to be used will be notified.

No anchoring at the docks unless justified, and anchors must be raised immediately the reason for dropping them has gone. There must be no delay on the part of vessels in complying with the Marine Authorities instructions to change berth or anchorage.

No tying up to other vessels without Marine Authority permission; no attachment to berths which have not been allocated and no changing of berth without authorisation.

No anchoring in places not authorised by the Marine Authority, the maximum fine being applied should this have caused damage to third parties.

No small craft to be tied up obstructing gangway or quays. Where this is necessary for embarking crew members, passengers, provisions, etc., the small craft must be removed immediately the operation has been completed.

Small craft must not be tied up to buoys or beacons. Vessels must not tie up at buoys or beacons.

Maximum speed of vessels in docks is 4 knots.

Navigation in channels of access to ports is governed as follows:

Maximum speed 8 knots.

Vessels must always keep to starboard.

Vessels must not overtake each other, but where this is necessary they must conform to the International Signal Code.

No anchorage in channels.

No fishing in channels.

Vessels navigating in channels must keep a distance of 1,000 m. from each other.

Vessels must not cross in front of each other in the fore-ports.

All vessels entering or leaving the ante-port or docks, changing berths or anchorages must be assisted by a Pilot and tug, unless specifically given exception to this rule by the Marine Authority.

No vessel must enter port with damage to hull, machinery or rudder unless prior inspected by the Technical Commission of the Mercantile Marine Directorate.

Any vessel springing a leak whilst navigating in the access channel, and which the bilge pumps cannot overcome, must go aground as quickly as possible off the channel so as to leave the channel open.

In case of fire on board whilst navigating in the access channel, Masters must observe usual procedure and give signals accordingly.

The strict use of semaphore signals within port must be observed.

When vessels enter the docks or remain in them, Masters, owners or Agents must request permission from the Marine Traffic Office, and report to the Office of Pilotage, and proceed in whatever form they may instruct. On leaving the same procedure must be followed.

Masters and owners of vessels must see that their vessels do not obstruct or cause harm to port works, beacons, buoys, or semaphores and once tied up they must not slacken ropes without permission of the Marine Authority except under conditions covered by items 1, 2 and 3 of Article 64 of the Port of Montevideo Marine Regulations.

No vessel to have badly stowed cargo, excess weight, or evidence of lists due to bad trim of cargo.

Only those lines necessary for tying up to be used. When 2 or more vessels tie up alongside to load or discharge they are all obligated to ensure that the handling of their respective cargoes does not prejudice the working of the others.

Vessels must take proper precautions when loading or discharging raw material, i.e. sand, bones, ash, coal, etc., by placing suitable planks of wood close together to prevent any such material falling into the water.

No vessel to enter docks with the gangway already rigged.

During unloading operations, no goods to be thrown on to the quay. This must be done manually or mechanically.

During discharge operations, cargo must be so positioned on the quay as to leave adequate passage for vehicular traffic, i.e. Police, Fire Brigade, Health Authorities, Customs and Port Officials.

Planks of wood — when planks are used for any operation, they must not be placed in contact with mooring bitts or cables. When work ceases all pieces of wood, ladders, small trucks, etc, must be removed from quay, and those belonging to the ship must be taken on board, this so as not to obstruct the public path along the quay.

When cleaning or washing ships tied up at quays, no rubbish, water or cleaning material must be allowed to fall on the quay.

A very serious offence is the throwing into the water of any rubbish, sewage or other material susceptible to polluting the water.

Very serious offences are the lightening of ships carrying petrol, crude oil, or the like, likewise the washing-out of tanks, except in authorised zones. The fine is based on the area spoiled by the wrongful discharge.

All ships should have local Agents, otherwise in the case of offences the Master is held responsible and vessels may be detained.

Vessels are responsible to ensure that no damage is made to quay installations by the cargo they load or discharge, and must always leave berths in a tidy and clean state.

Vessels' auxiliary small craft, launches and the like must not hang over the side of the vessel in port, except during operations of launching and reshipping on board, where such operations are conducted at points indicated by the Marine Authority. Such small craft may only be used for the purpose and at the times authorised by the Marine Authority.

Usual regulations concerning carriage of passengers in vessels and heavy fines are imposable for the carriage of passengers or crew members not listed.

Vessels exceeding their navigation limits shown in their Certificate of Navigability are subject to fine.

All vessels must be cleared to sail by the Marine Authority.

Vessels must use their proper name and this must be painted on in letters of minimum of 15 centimetres height and 8 centimetres wide. Letters must be white on black or black on light colour.

Masters, Owners and Agents must report any crew offence or irregularity on board to the Marine Authority.

Vessels in port must hoist the Uruguayan flag.

N.B. It is recommended that Masters correctly establish the prescribed times for raising and lowering the Uruguayan flag, in order to avoid fines.

Vessels must have their gangway equipped with handrails, and the gangway must be clearly lit at night.

All lines to shore must have rat-guards fitted.

When there are hazardous goods on board or when such goods are being worked, the vessel must hoist the International Signal Code letter B, and at night show a red light on the bow masthead, must always have engines in a state of readiness in case of danger, keep two-thirds of the crew on board, keep watchmen and firemen available (the number of whom will be determined by the number of holds containing the hazardous material), must only work with incandescent lights, and keep a Port Pilot on board if the Marine Authority so directs.

Vessels moored at quays must not move propellers, except under the direction of the Marine Authority.

Vessels must not moor in the port access channel. There must be no improper use of the International Signal Code. Signal flags must not be interspersed with flags of nationality.

If a vessel wishes to dress flags over all, or fly a flag at halfmast due to a bereavement on board, the Marine Authority's permission must be first obtained.

The use of whistles, sirens or any other audible signal within the area of the roads, bay, ante-port or docks, for any reason other than justifiable for navigation is prohibited.

Any vessel anchored, tied up to other vessels or to the shore or quays, must show a white light from sunset to sunrise which can be seen at a distance of 500 m.

In the access channel to Montevideo, no more than 4 vessels may navigate at one time — 2 entering, 2 leaving.

Maximum speed in the Montevideo ante-port is 6 knots. There must be no anchoring in the Free Zone, reserved for the manoeuvring of vessels entering and leaving.

At Montevideo there must be no anchoring along the route leading from the Free Zone to Channel "A", between the quay and the pier of the same letter. Also on the route leading from Pier "A" along a line to 100 m. to the North of the end of the West Jetty.

No anchoring in any area less than 200 m. from Pier "A" in a semi-circular coverage, taking as middle point a position half way between Quay "A" and Pier "A".

All vessels must keep to the right or to the middle when there are no other vessels in the vicinity.

International Regulations for the Prevention of Collisions apply, plus the following:

Vessels navigating along the routes established in the anteport or which have to pass directly through the passage between Jetties "A" and "B", must keep to the right when another vessel is coming in the opposite direction.

Vessels which have to cross the North, the South route or directly between Jetties "A" and "B", must ensure that they pass any other vessel at a distance not less than 50 m.

Any vessel navigating under her own power must give way to a vessel under tow by a tug.

Vessels with tugs following routes which cross one another, thereby creating a collision risk, the one passing to the starboard of the other is the vessel which must take the precautionary measures to avoid collision. If, however, the risk persists, the vessel passing to port of the other must also take measures to increase the distance between the two vessels.

No vessels to pass in pairs or in opposite direction between Jetties "A" and "B"; the semaphore signals transmitted by Quay "A" must be observed. If the signal is "vessel entering from the ante-port to the docks", the vessel in the docks, ready to sail, must wait until the incoming vessel has entered.

If the signal is "vessel leaving the docks for the ante-port" the vessel in the foreport, moving towards Jetty "A" to enter the docks, must wait in the free zone, stop engines, keeping to the right, and drop anchor if necessary, until the outgoing vessel is outside and well clear of Jetty "A".

The same regulation applies to vessels leaving the River Dock. In this case, the vessel leaving Jetty "A" has priority, coming from Docks I and II the first will wait for the second before starting engines.

All vessels navigating in the same direction in the ante-port must keep a distance of not less than 300 m. from each other stern to bow. They must not pass each other or navigate in pairs.

In the event of offences being incurred whilst an Uruguayan Pilot is on board, at the request of the local ship's Agent, the Marine Authority will determine whether the Pilot is responsible for the offence having occurred, and take measures accordingly.

Vessels which load beyond the appropriate load line will be subject to a fine of 1,000,000 pesos.

DOCUMENTS:

Consular Documents: The Consulate in a foreign port from which merchandise is to be shipped to a Uruguayan port must be presented with the following documents:

(a) Cargo Manifest, original and 3 copies.
(b) Crew List, original and 1 copy.
(c) Passenger List (or no-passenger declaration), original and 1 copy.
(d) Bills of Lading, original and 3 copies.
(e) Commercial Invoice, original and 3 copies.
(f) In the event that the vessel is cleared in-ballast, an in-ballast declaration, original and 1 copy.

One copy of each document is filed at the Consulate, and the following are returned, duly visaed:

1 original manifest, 1 copy of each bill of lading, and 1 copy of the commercial invoice, in an envelope addressed to the Customs Administrator of the port of destination.

1 copy of the manifest, and 1 copy of the bills of lading, in an envelope addressed to the National Ports Administration.

1 copy of the manifest, the original and 2 copies of the bills of lading, the original commercial invoice, the original crew list, and the original passenger list (or no-passenger declaration).

Prior to Arrival:

Notification of Arrival – by Ships' Agents.

(a) Container vessels (minimum load 30 FCL and minimum discharge 30 FCL stipulated) and passenger vessels have berthing priority. Agents must notify the arrival of the vessel 10 days in advance to the National Port Administration (ANP) and confirm ETA 2 days ahead of arrival.
(b) For arrival in Uruguayan ports of all other vessels, agents must notify the ANP 48 hours in advance.

All notifications must be made on special forms from the ANP on request for a berth, presenting original and 6 copies, accompanied by a complete set of cargo manifests in Spanish.

For container vessels, Agents must present lists with details of a complete nature covering the containers to be unloaded in Montevideo (prefix, number, contents, gross weight and tare), whether to be discharged to store or to quay, and final destination in the case of transit.

Request for Port Services:

As has been said in the previous section, the berthing request must be presented to the ANP and acts as advice of arrival.

Each morning at 1000 hrs. the ANP designates berthing crews for vessels for the next 24 hours. In the event of there being no berthing staff available, the ANP appoints a place for waiting berthing in turn in accordance with the order of arrival at the port of Montevideo.

On Arrival:

Type of Document	*Number and distribution of documents*

a. Visaed by the Uruguayan Consulate.
b. For the Postal Service.
c. The Consulate returns 1 envelope to the Customs Administrator, another to the National Ports Administration (with a copy of Manifests and Bills of Lading), and a third to the agency, with the required visaed documents.

Other Requirements:

The agency must provide a cargo book (tally book) for each port to the National Ports Administration.

Prior to Departure:

24 hours prior to sailing, the vessel must notify the Maritime Prefecture and Migration. Representatives of these agencies must receive a crew list and check any changes. If the vessel carries passengers, the Inspector of the National Migration Administration must prepare a record of a sailing inspection, similar to that required upon the vessel's arrival.

The Maritime Prefecture authorises the clearance of the vessel.

PILOTAGE: Also see "Control". Pilotage is compulsory in all river and port zones, except for vessels coming from the East to ports between La Paloma and Montevideo Roads, or entering Montevideo Roads for no commercial reason. All coastal vessels either Uruguayan or foreign are also exempt.

Pilotage Zones:

1. RIVER PLATE – Comprises zone between imaginary lines in the East from Punta del Este (Uruguay) and Punta Rasa, on Cape San Antonio (Argentina) and on the West between Colonia and San Isidro (Argentina).
2. RIVER URUGUAY – From 56.5 km. of Farallon Channel to Uruguayan ports on the River Uruguay.
3. PORTS – Pilotage zones, comprises limits of each port including its Roads.
4. SBM at Jose Ignacio.

In the River Plate, Pilots presently board to the South of the wreck of the *Calpean Star*, approximately 4.5 km. South and lying 70 m. West of the dredged access channel.

Several of the pairs of buoys are missing, and only the Mid Channel Buoy indicating the entrance to the Access Channel, 5 miles South from the port, and the 2 pairs nearest to the breakwaters are operating.

When taking tankers, the port Pilot usually goes out to the 5-mile mark.

There is no more than 30 ft. in the Access Channel at the moment; dredging is being carried on, but there are only 2 dredgers operating between the channel and the port of Montevideo itself.

The current is across the channel, running at about 1 knot, and changes direction more with the wind than the tide.

Vessels awaiting Pilot should anchor on the West of the channel and South of the *Calpean Star;* there is 24 ft. up to 500 m. West of the channel. The zone to the East of the Access Channel has submarine cables and must therefore be avoided.

Pilots are ordered through the Agent, and have an up to date communications system installed in their office on the 11th floor of Custom Building.

Permanent watch is kept on Channel 16 VHF, and operator speaks English. It is possible to call "Practicos Montevideo" and ask to be connected by phone to the vessel's Agent's office for last minute instructions, etc.

Channel	Frequency	Channel	Frequency
9	154.50	11	155.50
16	158.00		

The port is closed when wind force exceeds 43 knots or, at night 37 knots, or if visibility is less than 1 km., but otherwise vessels can enter or sail at any time.

There is also a Telex machine with 24 hour watch, over which messages can be transmitted to Agents out of office hours, over a weekend, for example. Call sign is DGT 843 Pilot CX. This is particularly useful for vessels sailing late from Buenos Aires, and the Office will pass on the message to the corresponding Agency by phone.

All Pilots carry a "walkie-talkie" and can communicate either with their office, the Port Authority or the Semaphore Station, using Channel 9 for the Port Offices and 11 for the Pilot's Office, 16 being kept for use with vessels.

Ordering of River Pilots for Sailings from Uruguayan River Ports: Although Masters can apply directly for Pilots such applications must be made by telegram addressed to the Practico Mayor Montevideo, it is preferable for them to keep their Montevideo Agent fully informed and leave the latter to order the Pilot.

The opportunity of ordering Pilots at any hour having been discontinued makes it more essential than ever that Montevideo Agents are kept accurately informed regarding expected readiness to sail. Failure to do so will result in unnecessary demurrage being paid to Pilots or delay to the ship concerned.

Pilots for Vessels Proceeding from Sea to a Uruguayan Port on the River Uruguay: A Uruguayan Pilot must be employed to conduct ships from sea to a Uruguayan Port on the River Uruguay.

Vessels must call at Montevideo Roads to embark Pilot and pay the cost of tug to take out Pilot. They can also, alternatively, take an Argentine Pilot at Recalada who will take the vessel to Intersection, where in either case an Argentine River Pilot will board to take the vessel to the Roads of port of destination, where a Uruguayan Port Pilot will come aboard, this being a simpler procedure and all handled by Agents in Buenos Aires (one radio advice).

Vessels from an Argentine Port Bound for Uruguayan River Port: Such vessels are normally taken to immediately off port of destination by an Argentine Pilot, but they must be berthed by a Uruguayan Pilot who has to be sent from Montevideo, thus Montevideo Agents must be kept promptly informed of vessel's position to enable them to order a Pilot to berth ship without delay.

Vessels Leaving Uruguayan Port for Argentine Ports on the River Parana: Uruguayan River Pilot supplied from Montevideo must be employed for unberthing, and this Pilot takes vessel to the Bravo Channel off Nueva Palmira, where the Argentine River Parana Pilot, who is normally already aboard, takes over.

The Uruguayan Pilot is paid in accordance with tariff to Nueva Palmira plus an unberthing fee and travelling expenses.

HEALTH: In order to be able to enter port and berth without delay, the Authorities accept a radio, cable or telex request, couched in the following terms (messages must be sent in Spanish).

Vessels Arriving from Elsewhere:

Capitan...solicita libre platica
(here the name of the vessel)
informando proceder de Buenos Aires, siendo su escala anterior
....
(here a port in another previous country which could be Santos, Valparaiso, Capetown, etc.)
ondicion sanitaria buena .... Capitan
(here the name of the Master)

Vessels Arriving from Buenos Aires:

Capitan...solicita libres platica
(here the name of the vessel)
informando proceder de ....
(here a port of origin, say London – Liverpool – San Francisco – Rijeka – Kotka – Tokyo – Oslo, etc.)
siendo su ultimo puerto ....
(here say Santos – Valparaiso – Capetown, etc.)
condicion sanitaria buena...Capitan
(here the name of the Master)

There have been cases of delay in delivery of radio messages, even though passed on by phone, but the original message must accompany Agent's request for Free Pratique, hence it is advisable to use cable or telex services if possible. Messages must be sent at least 24 hours ahead, and changes in ETA advised.

Although it is possible to take Pratique in Uruguayan River ports, there is frequently delay there, and since vessels must enter Montevideo to pick up the river port Pilot also, it is advisable in these cases to ask for Pratique at Montevideo as above, and the order from Sanitary Authorities granting Free Pratique will be handed to the Pilot to take on board with him.

In no case, however, does the granting of Pratique by radio modify the inspection in port, where the usual commission must be the first to go on board.

Illness On Board: Any private doctor attending a patient on board must immediately inform the Sanitary Inspector should the disease be contagious.

No patient can be landed without the consent of the doctor of the Health Department with the exception of accident cases that require immediate medical attention, and even in those cases the Health Department Doctor must be informed in order to issue a Sanitary Pass for the Hospital where the man was taken to.

If a Master does not report the existence of illness on board he is liable to fines which are double if patients land without the consent of the Sanitary Authorities.

RADIO:

Notice to Mariners:

Official Uruguayan Notices to Mariners are transmitted in Spanish only preceded by the signal TTT, the number of the Notice, letter R, then contents and are repeated for 15 days. Should there be no Notices to transmit, the wording "no hay avisos para navegantes" will be radioed.

Punta Carreta CWF 2768.5 kHz. A3 0.4 kW. at 0003, 1403 and 1903 hrs. (after the weather forecast).

Cerrito CWA on 4346, 8602,12750, 17208.8 A1, 1.5 kW., also on 421.5 kHz. A1 and A2 5 kW. at 0000, 1400 and 1900 hrs. (after the weather forecast).

Montevideo CX 16850 kHz. A3 10 kW. at 1302 hrs. and 1602 hrs. on working days, at 1700 hrs. on Sundays.

Montevideo	CX 6	659 kHz	A3 2.5 kW.
	CX 26	1050	A3 all transmit Notices to Mariners at 1600 hrs.
	CX 38	1290	A3 5 kW.
	CXA 4	6125	A3 10 kW.
	CXA 6	9620	A3 20 kW.
	CXA10	11900	A3 20 kW.

Weather Forecast: A weather forecast is transmitted in Spanish to cover 3 zones.

Reference AAA 830 is the Coastal area from Lat. 30° S., Long. 50° W. out to Lat. 30° S., Long. 46° W. and down to Lat. 33° 30′ S., Long. 53° W. and Lat. 35° S., Long. 49° W.

AAA 860, River Plate zone from Lat. 33° 30′ S., Long. 57° W. to Lat. 35° S., Long. 49° W. and down to Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W.

AAA 870 Coast of Argentina from Lat. 35° 30′ S., Long. 57° W. to Lat. 39° S., Long. 53° W. and down to Lat. 41° S., Long. 62° W.

Details of all 3 zones are transmitted as follows, valid for 24 hours.

CWA on 421.5 A1 5 kW. at 0001, 1400 and 1900 hrs.

CWF on 2768.5 A3 0.4 kW. at 0005, 1405 and 1905 hrs. and in A1 over 4346 kHz, 8602 kHz, 12750 kHz and 17208 kHz.

Time Signals: Are transmitted from 2 stations in Montevideo at 1500 and 2000 hrs. The hour is indicated by 6 dots preceded by a 10 second dash and a 5 second silence. The last dot indicates the hour.

CX 6 on 650 kHz. A3 25 kW.
CXA 6 9620 kHz. A3 20 kW.

Standard time is GMT minus 3 hours.

Direction Finding: There are 2 radio beacons specially for maritime navigation. Both operating on circular sweep from the lighthouses at Cape Polonio and Isla de Lobos.

Cape Polonio: Lat. 34° 24′ 00″ S., Long. 53° 47′ 45″ W. frequency 295 kHz. A2 range 380 miles, and 500 kHz. A1 A2.

The signal is "P" repeated 3 times in 10 seconds followed by 18 dashes in 30 seconds, repeat "P" 3 times and 10 seconds silence total period 1 minute. This is repeated 4 times after 5 minutes silence, total 10 minutes.

In good weather transmission must be requested from CWM 21 on 500 kHz. A1 A2. In fog, there is continuous transmission from the hour.

Isla de Lobos: Lat. 35° 01′ 33″ S., Long. 54° 53′ 17″ W. frequency 300 kHz. A2 range 380 miles. The signal "L" is repeated 3 times in 10 seconds, followed by 18 dashes in 30 seconds, repeat "L" 3 times, silence 10 seconds. Total period 1 minute, repeated 4 times, then 5 minutes silence total period 10 minutes.

In good weather this transmission must be requested from CWM 26 on 500 kHz. A1 and A2.

In fog transmission is continuous from 05 minutes in each hour.

There are also the following airbeacons which can be used.

		S.	W.	kHz	
Colonia	COL	34° 27′ 33″	57° 45′ 49″	203	A2 0.075 kW. cont.

Punta del Este	CB	34° 55′ 00″	54° 55′ 00″	325	A2 occasional only.

GENERAL INFORMATION:

River Uruguay

Rises in Brazil, and later separates Argentina and Uruguay. Its right bank is generally low, wooded and swampy, the left bank high and hilly. Preparatory work has commenced on a large hydro-electric dam to be built at 332 km., above Concordia, which will take some years but will contribute to a regularisation of the river, which at present rises and falls twice every year, with the varying rainfall seasons in its basin, so that approximately half the year the water is low, usually from January to April and again in August. However, the wind also affects the depth of the water as in the River Plate, so that any seasonal forecast is impossible. A safe year round draft to Concepcion del Uruguay can be taken at 20 ft. 6 in., though vessels from time to time load to 22 ft. 6 in.

The Ministry of Marine publishes fortnightly a bulletin with all information on depths of water in the channels, as well as of changes in buoys, lights, etc.

Two new bridges communicating with Argentina now span the Uruguay River at Fray Bentos and Paysandu. The bridge at Fray Bentos has a clearance of 36 m. over zero, and a main span of 220 m.

CARGO

Movement of Cargo

Once stevedores have come aboard, no cargo, either for the port or in transit, may be handled by the crew, as otherwise the vessel will be called on for high extra wages to stevedores. This also affects the lashing of transit cargo on deck.

Stevedores will not work in the rain, except when loading meat, earning double wages while doing so. They can also be persuaded to handle baggage or mail.

When handling dusty cargo in general, or which gives off ammoniacal, nicotine, or organic emanations, masks must be provided for stevedores' use.

Overcarried Cargo

Cargo for Montevideo is often overcarried to Buenos Aires with the consequent delays in delivery and expenses for the vessel. Holds should be carefully inspected as soon as discharge is said to have been finished to avoid possible overcarrying.

Clean Receipt

Agents will advise if they wish to receive any cargo for which a clean receipt cannot clearly be given, otherwise the cargo should be rejected. Mate's receipts cannot be claused to cover any damage from rain, wetting or other causes which might be sustained after the cargo is received on ship's tackle.

Bulk cargoes falling or drifting into water or on dock

When handling bulk cargoes vessels must place between the vessel and the dock side a wooden scaffolding, with lateral boards, or strong canvas to collect all material which is liable to fall into the water or on to the Dock during handling. There is a heavy fine for non-compliance.

This should be remembered when writing charter parties, especially under FIO conditions, as this should be for account of shippers or receivers.

Delivery of cargo from vessels

The cargo is discharged direct to Fiscal Warehouses, to lorries, lighters or wagons. When the cargo is delivered to Fiscal Warehouses, receipt for this is given to the vessel's Agents by the Custom House official in charge of the Warehouse. If discharged to lighters the lighterman obtains receipt from the Custom House official once the cargo is received in warehouse. When the cargo is delivered direct to Consignees' lorries, the receipt is given by special Custom House officials called "Cargo Receivers".

The goods are delivered by the Custom House officials to the Consignees against the presentation of the "transferencia" (transfer ticket) signed by the Agents of the vessel. The Agents sign the "transferencia", extended on stamped paper, against the Original Bill of Lading, which must be legalised by the Uruguayan Consul at the port of loading.

The steamship Agents must keep a special register of all "transferencias", and are responsible to the Authorities for keeping this register. Agents must retain Original Bill of Lading for cargo discharged, as it must be shown to the Customs Authorities immediately if demanded.

When the Consignees have not received the original documents and they wish to take delivery of the goods from the Custom House they must present a Bank guarantee, drawn up in accordance with the form approved by the Shipagents Association.

Cargo manifested to this country in transit to other countries without documents for Uruguay may not be re-shipped to other countries without government permission.

Marks on goods imported to Uruguay

By a Decree dated 30th January 1939, the Uruguayan Government decided that:

"Packages entering Bonded Warehouse, excepting those containing provisions or beverages, and excepting also 'Barraca' articles, shall be marked with the gross weight, the nett weight and corresponding measurement, in a clear and legible manner. These marks may be either 'fire-branded or printed'.

"The 9th August 1939, the Customs Authorities requested that marks and numbers of cases entering Montevideo warehouses should be placed on the extreme ends".

The Customs Authorities have also made known that it is necessary for the packages entering the warehouse to show their weight and measurement in the decimal-metric system.

The inspection of potato cargoes can be effected on board the carrying vessel, and if found in good sanitary condition, can be discharged direct to shore.

Opening and Closing of Hatches

This can be carried out by either crew or stevedores, and hatches must be kept closed when not in use.

Shipments of Meat

These are controlled by the Ministry of Agriculture, whose inspectors check ships' holds before shipment can commence. Holds must be clean and disinfected and temperature controlled to minus 1° to a maximum of plus 1° Celsius for chilled meat, or minus 10° for frozen meat.

Chilled is to be hung on hooks adjustable for height and space and stow of frozen must give a uniform distribution of weight. Alternatively, special cuts are packed and shipped in cartons.

Containers

Use of containers is very limited, since these must be opened up and emptied on the dock alongside, or even on board the vessel. The container itself is considered as part of the vessel's gear, and must be re-shipped without delay.

On rare occasions the Armed Forces have had containers moved out to their barracks.

The Port Authority is buying a crane to handle containers of 8 ft. × 8 ft. × 20 ft. and a maximum loaded weight of 44,800 lbs.

Consular Dues

All ships arriving at Montevideo must pay Consular dues, with the following exceptions:

Ships that due to a change en route, or by special call of their Agents in Uruguay, during passage, arrive at Montevideo with the sole purpose of receiving orders, as long as no commercial operations are effected.

Ships arriving in distress and which leave port without effecting operations.

Ships arriving for the sole purpose of landing or embarking Pilot.

The Ministry of Foreign Affairs consider bunkering as an operation, therefore ships calling at Montevideo for bunkers must pay Consular dues.

Consular value of the Uruguayan Peso – For the payment of fees abroad, the Executive Power will fix periodically the respective values of the peso, in accordance with exchange fluctuations.

Hours of Attendance at the Uruguayan Consulates – The Office hours of the Consulates will be those fixed by the Government in agreement with the Consuls in each country, endeavouring in each case to have the same working hours as those of the Custom House and other Public Offices of each City. Outside these hours, overtime is charged.

Consular dues on Bills of Lading – When vessels load cargo for Uruguay at ports where there is no Uruguayan Consulate, these dues are collected when the vessel arrives at Montevideo or at any other Uruguayan port. The Agent then recovers these charges from the Consignees.

CREW:

Deserters – Masters and/or Agents must report any deserters when the vessel sails. The Maritime Authorities give intervention to the Police Department, and if the men are located, the Agents must hand them over to the respective Consuls. However, the Agents continue to be responsible before the Authorities for the ultimate repatriation of the men, which must be done at first opportunity.

Vessels are subject to a fine per man. The Agents have also to pay repatriation expenses, in cases where the respective Consuls will not do so.

They must also deposit a guarantee which can be used for repatriation expenses in case the deserter stays in the country for more than 15 days.

Upkeep of men left in hospital or temporarily disembarked and traced deserters – The Agents are responsible for the maintenance of men disembarked for medical treatment, or temporarily with a special Immigration permit, and for deserters, until they leave the Country.

Stowaways – Masters of vessels having stowaways on board must report them to the Authorities, stating their name and port of embarkation. The stowaways must be kept on board. If they escape and are found after the vessel sails, Agents will be responsible for their repatriation and upkeep charges until they leave the Country. As with deserters, vessels with stowaways on board are liable to a fine per man if this regulation is not complied with.

Agents must also deposit a guarantee per man, amount to be used for repatriating the stowaway or for conveyance to the port of embarkation.

Time limit for getting crew members left behind out of the country – According to law, Agents must arrange that such crew members leave the country within 15 days. This period of grace commences as from the date of vessel's departure in respect of deserters and for those disembarked for medical treatment as from date on which they are medically certified as fit for travel.

Landing members of crew – Paying off crew for other than medical assistance is not permitted, but exceptions are granted in special cases. An application must be presented by the Agents to the Immigration Department, and if the permit is granted, a formal declaration is signed by the Master of the vessel, the Agents, the Immigration Inspector and the person wishing to disembark, setting forth length of time he is going to remain in the Country and conditions of departure. The personal documents of the person allowed to land, remain in charge of the Immigration Board.

If any member of the crew is landed for medical treatment or paid off without the corresponding permit, the vessel will be fined.

Gangways and Rat-Guards

A gangway must be placed and ready after a vessel comes alongside the quay, but this must not be presented before coming in to the quay. Authorities will only come aboard by the gangways.

Gangways must also have a lifebuoy with suitable line attached and handy, and a safety net must be placed under the gangway, otherwise shore labour will not board vessels, with consequent delay.

The gangway must also be brightly illuminated at night; an oil lamp is not sufficient.

As soon as vessel is securely moored, regulation size (not less than 80 cm.) rat-guards must be placed on all ropes, wires, fenders, lines and hoses.

Heavy fines are imposed for non-compliance with any of these or other regulations.

Overside Discharges

All overside discharges from latrines, bathrooms, gallery, scuppers, engine room, etc. must be screened or covered when vessel is alongside the quay, as vessels will be fined if the discharge falls on the dock or gangway.

Adjustment of Compasses

Vessels proceeding through Magellan Straits – The disposition issued by the Chilean Shipping Authorities on 13th April 1953, states:

"When a foreign ship arrives at the Magellan Straits and applies for a Pilot, official or private, for navigating the Channels, the Pilot must first check the compass for deviations of more than 5°, and if such deviation has been determined more than 6 months ago, especially in a place with great difference of latitude or different hemisphere, compensation of compass is obligatory when not in true order, and a written declaration to this effect will be made in the pilotage agreement. The Authorities will also send an officer to verify that the compass is in satisfactory condition before entering the Straits".

To avoid probable delays, ships heading for the Straits can make the necessary compensation in the Port of Montevideo or in the ante port whilst waiting for orders for departure. This port is most convenient for this class of compensation because at the present moment there is no magnetic variation and also because it is a quiet harbour with sufficient depth for turning. A compass adjuster may be obtained at any time.

200 Mile Limit and Fishing

Uruguay has declared sovereignty over 200 miles off shore, reserving all fishing and undersea exploitation rights. A number of foreign flag vessels fishing without permits have been seized and heavily fined, their catch and gear being confiscated.

Permits are obtainable, but in no case for vessels over 500 tons gross, to operate within 60 miles from shore, while all activity in territorial waters (200 miles) is forbidden in the months of May and June.

Garbage

Garbage is collected every morning by truck. There is a strict prohibition of dumping anything into the port, and oil tanks must not be cleaned within 30 miles of the coast, and on a falling tide.

Old dunnage should not be dumped or sold, without permission from the Authorities, through Agents.

Ships' Boats

Use of ship's boats is forbidden within the port, unless they are being lowered, with prior permission, for maintenance or exercises.

Fenders

All vessels must have at least 2 large fenders, to keep them 5 ft. or more off the quay. If the vessel has no fenders, or due to deck cargo cannot use them Agents should be warned in advance to rent the necessary equipment and have it ready on arrival.

Dropping Anchor when Berthing

If an anchor is dropped when approaching a dock to berth, to control the vessel as she moves in, it is essential that the anchor should be hove in again once the ship is moored. Port regulations require this and any damage to other craft, real or imaginary, through fouling anchor or chain, would cause considerable trouble.

SYSTEM OF CONTROL CENTRES AND MARITIME INFORMATION (COASTAL STATIONS FP-FT-FW, VHF-FM):

Legal Basis

- (a) System of Control and Information of Movement of the Port of Montevideo and its zone of influence made operative on 9/4/75. (Maritime Regulation No. 1).
- (b) Control Centre and Information of the Maritime Movement of the Port of Colonia and its zone of influence made operative on 23/9/76. (Maritime Regulation No. 3).
- (c) Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira and its zone of influence made operative on 1/10/76. (Maritime Regulation No. 4).
- (d) Control Centre and Information of the Maritime Movement of the Port of Punta del Este and its zone of influence made operative on 2/1/77. (Maritime Regulation No. 5).

(e) Control Centre and Information of the Maritime Movement of the Western Coast and its zone of influence made operative on 27/4/78. (Maritime Regulation No. 11).

(f) Control Centre and Information of the Maritime Movement of the Port of La Paloma and its zone of influence made operative on 1/11/78. (Maritime Regulation No. 12).
Note: In all the creations of the Control Centres, due account was taken of Programmes 1.09 and 3.08 corresponding to Law 14.106 and Sub-Programmes: "Maritime Police" and "Direction of Mercantile Marine".

(g) Control and surveillance of fishing vessels in the various fishing areas within the waters in the jurisdiction of the P.N.N. – Sources: Laws Nos. 14.145, 14.521 and 14.106 of the P.N.N. – Programme 1.09. (Maritime Regulation No. 2).

(h) Equipment which fishing vessels under the Uruguayan flag must possess when they operate in the common fishing zone between the Eastern Republic of Uruguay and in the Uruguayan fishing areas proper.
Sources: Maritime Regulation No. 2 of the 23/7/76. Decree of Co-ordination of Punta del Este of 27/1/76 (P.N.N. – P.N.A.). (Maritime Regulation No. 6).

(i) Equipment which vessels and/or craft in the coasting trade, pleasure craft, passenger vessels and working boats must carry where they operate in the Ports of the Republic and Navigate in the River Uruguay. (The zone between International Bridges and the Salto Grande).
Sources: Appendix 18 MAR 2 of the Radio communications regulation of the UIT and the Agreement arising from the meeting between Uruguay and Argentina (Buenos Aires 9/76) in respect of the use of VHF and FM channels and Maritime Regulations Nos. 1 to 6 of the P.N.N. – (Maritime Regulation No. 7).

(j) Law covering the control of pollution: Sources: Law No. 13.833 of the 29/12/69 and in particular articles 2 and 12 of the said Law. Chapter IX Pollution – (Articles 47 to 52) of the Treaty of the River Plate and its Maritime Frontage and Regulation of 28/10/74 of the Prefecture of the Port of Montevideo (Maritime Regulation No. 8).

(k) Zones for lightening ships and complement of cargo: Sources: Resolutions Nos. 2 and 4 of the Administrative Commission of the River Plate of dates 30/9/77 and 26/10/77 as laid down in Article 28 of the Treaty of the River Plate and its River Frontage and established transitorially in the Article 88 of the said treaty (Maritime Regulation No. 9).

(l) "LASH" – Type Operations: Sources: Resolution No. 1/2/78 of the Administrative Commission of the River Plate, Chapter IV. Articles 24 and 27 (Port Facilities, lightening operations and complements of cargo) of the Treaty of the River Plate and its maritime frontage (Maritime Regulation No. 10.).

(m) Agreement on the International Regulation for preventing unauthorised boarding.

(n) The Treaty of the River Plate and its Maritime Frontage.

(o) The Statutes of the River Uruguay.

(p) The International Agreement for the Safety of Human Life at Sea – 1974.

(q) Regulation of Radio-communications of the International Union of Telecommunications (UIT) and nomenclatures.

Particulars of the System

1. AIMS OF THE SYSTEM OF CONTROL CENTRES

(a) To effect positive sovereignty over the Area of the System:
  1. Territorial Sea
  2. River Plate
  3. River Uruguay
  4. Merin Lagoon

(b) To offer support to the National Mercantile Navigation and of third parties, complying with the objectives as propounded by the International Maritime Organisation (OMI) and by the International Telecommunications Union (UIT).

(c) To serve as a chain of Control Towers, effecting control and information of Movement of vessels and Port Operations.

(d) To co-ordinate with Public and Private Institutions who operate within the Ports of the Republic, to facilitate and activate port operations, avoiding delays and inconvenience.

2. GENERAL FUNCTIONS

The General functions of the Centre are:

(a) To maintain real and efficient control of the movement of vessels, in the area of application of the system in order:
  1. To prevent collisions between vessels.
  2. To alert the systems of Search and Rescue and/or Salvage in the event of vessels requiring assistance.
  3. To facilitate BYR operations.

(b) To maintain real and orderly control of the operations in the ports to:
  1. To prevent groundings and collisions with obstacles in port works:
  2. To have prepared emergency plans for cases of disasters and maritime accidents within the Ports and International Bridges (River Uruguay).

(c) To maintain up-to-date information concerning the state of the weather, lighting and all other matters contributing to the safety of navigation and operations in the area.

(d) To maintain up-to-date information for Maritime Agencies and/or Owners, providing such information to facilitate and activate port operations to be effected by vessels, obviating delays and inconvenience at all times.

(e) To serve Public and/or Private Institutions who operate in the Ports, collecting, classifying, analysing, evaluating and disseminating all the necessary information for the better fulfilment of port service.

(f) To comply with all other functions which are specified by the Mandate and to co-operate with Public Authorities and organisations in all matters relating to its functions.

3. CONTROL AND INFORMATION FROM THE CENTRES

The system belongs to the National Navy and is controlled by the National Navy Prefecture. It is directed from the Montevideo Control Centre.

(a) Control of Movement of Vessels – Control of vessels navigating within the Vessel Movement Areas.

(b) Control of Port Operations – Control of vessels manoeuvring within the ports of the Republic, including roads and access channels.

(c) Control of International Bridges – Control of vessels navigating in the International Bridges Zone – Gral. Jose Artigas Bridge at Paysandu, and Gral. San Martin Bridge at Fray Bentos.

(d) Vessel Movement Service – Maritime Mobile Safety Service, between coastal stations and vessels or between vessels, where the messages refer solely to vessel movement.

(e) Port Operation Service – Maritime Mobile Service in a port or in its district, between coastal stations and vessels, where the messages refer solely to vessel operations, movement and safety and, in the event of emergency, to safeguarding persons.

4. ZONES OF CONTROL AND INFORMATION OF THE CONTROL CENTRE SYSTEM

(a) Port of Montevideo (Deep Sea – Coasting – Fishing).
  1. "Alpha" – Control and information of vessel movement.
  2. "Bravo" – Control and information of port operations.

(b) Port of Buceo (Pleasure Craft).
  1. "Oscar" – Control and information of port operations.

(c) Port of Santiago Vazquez (Pleasure Craft – Coasting).
  1. "Papa" – Control and information of port operations.

(d) Port of La Paloma (Fishing Centre).
  1. "Kilo" – Control and information of movement of vessels.
  2. "Lima" – Control and information of port operations.

(e) Port of Punta del Este (Fishing – Pleasure Craft).
  1. "Golf" – Control and information of vessel movement.
  2. "Hotel" – Control and information of port operations.

(f) Port of Piriapolis.
  1. "Tango" – Control and information of port operations.

(g) Port of Colonia (Passage port to Buenos Aires).
  1. "Charlie" – Control and information of vessel movement.
  2. "Delta" – Control and information of port operations.

(h) Port of Sauce (Coasting).
  1. "Uniform" – Control and information of vessel movement and of port operations.

(i) Port of Nueva Palmira (Deep Sea).
  1. "Echo" – Control and information of movement of vessels.
  2. "Foxtrot" Control and information of port operations.

(j) Port of Carmelo (Pleasure Craft – Coasting).
  1. "Quebec" – Control and information of port operations.

(k) Port of Fray Bentos (Overseas – Navigation – International Bridges).
  1. "India" – Control and information of the movement of vessels.
  2. "Juliet" – Control and information of port operations.

(l) Puerto Paysandu (Overseas – Navigation – International Bridges).
  1. "Mike" – Control and information of the movement of vessels.
  2. "November" – Control and information of port operations.

(m) Puerto Salto (Coasting – Pleasure Craft – Passages).
  1. "Romeo" – Control and information of the movement of vessels.
  2. "Sierra" – Control and information of port operations.

5. COMMUNICATIONS

All Centres maintain permanent listening on Channel 16 (VHF – FM).

(a) *Language:* The language used in communication is Spanish. Vessels who have difficulty in communicating in Spanish may do so in English, and if there are problems in hearing properly they may use the groups of the International Signals Code, Tables of Spelling equivalents and Numbers, or Code Q.

(b) *Channels – Frequencies and Usages:* There will be those as defined by Appendix 18 Mar 2, of the Radiocommunications Regulations of the International Telecommunications Union, published by the General Secretary of the UIT in Geneva 1976 and the points agreed in the Uruguay – Argentina Meeting, carried out in the City of Buenos Aires 9/76, use of the VHF Channels (Band 156 – 174 MHz.).

Channel	*Frequencies*	*Usage*
6	156.300 MHz.	Bridge to Bridge.
8	156.400 MHz.	Port Operations.
9	156.450 MHz.	Port Operations.
11	156.550 MHz.	Transmission from the Centres in fulfilment of objectives.
13	156.650 MHz.	Transmission from the Centres in fulfilment of objectives.
15	156.750 MHz.	Meteorological Bulletins and Warnings to Navigators.
16	156.800 MHz.	Calling up and Security.
18	156.900 MHz. Reception	Jose Ignacio Oil Terminal.
	161.500 MHz. Transmission	Jose Ignacio Oil Terminal.

Should problems arise with VHF equipment on vessels (the range of same, out of service, etc.) communications should be effected on MF or on HF with the Safety Coastal Stations of the P.N.N.

The services and frequencies of the Coastal Stations are described in the tables at the end of "Uruguay General" Section.

Vessels who, for some reason or other cannot effect communications by radiotelephone (VHF, HF, MF), should do so by radiotelegraphy through the intermediary of the Coastal Station (open to public correspondence) Cerrito Radio CWA.

Radiotelegrams should be sent in time to the telegraphic address Comopre.

(c) *Listening Out by Vessels:*

1. *All vessels* in Uruguayan judicial waters must maintain permanent listening out service on Channel 16 (VHF – FM) except when they are moored in port. If there are problems on VHF they should listen out on 2182 or 4125 KHz.
2. When a vessel cannot, due to any fault of whatever nature, maintain listening on Channel 16, she should pass to Channel 11 or 13, but advise the Control Centre first.
3. In the various zones, the vessels must use as a working channel to communicate with the Zone Centre, the frequency which the Control Centre will indicate to them on Channel 16.
4. In all the ports of the Republic, vessels and/or craft in the coasting trade, pleasure craft (Categories A and B), passenger craft and traffic units (tugs, dredgers, launches, lighters, etc.) must be equipped with a VHF – FM transmitter and receiver for local communications with Port Controls, Appendix 18 Mar 2 of the Radiocommunications Regulations of the International Telecommunications Union.
5. *All vessels or craft* navigating or carrying out operations within 25 miles or more of the coast, must be equipped with a BLU transmitter and receiver (with corresponding frequencies) of 150 watts effective power and A3A and A3J type transmission.

(d) *Services and Frequencies of the FP, FC and FW Dependent on the P.N.N.*

Coastal Station (FC), Station for Port Operation (FP), Station for Service of Vessel Movement (FT), Station which is both for Port Operations and for Service of Vessel Movement (FW).

(e) If in fulfilment of the regulations set out by this System, vessels on calling up the Control Centre cannot obtain a reply, they should immediately make the communication in question to the Director of the System (telegraphic address: Comopre) by radiotelegraphy or radiotelephony via Cerrito Radio (CWA) or Punta Carretas Radio (CWF) respectively.

Communications to Centres:

1. From Vessels in the Zone.
   - (a) Position on entering and leaving each Zone of Vessel Movement (Flag, Name, International Call Sign, Where From, Where Bound, Latitude, Longitude, Force, Speed and Maximum Draft).
   - (b) ETA at next port.
   - (c) Problems with characteristic aspects during navigation.
   - (d) If anchoring or raising anchor at any point in the Control Zone of Vessel Movement, it is necessary to ask for authorisation when this is done within Port Operation Zones, and also whenever any manoeuvre is intended to be carried out, and this authorisation expiring within twenty (20) minutes from its request.
   - (e) Any damage suffered by the vessel.
   - (f) Assistance given to damaged vessels or those in difficulty.
   - (g) Any indications of dangerous obstacles to navigation which are not duly indicated by buoys and lights.
   - (h) Any serious reduction in visibility.
2. Pilotage:
   - (a) Whatever is specified in the General Pilotage Regulations.
   - (b) Time of embarkation and/or of disembarkation.
   - (c) Request of Master concerning change, mooring, etc.
   - (d) Difficulties in pilotage.
3. Concerning the Owner or Agent:
   - (a) Monthly list of expected vessels.
   - (b) Confirmation of arrival of vessels 24 hours in advance.
   - (c) News concerning vessels being delayed or arriving early.
   - (d) Information if the vessels are carrying hazardous cargo (explosives or inflammables) 24 hours in advance of arrival, including any such cargo in transit, mentioning:
     - (i) The amount and location of such cargo.
     - (ii) The correct technical name of the substance (the designation used for transportation purposes), the UNO number (if this is given), classification in the IMDG Code (if this is given), the flash point (if applicable) and quantity.
     - (iii) The presence or otherwise on board of a Certificate which is valid showing the ability of the vessel in respect of the cargo which it is carrying (only for hazardous substances carried in bulk);
     - (iv) The stowage of hazardous cargo on board, indicating those which have to be unloaded and those which have to remain on board;
     - (v) The condition in which the hazardous cargo is and any defect which is known in respect of packages or drums, together with the system of containing and handling of the cargo, of the equipment and instruments used (when hazardous bulk cargo is involved), which may engender excessive risk.
     - (vi) Any known defect which may effect considerably the safety of navigation.

(f) *Communications from the Centres:*

1. To vessels (navigating towards Uruguayan Ports).
   - (a) The quay at which they will berth.
   - (b) The Pilot who will assist the vessel.
   - (c) Any information from the Maritime Agent with regard to future operation.
2. To the Pilot:
   - (a) Tugs and cable launches who will assist him.
   - (b) Defences on the sea wall.
   - (c) Bitts which the vessel will use.
3. To the Owner or Agent:
   - (a) Position of their vessel.
   - (b) ETA.
   - (c) Conditions of cargo.
   - (d) Time at which the Pilot will go on board.
   - (e) Time of berthing.
4. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port of Montevideo) immediately any information is obtained with regard to:
   - (a) A BYR incident or any difficulty which is presented to a vessel.
   - (b) A deep sea or coasting vessel (data concerning Naval Messages in accordance with the Abbreviated Code).
   - (c) A fishing vessel, with the Naval Message data being as follows:
     - – Where from, Flag, Name, International Call Sign, Month, Day and Hour of sailing, Position (for Customs Clearance), Month, Day and Hour of Position, Activity (fishing or bound for Port).
     - – Arrival, Flag, Name, International Call Sign, Month, Day and Hour of Arrival, Port of Arrival.
     - – Fishing or within the Zone, or the Port, Flag, Name, International Call Sign, Position, Month, Day and Hour of Position ETA (if it is within the Zone or the Port).

(5) To the adjacent Control Centre:

When a deep sea or coasting vessel sails from a port controlled by the Control Centre, or when this vessel effects a passage to the Vessel Movement Zone controlled by that Centre, this must be informed to the adjacent Control Centre (according to the course of the vessel) stating ETA and the Zone of Vessel Movement of this adjacent Centre.

Note: The Control Centres will effect communications by Naval Message. These Naval Messages must be sent immediately after receipt from vessels or when such information comes to hand from other sources.

(Naval Messages in this context will have Priority Precedence).

(6) Command of to the Naval Control of Maritime Traffic in Uruguay (Contramu). Immediately on receipt all information specified in item (f) – Number (4).

(g) *Communications from Coastal Stations (Vessel Movements – FT, MF-HF)*

1. To the Centre Director of the System (Control Centre and Information of the Maritime Movement of the Port of Montevideo). Immediately on receipt all information specified in Item (f) Number (4).
2. To the Control Centre with responsibility over the zone to which a message refers.

   The same as those quoted in the preceding Number 1.

6. FISHING VESSELS:

(a) All fishing vessels clearing entry or departure from any national port towards the different Fishing Areas must communicate to the Maritime Authority the following:

1. On Sailing:
   - a. Flag (FL)
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Departure (DEP)
   - e. Month, day and hour of departure (TOD).
   - f. Destination (Indicate Fishing Zone and Position) (DST).
   - g. Month, day and hour estimated at arriving at the Fishing Zone (ETA Z/P).
2. On Arrival:
   - a. Flag (FL).
   - b. Name of Ship (SHP).
   - c. International Call Sign (IND).
   - d. Port of Arrival (PORT).
   - e. Month, day and hour of arrival (ARR).

(b) All fishing vessels *navigating* must communicate every 6 hours with the Safety Coastal Station of the National Naval Prefecture of the Eastern Republic of Uruguay which is nearest to them (or to which they are listening) giving the following information:

1. International Call Sign (IND).
2. Position in Latitude and Longitude (POS).
3. Month, day and hour of the position (DHPOS).
4. Port of Destination (DET).
5. Activity: (Fishing – Coming to Port – Going to Zone) (ACT).

(c) *Normal Fishing Zones:*

1. High Seas Zone (Altamar): Zone which is outside the judical waters and within the Common Fishing Area.
2. Common Fishing Area (ZOCOPES): Art. 73 of the River Plate and Territorial Sea Treaty.
3. The Zone of the River Plate (RIPLATA).
4. The coastal Zone of the Atlantic Ocean (COSATLAN): Zone included between our coast on the Atlantic Ocean and a Line 12 miles out.
5. Zone of the River Uruguay (RIURU).
6. Zone of the Merin Lagoon (LAMERIN).

(d) Uruguayan Fishing Vessels which are *navigating* in the Common Fishing Area (Uruguay – Argentine) within the Sector of Argentine Jurisdiction are obliged to communicate its position to the Argentine Maritime Authority. Communications will be made on frequency 3860.6 kHz. to the Coastal Safety Station of the Prefecture of the Mar del Plata.

(e) *Note:* Information to be communicated: All the communications as specified in (b).

All fishing vessels must *listen out permanently* on Channel 16 (VHF – FM), except when they are moored in port. If they are at a distance from the coast which prevents a safe communication on

VHF, listening must be effected on 2721.5 kHz. Those effecting operations 25 miles or more from the coast, must be equipped with a BLU transmitter and receiver (with the corresponding frequencies) with 150 watts effective power and type of transmission A3A and A3J, and also fishing vessels must be equipped with a receiver on 2721.5 kHz.

(f) Vessels, after prior request to the Control Centre covering them, may pass to Channel 6 or 8, and keep on those *only for the necessary time* for Fishing Manoeuvres, after which they must return to Channel 16, and advise the Centre accordingly.

7. HYDROCARBONS: It is prohibited to pour hydrocarbons or residual matter arising from the washing of tanks, clearing of bilges and ballast in general or any other action capable of having contaminary effects in waters within the territorial sea of Uruguay with the exception of the zone which is:
   (a) Outside the limits of the River Plate.
   (b) Outside 100 miles of the Uruguayan Territorial Waters, i.e. 100 miles out from the Atlantic Ocean coast.
   (c) Outside the Prohibition area for contaminatory action (Article 78 of the River Plate Treaty).

8. ZONES OF OPERATION FOR LIGHTENING AND COMPLEMENT OF CARGO:
   The zones of operation for lightening and complement of cargo are as follows:
   Zone "A": Between the Parallels of Lat. South 35° 04′ and 35° 08′ and between the Meridians of Long. West 56° 00′ and 56° 02′.
   Zone "B": Between the Parallels of Lat. South 35° 30′ and 35° 33′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
   Zone "C": Between the Parallels of Lat. South 35° 35′ and 36° 06′ and between the Meridians of Long. West 56° 30′ and 56° 38′.
   Zone "D": Between the Parallels of Lat. South 35° 04′ and 35° 06′ and between the Meridians of Long. West 56° 11′ and 56° 16′.

9. OPERATIONS OF LOADING AND UNLOADING "LASH" TYPE VESSELS:
   The operation of loading and unloading "LASH" type vessels for the national territory, on the one hand may be effected apart from within the lightening and complement of cargo areas in ports, also in the corresponding roads.

10. TRANSFER OF VESSELS:
   The transfer of vessels between roads and lightening areas and for complement of cargo purposes, will be effected under pilotage and tug control using the Port Services from which the barges in question have come.

CONTROL CENTRES:

Control Centre and Information of Maritime Movement of the Port of Colonia.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of Colonia, within the free zone of the Port, located in the main building of the free Port zone of Colonia (Latitude: 34° 28′ 28″ S., Longitude: 57° 57′ 38″ W.).

(b) The call sign of the Control Centre is CWC 23, and for calling up purposes it is possible to use CONTROL COLONIA PREFECTURE.

(c) The Control Centre of the Port of Colonia is located in the Prefecture of the Port of Colonia.
The Prefecture of the Port of Colonia is a dependency of the National Naval Prefecture (2nd Circumscription).
Telephone No. of the Control Centre – 688.
Address – Boulevard Espana 2054 (Department of Colonia).

AREAS OF CONTROL.

(a) The Control Centre and Information of Maritime Movement, covers:
   1. Zone "CHARLIE". The area of the River Plate marked by the Meridians which pass through Martin Chico Point (Longitude: 58° 12′ 30″ W.) and Punta Rosario (Longitude: 57° 21′ W.) and the middle line equidistant from both coasts (Law 14.145/74 – "Treaty covering the Limits of the River Plate"), with the exception of the area of water included between the imaginary line which joins San Carlos Point; Lopez West Island; Farallon Island; the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast ("DELTA" AREA).
   2. "DELTA" area. Area of the River Plate, limited by the imaginary line which joins San Carlos Point; Lopez West Island, Farallon Island; the Green Buoy of Vienna, Parallel 34° 30′ S., the Meridian which passes through Riachuelo Point Longitude: 57° 43′ 18″ W., and the coast.

(b) The Control Centre and Information of Maritime Movement of the Port of Sauce covers:
   1. "UNIFORM" zone. The area of the River Plate included between Meridians 57° 25′ 48″ W. and 57° 33′ W., the coast and the parallel Latitude: 34° 29′ 18″ S.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels.
   1. In zone "CHARLIE". The Control Centre must be informed when the following points have been passed:
   Punta Rosario
   Puerto Sauce
   Roca Barriles
   Puerto Colonia
   Km. 56.5 (Farallon Island)
   Km. 71.3 (San Pedro Bar)
   Km. 101 (Martin Chico Point)
   In both Zones of Control the communications as designated in following tables, must be effected.

(b) From the Director of Hydrographic Studies of the MTOP.
   1. The place assigned for berthing or mooring.
   2. Guard and order tugs (when these exist).

Control Centre and Information of the Maritime Movement of the Port of Fray Bentos

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of Fray Bentos (Latitude: 30° 06′ 50″ S., Longitude 58° 18′ 27″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Fray Bentos is CWC 25. When calling up it is possible to use CONTROL FRAY BENTOS PREFECTURA.

(c) The Control Centre of the Port of Fray Bentos is located in the Prefecture of Fray Bentos (5th Circumscription P.N.N.).
Telephone No. of the Control Centre is 321.
Address: Luis A. de Herrera 1249 on the corner with 25 de Agosto, Fray Bentos Department of Rio Negro.

CONTROL AREAS.

(a) The Control Centre Information of the Maritime Movement of the Port of Fray Bentos covers:
   1. Zone "INDIA" The area of the River Uruguay marked by the parallel 33° 30′ S. (Punta Amarilla Km. 46) and the parallel 32° 50′ S. (Roman Island) navigable areas of the Rio Negro and San Salvador and the middle line equidistant from both coasts; with the exception of the Port of Fray Bentos and the area of water marked by the port and maritime constructions (zone "JULIET").
   2. Zone "JULIET". The port of Fray Bentos and the areas of water marked by the port and maritime constructions.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels:
   1. In zone "INDIA". The Control Centre must be notified during navigation when the following crossings are made:
   Km. 46 (Punta Amarilla)
   Km. 61 (Riacho Yaguari)
   Km. 83 (Paso Barrizal)
   Puerto Fray Bentos
   International Bridge "General San Martin"
   Km. 122 (Nuevo Berlin)
   Km. 140 (Roman Island)
   In both Areas of Control the designated frequencies are shown in following tables.

THE BRIDGE ZONE

All vessels of 100 tons or more gross registered weight must comply with the following instructions:

(a) Navigation day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 10 and 11 in the Bridge "Libertador General San Martin".

(b) It is prohibited to cross or overtake between Km. 100 and Km. 102.5 and for this purpose the following passage priorities are established:
   1. Those navigating downstream over those navigating upstream.
   2. Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.

(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.

(d) Between the limits indicated in point (b), speed must be reduced to the minimum compatible with good steering and manoeuvring.

(e) In the zones included between the limits indicated in point (b), it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of La Paloma

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Centre is controlled from the Prefecture of the Port of La Paloma (Position: Latitude 34° 39′ 30″ S. and Longitude 54° 08′ 28″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of La Paloma is CWC 30. For calling up purposes "CONTROL LA PALOMA PREFECTURA" may be used.

(c) The Control Centre La Paloma is located in the Prefecture of the Port of La Paloma (8th Circumscription P.N.N.)
Telephone No. of the Control Centre – 16.
Address – Avenida del Navio (Puerto de La Paloma) – Rocha.

CONTROL ZONES.

(a) The Control Centre and Information of the Maritime Movement of the Port of La Paloma comprises:
(1) Zone "KILO". Zone of the Atlantic Ocean (Territorial Sea) situated between the meridians 50° 50′ and 54° 15′ W., limited by the straight line 128° of the Chuy Lighthouse (lateral maritime limit with the Federal Republic of Brazil – Law 14.163) and to the South by the lateral maritime Argentine–Uruguay limit (Law 14.145/974). – "Treaty of Limits of the River Plate". Art. 70), with exception of the Port of La Paloma, between the coast and an imaginary line which goes between the end of the breakwater towards the Eastern point of the Costa Azul (Zone "LIMA"). Zone "LIMA".
(2) Zone "LIMA". Port of La Paloma, zone situated between the coasts and an imaginary line which goes from the end of the breakwater to the Eastern point of Costa Azul.

COMMUNICATIONS TO THE CENTRE.

(a) From vessels to:
   (1) In Zone "KILO" – The Control Centre must be informed during navigation when the following points are crossed:
   The Lighthouse Chuy
   The Lighthouse Cabo Polonio
   The Lighthouse Santa Maria

(2) In Zone "LIMA"
During navigation in the Access Channel and within the Port when the Port jetty small light is passed.

Also, in both control zones the communications shown in the following tables must be effected.

(b) From the Hydrographic MTOP Directorate:
(1) Place assigned for berthing or mooring.
(2) Guard or order tugs (when they exist).

Control Centre and Information of the Maritime Movement of the Port of Montevideo.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS

(a) The Centre is controlled from the National Naval Prefecture, located on the Floors 11, 12 and 13 of the General Command Tower of the Navy (Customs Building Lat. 34° 54′ 03″ S., Long. 56° 12′ 44″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Montevideo is CWC 39. In calling up it is possible to use "CONTROL MONTEVIDEO PREFECTURA".
(c) The Call Sign of the Control Centre of the Port of Buceo is "CONTROL BUCE PREFECTURA".
(d) The Call Sign of the Control Centre of the Port of Santiago Vazquez is CWC 38.
In calling up it is possible to use "CONTROL SANTIAGO VAZQUEZ PREFECTURA".
(e) The Control Centre of the Port of Montevideo is located in the building of the Navy General Command.
Telegraphic Address – "Comopre" (Control Montevideo Prefectura).
Telephones – 95.51.01 – 95.24.77 – 95.62.53.
Telex UY 929
Address – Rambla 25 de Agosto de 1825.

ZONES OF CONTROL.

(a) The Control Centre and Information of the Maritime Movement of the port of Montevideo covers:
(1) Zone "ALFA". Zone of the River Plate situated between the Uruguyan coast and the meridians 55° 30′ and 57° 21′ W., and to the South to the limit of the River Plate with the Argentine Republic (Law 14.145/74 "Treaty of Limits of the River Plate").
With the exception of the areas of water included:
(a) Between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01′ South (Zone "BRAVO").
(b) Between the meridians 56° 00′ and 56° 09′ W. and the parallel 34° 57′ S. (Zone "OSCAR").
(c) Between the meridians 56° 20′ and 56° 40′ W. and the parallel 34° 56′ S. and the coast (Zone "PAPA").
(2) Zone "BRAVO". Zone of the River Plate included between the meridians which pass through Punta Sayago and Punta Brava, the coast and the parallel of Latitude 35° 01′ S., including the Access Channel to the Port of Montevideo, Foreport, Docks, Channel or Inflammable Cargo Docks (ANCAP).
(b) The Control Centre and Information of the Port of Buceo includes:
(1) Zone "OSCAR". Zone included between the meridians 56° 00′ and 56° 09′ West and the parallel 34° 57′ South.
(c) The Control Centre and Information of the Maritime Movement of the Port of Santiago Vazquez includes:
(1) Zone "PAPA". Zone included between the meridians 56° 20′ and 56° 40′ West and the parallel 34° 56′ South and the coast. It includes the Port, Anchorages and all areas of water.

COMMUNICATIONS FROM THE CENTRE

(a) To the National Administration of Ports (A.N.P.).
(1) Time of arrival of each vessel (ahead of time or delayed).
(2) Movement of tugs.
(3) Information from Masters of vessels on his cargo or changes in his berth.
(b) To the Argentine Naval Prefecture:
(1) ETA of vessels which are going to Argentine Ports or to Coastal Ports.

COMMUNICATIONS TO THE CENTRE.

(a) From the National Ports Administration (A.N.P.)
(1) Designation of berths prior to 1700 hrs. on the previous day.
(2) Tugs and launches for guard and order purposes.
(3) Departures for Deep Sea and Coasting vessels.
(b) From the vessels:
(1) In Zone "ALFA". The Control Centre must be informed during navigation when the following points are passed:
(a) To the West of the Access Channel to the Port of Montevideo.
1. By Middle Channel:
The *Graf Spee*
The Panela Lighthouse
The Uruguayan Banco Ortiz Buoy
The Argentinian Banco Ortiz Buoy
2. By North Channel:
The *Graf Spee*
The Panela Lighthouse
The Jesus Maria Buoy
The Arazati Point
The Puerto Rosario.
(b) To the East of the Access Channel to the Port of Montevideo.
Punta Brava
Isla de Flores
(2) In Zone "BRAVO".
During navigation in the Access Channel:
The Eje Buoy
The Jetty

In both areas of control the communications as designated on the following tables should be effected.

Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS.

(a) The Control Centre is controlled from the Sub-Prefecture of Nueva Palmira (Position Lat. 33° 52.7′ S., Long. 58° 25.3′ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira is CWC 31 and when calling up it is permitted to use "CONTROL NUEVA PALMIRA PREFECTURA".
(c) The Control Centre of the Port of Nueva Palmira is located in the Sub-Prefecture of Nueva Palmira.
The Sub-Prefecture of Nueva Palmira is a dependency of the Prefecture of Colonia (2nd Circumscription P.N.N.).
Telephone No. of the Control Centre – 139.
Address – Port Area – Nueva Palmira – Department of Colonia.

AREAS OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Nueva Palmira cover:
(1) Zone "ECHO". Zone of the River Plate and the River Uruguay is marked by the meridian 58° 12.5′ W., (Punta Martin Chico Km. 101) and the parallel 33° 30′ S., (Punta Amarillo Km. 46) and the middle line equidistant from both coasts with the exception of the Port of Nueva Palmira and the area of water limited by the port constructions (zone "FOX-TROT").
(2) Zone "FOX-TROT". The Port of Nueva Palmira and the areas of water limited by the port constructions (official quay, the Bed of the Company Navigen and the Higueritas Dock).

COMMUNICATIONS TO THE CENTRE:

(a) From Vessels:
(1) In zone "ECHO", the Control Centre must be informed during navigation of the following crossings:
Km. 101 (Punta Martin Chico),
Km. 121 (Sola Island).
Puerto Nueva Palmira.
Km. 22 (Punta Arenal Grande).
Km. 46 (Punta Amarilla).
In both Areas of Control, the communications as shown in following tables must be effected.

Control Centre and Information of the Maritime Movement of the Port of Paysandu.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Paysandu, located in the main Customs building (32° 18′ 06″ S., 58° 05′ 08″ W.).
(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Paysandu is CWC 32, and when calling up it is possible to use "CONTROL PAYSANDU PREFECTURA".
(c) The Control Centre and Information of the Maritime Movement of the Port of Paysandu is a dependency of the Prefecture of the Port of Paysandu (6th Circumscription P.N.N.).
Telephone No. of the Control Centre – 3099.
Address – Presidente Viera and Avenida Brasil – Paysandu (City).

CONTROL AREAS:

(a) The Control Centre and Information of the Maritime Movement of the Port of Paysandu covers:
(1) Zone "MIKE". The area of the river Uruguay marked by the parallel 32° 50′ S. (Roman Island) and parallel 31° 53′ S. (the mouth of the Malo Stream Km. 257 approximately) and the middle line equidistant from both sides with the exception of the zone included between the parallel 32° 20′ S. (the mouth of the Stream "Sacra") and the parallel 32° 14′ S. and the mouth of the Stream "San Francisco". (Zone "NOVEMBER").
(2) Zone "NOVEMBER". The area of the River Uruguay limited by the parallel 32° 20′ S. which passes through the mouth of the Stream "Sacra" up to parallel 32° 14′ S. which passes through the mouth of the Stream "San Francisco".

COMMUNICATIONS AT THE CENTRE:

(a) From vessels:
(1) In zone "MIKE" – The Control Centre must be notified during navigation when the following crossings are made:
Km. 140 (Roman Island)
Km. 160 (San Javier)
Km. 183 (Concepcion del Uruguay)
Punta "N" Almiron Island
Puerto Paysandu
International Bridge "General Artigas"
Punta Piedras
Arroyo Malo
In both Areas of Control the communications are shown in the following tables.

THE BRIDGE ZONE.

All vessels of 100 tons or more gross registered weight must comply with the following instructions:
(a) Navigation both by day and night in both directions will be made under the bridges by the marked channel, in the central arch, between piles 11 and 12 in the bridge "General Artigas".
(b) It is prohibited to cross or overtake between Kms. 208 and 211. For this purpose the following passage priorities are established:
(1) Those navigating downstream over those navigating upstream.
(2) Convoys with a tug either pulling or pushing have priority over all vessels which include those that are navigating downstream.
(c) The vessel or convoy which has to give way will wait outside the limits indicated in point (b). Between those limits it is prohibited to anchor for any cause, even though the channel is left free.

(d) Between the limits indicated in point (b) – speed must be reduced to the minimum compatible with good steering and manoeuvring.

(e) In the zones included between the limits indicated in point (b) – it is prohibited to effect any form of dredging operation across the whole width of the river.

Control Centre and Information of the Maritime Movement of the Port of Punta del Este and Piriapolis.

LOCATION, INTERNATIONAL CALL SIGN, ADDRESS:

(a) The Centre is controlled from the Prefecture of the Port of Punta del Este (Lat. 34° 57′ 48″ S., Long. 54° 57′ 06″ W.).

(b) The International Call Sign of the Control Centre and Information of the Maritime Movement of the Port of Punta del Este is CWC 34. For calling up purposes it is possible to use "CONTROL PUNTA DEL ESTE PREFECTURA".

(c) The Call Sign of the Control Centre of the Port of Piriapolis is CWC 33.
For calling up purposes it is possible to use "CONTROL PIRIAPOLIS PREFECTURA".

(d) The Control Centre of the Punta del Este is located in the Prefectura of the Port of Maldonado (3rd Circumscription P.N.N.).
Telephone No. of the Control Centre – 4.18.84.
Address – Calle 8 and 13 (Department of Maldonado).

(e) The Control Centre of the Port of Piriapolis is located in Sub-Prefecture of the Port of Piriapolis (3rd Circumscription P.N.N.).
The Sub-Prefecture of Piriapolis is controlled by the Prefecture of Maldonado.
Telephone No. – 18.
Address – Avenida Piria and Calle Maipu (Piriapolis).

ZONES OF CONTROL

(a) The Control Centre and Information of the Maritime Movement of the Port of Punta del Este covers:
- (1) Zone "GOLF". Zone of the River Plate, Atlantic Ocean (Territorial Sea) situated between the meridians 55° 30′ and 54° 15′ Longitude West, the imaginary line which joins the Punta del Este with Punta Ballena and in the South by the continuation of the limit of the River Plate with the Argentine Republic and the Territorial Sea (Law 14.185/974 "Treaty of the Limits of the River Plate"), with the exception of the extent of water included between meridians which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian of 34° 56′ 30″ South (Zone "TANGO") – Piriapolis.
- (2) Zone "HOTEL". The Bay of Maldonado and the Port of Punta del Este.
  - (a) The Bay of Maldonado: Zone situated between the coast and the imaginary line which joins Punta del Este with Punta Ballena, includes also "Boca Grande" and "Boca Chica".
  - (b) The Port of Punta del Este: Zone situated between the coast and an imaginary line which goes from the end of the jetty to a point which limits to the North of the Mansa Beach. It includes all the mooring areas.

(b) The Control Centre and Information of Maritime Movement of the Port of Piriapolis comprises:
- (1) Zone "TANGO". Zone of the River Plate included between the parallels which pass through Punta Iman (55° 16′ 08″ W.) and Punta Raza (55° 14′ 00″ W.) and the meridian 34° 56′ 30″ South.

COMMUNICATIONS TO THE CENTRE

(a) From Vessels
- (1) In zone "GOLF". The Control Centre must be informed during navigation when the following points are passed:
  The Isla de Lobos (Wolf Island)
  The Punta del Este Lighthouse.
- (2) In zone "HOTEL". During navigation in the Access Channel and within the Port:
  When the Bajo del Monarco Buoy is passed, and
  When the Isla de Gorriti Small Lighthouse is passed.
  Also within both Control areas the communications indicated in the following tables must be effected.

(b) From the Hydrographic Directorate of MTOP.
- (1) The place assigned for berthing or mooring.
- (2) Guard and order tugs (when they are present).

KEY TO LITERAL AND NUMERICAL REFERENCES USED IN THE COASTAL STATION NOMENCLATURE

(a) To transmit meteorological bulletins in accordance with the requirements of List VI of RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(b) To transmit Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services which are offered by the FC, FP, FT and FW of the P.N.N.
(c) To transmit medical advice on request of navigators.
(d) To transmit urgent messages to Mariners immediately on receipt and to repeat them 3 minutes past every hour and at the normal times of transmission of messages to navigators.
(e) To participate in operations of Search and Salvage.
(f) To alert the Centre's Co-ordinator of Search and Salvage.
(g) To direct the system of Control Centres and Information of Maritime Movement and Port Operations. (FP, FT and FW).
(h) Receive meteorological observations (SHIP) made on the high seas by Masters of vessels.
(i) To effect special transmissions relating to hydrographic and mareographic Information.
(m) To receive reports from fishing vessels (National, Argentine and third nations who are authorised to operate within the area) and to remit them to the Director of the Control Centre System (CONDI) obligatorily in accordance with Maritime Legislation No. 6 P.N.N.
(n) To effect control and facilitate information within the area, receiving reports from vessels navigating within it (obligatory for vessels in accordance with IMP Uruguay).
(o) Effect control and facilitate the supply of information from the port.
(p) Receive by telex or radio requests for pilotage service.
(q) Radiogoniometric Service on VHF (RG).

1. Call up and listening service on a permanent basis and for announcing in advance the intention to transmit.
2. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 156.800 MHz (Channel 16).
3. Frequency used for the transmission of meteorological bulletins and Notices to Mariners in accordance with requirements of List VI of the RR of the UIT. Special services offered by the FC, FP, FT and FW of the P.N.N. with prior announcement on frequency 2182 kHz (Simplex) and 4419.4 kHz (Duplex C.421).
4. Frequency used for the transmission of radiomedical advice on request.
5. Frequency used for operations of Search and Salvage.
6. Frequency used for reports from national fishing vessels.
7. Frequency for Coastal working purposes.
8. Frequency used in common with the Argentine Republic (Naval Prefecture) for the control of fishing vessels of both nations.
9. Provisional working frequency.
10. Working frequency for control and zonal information (Vessel Movement Service).
11. Working frequency for control and Port information (Port Operation Service).
12. Port operation frequency (tugs, traffic launches, tugs and control centres).
13. Duplex frequency Band from 4 to 23 MHz of the Mobile Maritime Service Section 17 REV. RR of the UIT.

CO – Station open exclusively to official correspondence.
CR – Station open to restricted public correspondence.
H24 – Continuous service, day and night.
HX – Intermittent service, day and night or station which has no fixed operating timetable.

SPECIAL SERVICES

Nomenclature of Radiodetermination Stations and Stations which offer Special Services with the P.N.N.

Name of the Station	Symbol	Identity of the Station	Trans-mission frequencies (KHz – MHz)	Type of Trans-mission	(GMT) Hours of Transmission	Service (See key below)

Key:

Key to numerical references used in the nomenclature of radiodetermination stations and stations which offer special services.

METEOROLOGICAL BULLETIN
(Forecast of weather within the 4 Maritime Areas)

1. SYNOPIS: Inform in clear Spanish text for the 4 Maritime Areas No. 1, 2, 3 and 4 stating:
   (a) General
      1. Name of Station
      2. Validity
      3. Significant Phenomena
      4. Weather Notices
      5. Synoptic Situation
   (b) By Area
      1. General Conditions (Phenomena or general character of the current weather)
      2. Winds (direction and speed)
      3. Sky
      4. Horizontal visibility
      5. Air temperature
      6. Strength of the sea
      7. Wave height
   (c) Reading of radio messages for Coastal Traffic and Radio Messages for local purposes (Notices to Mariners) per area.
2. Messages concerning water height.
3. Offer on request of a vessel, a weather forecast, height of water and local radio messages (Messages to Mariners).
4. The station transmits at any time meteorological safety messages preceded by the Safety signal (SECURITE) and repeat them after periods of silence and during normal transmission periods.
5. Meteorological bulletins, radio notices for coastal traffic (Notices to Mariners) and local Radio notices (Notices to Mariners), announcing the fact previously on frequency 2182 kHz, 4125 kHz Simplex and 4419.4 kHz (C.421) Duplex.
6. Meteorological bulletins, radio messages for coastal traffic (Notices to Mariners) and local Radio messages (Notices to Mariners) announcing the fact previously on Channel 16 (156.800 kHz).
7. For services being offered, listening and working frequencies see Nomenclature of Coastal Stations.
8. Radiogoniometric station on VHF.
   (Station of Radiodetermination which uses the receipt of radioelectric waves to determine the direction of a station or of an object).

COLONIA: 34.28 S. 57.51 W. (See Plan Book)

LOCATION: Lat. 34° 28′ 28″ S., Long. 57° 50′ 38″ W.

On the River Plate 92 miles from Montevideo and 27 miles in a straight line E.N.E. of the City of Buenos Aires.

DOCUMENTS: Vessels entering the port must provide the following: Machinery, Hull, Safety, Freeboard and Derat Certificates, Stores List, Crew List, List of Passengers or Negative, Cargo Manifest, Declaration of Transport of inflammables or explosives, or where not carried a certificate to that effect.

PILOTAGE: No port or river Pilot is required for coasting vessels.

ANCHORAGES: In the Roads with a depth of 10 ft.

In the foreport with a depth of 8 ft., for shallow draft vessels.

RESTRICTIONS: The port will be closed for all vessels when the wind intensity is 70 knots or more. Also all operations are prohibited in the port shelter area.

The port will be closed for vessels of all kinds when the visibility is 500 m. or less due to fog, squalls, etc. Under these conditions vessels are prohibited to carry out any kind of operation within the shelter area.

HEALTH: Inspection is by a Health Doctor, and is carried out jointly with Immigration, Police, Customs, and Naval Prefecture officials.

RADIO: VHF equipment. Operates permanently on Channel 16.

VHF: All communications are carried out by VHF, the call sign being CWC 23 and that for working Control Colonia Prefecture. Channels used are 6, 8, 9, 11, 12, 14, 15, 16, 25, 26, 68, 69.

The Control Centre listens out permanently on Channel 16, whose frequency is 156.800 MHz.

RADAR: Range 16 miles. Does not give service to vessels.

TUGS: There is no tug service.

BERTHING: Union Quay: Running East to West with a length of 178 m., equipped at its two ends with ramps for landing and shipment of cars and lorries.

Coastal Quay: Running North to South, with a length of 111 m.

Ultramar Quay: Running North to South, with a length of 142 m.

These quays are provided with water hydrants and electricity supply points, the Coastal Quay also having a fuel point for operation of tankers.

Warehouses: For general cargo, the National Port Administration has warehouses within the port area.

CRANES: On the Overseas Quay there are two mobile cranes on rails, with 3 tons and 5 tons capacity.

STEVEDORES: There is no permanent service of stevedores, and such requirements must be applied for in advance by the ships' agents at Nueva Palmira.

MEDICAL: 300 m. from the port is the local hospital with a First Aid room and ambulances.

FRESH WATER: Supplied by the National Port Administration.

FUEL: Supplied by road tankers.

FIRE PRECAUTIONS: There is a fire fighting pump with a pressure of 8 kg./sq.m.

TANKERS: Operate at the Coasting Quay with a watchman and a fireman on board.

CONSULS: Argentina and Italy.

REPAIRS: Not possible.

GANGWAY/DECK WATCHMEN: There is a watchmen service administered by the Prefecture of Colonia.

CUSTOMS ALLOWANCES: Tourists from neighbouring countries may bring in: 5 kilos of food, 1 carton of cigarettes, 1 litre of alcoholic drink.

No products derived from meat can be brought into the country (cold meats, susages, etc.), nor any plants or seeds.

REPATRIATION: Only to Buenos Aires.

AIRPORT: Located on Highway 1 linking Colonia with Montevideo, 7 km. from Colonia.

TIME: Local time is GMT minus 3 hours.

HOLIDAYS: 1st and 6th January, Carnival, Touriso, 19th April, 1st May, 18th May, 19th June, 18th July, 25th August, 12th October, 2nd November, 25th December.

POLICE/AMBULANCE/FIRE: Police Tel: 2962; Hospital Tel: 2994; Fire Brigade Tel: 2577; Prefecture 2020.

TELEPHONES: No arrangements for connecting the telephones on board vessels, but there are telephone boxes for communications within and outside the country.

SERVICES: Bureau de Change via a branch of the Banco Republica. There is a bus service with international service, working in conjunction with arriving and departing vessels, connecting Colonia with the rest of the country.

Post Office: 200 m. from the port.

Mooring Gangs: Provided at the request of the ships' Agents by the National Port Administration.

AUTHORITY: Prefectura del Puerto de Colonia.

FRAY BENTOS: 33.06 S. 58.18 W. (See Plan Book)

LOCATION: Km. 95 River Uruguay. On the right bank of the River Uruguay from seaward 213 miles by river from Montevideo or 145 miles from Buenos Aires.

PORT LIMITS: A vessel is considered to have arrived when she leaves the channel and goes to the berth.

DOCUMENTS: Same requirements as for the port of Montevideo.

PILOTAGE: Obligatory, except where bilateral national agreements exist concerning navigation of the River Uruguay, and the Pilot must be taken on board in Montevideo.

ANCHORAGE: Between the channel and the port.

RESTRICTIONS: When the port is closed due to bad weather, also the draft depends upon the depths of water in the "El Marques" and "Punta Caballo" passages.

MAX. SIZE: Controlled only by the draft of the vessel and the length of the berth. Max. draft 26 ft. (FW), water depends upon the river conditions.

HEALTH: Same requirements as for Montevideo.

RADIO: The call sign is CWC 25 "Control Fray Bentos Prefectura".

VHF: Port works on the following frequencies:

a) Channel 16: frequency 156.800 MHz; Usage: Calling-up and safety.
b) Channel 9: frequency 156.450 MHz; Usage: Port operations.
c) Channel 11: frequency 156.550 MHz; Usage: Central Control broadcasts in fulfilment of objectives (Safety PNN).
d) Channel 13: Frequency: 156.650 MHz; Usage: Same as Channel 11.
e) Channel 15: frequency: 156.750 MHz; Usage: Meteorological bulletins and Notices to Mariners.
f) Channel 17: Usage: P.N.N.: Maritime Safety.
g) Channel 68: Usage: P.N.N.: Maritime Safety.

Furthermore, on entering the area between Km. 6 and Km. 165 of the River Uruguay, the vessel must communicate to the Fray Bentos Prefecture Control:

a) flag.
b) name.
c) destination.
d) position.
e) course and speed.
f) max. draft.

And on leaving this area:

a) accident or fire occurred on board the vessel.
b) whether vessel has given assistance to another vessel which is damaged or in difficulties.
c) whether she has sighted any dangerous object to navigation and which is not marked.
d) any serious reduction in visibility.

RADAR: None.

TUGS: None.

BERTHING: There are two types, quays for deep-sea vessels and for coasters, both being of cement and wood.

Type	Deep-sea	Coasting
Length	125 m.	250 m.
Direction	East – West	N.W. – S.E.
Average depth	7 m. – 8 m.	5 m. – 6 m.
Signalling lights	Green light – West side Red light – East side	
Fresh water	2 connections	3 connections
Electricity	1 point A.C., 3-phase 220 V. South side quay in shed 3 points 220 V. D.C. (cranes)	3 points 220 V. D.C. (cranes)

Also there is the Anglo Quay with a maximum depth of 26 ft., normally used for meat.

CRANES: There are in the port 3 cranes of 3 tons each and 1 of 5 tons which can move about the port. It is possible to use ship's derricks and shore cranes at the same time.

BULK HANDLING FACILITIES: There is a silo with a conveyor belt, having a storage capacity currently of 14,500 tons, and the conveyor has a loading or discharge rate of 100 t.p.h. See "Developments".

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Can be requested in advance or when the vessel arrives in port. The work is controlled by the following time table: order 0630 hrs., commence work 0700 hrs.; order 1230 hrs., commence work 1300 hrs.; order 1830 hrs., commence work 1900 hrs.

MEDICAL: Doctors and hospital facilities available.

DENSITY: 1000.

FRESH WATER: On the Deep Sea Berth there are 2 connections and on the Coasting Quay there are 3 connections controlled by the ANP. Cost of U.S. $1.20 per 1,000 litres.

FUEL: Not available.

FIRE PRECAUTIONS: Fire Brigade present.

CONSULS: Argentina, others at Montevideo.

REPAIRS: Only minor repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Same as for the port of Montevideo.

HATCHES: If steel, handled by vessel's crew. If wooden, handled by stevedores.

REPATRIATION: See "Montevideo".

AIRPORT: None, only Montevideo.

TIME: See "Montevideo".

HOLIDAYS: The following dates will be used as national holidays of a traditional character:

1st January; 6th January; Monday and Tuesday of Carnival Week; the 6th week following Carnival, which will be called Tourism Week; 1st May; 2nd November; 25th December.

The following dates will be celebrated as national holidays as they are linked with patriotic exaltation and commemoration.

19th April; 18th May; 19th June; 18th July; 25th August; 12th October.

With regard to the holidays of 1st May, 19th April, 18th May, and 12th October, these will follow the undermentioned plan:

(a) If they occur on Saturday, Sunday or Monday, they will be observed on those dates.

(b) If they occur on Tuesday or Wednesday they will be transferred to the immediately preceding Monday.

(c) If they fall on Thursday or Friday, they will be transferred to the Monday immediately following.

POLICE/AMBULANCE/FIRE: *National Prefecture:* Tel: 321. *Police:* Tel: 201. *Fire Brigade:* Tel. 35. *Hospital:* Tel: 533.

TELEPHONES: Not possible.

SERVICES: None.

SHORE LEAVE: See "Montevideo".

IDENTIFICATION: Seaman's Book sufficient.

DELAYS: Normally there is no delay.

DEVELOPMENTS: Increase in the storage capacity of the silos of the Ministry of Agriculture and Fisheries by 5,500 tons, and increase of the capacity of the conveyor belt to 400 t.p.h.

AUTHORITY: National Port Administration, Herrera and 25 de Mayo, Fray Bentos, Uruguay. *Tel:* 284.

JOSE IGNACIO: 34.54 S. 54.43 W.

SBM: Position Lat. 34° 53′ 43″ S., Long. 54° 42′ 45″ W.

PILOTAGE: Compulsory. Pilot boards at the Fairway Buoy in position Lat. 34° 57′ 14″ S., Long. 54° 40′ 06″ W.

RADIO/VHF: Call sign "Control Punta del Este", Continuous watch on VHF Channel 16. Intership working on Channel 6.

GENERAL: ANCAP have installed a Single Buoy Mooring, 3,600 m. from the shore in 16.8 m. (55 ft.) depth of water. Vessels of 150,000 d.w.t. can be handled and the average rate of discharge of crude oil is 5,000 cu.m./hr.

The shore terminal receives, stores and pumps the crude to the refinery at Montevideo.

A River Pilot must be ordered from Montevideo for securing to the buoy, and he remains aboard until the vessel sails.

Five days before arrival, Agents must request Free Pratique from the Health Authorities in Montevideo, and the Customs, Prefecture and Immigration Officials, from Punta del Este.

AUTHORITY: Prefectura del Puerto de Maldonado, Calle 8 y 13, Punta del Este (Maldonado), Uruguay. *Tel:* 41884, 41967. *Contact:* Port Captain.

MONTEVIDEO: 34.55 S. 56.13 W. (See Plan Book)

Also see beginning of Uruguay section.

APPROACHES: The Roads of Montevideo consist of the Outer Roads situated to the South of the bay and Inner Roads situated outside the Western breakwater.

Both anchorages are very exposed and vessels are recommended to enter the anteport.

The entrance channel has 30 ft.; the channel to Ancap's wharf (La Teja) 30 ft. 6 in. Basins 1 and 2 have a depth of 28 ft. to 31 ft., and the River Traffic Basin, 15 ft. These depths depend on dredging being maintained, but even so vessels often "drag" when on the higher marks; the bottom is fine soft silt.

DOCUMENTS:

Health:

Maritime Declaration of Health.
1 List of Passengers Disembarking.
1 List of Crew Members.
1 Derat Certificate.
1 List of Crew International Vaccinations.

Immigration:

1 Copy of Crew List.
2 Lists of Passengers Disembarking.
2 Copies of List of Passengers in Transit.

Police:

2 Copies of List of Passengers Disembarking.
1 Copy of Crew List.
2 Lists of Passengers in Transit.

Prefecture:

2 Lists of Passengers in Transit.
1 Visaed Copy of List of Passengers with Port of Origin.
2 Non-visaed Copies of List of Passengers.
1 Passenger List – or Negative – from all ports visited.
1 Non-visaed Crew List.
1 Cargo Manifest for Montevideo.
1 Manifest for Cargo in Transit.
1 List of Inflammable Cargo or Hazardous Goods – visaed or straight.
1 List of Vessel's Data.

Customs:

1 Visaed Manifest
1 Copy of Ballast loaded at each port.
1 Negative discharge statement for each port.

If there is no Consul in previous ports, the last port where there was one.

2 Stores Lists.
2 Lists of Cigarettes and Whisky.
2 Lists of Personal Effects.
3 Lists of Bunkers on Arrival.
1 copy of Passenger List for those disembarking, or negative, and their baggage in the same list (drawn up and signed by the passengers themselves).

Agents:

2 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
2 Crew Lists.
2 Stores Lists.
2 Manifests, including Inflammable Cargo.
2 Cargo Plans.

NOTE: The manifest must have a special section with all effects in transit or otherwise, for the free zones of Colonia and Nueva Palmira.

Crew Lists, amended Crew Lists and Inflammable Cargo Lists must be visaed at ports of sailing or loading.

ANTEPORT: The Anteport is to the North of the entrance, between the breakwaters, and has 30 ft. – 31 ft. Sufficient room for 10 vessels, depending on size.

PORT: The port is formed by the North side of the Montevideo Peninsula and the "Dique de Cintura", a breakwater running parallel to the coast, about 840 m. distant.

It consists of 3 basins, 2 of which are for ocean-going vessels and 1 for river traffic.

Basins 1 and 2 have a depth of 30 ft., and the basin for river traffic 15 ft.

PILOTAGE:

1. The Pilot must be requested via the Agent 24 hours in advance, giving ETA in the roads by W/T (Cerrito Radio – CWA on frequency of 500 kHz). It is not possible to elect a Pilot for the area of the port of Montevideo, except where the vessel exceeds 10,000 tons.
2. On entering into the system of the Control Centres, communication must be made with them, giving the information laid out in the "Basic Rules of the System of Control and Information of Maritime Movements". See "Control" in General Section before first Uruguay port.
3. By VHF on the Channels stipulated in "Basic Rules of the System of Control and Information of Maritime Movements".
4. Channel 11 must be used to communicate with the pilot vessel. The vessel is a powered craft painted reddish orange, with white deckhouse with the inscription "Practicos". During daylight hours, it flies the pilot flag, HOTEL (white and red), and at night it is necessary to have white and red lights indicating "I have a Pilot on board". Where a vessel does not have VHF, light signals must be used to communicate with the pilots' launch.

Should this launch be out of service, Pilots are transported by tugs of A.N.P. and/or REYLA.

5. The Pilot will await the vessel near the Axis Buoy located at Lat. 35° 00′ S., Long. 56° 14′ W.
6. In the event of bad weather the vessel must anchor near the Axis Buoy.
7. To take the Pilot on board, the gangway must be positioned on the side which gives most advantage *vis-a-vis* wind and sea.

ANCHORAGE: Vessels may anchor near the Axis Buoy with a draft of 30 ft. at zero tide. The sheltered anchorage is located in the foreport inside the shelter of the breakwaters. To gain access to it, the Pilot must be on board and the permitted draft will be that specified previously.

RESTRICTIONS:

1. The port is closed when winds are up to 70 km. per hour. However, up to 80 km. per hour the Prefecture may authorise manoeuvres. The port is also closed when there is fog, channel obstruction or any other problem which may make manoeuvring difficult.
2. Vessels will not be handled when there is serious damage to engines, hull or rudder.

MAX. SIZE:

1. The largest vessels operating in the port, are of the LASH type, with dimensions approx. as follows:

Overall length 272.22 m.; Beam 30.48 m.; Draft 28 ft.

2. Tankers which berth at the inflammable dock A.N.C.A.P.:

Overall length: 241.50 m.; Beam 32.33 m.; Draft 28 ft.

With regard to the dimensions of the vessel, the state of the tide and time will be considered, the Pilot will advise the Master of the best measures to adopt.

Report: March 1982.

Max. draft to reach Montevideo safely is 31 ft.

HEALTH: The procedure is as follows:

1. Request the Owner or Agent to obtain Free Pratique which will be done via Cerrito Radio Station – call sign CWA.

In the event of there being any suspected illness or fever on board, the vessel must anchor in the roads to await instructions, at the same time communicating this to her Agent/Owner.

RADIO: Cerrito Radio Station CWA operating on 500 kHz, 421.5 kHz, 4346 kHz, 6434.5 kHz, 8602 kHz, 12750 kHz, 17208.8 kHz and 22563 kHz.

Timetable for broadcasting information to Mariners:

	Frequency	*Times*
Cerrito	4,346 kHz	1100 hrs.
CWA	8,602 kHz	1600 hrs.
	12,750 kHz	2100 hrs.
	16,871 kHz	
Sodre (CX 6)	650 kHz	0900 hrs.
Coastal Station		
Punta Carreta	2,768 kHz	1103 hrs.
CWD		1603 hrs.
		2103 hrs.

RADAR: Port Radar Control available. Additional coastal radar stations to be installed.

VHF: The Control Centre has a range of 60 miles on VHF. It also effects communications by "Phone-Patch" between the vessel and or Agent or Owner; this, from their office or private address.

All the operations of the Centre of Control and Information of Marine Movement of the Port of Montevideo are set out in the booklet "Basic Rules of the System of Control and Information of Maritime Movements".

On entering waters of port jurisdiction, communication must be made with La Paloma Control, then Punta del Este Control and the Centre of Maritime Control of the National Naval Prefecture.

TUGS: Tugs come alongside in the foreport. Lines are to be supplied by the vessel, and this is not optional. In the event that the vessel has no tug cable, this will be supplied by the tug at a cost of approx. US $47.

BERTHING: The berth will be allocated by A.N.P. and is to be requested by the Agent. Vessels may berth or unberth at any time of the day or night, except when the port is closed or due to lack of available berths. Generally, there are fenders placed along the berths. In the event that the vessel requires this service, it must be requested in advance via the Agent.

When berthing or unberthing, the gangway must not be in position due to the proximity of the cranes.

Anteport: 7 anchorage berths in 28 ft. depth. However in practice there is rarely room for more than 5 vessels to anchor. Basin No. 1: 7 berths, 28 ft. to 33 ft. depth alongside. Basin No. 2: 4 berths, 28 ft. to 33 ft. depth alongside. La Teja: Ancap basin with berths for 2 tankers 30 ft. depth in basin and entrance channel.

Berths are allotted by the Port Authorities in the order of arrival of the vessels and according to their category, as follows:

1. Mail vessels.
2. Regular Line vessels carrying immigrants.
3. Cargo vessels.
4. Sailing vessels.

The Authorities allocate the deposit at which vessel must discharge or load.

Port Authorities give preference at Deposit No. 10 to ships operating with refrigerated cargo from this Deposit; and at Deposit No. 11 (Florida Wharf) to tankers discharging to the pipe-line situated there. Conditional that they vacate the berth within 2 hours' notice, to permit berthing a preference vessel, other ships may operate at either berth.

Muelle de Escala – On the pier head, formed by the Southern side of the River Traffic Basin, and running Westwards, a quay has been built, known as "Muelle de Escala", 288 m. long, originally constructed for berthing passenger liners and war vessels, but now only used by cargo vessels, loading and discharging, when there is port congestion. There are no shore cranes and work is very slow, nor are there shore deposits. A fixed heavy lift boom capacity 200 tons is placed at the East end.

The berth is very exposed to wind and swell, and Masters are recommended to take every precaution to ensure their vessels are strongly moored and a lookout kept for changes of weather which, locally, are very sudden.

The depth of water alongside depends on dredging, but generally is over 28 ft.

Also see "Developments".

River Traffic Basin – This basin is situated on the Western side of Pier "A". It is 400 m. long and has a passenger landing station on one side. The opposite side of the basin is used for coastal vessels, but mainly by the Navy.

2 warehouses, called Warehouse "A" and Warehouse "B", have been built on the East side of this basin and are serviced by 3 electric cranes. In addition, there are on the quay a 1.5 and 6 ton steam crane, which are employed when necessary.

These berths can only be used by light-drafted vessels, as depth of water is around 16 ft.

Basin No. 1 – This basin is situated between piers "A" and "B". Its entrance between the "Dique de Cintura" and the pier head "A" is about 150 m. wide. It encircles a total mooring space of 1,093 linear metres and 7 vessels can comfortably berth along the quay walls.

Pier "A" is 501 m. long on the West side; 306 m. on the East side, and 50 m. wide at the Northern pier-head.

On this pier 2 brick and concrete warehouses, Nos. 1 and 2, have been constructed, consisting of a ground floor, 3 storeys and a basement.

On the City side of Basin 1, there are 3 brick warehouses, numbered 3, 4 and 5, consisting of a ground floor of between 17,800 cu.m. and 19,600 cu.m. capacity.

On the Western side of Pier "B" facing Basin No. 1, there are 2 brick and concrete warehouses, Nos. 6 and 7, with a ground floor and 1 storey having a capacity of 30,174 and 33,140 cu. m. respectively.

In Basin No. 1, berths Nos. 1, 2, 3, 4 and 5 are generally used for the discharge and/or loading of liners running to timetable.

Depths alongside vary, as it depends upon dredging, but generally are 26 ft. to 30 ft.

Basin No. 2 – This basin is situated between Pier "B" and the foot of Florida Street. The entrance to this basin is also about 150 m. wide. It has a total mooring space of 722 m. and it can accommodate 4 vessels.

Pier "B" is 294 m. long on the Western side, 328 m. long on the Eastern side, 148 m. at the Northern pier-head and 13 m. wide on the bend at the Western corner of the pier-head.

At the Northern end of pier-head "B", livestock is embarked. This berth is also used for general cargo operations in times of congestion. Moorings must be strong and carefully watched as the berth is very exposed to wash of passing vessels.

There are 2 warehouses on this pier, numbered 8 and 9, facing Basin No. 2, built of brick and concrete, with a ground floor and 1 storey and with a capacity of 33,320 cu.m. each. On the city side, there are 2 warehouses, built of brick, numbered 10 and 11, consisting of a ground floor with a capacity of 15,362 cu.m. each. Warehouse No. 10 carries an additional storey, and is being used for refrigerated cargo. Vegetable oils can also be loaded at Warehouse 11 berth ex-pipe-line from 4 storage tanks each of a capacity around 1,250 tons, in the vicinity.

Depths of water alongside vary, depending upon intensity of dredging but are generally 28 ft. to 30 ft.

Coasting Quay Wall – From Florida Street to Mole F, which is the end of the Port, and over a distance of 1,900 m., there is a quay used for coastal craft, and on part of which a fish-receiving and industrialising plant is being opened; depth in this zone is 15 ft.

A floating dock is also anchored in the N.E. part of this section.

Basin For Inflammables "La Teja". (Also see "Tankers".)

On the North side of the Bay, the National Administration of Alcohol, Cement and Fuels, known as A.N.C.A.P., has a basin with concrete walls for the discharge of tankers arriving with oil to their consignment. This basin is known as the "Darsena de Inflamables", and has 1 berth for tankers on the North side in 30 ft. 6 in. and for liquid gas discharge on the Southern side, max. draft 22 ft., while on the West or land side there is a berth for coastal vessels. Width of the basin here is 147 m., which is the same as the entrance, while the South berth is 248.75 m. long. On the North berth the jetty protrudes 34 m., and is 96 m. long.

Vessels berth bows to shore, and on leaving turn immediately outside the basin, if draft is less than 22 ft., otherwise they must reverse back down the narrow access channel.

The North berth has separate lines for Crude, 10 in. and 12 in. maximum pressure 105 lbs. Fuel oil, 8 in. and 10 in. with a pumping rate of 300 t.p.h. at temperatures between 40°C and 70°C. Diesel/Gas Oil/Kerosene 6 in. connections and pumping rate of 300 t.p.h. Naptha 8 in. Lube oils 6 in. lines, 150 t.p.h. and a line for Alcohol 6 in. There is no line for Gas. There are 3×5 ton electric cranes and 1×12 ton diesel crane. Coal and Cement are also discharged at this berth, the coal to Decauville cars and the Cement to trucks, handling 750 tons per 8 hour day, with 5 gangs.

At the South berth the oil lines are identical, and there is also a 6 in. connection for loading or discharging Super Gas, at 200 t.p.h. There are no cranes at this berth.

The Western berth has the same installations except for Super Gas and Alcohol.

There are 3 in. water lines at each berth, and use of 2 tugs is essential for berthing or unberthing. At the North berth, vessels fully loaded often lie up to 15 m. out from the quay, owing to accumulation of mud, and will gradually close in as the vessel lightens. Access gangways are placed by the Port.

Railway Connections – Basins 1 and 2, River Traffic Basin and also Deposits "A" and "B" have railway lines on all sides, belonging to the Port Administration, which are connected with the main lines of the Uruguayan State Railways.

The Port Administration has 2 electric locomotives used exclusively in the port.

Cranes – The Port Administration has 1 heavy-lift floating crane of 80,000 kilos, a mobile crane of 20,000 kilos, also 46 movable electric cranes of 5,000 kilos each; 5 movable electric cranes of 1,500 kilos each; 1 fixed electric crane of 4,000 kilos; 33 of the aforementioned 5,000 kilos cranes, are placed alongside the quay walls for vessel's operations.

There are also 24 electric trolleys of 1,500 kilos, and one of 1,000 kilos. There is a fixed crane for 200 tons on Muelle Escala.

Fiscal Lorries – The Port Administration has purchased special lorries and 12 auto cranes for receiving cargo, as the railway wagons available are not sufficient to carry all the cargo that is at present being handled at this port.

Loading Operations – Loading is effected from carts, lorries and/or wagons and the cargo is hoisted on board with the cranes. Cargo is also loaded from lighters.

Grain Loading – There are 2 Mobile grain vacuvators, each of which can load bulk grain at around 35/50 t.p.h, also 10 smaller machines that can each load around 20 t.p.h.

Fumigation – Montevideo is the only port in Uruguay at which vessels can fumigate, using the Cyanide method. The tariff is per cubic metre fumigated over a basic charge which varies according to n.r.t. There are surcharges for overtime.

Disinfection of Mail Bags – To avoid delay through disinfection mail bags can be fumigated on board in a 10% formalin solution and kept in a closed space for 4 hours before vessel gets into port. The closed space will be opened in the presence of a Health Officer who will verify the use of formalin. When in doubt, fumigation will be carried out again and exposed for 2 hours.

Height of Quay above water – Tide being very small, the height of quay above water only varies from 8 ft. – 10 ft. at LW to 10 ft. – 12 ft. at HW. Wind influence is felt even in the bay, as a South wind will raise water as much as 5 ft., or a Northerly wind reduce it 2 ft. or 3 ft.

PORT EQUIPMENT: In process of supply or installed.

Fork-lift trucks – 3 of 5 tons and 1 of 6 tons, to lift to 3 m.
Container lifter – 1 to lift to 22.4 short tons, size 8 ft.×8 ft.×20 ft.
Fork extensions for fork-lift trucks in use – 25 pairs.
Mobile cranes (diesel) – 2 capacity 7.5 tons with telescopic arm up to 10 m., turning through 360°; 8, capacity 7.5 tons, fixed arm; 1 capacity 10 tons with telescopic arm up to 12 m., 360°; 1 truck-mounted crane no less than 60 tons, with arm not less than 21.5 m.
18 electric cranes (installed) × 6 tons capacity.
2 mobile cranes (installed) × 20 tons for containers.
Tender out for 250 ton capacity floating crane.
Pallets – material for making 15,000 pallets, in 2 sizes.
Slings for these pallets, also for heavy-lift cargo for use with the mobile cranes.
Lighters – 7 new lighters, ranging from 100 tons to 400 tons.
2 container cranes "Bellotti" 40 – 60 tons each (installed).
2 container cranes "Kalmar" 24 tons each, with spreader (installed).
1 container crane "Kalmar" 24 tons, with lifter (installed).

STEVEDORES: Working hours: 1st shift, 0700 to 1300 hrs.; 2nd shift, 1300 to 1900 hrs.; 3rd shift, 1900 to 0100 hrs.; 4th shift, 0100 to 0700 hrs.

Normal capacity per gang per hour: *(a)* Rice – about 80/90 tons per gang/hour. *(b)* Meat – about 60/100 tons per gang/hour.

Overtime is compulsory if port is congested.

Lavatory Conveniences for Shore Labour – Each vessel must furnish conveniences for all shore labour employed on board. Work has been stopped until such conveniences are installed. It is advisable, therefore, for vessels calling at Montevideo to be equipped with 2 spare lavatories, 1 for tally clerks and 1 for stevedores, etc.

DENSITY: This varies according to wind and tide (1006 – 1002). The degree of salinity (max. 10 gm. per litre) is broadcast daily in the weather reports by radio, and varies from fresh to brackish to sea water. Steady South winds give the highest degree of salinity.

FUEL: This can be taken on board whilst anchored in the foreport via two barges, one of 595 tons delivering at the rate of 250 to 350 cu.m./hr., the other of 310 tons at the rate of 200 to 250 cu.m./hr.

Also available from the Uruguayan tanker "Valiente" (capacity 1,337 cu.m. of fuel, rate of 700 cu.m./hr.) or 196 tons of water at the rate of 70 cu.m./hr. This service can be effected outside the port.

A.N.C.A.P. Information: All grades subject to confirmation, the request being made via the Agent 15 days in advance.

TANKERS: Dirty ballast can be discharged depending on whether or not there is a berth at La Teja, Inflammable Materials Dock. A.N.C.A.P. have the necessary reducers for any type of operation.

Diameter of pipes: Crude – 12 in.
Fuel oil – 8 in.
Dirty ballast – 8 in.
Berth depths: North quay – 29.6 ft.
South quay – 22 ft.
West quay – 14 ft.

GANGWAY/DECK WATCHMEN: Shore watchmen are compulsory. Arranged by Agents. 1 required on deck and 1 for each gangway. Vessels carrying dangerous cargo must also employ a guard of the Prefectura.

Vessels calling for supplies only, for orders, in distress or to land sick crew members or to enter dry dock, need not employ Watchmen. Repairs afloat require a watchman, if they do not carry out commercial operations.

Shifts are of 8 hours, commencing at 0700 hrs. Vessels under repair, and those at ANCAP moles may fix 12-hour shifts, paying a shift and a half.

If special watchmen are required for goods or working equipment, application must also be made to the Union.

If watchmen are needed in the holds, same applies.

Regulations also require a watchmen in the holds wherever the ship has a crew member, cadet or officer permanently on watch to prevent pilferage. However, where ship's personnel are in the hold to watch the stowage of the cargo, no extra watchman is required. Masters should therefore, advise Agents if they intend to place crew members permanently in the holds during discharge, so that Agents can advise the Association before they make their claims.

Care must also be taken on arrival, since the watchman is on duty from 0700 hrs. on, whereas it may be necessary to place the gangway safety net, etc., before that time, so that Pilot may disembark.

Only those involved in this operation should go ashore. The Receiving Commission may ask for the gangway to be opened before 0700 hrs., which is in order, but no one else should use the gangway to avoid claims from the Union.

Vessels lying in the anteport must provide launches for the transport of watchmen employed.

IDENTIFICATION CARDS: The prefecture issues identity cards. Crew not allowed ashore without card.

MEDICAL: Any urgent case must be advised in advance. In normal cases, the Health Service doctor in the port will visit. For this purpose there are Clinics and Hospitals with optional assistance. Vaccination certificates are issued by the Port Health Service. There are also private health and medical services which give on-board treatment.

FRESH WATER: Fresh water is supplied by the Port Authorities at all quay berths. Request must be made through the Agents, vessels supplying their own hoses where possible. It is important that the water meter should be read together with the Port official both at connecting and disconnecting to verify the exact quantity. The cost of water is high. Loading rate 20 cu.m./hr. Water also available by barge (capacity 170 tons) loading rate 18 t.p.h. – 20 t.p.h.

REPAIRS: All kinds of repairs can be effected, either afloat or in drydock.

DRY DOCKS:

Nacional	Length between perpendiculars	141.30 m.
	Width	28.50 m.
	Height	10.46 m.
	Depth of water	14.11 ft. at zero
Tsakos	Lifting power	12,000 tons
	Length	165.99 m.
	Width	28.50 m.
	Height	4.41 m.
	Max. height of stocks	23.16 m.
A.N.P.	Length	67.06 m.
	Width	13.72 m.
	Height of water at the stocks	4.75 m.
Maua	Length	79.25 m.
	Length on stocks	74.42 m.
	Depth of water	12 ft.
	Width of pontoon	15.25 m.
	Capacity of operation	2,000 tons

REPATRIATION: There are facilities for exchanging crews.
AIRPORT: Located 30 minutes away by car. There are various regular services to all parts of the world.
TIME: GMT minus 3 hours. (However changes are possible).
HOLIDAYS: 1st January (New Year); 6th January (Epiphany); 3 days in February (Carnival); 7 days in March or April (Tourist Week); 1st May (Labour Day); 18th May (Battle of the Stones); 19th June (Artigas' Birthday); 18th July (Swearing of the Constitution); 25th August (Declaration of Independence); 12th October (Day of the Race); 2nd November (All Souls'); 25th December (Christmas Day).

On these days, work will always proceed when the Agent or Owner requires it or also if the Port Authority requires it, should there be a number of vessels anchored in the Roads awaiting a berth.

POLICE/AMBULANCE/FIRE: Port Police (Immigration): 95.21.51; Fire Brigade: 91.51.51 to 56 – extensions 139/337. Ambulance: 91.51.51 – extensions 272/382.

Prefecture of the Port of Montevideo: 95.21.27 – 95.21.77, 95.54.05, 95.52.01, 95.22.27, 95.24.27 ext. 07, 91.51.51 ext. 199, 91.93.03, 91.53.71 ext. 199.

TELEPHONES: There are services on all quays. Telephones can be requested by the Agent from the Port Authority.
SHORE LEAVE: Allowed.

DEVELOPMENTS: A container park and fish quay will be built alongside the Eastern Quay and in the Mantaras Zone respectively.

A battery of silos will be constructed at C.M.B. (between Warehouses 7 and 8) which will facilitate the loading and unloading of grain. Sheds 10 and 11 will be equipped with modern refrigeration machinery.

There is a large plan for improvements in equipment, tugs, dredging, etc., for which the A.N.P. (Administracion Nacional de Puertos) (National Port Administration) has received a loan granted by the World Bank.

Report: 1981.

The National Port Administration (Administracion Nacional de Puertos) is building a containers terminal with an area of 7 hectares close to the Muelle de Escala.

This berth is at present dredged to 10 m. Its length will be increased from the present 288 m. to 400 m. and the draft increased to 12 m.

The storage capacity will be a maximum 5,000 containers.

The berth will be equipped with 2 container cranes of 40 – 45 tons. Also all necessary equipment ashore for handling containers will be available.

A fishing berth of 320 m. has also been built with 6 m. draft.

SHIPMASTER'S REPORT: July 1983.
Documents: As per "Guide to Port Entry".
Pilotage: Compulsory. Pilot boards at Sea Buoy. 24 hours' notice required.
Anchorages: As per B.A. Chart 2001.
Restrictions: Max. draft 28 ft. Possible to depart/enter 24 hours a day.
Max. Size: Largest vessels using the port are LASH vessels, length 272 m., beam 30 m. – 40 m., max. draft 28 ft.
Health: Inform Agents of vessel's state of health and request Free Pratique.
Radio: Cerrito Radio Station.
VHF: Vessels must abide by Uruguay Regulations as per Radio Signals Volume 6, Part 2, Page 266 otherwise will be subject to very heavy fines.

As soon as vessel is inside Territorial Waters, i.e., S.W. of a line bearing 128° from Chui Lt. and West of 50° 50′ W., they must report to the appropriate station on VHF.

Pilots and Port operate on Channel 16.

Tugs: Available.
Berthing: Vessel berthed at Darsena/Muella A. Least depth in channel from sea to berth was 30 ft., distance between sea and berth being 6 miles. Mean tidal range at berth is 2 ft. Nature of bottom at berth – mud.
Cranes: Sufficient quay cranes of 4 tons capacity available. One floating crane of 80 tons capacity available.

Equipment and storage available for breakbulk/palletised cargoes.

Stevedores: Government controlled stevedores. Very helpful.
Medical: Doctor and hospital available.
Density: 1002.
Fresh Water: Available.
Fuel: Bunker fuel and diesel oil available.
Repairs: Can be undertaken.
Dry Docks: Available.
Surveyors: Lloyds' Surveyor based at the port.
Airport: Available.
General: Fresh provisions, meats, groceries and laundry services available.

AUTHORITY: Administracion Nacional de Puertos.

NUEVA PALMIRA: 33.53 S. 58.25 W. (See Plan Book)

LOCATION: Situated on East bank of Uruguay River, 155 miles above Montevideo. Km. 0 on River Uruguay.
DOCUMENTS: The documentation required is as follows:

Cargo or Ballast Manifest.
Negative Passenger List or list of passengers visaed by the Consul.
Crew List.
Stores List.
List of Personal Effects.
Tonnage Register.
Consular Clearance.
Maritime Declaration of Health.

PILOTAGE: The information required from vessels navigating within the area of the Port Control are:

Time of entry and leaving the area.
International call sign.
Name of vessel.
Flag.
Estimated course.
Latitude.
Longitude.
Port of destination.
Estimated time at port of destination or other point of call.

The area appointed for effecting change of Pilots is the Port Roads. The Pilots arrive at the vessel in a launch 5.53 m. overall length, with cabin, painted orange, owned by the Pilots' Corporation of Uruguay.

ANCHORAGE: The area designated for anchoring is located within the roads and fore-port, depth being between 20 ft. and 24 ft.
RESTRICTIONS: There are no restrictions for berthing in the port, except those imposed by weather conditions (winds, etc.). Vessels berth without the aid of tugs.
MAX. SIZE: With regard to length and capacity of vessels, there is no stipulated limit but due account should be taken of the fact that the depth of water in the port is 24 ft.

HEALTH: The Health Authorities will require a Crew List and Maritime Declaration of Health. In the event of disease being detected on board, the Health Official will proceed to inform the Aid Centre who will arrange for a doctor to attend on board, with the vessel placed in quarantine or the patient will be transferred to hospital, depending upon the illness discovered. To date, no such occurrence has arisen in the port.

RADIO: VHF equipment with permanent listening out on Channel 16.

RADAR: There is no radar equipment.

VHF: All communications are effected by means of VHF equipment. The call sign is CWC 31 – "Control Palmira Prefecture", and the following Channels are used: 6, 8, 9, 11, 12, 13, 14, 16, 25, 26, 68 and 69. The station operates permanently on Channel 16, the frequency being 156.800 mHz.

TUGS: The service of a tug is not necessary for berthing vessels.

BERTHING: The port has the Official Quay and the quay owned by Cia. Navigen.

Official Quay: Length 240 m., length of the head 80 m., width in the centre 40 m.

Navigen Co. Quay: Length 234 m. It has a conveyor belt system 500 m. long, running 15 m. above the level of the water. Electrical operating system with a loading and discharge capacity of between 300 t.p.h. and 700 t.p.h., dependent upon whether cereals or ore is being handled.

CRANES: The Official Quay is equipped with 3 cranes of the National Port Administration. They are mobile cranes on rails. Two are for 3,000 kg., and the third is for 5,000 kg.

STEVEDORES: As soon as the vessel communicates the ETA at the port, the Agent will make all necessary arrangements for stevedoring services to commence work as soon as the vessel has obtained Free Pratique. These services will be made available dependent upon the tasks required to be fulfilled.

MEDICAL: The local Public Health Aid Centre is entrusted with furnishing any medical aid which may be necessary on board.

BULK HANDLING FACILITIES: There are no tanks, but there are warehouses for storing grain and general cargo. These warehouses belong to the National Port Administration and to the Free Zone, and are located within the port area.

FRESH WATER: Fresh water is supplied by the National Port Administration.

FUEL: There is a fuel storage depot within the port area, and should it be necessary to supply bunkers to a vessel, application has to be made to ANCAP who will supply via tanker trucks.

FIRE PRECAUTIONS: There are none, other than those of a routine nature.

CONSULS: There are none at local level. In the town of Carmelo, 21 km. from Nueva Palmira, there is the Consulate of the Argentinian Republic.

REPAIRS: Minor repairs possible.

SURVEYORS: None available.

GANGWAY/DECK WATCHMEN: The service of watchmen is not necessary, unless the vessel is carrying flammable cargo.

HATCHES: Opening and closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCE: Each crew member is permitted to carry out of the bonded ship's store, 5 kg. tobacco, 2 cartons of cigarettes and 2 bottles of wine.

CARGO GEAR: Normally, loading and discharge are effected by means of land-based equipment.

REPATRIATION: There are facilities for changing crews, and to effect any repatriation necessary. In both cases, the arrangements are carried out with the participation of the Immigration Authorities and the Maritime Agency concerned.

AIRPORT: There is the airport of Zagarzazu located between Nueva Palmira and Carmelo, approximately 15 km. from this town.

TIME: Local time is GMT minus 2 hours.

HOLIDAYS: 1st January, 19th April, 1st May, 19th June, 18th July, 25th August, 12th October, 8th December, 25th December. Holidays do not interrupt operations on vessels.

POLICE/AMBULANCE/FIRE: Police: Tel. 42, Ambulance: Tel. 82. No fire brigade.

TELEPHONES: It is not possible to have telephones installed on board vessels.

SERVICES: There are stevedoring services, Maritime Agents and Customs Clearance Agents.

SHORE LEAVE: Once Free Pratique is granted, there are no prohibitions for crew members going ashore.

DEVELOPMENTS: The lengthening of the head of the Official Quay by 200 m. to the North is planned. Grain Silo with capacity of 25,000 tons to be built.

AUTHORITY: El Sub-Prefectura de Nueva Palmira.

PAYSANDU: 32.18 S. 58.06 W. (See Plan Book)

LOCATION: Situated on the East bank of Uruguay River, 380 km. above Montevideo. Km. 204 on River Uruguay.

DOCUMENTS/PILOTAGE/HEALTH/RADIO: See beginning of Uruguay section.

RESTRICTIONS: River navigation controlled by depth in the passes at Almiron, Vera and Urquiza. Since river conditions vary from season to season, Agents should be consulted beforehand regarding available draft at any particular time.

ANCHORAGE: Off Montevideo.

MAX. SIZE: Up to 15 ft. draft fresh water, depending on river conditions.

TUGS: Available.

BERTHING: Grain Elevator Berth; 20 ft. depth alongside at zero tide. Coastal Berth: Length 300 m. Depth 11 ft. at zero tide. Ancap Pier: 1 berth for tankers, 30 ft. depth at zero tide.

There is 1×5 ton crane on the grain quay and 3×3 ton cranes on the coastal berth. Loading on the ANCAP berth is by lorry.

STEVEDORES: Working hours: 0800 – 1200 and 1430 – 1800 hrs. Saturdays: 0800 – 1230 hrs.

MEDICAL: All assistance available.

FRESH WATER: Available at all berths.

FUEL: By negotiating through the intermediary of the Customs Clearance Agent the required quantity is delivered.

REPAIRS: Minor repairs can be effected.

CONSULS: Local representation for Argentina, Brazil, Italy and Paraguay. All other Consuls at Montevideo.

GENERAL: Refer to "Montevideo" for all general information.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Vanuatu

PORT VILA: 17.45 S. 168.18 E.

PORT LIMITS: A line drawn between Pango Point and Devil's Point.

DOCUMENTS:

Last Port Clearance.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores Lists.
2 Drugs Lists.
2 Firearms Lists.
2 Animal Lists.
2 Crew's Search Lists.

Log Book, Derat and usual Ship's Certificates to be available for inspection.

PILOTAGE: Compulsory for all vessels over 60 m. in length. Pilot boards 2 miles West of the fairway buoys, on the leading lights. Pilot launch displays the Pilot (H) flag by day; by night, a red flashing light. 24 hours' notice of ETA to be given.

ANCHORAGES: When a vessel has to await a berth or tide, the Master may anchor in the main bay North of the leading lights (1,200 m. from lower lead); or as directed by the Harbour Master.

HEALTH: Vessels are to request Pratique when giving their ETA.

RADIO: Radio Vila.

VHF: Vessels to maintain VHF watch, Channel 16 for 2 hours prior to arrival. Pilot and Port Authority equipped with VHF sets.

TUGS: One tug available for berthing/unberthing. 780 h.p., 14 tons bollard pull.

BERTHING:

Main Government Wharf: Steel pile and concrete decking construction; with bollards 30 m. from each end of the wharf. Length of wharf 212 m, width 9 m. and depth 10.7 m. alongside.

Transit storage 2,000 sq.m.; open storage 1,000 sq.m. Can take Ro/Ro traffic.

Arammadi Wharf: Privately owned. Length 55 m., depth 8.2 m. alongside. Vessels of 150 m. length can berth safely. Ample open storage, but no closed storage.

Town Wharves: 2 small wharves on town waterfront, depth 2.5 m. alongside. Also see "Tankers".

STEVEDORES: *Working Hours:* Monday to Friday: 0700 – 1100, 1300 – 1700, 1800 – 2300. Saturday: 0700 – 1100, 1300 – 1500. Sunday: No cargo work.

MEDICAL: Government hospital with full facilities. Private doctors and dentists available.

TANKERS: Berth is situated in Paray Bay. It is a timber pontoon with a small T-head catwalk. Due to bar at entrance to bay, entry is made at HW only with controlling draft of 7 ft. plus height of tide.

There is an overhead power cable between Iririki Island and the mainland with a vertical clearance of 18 m.

FRESH WATER: Good quality potable water is available at all wharves except tanker berth. Delivery rate 80 t.p.h. at Main Government wharf.

FUEL: Limited supplies of diesel, etc., delivered by road tanker. No boiler fuel available.

CONSULS: Australia, France and U.K. are represented.

REPAIRS: Small repairs can be undertaken. No foundry available.

DRY DOCKS: None. 1×40 ton slipway available.

SURVEYORS: Lloyd's representative available. Other Classification Societies' Surveyors can be brought from Fiji and New Caledonia at short notice.

CARGO GEAR: Ship's gear used for loading/discharging. 11 forklifts from 2 – 20 tons, 1×22 ton flat-bed truck, 1 flat-bed truck with 19 ton crane, 1×8 ton tipper truck, 1 prime mover, 1×20 ton semi-trailer, 1×10 ton tilt trailer, 3×3 ton trucks and 1×20 ton container top lift frame (20 ft. containers) available.

REPATRIATION: See "Airport".

AIRPORT: Daily services to Noumea. Regular services to Fiji, Auckland, Sydney, Brisbane, Honiara and Naura.

TIME: GMT plus 11 hours.

POLICE/AMBULANCE/FIRE: Police tel: 2222; Ambulance tel: 2100; Fire tel: 2555.

TELEPHONES: Available on board at Main Government Wharf through Agent.

SERVICES: Diver available. Tinned, frozen meat and vegetables available, also bonded stores.

SHIP SUPPLY SERVICE: Tug "Roimata" and pilot boat "Tekoni" can be used in an emergency for transport of personnel/essential stores. There are various charter boat operators who can be mobilised through the Department for Emergency Operations.

GENERAL: *Charts:* BA 1493 and 1494 cover this port.

AUTHORITY: Director of Ports and Marine, P.O.Box 198, Port Vila, Vanuatu. *Tel:* 2339. *Telex:* NH 2040. *Cable:* Vangov. *Contact:* Captain J. Walls, Director of Ports and Marine, *Tel:* 2860 (home); Captain D. J. Enever, Principal Marine Officer, *Tel:* 2269 (home); Captain Norris Hamish, Assistant Harbour Master.

SANTO: 15.31 S. 167.11 E.

The Port of Santo is sometimes referred to by the name of the old town 'Luganville', but nowadays the port and the town are usually called 'Santo'.

PORT LIMITS: The Port of Santo includes that area of the Segond Channel bounded in the East by a line running due North from Black Rock Point on Aore Island (from the 'Black Rock' on Chart BA 1736). This is known as Pointe Chapuis on French charts. It is bounded in the West by a line running due East from the Renee River on the island of Espiritu Santo.

DOCUMENTS:

Last Port Clearance.
2 Cargo Manifests.
1 Crew Declaration.
2 Animals List (Nil if none aboard).
2 Prohibited and Restricted Goods (Arms and Ammunition).
2 Lists of Ship's Stores (Cigarettes, Tobacco, Alcohol, etc.).
6 Crew Lists.

All the above can be provided on ship's paper.

The following is a Vanuatu form which can be filled in on arrival:

Ship's Report and Arrival Declaration (Vessel's Details).

PILOTAGE: Telegrams for the Pilot should be addressed 'Harbour Master Santo' or advice passed through Agents. ETA messages for night-time and week-ends must arrive during office hours Monday to Friday.

Ships calling at Port Vila first may pass ETA Santo through the Harbour Master at Vila.

VHF watch is kept during office hours on Channel 16 and for 2 hours prior to all advised arrivals. Pilot boat also watches Channel 16.

The pilot boat is a 12 m. boat with white hull and superstructure. She has 'Pilot' in black letters on the cabin and exhibits a pilot jack. She carries a red flashing light with her pilot lights at night.

The pilot station is 1 mile East of Black Rock Point at the Eastern entrance to the Segond Channel. By day and in good visibility the Pilot may board or disembark at the South-Western end of the Segond Channel South of Georges Philippar Pass, though this is not normal and should be by prior arrangement.

Pilot ladder should be rigged in accordance with the S.O.L.A.S. convention.

ANCHORAGES: Vessels may anchor anywhere in the Segond Channel except in the 'Prohibited Anchorage' close off the Main Wharf (which is shown as 'Dock No. 3' on Chart BA 1736). There is a patch with a least depth of 14 fathoms 1 mile S.S.W. of the main wharf which is recommended for anchoring, especially for smaller vessels seeking shelter from the S.E. trades. A strong tidal current, normally up to 3 knots, runs in the channel and vessels should give plenty of scope.

RESTRICTIONS: There are no restrictions on entry. However, as stevedores do not work from 2300 hrs. to 0700 hrs., vessels due to arrive between these times are *recommended* to slow down, save fuel and arrive at the pilot station at 0530 hrs. or 0600 hrs. to berth in daylight.

MAX. SIZE: Governed by berth size only.

HEALTH: Pratique messages should be addressed to Harbour Master with ETA message. If vessel is *not* healthy Harbour Master will advise action to take. Pratique messages will not normally be responded to if vessel is healthy. Vessels arriving from Port Vila do not require Pratique.

RADIO: Message should be sent via Port Vila radio, call sign YJM.

VHF: A port watch is kept on Channel 16 during office hours Monday to Friday and from 2 hours prior to advised ETAs. Call 'Harbour Master Santo'. The pilot vessel also watches Channel 16 VHF when on pilotage duty.

RADAR: No radar service.

TUGS: None, but one may be obtained in emergency from Port Vila.

BERTHING: Saltwater Berth 140 m. long with a depth of 10.5 m. at LWS, and this is the maximum draft. Vessels can, and usually do, overhang the ends of the wharf with lines on dolphins or bollards on the shore. Dolphins are situated 22.5 m. East and 35 m. West of the Wharf.

Also see "General".

CRANES: None.

BULK CARGO FACILITIES: Stevedores are currently interested in experimenting with bulk loading of copra (rather than from bags) and various methods are used to suit different ships. All methods, however, require lifting by ship's gear. There is interest in the construction of a small coconut oil mill, storage tanks for which are already constructed.

BRIDGES: None.

STEVEDORES: Stevedores work 0700 hrs. to 1100 hrs., 1300 hrs. to 1700 hrs. and 1800 hrs. to 2200 hrs. Advice given at least the previous day by Agents should be sufficient. Stevedores do not work on Sundays, or if avoidable on public holidays.

MEDICAL: Medical attention can be arranged after arrival and there is a hospital in Santo. However, medical treatment that is not of an emergency nature should be sought elsewhere.

TANKERS: Tankers berth at the main cargo wharf. The discharge line is 8 in. and the rate of discharge is 150 tonnes per hour.

DENSITY: 1025.

FRESH WATER: Vessels can take up to 500 tonnes if 2 working days' notice are given. Otherwise the maximum amount may be as little as 50 tonnes. Water is good though a little hard.

FUEL: Small quantities can be arranged by truck. Large quantities can be delivered by the 8 in. tanker discharge line, but must be by prior arrangement with Shell or Mobil. Santo is not normally a bunkering port.

FIRE PRECAUTIONS: All normal precautions only.

CONSULS: None.

REPAIRS: No shore facilities suitable for larger vessels.

DRY DOCKS: None. Slipway for vessels up to 50 m. length.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Not considered necessary.

HATCHES: Hatches are opened and closed by either crew or stevedores. Recommended that crew carry out this operation on copra loading ships.

CUSTOMS ALLOWANCES: (Per crew member) 200 cigarettes or 100 cigarillos or 50 cigars or 250 grammes tobacco. 2 litres of wine and 1.5 litres spirits.
CARGO GEAR: Ship's gear only. Ashore: 5 forklifts (from 2.5 to 22 tonnes), 2×3 tonnes flat trucks, 1×6 tonnes dump truck, 8 tractors, 100×2 tonnes trailers and 1×22 tonnes container carrier are available. No lighters available.
STORAGE: General cargo sheds of 6,000 cu.m.; 9,000 cu.m. of copra storage. Container yard for 200 TEUs. There is a minimum of 1,600 cu.m. of open storage.
REPATRIATION: Possible from Santo Airport via Port Vila.
AIRPORT: Santo International Airport is about 6 km. from town.
TIME: GMT plus 11 hours. GMT plus 12 hours from 24th September to 24th March.
HOLIDAYS: Holidays vary from year to year. It is recommended to seek advice of local Agents. It is not normally possible to work cargo on public holidays or Sundays.
POLICE/AMBULANCE/FIRE: Police tel: 222; Fire tel: 316; Health Officer tel: 419.

Police station is close to the wharf. There is no ambulance service. The fire service consists of a fire tender operated by Public Works Department. The Harbour Master has some hoses and a small foam generating machine stationed on the wharf.
TELEPHONES: There is a public telephone in the Post Office near the wharf.
SERVICES: None.
SHORE LEAVE: No restrictions.
REGULATIONS: No special regulations.
IDENTIFICATION CARDS: Not required.
DELAYS: Only for stevedores non-working times or when there is more than 1 ship present in the port.
GENERAL: Tidal stream in the Segond Channel can reach as much as 4 knots, the Westerly flood stream being predominant and the East going ebb stream occasionally absent. The flood stream can set in a North-Westerly direction at the main wharf, thus setting a vessel down onto the wharf and making an apparently simple berthing manoeuvre a little difficult. It is recommended that when S.E. trades are blowing, and a vessel has to berth port side to in order to stem the tide, the starboard anchor should be laid off whilst berthing with about 5 or 6 shackles leading 2 points for'd of the beam. This is to heave the bow away from the wharf on departure.
DEVELOPMENTS: A main wharf replacement is sought and overseas aid funds are being sought. No dates are fixed.
AUTHORITY: Department of Ports and Marine, Box 148, Santo, Vanuatu. *Tel:* 739 (office); 454 (home). *Contact:* Captain M. Toa, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Venezuela

GENERAL:

BERTHING PRIORITY: The Venezuelan Ministry of Communications has decreed, through the Directorate General for Transport and the Port Captaincies, the following new docking priority system:

1. Vessels owned by the C.A. Venezolana de Navegacion or chartered by that company.
2. Venezuelan vessels belonging to private companies.
3. Vessels of other countries.

Previously, vessels chartered by the C.A. Venezolana de Navegacion did not get priority treatment and it is understood that, with these new priorities, the number of vessels with docking privileges has been tripled, thus resulting in greater delays for vessels operated by foreign companies.

SHIPMASTER'S REPORT: July, 1982.

You may wish to caution all seafarers who may in the future trade to Caripito, and the other similar jungle areas. The problem in this area used to be mosquitoes, but although they are still around, the problem that we have recently experienced is a moth locally known as 'Palometas'. One doctor referred to it as an insect 'Hylesia Canitia'.

My information is limited, due to language difficulties, but the problem is very real, and I cannot caution the unaware strongly enough to take precautions. The vessel has traded to Caripito frequently over the past two years, and this would appear to be the first experience as I can find nothing about these moths in writing and our first warning was given when an Agent saw some of these moths onboard. This type of moth appears suddenly from the jungle with no regular cycle, and like other moths is attracted at night by lights, be they from vessels, homes or berth installations. They are about *one inch* in length, their bodies about pencil thickness and filled with eggs. They flutter in vast numbers around the lights, and it would appear that the dust, pollen, hair or whatever comes off them, falls onto the ship's structure or persons nearby. They do not bite and therefore I assume the dust, breathed in or landing on the skin causes a red pimply rash which gradually spreads over the whole body. It affects everyone differently, some crew were covered in a very heavy bumpy red rash within a few hours of exposure, others only in small patches on the arms which spread over the body taking several days, but in all cases causing extreme discomfort due to the itching and constant desire to scratch. At first it was only crew who were on deck that were affected, but as I assume the dust was brought into the accommodation by clothing, fans and the moths which got past the doors, the engine and catering crew were similarly affected.

Over two thirds of the crew were treated locally within 24 hours, with injections, tablets, lotions & creams but this only brought temporary relief. Rashes picked up 10 days ago with the first incident are now clearing up, but fresh rash areas appeared when we visited the Caripito area 3 days ago. We are on a weekly schedule, and one would hope we will build up a resistance to this problem. The local people also suffer from this rash, but the ones I met only had a very light rash on arms, neck and body. They cannot say how long the moths will be present, varied reports of two weeks to months. However, we are now adopting the following anti-moth measures:

1. Put the air conditioning on recirculation, ensure all openings are closed.
2. At night when underway, blackout the vessel as much as possible. During the San Juan River passage to Caripito, navigation lights only situation if possible.
3. When you anchor in San Juan River to wait for the tide or berth at Caripito, blackout the vessel and allow no one outside if possible at night, anchoring or picking up by torchlight. Having anchor lights on at night is debatable, the local dredger does not.
4. Wash the vessel down completely at daybreak, and sweep all dead moths off the deck.
5. For night mooring/deck operations, have as few lights on as safely possible, all exposed crew should cover themselves completely, particularly around the neck area.
6. After clearing the Maturin Bar (river entrance) wash down the whole ship. The dust off the moths is still active days after leaving the area. Wash all filters of air conditioning units.

Knowing about this problem could have reduced exposure to what is an extremely unpleasant experience, and I have urged the local installation to include a warning in their Port Information Guide.

DOCUMENTS: *Prior to Arrival:*

Arrival Notice: The Agent must submit 24 hours in advance of the vessel's arrival, a letter-notification indicating date and time of arrival, name and nationality, name of Master, length, gross and net registered tonnage of cargo for the port, origin, destination, shipper and agency, in 16 copies, with the following distribution:

Captain of the Port, Customs (2), The National Institute of Ports-INP (3), Armed Forces of Cooperation, National Guard, Police Intelligence Service Bureau-DISIP, National Bureau of Identification and Alien-Immigration, Interpol, Ministry of Health and Social Welfare-Public Health Unit, Ministry of Agriculture and Livestock-Animal and Plant Health, Post Office and Chamber of Commerce.

Information on Cargo and Passengers for the Port: The agency must receive by airmail, sufficiently in advance, the following documents to be submitted to the authorities at least 24 hours before the vessel's arrival:

Documents	*Captain of Port*	*Customs*	*INP*	*Agency*	*Total*
Cargo Manifests(a)	–	1	3	3	7
Correction Letter to Manifest	–	1	–	1	2
Bills of Lading	–	–	2	1	3
Stowage Plan(b)	–	–	1	2	3
Cargo List	–	–	10	–	10
Container List	–	–	12	–	12
Dangerous Cargo List	2	–	1	1	4
Passenger List	–	–	–	1	1
Mail List	–	–	1	–	1

(a) As of January 29, 1979, the Cargo Manifest may be submitted on LAFTA/OAS Form 2, instead of on the Venezuelan Freight List (Sobordo).

(b) The Venezuelan Shipping Association is negotiating to have the stowage plan submitted to the National Institute of Ports on the vessel's arrival, instead of 24 hours in advance.

Request for Port Services: 24 hours before the vessel's arrival, the agency must submit to the Captain of the Port the request for pilotage, towage and berthing.

At the same time, it must request permission to disembark and embark passengers and cargo and unload merchandise, on a form addressed to the Customs Administrator, with copies to the INP and the National Guard.

Additional Requests: The agency must draw up and submit to the National Institute of Ports, 24 hours before the vessel's arrival, 12 copies of the cargo index, a document corresponding to tally books.

On Arrival:

Type of Document	*Number and distribution of documents*						
Basic forms	*Captain of Port*	*Customs*	*INP*	*National Guard*	*Public Health*	*Others*	*Total*

(a) DISIP and Identification.

(b) DISIP, Bureau of Military Intelligence, Interpol, Identification and Tourism.

(c) Eliminated by the new Organic Law of Customs, March 5, 1979.

(d) Postal Service.

(e) DISIP, Bureau of Military Intelligence, Interpol, Identification and Tourism.

(f) When a vessel returns to the country goods missing in unloading other vessels, it shall submit, in addition to the cargo manifest a return cargo manifest containing the data required for the manifest and the name of the vessels on which the goods were originally manifested (Organic Law of Customs).

(g) Eliminated by the Organic Law of Customs.

Prior to Departure:

Clearance Documents: At least 6 hours in advance, the request for the clearance permit must be submitted to the Captain of the Port.

Request for Pilotage: Also 6 hours in advance, or more, the request for pilotage must be submitted to the Captain of the Port.

AMUAY BAY: 11.46 N. 70.15 W. (See Plan Book)

OPERATORS: Lagoven, S.A.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Amuay Bay. During hours of darkness all vessels must identify themselves on arrival either by radio-telephone or aldis, preferably the former.
2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Amuay Bay, certain information must be radioed prior to arrival to avoid heavy fine and/or delays. See "Radio".
3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Ballast disposal facilities are available at Amuay Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and for movements inside the bay.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by ships anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's chest must be presented to Authorities on arrival.
7. Emergency fire signal is 5 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.
8. Ratguards must be in place on all mooring lines.

LOCATION: The port of Amuay Bay is located on the Gulf of Venezuela, on the West Coast of the Paraguana Peninsula, Venezuela. The sea buoy marking the entrance to the bay is located in Lat. 11° 44′ 25″ N., Long. 70° 14′ 50″ W.

DOCUMENTS: Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

Clearance from last port (Consul Mail).
Ballast Certificate from last port.
Crew Lists (5 copies).
Passenger Lists (5 copies).
Baggage List (3 copies).
Lists of Personnel Effects (3 copies).
Store Lists (3 copies).
Lists of Slop Chest (3 copies).
Sailing permit (Zarpe).

Vessels arriving with cargo to discharge, will also require:

Manifest (Sobordo) (1 original and 2 copies from each loading port).
Consular Mail (1 sealed envelope from each loading port).
Bills of Lading, 1 original and 5 copies from each loading port.
Tally Books (6 from each loading port).
Consular Invoice (3 originals and 3 copies from each loading port).
Commercial Invoices (3 from each loading port).

Although vessels proceed directly to Amuay Bay, clearance documents should be prepared showing the port as Las Piedras, Paraguana (Amuay Bay). Failure to observe this requirement may result in penalties up to a maximum of Bs.2,000.

Admeasurement Certificate: All ships calling at a Venezuelan port for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, or any other certificate with which Venezuela is in agreement, which is used as a basis for recalculating tonnage under the Venezuelan Regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call. Vessels registered in the following countries are excluded from the above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A, Ireland and Norway.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to "Lagomar-Judibana" prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival.

Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted.

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of fine.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form, delivered on board on arrival, must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information by the Captain of the Port.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Marine Department will arrange for Pilots to board all vessels as necessary.

The Pilot acts in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

TUGS: Tug assistance is considered essential and is afforded all vessels entering, leaving or shifting in the harbour by 2 × 1,600 h.p. tugs. Disposition and manoeuvres of tug-boat are directed by the Pilot, who uses a "walkie-talkie" to convey orders to the tugs.

BERTHING: 4 finger piers provide 8 berths, numbered 1 to 8, from South to North.

	1	2	3	4	5	6	7	8
Max. Arrival d.w.t. (m.t.)	70	92	24	44	16	30	16	30
Max. departure d.w.t. (m.t.)	112	112	48	48	38	38	94	94
Max. Draft (S.W.)	43′	43′	*37.6′	*37.6′	*37.6′	*37.6′	*37.6′	43′
Max. Length Ship	1000′	1000′	650′	700′	700′	700′	856′	856′
Max. Beam	Unl.	Unl.	Unl.	†	†	†	†	Unl.
Bow to manifold distance	495′	495′	300′	320′	330′	330′	340′	340′

Ballast line, fresh water and all grades bunkers at all berths.

*The max. draft will be increased to 40 ft.

†Max. beam permissible varies dependent upon the beam of vessel berthed on other side of the slip.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

Products handled:

Berth No. 1 & 2: F.O., heating, heavy distillates, TJ-102, topped crudes, all crudes.

Berth No. 3 & 4: Lubes, F.O., LCT asphalts (penetration).

Berth No. 5 & 6: Naphtha, jet fuel, crudes, F.O., heating, MC/RC asphalts, kerosene, TJ-102, topped crudes, LCT (pref.).

Berth No. 7 & 8: Naphtha, kerosene, heating, F.O., jet fuel, MC/RC asphalts, all crudes except TJ-102.

ANCHORAGES: For vessels awaiting berth, there is a good anchorage about 1 mile N.W. of the sea buoy in 8 to 12 fathoms with a sand and mud bottom. Ship Masters are requested not to anchor at a distance greater than 3 miles from the sea buoy.

RESTRICTED AREA: A restricted fishing area has been established by the Venezuelan Government which is prohibited for mechanically propelled vessels drawing more than 5 ft. This zone lies within the area off the Paraguana Peninsula from Punta Macolla, Lat. 12° 5′ 32″ N., Long. 70° 12′ 55″ W., to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the positions below indicated: Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.; Lat. 12° 03′ 15″ N. Long. 70° 19′ 23″ W.; Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

HEALTH: *Sanitary Inspections:* A close control of veneral diseases has been put into effect by the Government Sanitary Office.

Immediately after docking a Sanitary Inspector will board the vessel and all Crew members will be checked before going ashore.

Those persons found with infection must be sent to the Government Anti-venereal Clinic for proper medical attention and return to vessel before sailing. 20 Bolivares per ship.

Shore passes will be granted to all healthy persons.

Masters are required to co-operate in this campaign.

MAX. SIZE: Length 1,000 ft.; draft 43 ft. Also see "Berthing".

RADIO: The cable and telegraphic address for the Lagoven S.A. at Amuay is "Lagomar Judibana". Radio messages to and from ships at sea are routed through "Shipward 2 New York" for retransmittal through Aircon system to Judibana (Amuay Bay).

Radio notice of arrival should be sent 72 hours prior to arrival at Amuay.

Ship-to-shore telephone: Radio-telephone listening watches are maintained on a 24-hour basis in the Marine Office on the following frequencies: 2182 kHz.; 156.8 MHz.

International telephone: International telephone calls are routed through Caracas, Venezuela. Telephone number is Punto Fijo area 069-51557. (It is usually difficult if not impossible to complete a call.) Telex: 54193 Lagoven.

Also see "Documents".

LOADING: Loading rates particulary for low-flash products loaded during the hours of darkness or when topping-off cargo tanks, will be reduced by the terminal to meet existing conditions.

All loading and discharging will be stopped during the passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calm, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping-off, if requested by the ship's officer.

Some of the fuel cargoes are loaded from fuel reservoirs through certified positive displacement meters, and shipping documents are prepared on the metered figures. All reconstituted crudes are line blended with conditions recording of component rates and quantities. Actual loading rates of both this crude and metered fuel cargoes are available at any time upon request of the standby.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on completion of inward clearance. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than this 10% limitation it is necessary to cable New York for confirmation.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "stand-by" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Vessels loading liquid and flaked sulphur: *For vessels loading liquid sulphur, the following applies:*

Location: Pier 2, berth 3 at Amuay Bay.

Draft – 40 ft., length overall – 700 ft., beam – no limitation.

Loading will be at the rate of 400 long tons per hour through a 6 in. line and rubber hose.

Maximum cargo size – 25,000 long tons.

Normal loading temperature is 275° F. (Minimum – 265° F. Maximum – 295° F.). Density at normal loading temperature is 112 pounds per cu. ft. Viscosity at same temperature is 8.5 centipoises.

Safety precautions/provisions: Molten sulphur classified as "Grade E Liquid" by U.S. Coast Guard. No naked light, open flames or sparks should be permitted near any tank openings. Molten sulphur is combustible but is handled at temperatures below its flash point (325-370° F) and ignition temperatures (476-502° F).

For vessels loading flaked sulphur, the following applies: Physical characteristics of the loading facilities:

(a) Location: Lat. 11° 44′ N., Long. 70° 14′ W. Anchorage approximately 2,000 ft. South Punta Adaro with a depth of 33 ft. 400 yards offshore and dropping off to 50 ft. 1,000 yards offshore. In the rare event that the wind is Westerly vessel would anchor further offshore.

(b) No draft, length or beam limitation. (Vessels loading up to 24 ft. draft may be anchored inside the bay).

(c) Loaded barges whose overall dimensions are 200 × 42 × 17 ft. will be brought alongside with the aid of tugs and removed when required, barges will be equipped with fenders. The hoppers are 160 × 37 × 14 ft. Loading from barges to ship will be done using ship's gear and clam shells of 1.25 ton capacity. Clam shells will be furnished by Lagoven free of charge. Personnel (stevedores) to carry out the loading operation will be supplied by Lagoven or the ship's crew can be used if this is set forth in the charter party. Loading rate 1,000 long tons per day.

(d) The anchorage is sheltered in the lee of the Adaro Peninsula. Wave heights vary between 1 ft. and 2 ft.

(e) Normal Maximum parcel size – 10,000 tons loaded at a rate of 1,000 tons per day, however, an additional 2,500 tons can be supplied at a loading rate of 500 tons per day.

(f) Flaked sulphur when stored in large quantities varies in density from 55 to 90 pounds per cu.ft. Average density is anticipated to be 70 lbs./cu.ft. Individual flakes are of irregular shape and are less than 0.5 sq.in. in area and less than 0.0625 in. thick. This size data is not a specification nor guarantee and is provided only to indicate the order of magnitude dimensions.

General:

Fee of Bs. 200 will be charged for trips between the Terminal and the anchorage by launch or tug for delivering personnel.

Method of cargo quantity determination: Barge drafts are marked to the nearest inch and capacity tables prepared by Charles Martin. The draft prior to commencement of and upon completion of discharging are noted. The amount transferred is obtained by consulting the tables. The quantity arrived at by totalling the amounts from the barges used is compared to the ships figures and reconciliation reasoned.

BALLAST: Vessels should arrive with sufficient ballast to permit safe handling. The Pilots require a draft of minimum 8 ft. forward, 18 ft. aft, on a T-2 or similar size tanker, 11 ft. forward and 20 ft. aft on a 26,000 d.w.t. or larger vessel. Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously.

Absolutely oil-free ballast may be discharged overside. All dirty ballast must be pumped ashore. A 30 in. ballast line, 2×60,000 and 1×120,000 barrel slop tanks and separator system are available.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the Lagoven concession, operated by the Society of Catholic Medical Missionaries. Several dentists are located in the area.

Italian Crew members covered by Casa Maritime insurance receive medical attention from the appointed medical representative in Punto Fijo.

Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FUEL: Ship's requirements specifying grade and quantity desired are to be given to the Marine Representative boarding the vessel on arrival. All grades of bunker fuel, intermediate fuels and Diesels are available except Esso diesel. Bunker delivery rates average 2,500/3,500 barrels per hour. Bunkers are loaded through meters which automatically register quantities on bunker receipts.

It is the responsibility of ship's engineer to give "standby" notice to the terminal employee and advise him when to shut down.

FRESH WATER: Fresh water can be supplied if necessary; however, supplies are limited to essential requirements. All fresh water is piped from distant sources. Loading rate is about 10 t.p.h.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while the ship is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

While the vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in the officers' mess-room, to avoid difficulties.

DENSITY: The usual specific gravity of sea water at the berth is 1025, temperature ranges from 78°F. to 85°F.

CONSULS: Brazil, Great Britain, Italy, the Netherlands, and Norway have consular representatives in the area.

TIME: GMT minus 4 hours.

SHORE LEAVE: Also see "Health". Shore passes will be granted to all healthy persons. A representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the Pilot undocking the vessel. Vessels are not permitted to sail until all Crew members are on board, unless hospitalised or prior arrangements made for disembarking. A letter to this effect is required from the Master.

REGULATIONS: (i) *Pollution:* The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with the greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require that a written report be submitted by the ship involved in the event of an oil spill.

(ii) *Gangways:* All vessels using the port of Amuay must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations, and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(ii) *Passengers:* Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

(iv) *Visitors:* All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

(v) *Rats:* Rat guards required at all times.

GENERAL: *(a) Weather Conditions:* There is little rainfall at Amuay Bay; annual precipitation averages 12 in. The so-called rainy season usually coincides with the Caribbean hurricane season, from August to November, although Amuay lies South of the usual hurricane track. During these months calms are often experienced and winds from a Westerly direction may be expected. Normal winds are steady from the N.E., average force 4, Beaufort Scale, with a max. of force 8. Temperatures average about 85°F., with little variation from day to night or season to season.

(b) Tides: The normal range of the tide is about 12 in.; however, a 28 in. range has been observed during spring tides.

(c) Lubricating oil: Supplies of Essomarine lubricating oils are available. Requirements should be given in vessel's radio notice of arrival.

(d) Bonded Stores: Cigarettes or other stores in bond are not obtainable in Amuay Bay.

(e) Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's ETA radio, to permit delivery on board on arrival.

(f) Charts: No supplies of charts or sailing directions are available at Amuay Bay.

(g) Laundry: A 6 hour laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

(h) Mail: Itemised lists are required for ship's mail, to be signed by the Master. Unless other instructions are given, ship's mail received after sailing, or for vessels on which no advice has been received, will be held for 30 days and then returned to Owners or Operators at ship's expense.

(i) Inspection – Petroleum Products: Chas. Martin & Co. and E. W. Saybolt, petroleum inspectors, are available if specified. Telephone numbers, Chas. Martin 44665, 44650 and 44211; Saybolt 44639, 44645 and 44227.

(j) Norwegian Government Seamen Service: A field representative of the above service is stationed at Amuay providing Norwegian and Swedish film exchange and other usual services. His telephone number is 51459.

(k) Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason, all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seamen, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

(l) Provisions and Stores: Provisions and stores in limited quantities are available, the prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc. are competitive; dry stores are considerably higher than in most ports. The Port Steward will assist in filling requisitions.

(m) Radar and Radio: Radar and radio repairs can be effected in Amuay. A service repair man is available, but spare parts are limited.

(n) Repairs: Shore facilities are available only for emergency repairs of a minor nature. The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

(o) Surveyors: There are no appointed surveyors to American Bureau of Shipping or Lloyd's in the area. However, with sufficient advance notice, arrangements can be made to have their nearest representatives come to Amuay to attend surveys.

(p) Walport Film Exchange: Subscribers to the Walport Service may exchange films at the Marine Office.

(q) Plimsoll Marks: The Captain of the port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(r) Landmarks: Three conspicuous radio towers, 350 ft., painted alternate red and white bands, with red flashing aircraft warning lights, are located in the refinery area, 1 mile East of the docks.

ATTENDANCE: Representatives of the Marine Department board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ship's requirements. The Marine Office Building is located at the Pierhead Trestle and personnel are available for assistance at all hours. Telephones are located on all docks and the Marine Shift Supervisor can be called on telephone No. 444475 or 444465.

CARIPITO: 10.09 N. 63.02 W.

Also see "General – Shipmaster's Report, July 1982".

OPERATORS: Lagoven, S.A.

LOCATION: Caripito is located on the West bank of the San Juan River in Lat. 10° 09′ 25″ N., Long. 63° 02′ 01″ W. Also see "General" before first port.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send to Caripito their ETA Guiria at least 3 days in advance followed by confirmation 48 and 24 hours before arrival.

2. If a ship originally cleared for another port (including some other Venezuelan port) is diverted at sea to Caripito, certain information must be radioed to Caripito prior to arrival to avoid a heavy fine and/or delays. See "Radio".

3. No dirty ballast may be pumped overside in port or in Venezuelan coastal waters. Limited ballast facilities are available at Caripito Terminal.

4. Vessels calling at Caripito must obtain Government Pilots at Guiria.

5. The Venezuelan flag must be displayed during daylight hours while vessel is within port limits.

6. The emergency fire signal in Caripito dock area is 6 short blasts and 1 long blasts on ship's whistle or siren. No other signal is to be given in the case of emergency.

APPROACHES: The traffic in San Juan River is restricted to one-way from Marieta Point to Caripito. Therefore, instructions are issued at Guiria to incoming vessels relative to what action to take on arrival at Marieta Point. Outbound traffic is controlled so as not to conflict with these instructions.

1. Guiria: The town of Guiria is located on South coast of Paria Peninsula on N.W. shore of Gulf of Paria. When approaching from East a signal tower will be observed on a bluff slightly to North of town.

2. Maturin Bar: Buoy E-1, marks the entrance to Maturin Bar Channel. At Punta Gorda there is a light tower located in approximate Lat. 10° 09′ 50″ N., Long. 62° 37′ 52″ W. displays a flashing red light.

3. Channel: Maturin Bar Channel is 14 miles in length and 400 ft. in width. The tidal range over the bar varies from 4.6 ft. to 5.7 ft. with currents up 3 knots. The average salinity of water is 1.009; however, this may vary considerably between wet and dry seasons and spring and neap tides dredging of channel to 32 ft. (MLWS) has recently been concluded. Maximum draft permitted by Venezuelan regulations is 34 ft. in fresh water. There is a restriction of 6 in. less for all motor tankers. On leaving Maturin Bar Channel the San Juan River narrows from approximately 1.25 miles in width to about 0.7 miles with slight variations in width up to Marieta Point where it narrows to about 1,200 ft. and varies between 800 ft. and 2,000 ft. up to Caripito. Marieta Point marks intersection of Cano Frances and the San Juan River. It is also at this point that course of San Juan River changes approximately 100° to starboard and it is the beginning of one-way traffic. Frequently, incoming vessels are requested to anchor below this point to await outbound traffic. There are 32 lights marking strategic points in San Juan River between Maturin Bar and Caripito Terminal. These light towers are painted aluminium and are easily visible during daylight hours.

DOCUMENTS: (also see "Radio").

1. *Clearance (inward and outward).* Inward clearance is effected at Caripito. The sanitary inspector boards vessel at anchor or at berth depending on tidal conditions and/or the availability of a berth. The Customs and other Government officials usually board at the berth. However, should there be a delay awaiting berth or tide, the entry will be granted while vessel is at anchor, in which case accommodation ladder must be rigged.

It is necessary that the following documents be ready on arrival:

Ballast List (1 original).
Passenger List (5 copies).
Baggage List (5 copies).
Crew List (7 copies).
Sailing Permit from Last Port (1 original).
Stores List (5 copies).
List of Personal Effects (3 copies).
List of Contents of Slop Chest (3 copies).
List of Passengers in Transit (5 copies).

Cargo documents. The Port of Caripito has in force a system of cargo documentation for expediting the sailing of vessel. It is as follows:

a. Certain documentation with approximate cargo figures of unofficial nature are placed on board and official cargo documents are airmailed to discharge port.

b. Blank signed documents are placed on board to vessel's departure from Caripito and thence correct figures are radioed to sub-agency at Guiria who delivers them in writing to Master, who acknowledges its receipt by signing carbon copies of transmittal sheet.

PILOTAGE: Pilots are employees of Venezuelan Government and act in an advisory capacity. The Master retains responsibility for ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must forward through the Marine Department a full written report of the circumstances, for delivery to the Captain of the Port.

Pilots are compulsory and are embarked and disembarked at port of Guiria through a sub-Agent. Vessels should proceed to the Guiria Sea Buoy (position Lat. 10° 33′ 12″ N., Long. 62° 15′ 00″ W.) and await instructions. If arriving during the hours of darkness, certain instructions are usually transmitted by light signals from the signal tower. Voice radio communications can be established at any time with Guiria or Lagoven Caripito on frequencies 2182 kHz, 2638 kHz and 2738 kHz. The launch which embarks the Pilot will also deliver instructions to the Master relative to the movements of his vessel en route to Caripito, port regulations, facilities, etc. The regular pilotage fees cover the area from the entrance to Maturin channel to and from Caripito. The Pilot is to be provided sleeping quarters and food equal to that provided the officers aboard ship.

Note: Complaints or observations concerning the Pilot's handling of vessel should be noted on back of pilotage ticket.

TIDES: The normal range of tide in the dock area is about 12 ft. with currents up to 3 knots during the flood and 4 knots during the ebb in rainy season (May-December). The normal current is 2.5 knots during the flood and 3 knots during the ebb.

ANCHORAGE: For vessels awaiting berth, there is an anchorage about 1,000 m. up-stream from the Caripito Terminal. Vessels awaiting clear channel may at times be requested to anchor at Punta Marieta. Vessels awaiting high tide anchor at Punta Marieta or off Punta Gorda.

MAX. SIZE: Vessels up to 745 ft., 52,000 d.w.t. and max. draft *33 ft. (FW) at No. 2 berth and LOA 630 ft., 32,000 d.w.t. and max. draft *33 ft. (FW) at No. 3 berth.

*Safe draft per tide tables.

RADIO: The cable and telegraphic address for Lagoven at Caripito is "Lagomar – Caripito". Messages to and from ships at sea are routed through the Government Radio Station at Maiquetia (La Guaira), call letters "YVG". This station operates on a 24-hour continuous watch, on the following frequencies:

Listening Frequencies: low frequency, 500 kHz; high frequency, 4178, 6267, 8356, 12534, 16712, 22225 kHz. Transmitting Frequencies: low frequency, 500, 472, 464, 417 kHz; high frequency, 4322, 4352, 6505.5, 6519.5, 8722, 8730, 12817.5, 17141.6 kHz. Radio notice of arrival should be sent 72 hours prior to arrival at Guiria and corrected if weather or other conditions delay the vessel.

Radio telephone listening watches are maintained on a 24-hour basis at Guiria and at Caripito on 2182 kHz. The following frequencies are available for communications after contact: 2638 kHz and 2738 kHz.

All vessels en route to Caripito may also communicate with Amuay or La Salina Marine offices and request that message dealing with corrected ETAs, Pilots and other business be relayed to the Caripito Marine Office.

Vessels that were originally cleared for another foreign port, or another Venezuelan port, and were subsequently diverted at sea, should radio the following information to Lagomar Caripito prior to arrival:

Vessel's name
Master's name
Vessel's flag
Number of crew
Estimated time of arrival at Caripito
Last port of call
Port for which originally cleared
Grade and quantity of cargo to be lifted

This information is required in order to make in advance special arrangements for inward clearance, to avoid payment of a fine. It is necessary in such a case that the following documents be ready on arrival:

Crew List (original and 6 copies).
List of Personal Effects (original and 2 copies).
List of Contents of Slop Chest (3 copies).
Stores List (original and 1 copy).

Also required are the original and 2 copies of the radiogram instructing Master to proceed to Caripito. Outward clearance documents are placed on board the vessel prior to departure from the Caripito terminal.

Masters should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. Caripito has also radio telephone communication with North and South America and Europe. For further information contact Port Services Section in the terminal building, telephone C-335.

BALLAST: Ballast is not required when mooring. Any ballast carried should be in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

A relatively small amount of salt water remaining in ship's tanks or lines can contaminate crude and cause operating problems for the refiners. It is important therefore to strip tanks and lines as dry as possible.

Vessels provided with completely segregated ballast system are permitted to discharge ballast and load cargo simultaneously. All ballast clean or dirty must be pumped ashore. Contaminated residues may be pumped ashore, where facilities are available for receiving up to a max. of 20,000 barrels.

A considerable number of vessels are now participating in the programme to eliminate pollution of the seas. Under this programme, vessels may arrive carrying quantities of oil/water emulsion. If it is desired to follow the "load-on-top" procedure in such instances, it is requested that the Marine Representative be informed on arrival.

BERTHING: The Marine Office Building is located on the West bank of the San Juan River upstream from the berths. Representatives of the Marine Department board vessel immediately upon arrival and it is particularly requested that Masters indicate at that time all ship's requirements. Personnel are available for assistance at all hours.

Lagoven maintains a deep water terminal, consisting of 2 ocean tanker berths, Nos. 2 and 3. These are T-type piers with breasting dolphins located approximately 10 ft. off the face of each pier.

All terminal facilities are under the control of Lagoven, S.A. The port is open for navigation during day and night. All ocean tankers are moored at berths No. 2 and 3 on the flood tide only. Vessels may sail from berth No. 3 at any stage of the tide. Sailings from berth No. 2 are restricted to flood tide only when berth No. 3 is occupied.

A vessel entering or leaving port must be assisted by the same Government Pilot taken aboard at Guiria. A Custom guard will board at the same time and remain with the vessel. A Lagoven Representative will deliver to the Master his loading and docking instructions together with any other information pertinent to the vessel's call. He will also sign the Notice of Readiness if requested. The vessel will proceed to anchor to await flood tide to dock, to await berth, or will swing to the flood tide in the turning basin and proceed directly to the berth depending on circumstances.

LOADING: Loading rates, particularly for low-flash products loaded during the hours of darkness or when topping off cargo tanks, will be reduced by terminal to meet existing conditions.

All loading and discharging will be stopped during passage of an electric storm, and ullage covers must be closed and dogged down. During periods of calms, loading of gasoline or other similar low-flash products may be loaded at reduced rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazard from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master. Supplementary information including number and size of lines and hoses will be furnished to the Chief Officer before loading commences.

If vessel's loading orders from Owners or charterers do not agree with terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated; if the cargo to be lifted will be more or less than 10% limitation consultation is necessary.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

MEDICAL: Medical treatment and hospitalisation, if required, is provided at a hospital located in the concession. Several dentists are located in the town of Caripito. Authorisation forms for medical and dental treatment are provided, which require Master's signature. Transportation is available at the Marine Office. Please note that if the patient does not speak Spanish or English, an interpreter should accompany him.

FRESH WATER: Fresh water is available in any quantity. Delivery is made through 2.5 in. national standard fire hose thread hydrants. Ship's personnel must provide hoses and connect up.

FUEL: Bunker "C" fuel oil, marine diesel and intermediate fuels are available. It is the responsibility of ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

CONSULS: There are no consular representatives in the area. Vessels bound for U.S.A. or British Caribbean ports will be provided with a letter stating this fact.

CERTIFICATES: All ships calling at a Venezuelan port for the first time must be measured for tonnage by Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and is returned before sailing. The Venezuelan Admeasurement Certificate, when later issued is forwarded to the Owners. A fee is charged for this certificate, which is payable only on ship's first call. Vessels registered in following countries are excluded from above regulations: Netherlands, Germany, France, Portugal, United Kingdom, Denmark, Sweden, U.S.A., Ireland and Norway.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these offícals during regular meal hours. Masters are requested to give them the privilege of eating in the officers' messroom, to avoid difficulties.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore. Cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest or closet which will then be sealed for the duration of the vessel's stay in port.

Firearms on board any merchant vessel calling at Venezuelan ports must not exceed 1 per officer, nor can ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the stores list. Officers must not carry firearms while ship is in Venezuelan waters and these side-arms and ammunition should be collected and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore.

REPAIRS: Only minor repairs of an emergency nature can be made. There are no electronic repair services available in the area.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to the Lagoven Despatcher undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking.

TIME: Local time is GMT minus 4 hours.

GENERAL:

Gangways: Gangways at berths No. 2 and 3 are provided by the terminal.

Plimsoll Marks: The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels will be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

Surveyors: There are no appointed surveyors to the American Bureau of Shipping or Lloyd's in the area. With 48 hours' notice, non-exclusive surveyors can be obtained from Caracas, or at times from Puerto La Cruz, or qualified Masters or chief engineers may be available for appointment as surveyors when required.

Bonded Stores: Cigarettes or other stores in bond are not obtainable at Caripito.

Cash Advances: The local currency is the Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in the vessel's radio ETA, to permit delivery on board on arrival. Cash returns can be accepted only during the normal working day – 0700 to 1600 hrs. Sundays and holidays excluded.

Provisions and Stores: Provisions and stores in extremely limited varieties and quantities are available at prices considerably higher than in most other ports.

Charts: No supplies of charts or sailing directions are available at Caripito.

Personnel – Seamen Left Ashore: In the case of seamen left ashore for hospitalisation, repatriation or other reason all documents and personal effects are to be delivered to the Marine Office before sailing. A letter is required from the Master advising the maximum advances to be made to the seaman, if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or owner, responsible for any seamen left behind in Venezuela.

Laundry; Laundry service is available.

Lubricating Oil: Supplies of marine lubricating oils are available from Puerto La Cruz. Quantities required should be included in the ETA cable.

Mail: Any pending ship's mail will be delivered on board by the marine dispatcher on arrival at Caripito. At the same time he will receive any ship's mail to be dispatched. The marine dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises postage by signing 7 copies of the Company Post Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter. Copy of this will be returned aboard vessel when leaving this port outward bound. If not ready on time, it will be air-mailed to the vessel's next port of call.

Inspection – Petroleum Products and Crude Oil: Charles Martin & Co. and E. W. Saybolt, petroleum inspectors, are available from Puerto La Cruz if specified.

Visitors: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

Pollution of Harbour and Coastal Waters: The laws of Venezuela are strict in regard to pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The authorities require that a written report be submitted by the ship involved in the event of an oil spill.

EL CHAURE: 10.15 N. 64.37 W. (See Plan Book)

OPERATORS: S.A. Meneven.

LOCATION: El Chaure Marine Terminal is located on the South shore of the head of Bergantin Bay. 1.8 miles N.E. of Puerto La Cruz: Lat. 10° 14′ 50″ N. Long. 64° 36′ 57″ W.

This terminal is also considered to be Berth No. 6 of 'Puerto La Cruz' which also see.

DOCUMENTS: To avoid penalties, ships clearing for Venezuelan Ports must present certain papers herein set forth for arrival and clearance after docking. The Clearance is made by Government officials accompanied by a company representative.

The following documents must be presented:

1 copy of Ship's register
Clearance from last port
1 copy of Ballast Certificate
6 copies of Crew list
5 copies of Passenger and baggage list
2 copies of List of passengers in transit
4 copies of List of personal effects
4 copies of Stores list
2 copies of List of slop chest
Sailing permit issued by Marine Authority of last port of call
Dispatch issued by Venezuelan Consul at last port.

PILOTAGE: Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The Company will arrange for Pilots to board all vessels as necessary. Whenever it might be deemed necessary for the Master to disregard the Pilot's advice in order to ensure the safety of the vessel, a written report must be submitted by the Master to the Venezuelan Port Captain, explaining the reason for such action.

ANCHORAGE: The crossed line portion on the plan is the anchorage zone for all ships after arrival at Pozuelos Bay. The Company will dispatch the Pilot, by launch, to all ships when they are ready to be docked. On entering the Pilot Zone, the Venezuelan flag must be flown from the foremast; it must be flown at all times between sunrise and sunset.

MAX. SIZE: Max. draft 39 ft. 6 in.

RADIO: El Chaure Terminal Office may be contacted on radio-telephone SSB or AM frequencies of 2738, 2638, 2182 and 2120 KHz. Frequency 2182 kHz should be used for initial contact.

Arrival advice: Masters are required to advise by cable their ETA. Such notice should reach El Chaure at least 48 hours ahead of vessel. In cases of ships being diverted at sea to a Venezuelan Port, or to another Venezuelan Port, Venezuelan regulations require, by cable, prior to arrival, name of Master, number in crew, port of departure, port to which originally cleared, flag of ship and net registered tonnage.

VHF: Channel 16 can be used after arrival at Pozuelos Bay.

TUGS: Tug assistance to moor and unmoor is compulsory at El Chaure installations. Ships over 145 m. long must use 2 tugs having not less than 1,600 h.p. each for mooring and unmooring at El Chaure. 1 launch is required for handling the lines.

BERTHING: The wharf has a length of 100 ft. with dolphins established on each side. The dock accommodates vessels drawing up to 39 ft. Sea conditions are usually very good in the entire area. Waves are almost nil and out of the hurricane path. A chain of small islands makes El Chaure a natural port. Only 1 vessel at a time can be moored for loading or unloading. The normal range of the tide is 1 ft.

BALLAST: Vessels arriving in El Chaure must carry sufficient ballast to ensure safe handling. By Venezuelan Law, all dirty ballast must be pumped ashore into ballast pits. Vessels having separate clean tanks for ballast may pump overboard, after first being inspected and passed by Port Authorities. The Company Terminal facilities include a 16 in. ballast line, which empties into ballast pits about 3,500 ft. from the dock. These pits have an elevation of 32 ft. above the dock and will hold 50,000 bbls. The ballast line will stand a pressure of 100 p.s.i.g. The pressure is recorded at the dock. The vessel will be held responsible for damages to the shore ballast line and spills that maybe occur because of line rupture.

LOADING: Before tying up, blind flanges on the ship's manifold should be removed, hose derrick to be topped and rigged to lift shore hoses along with dock booms. All vessels must dock with starboard side to dock. The Company dock supervisor will inform the Master of the vessel as to characteristics of cargo to be loaded, loading rates and all other information necessary for safe and efficient loading operations. During the ship's stay at the dock, company employees are available at all hours to assist in any manner. After loading is completed, if the dock space is required for another vessel the ship must vacate the berth and wait at anchorage until cargo and sailing papers are completed.

FRESH WATER: Available, rate 10 t.p.h.

REPAIRS: Facilities are limited; any repair work must be requested by Master in writing.

CONSULS: The following are in Puerto La Cruz: Belgium, Brazil, Denmark, France, Great Britain, Netherlands, Italy, Panama, Norway, Colombia, Spain, Sweden and West Germany.

SURVEYORS: Aivepet, Charles Martin & Company and E. W. Saybolt maintain offices in Puerto La Cruz for inspection of cargo if required.

TIME: Local time is 4 hours slow on GMT, year round.

POLLUTION: Pollution of coastal waters is strictly forbidden by Venezuelan Law. The escape of dirty ballast or of cargo either at the dock or in the harbour or in territorial waters will result in heavy fines by Venezuelan authorities. If oil is spilled an estimation of quantity should be made by the Master of the vessel, Venezuelan Authorities and Company personnel, acting jointly. Their joint report must be submitted to the Venezuelan Petroleum Inspector from the Energy and Mines Office, and also the National Guard Headquarters in Puerto La Cruz. The Ministry of Energy and Mines will assess a fine based on the quantity of oil that was spilled. Also the ship is held responsible for the spill and cleaning. Chemicals, equipment, boat and labour used for this purpose are for the ship Owner's and/or operator's account. Each ship must maintain strict supervision on discharging of ballast as well as loading cargo in order to avoid spillage.

CUSTOMS: Venezuelan laws are strict in regard to contraband and Masters are requested to instruct crews not to take cigarettes or other articles ashore.

GENERAL: *Crew:* Passes for shore leave for ship's crew will be given to Master by Company Representative on docking or at anchorage. These passes must be filled out for each Crew member prior to Venezuelan authorities' visit. Passes may be used during the ship's stay but must be returned to the National Guard at the dock prior to departure. Before ship's departure a report must be made to the Dock Master if any Crew member is missing. Crew members left behind will be placed in custody by Venezuelan authorities until deported at vessel's expense. A Crew member requiring medical or dental treatment must submit his request for such aid through the Master to the Dock Master. Arrangements for seamen arriving from other ports, transferring to other ships or being repatriated are handled by the vessel's Agency.

Under the Venezuelan law the vessel is responsible for all seamen in the country during their entire stay. Masters are requested to leave written instructions with the Dock Master for handling seamen left ashore. The Master of the ship must indicate his acceptance of the responsibility for all costs incurred in handling a seaman.

Seaman Left Ashore: A letter from the Master is required advising the amount of cash advance and any other instructions concerning the seaman's repatriation. All expenses incurred by the seaman, including the cost of repatriation are for the vessel's account. The documents and personal effects of seamen left ashore for hospitalisation, repatriation or any other reason, must be delivered to the Terminal Office before sailing. Venezuelan Law holds the Master, ship's representatives and Owners responsible for any seaman left behind in this country.

In Dock: Masters are requested to observe the following regulations while alongside the Company Terminal:

1. – Sufficient number of Crew members must be on board at all times, during discharge of ballast and loading of cargo to ensure proper handling of mooring lines.
2. – Rat guards are to be on all mooring lines during entire stay.
3. – Venezuelan authorities do not permit blowing of heavy smoke from vessel's funnel, while in port. Breaking of this rule may result in Government fine and/or removal of ship from the dock.
4. – Venezuelan National Guard personnel are assigned to guard duty for each ship while it is at the dock. Meals must be furnished for these guards in the Officers' Messroom.

Visitors: All visitors to vessels are prohibited, without written permission of the Port Authorities. Dock Master, Petroleum Inspectors, Dispatchers and Terminal employees handling hoses may board ship in performance of their duties.

Charts: Not available at El Chaure.

AGENCY: All incoming vessels must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all vessel disbursements.

EL GUAMACHE: 10.52 N. 64.04 W. (See Plan Book)

SHIPMASTER'S REPORT: October 1978.

LOCATION: The Port of El Guamache is a new developing port, located about 1000 feet northward of Pta. Mangle on the Isla De Margarita (see B.A. Chart 230).

DOCUMENTS:

Clearance from last port.
Sealed envelope for Customs
Visaed B/L and Sobordos.
Despatch from last Venezuelan port, if any.
Consular Documents from last foreign port.
6 Crew Lists.
Vaccination Certificates of Crew.
4 Store Lists (Deck, Engine, Provisions, Bonded store).
4 Personal Effects Lists.
4 Arms & Ammunition Lists.
4 Passengers Lists.
4 Mail Lists.

ANCHORAGE: On the Western side of the Pta. Mangle in Bahia Guamache, depth 8–11 fathoms.

PILOTAGE: Pilotage is compulsory. Pilot boards on arrival or at anchorage. Vessels arriving at the anchorage must keep engines on stand-by and wait for shifting or berthing instructions.

Note: As at other Venezuelan ports, vessels must fly the Venezuelan flag at masthead and lower gangway for boarding party – Agents, Customs Officers, Quarantine Officers, Immigration Officers, Pilot and representative of Port Captain, etc.

RADIO: As a new developing port, no radio service at Margarita Island, all ETA wireless messages must be sent via ITT or YVG – 72, 48, and 24 hours prior to arrival

The port office is equipped with radio telephone installation, operating 0600-2000 hours, transmitting on VHF frequencies 156.8 MHz (Channel 16.) Vessels calling in Spanish language will be answered promptly; if calling in English will be answered by English speaking person when on duty.

TUGS: Not available.

BERTHING: Length 126 m. with 3 dolphins installed at each end with catwalk to dolphins. Depths of water, 36 ft. at LW and 42 ft. at HW.

STEVEDORES: Arranged by Agents, normal working hours 0700-2100, cargo discharged into warehouse.

GANGWAY/DECK WATCHMAN: Necessary, normally engaged by Customs or Police.

OPENING/CLOSING HATCHES: Normally by crew.

FRESH WATER: Not available.

FUEL: Not available.

TIME: Local time is GMT minus 4 hours.

AIRPORT: Distance about 15 km. from port. Connections to other cities.

MEDICAL: Available at Polamar City about 31 km. from the berth.

PROVISIONS: Fresh and dry provisions supplied through ship chandlers from Polamar City and delivered on board.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of wine or spirit.

REPAIRS: No repair facility available.

TELEPHONE: No telephone connection to vessel at present but provided inside warehouse and port office.

DENSITY: 1025

HOLIDAYS: As other Venezuela ports.

SHORE LEAVE: Shore leave permitted. Passes issued by representative of the "Direccion De Marina Mercante" on arrival. Shore passes to be collected prior to sailing and given to Agent.

DEVELOPMENTS: El Guamache has a development programme to construct new wharves Northward from present pier to accommodate 6 ocean-going vessels and expected to complete within 3 years.

All port facilities will be available. Margarita Island is the only free port in Venezuela. Tourism from the mainland and overseas is increasing day by day as Margarita Island has very good weather and beaches.

EL PALITO: 10.29 N. 68.07 W. (See Plan Book)

OPERATORS: Corpoven S.A.

LOCATION (of El Palito Terminal): The terminal facilities operated by Corpoven S.A. at the port of Puerto Cabello (Punta Chavez), are situated on the Venezuelan coast, 7 miles West of Puerto Cabello. The terminal has a 2,475 ft. pier, part causeway and part trestle, extending out from Punta Chavez along a shallow reef then angling into water 48 ft. deep. 2 tankers can tie up simultaneously at the berths.

WEATHER: Winds are normally from the N.E. with an average Beaufort scale force of 2-3. Average temperature about 85°F. The months of January, February and March have the roughest sea and swell, and vessels may not be able to dock due to the weather.

TIDE: The normal range of the tide is 1 ft.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA 72 hours before arrival at El Palito Terminal and another 24 hours before arrival advising any change of ETA.
2. If a vessel originally cleared for another port (including some other Venezuelan port) is diverted at sea to El Palito, certain information must be received prior to arrival, to avoid heavy fine and/or delays.
3. *No Ballast* may be pumped overside in port. Ballast disposal facilities are available at the El Palito Terminal.
4. The use of Venezuelan Government Pilots is compulsory for docking and undocking.
5. The Venezuelan flag should be displayed at the mast-head during daylight hours by vessels anchored and berthed in Venezuelan waters.
6. In addition to other clearance documents, 2 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.
7. The emergency fire signal is 5 long blasts on the vessel's whistle or siren. No other signal is to be given in case of emergency.
8. Rat guards must be in place on all mooring lines.

APPROACHES: The terminal pier is marked by the following lights: One occulting red light at the top of No. 1 (N.W.) Hose Rack, 80 ft. above sea level. Lat. 10° 29′ 51″ N., Long. 68° 07′ 13″ W., and one green light, flashing every 3 seconds at the top of No. 2 (S.E.) Hose Rack, 80 ft. above sea level, located 275 ft. S.E. of No. 1 Hose Rack. A group of 5 crude storage tanks, painted aluminium, visible 20 miles on a clear day, are located 1.25 miles 200° from the head of the pier.

DOCUMENTS:

A. Admeasurement Certificates. All vessels calling at Venezuelan ports for the first time must be measured for tonnage by the Captain of the Port. It is the usual practice to take the Ship's Panama Canal or Suez Canal Certificate, which is used as a basis of recalculating the tonnage under the Venezuelan Regulations and is returned before sailing. The Venezuelan Admeasurement Certificate is forwarded to the owners at a later date. A fee is charged for the certificate which is payable only on the vessel's first call. Vessels registered in the following countries are excluded from the above regulations: Denmark, France, Germany, Ireland, Netherlands, Norway, Portugal, Sweden, United Kingdom and U.S.A.

B. Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department. It is necessary that the following documents be ready on arrival:

- Clearance from last port (1 copy).
- Ballast Manifest from last port (1 copy).
- Crew List (9 copies).
- Passenger and Baggage Lists (7 copies).
- List of Personal Effects (5 copies).
- Store List (3 copies).
- List of Slop Chest (3 copies).
- Sailing Permit (issued by maritime authority of last port).

Vessels arriving with cargo to discharge, will also require:

- Consular Mail (one sealed envelope from each loading port).
- Manifest (Sobordo), 1 original and 2 copies from each loading port.
- Bills of Lading, 1 original and 5 copies from each loading port.
- Tally books; 6 from each loading port.
- Consular invoice: 3 originals and 3 copies, from each loading port.
- Commercial invoices: 3 from each loading port.

Vessels originally cleared for another port, and diverted at sea to El Palito, should radio Corpoven Puerto Cabello the following information as soon as the change of sailing orders are received:

- Advise diverted.
- Name and class of vessel.
- Number of crew.
- Flag of vessel.
- Last port of call.
- Port from which originally cleared.
- Estimated time of arrival at Pilot station.
- Type and amount of cargo vessel will load.
- Time required to discharge ballast.
- Master's name in full as signature (John Jones, Master).

This information is required in order to make in advance special arrangements for inward clearance to avoid payment of fines.

Outward clearance and cargo documents are delivered on board by the Marine Dispatcher. However, in order to obtain the sailing permit, a special form which is delivered on board on arrival must be completed, not later than 2 hours before sailing time. This form gives cargo and freeboard information required by the Captain of the Port. In addition, one of the 9 copies of the crew list specified above, corrected to show any changes made while in port, should be attached to the form.

HEALTH: No Radio Pratique. Health Officers board vessel at berth.

RADIO: Puerto Cabello, Venezuela, Coastal Station call sign YVL, makes radio contact with all vessels "CQ" on 8722 kHz at the following hours: 1130, 1330, 1530, 1830, 2130, 0030, 0200 GMT. Also "CQ" on 17141 kHz at 1630 GMT and "CQ" on 4322 kHz at 0430 and 0630 GMT.

VHF: Master should call El Palito Marine Terminal 3 hours before arrival on Channel 16.

PILOTAGE: The Pilot's working hours are from 0600 to 1800 hrs. There are no special charges for their assistance during those hours on workdays. On Sundays and holidays they charge overtime. There is also a charge when ship has anchored in the bay as according to the pilotage law each movement (and entering the bay is one movement) requires a Pilot. By special agreement only Pilot's overtime will be charged for anchorage, as anchorage and docking is considered as one movement with respect to Government Pilotage Fee.

Pilotage is a compulsory government service. The government charges the Pilot's assistance according to ship's net tonnage. Vessels under flags of Panama and Liberia are required to have their Venezuelan Tonnage Certificate. The government charges for docking and sailing.

Pilots are employees of the Venezuelan Government and pilotage is compulsory for vessels entering or leaving the harbour. The terminal will arrange for Pilots to board all vessels as necessary. Pilots meet the vessel via launch provided by the terminal. The Pilot may decline to moor the vessel if it is not equipped with satisfactory mooring equipment, lines, gear, etc., or if it is not sufficiently ballasted. It is the responsibility of the Master to notify the Pilot of any special conditions or peculiarities, such as defective navigation equipment, mooring lines, tackle, gear or lack of necessary equipment, which might impose hazards in connection with the handling, mooring, discharging or loading of vessels.

At the berths, vessels must be moored to the entire satisfaction of the Pilot and the terminal operators' Mooring Master.

The Pilot acts in an advisory capacity. The Master retains responsibility for the vessel at all times. In the event it becomes necessary to disregard the Pilot's advice in order to ensure the safety of the vessel, the Master must forward a full written report of the circumstances through the terminal for delivery to the Captain of the Port.

ANCHORAGE: Notice of Readiness can be tendered at anchorage. The suggested anchorage for El Palito Terminal is located 0.5 to 1 mile North or West of the seaward end of the pier. The area to the East of the pier is not recommended as an anchorage.

RESTRICTIONS: None. Vessels enter day or night and at any state of tide.

MAX. SIZE: East berth draft 38 ft. West berth draft 40 ft. Length 730 ft.

BALLAST: Due to the exposed location of the oil piers, vessels are required to be ballasted to the following minimum drafts for safe manoeuvring to and from the berths:

Overall Length of Vessel	*Minimum Draft Required*
400 ft. – 480 ft.	Forward 9 ft., Aft 17 ft.
481 ft. – 700 ft.	Forward 12 ft., Aft 20 ft.
701 ft. – 730 ft.	Forward 14 ft., Aft 23 ft.

A total capacity of 65,000 barrel tank and a 20 in. ballast line are available to receive all ballast.

Vessels with separate ballast tanks, lines and pumps may discharge ballast overside. Ballast for entering the harbour should be carried in the minimum number of tanks, and all other tanks stripped dry so as to minimise the time required for discharging ballast alongside berths.

All ships in ballast from abroad are charged for Consular Ballast Certificate.

BERTHING:

The use of both anchors is required for docking at both berths. It is considered prudent to have both anchors hove-out prior to entering the harbour in order to facilitate speedy release while mooring. The Pilot will advise whether the vessel is to be moored port or starboard side to the dock.

In the event the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents.

East Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and the West berth at a distance from it equal to the distance of the North buoy. Drop the starboard anchor at the point of intersection of the ship's fore with a line formed by the two East shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the East berth. Drop the port anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by Pilot and with the help of the ship's engines.

West Berth: Approach at very dead slow speed along a line parallel to a line formed by the East and West berths and at a distance from it equal to the distance of the North buoy. Drop the port anchor at the point of intersection of the ship's fore with a line formed by the two West shore range markers. Continue along same path at very dead slow speed until reaching with the ship's fore the West berth. Drop the starboard anchor. Allow the ship to drift into position alongside berth. This will be done by tying mooring lines as required by the Pilot and with the help of the ship's engines.

General: Available hose connections, all 8 in., are as follows: 3 for Fuel oil, 1 for diesel products and 1 for leaded or unleaded gasolines. All dirty ballast to be pumped ashore through the fuel oil loading hoses.

LOADING:

Cargo: On completion of inward clearance, information regarding the number of hoses and loading rate will be given to the Master and Chief Officer. During ballast discharge supplementary information will be given to the Chief Officer. A 15 minute standby is required prior to finishing any grade.

Contamination of Crude: It has been established that one of the major causes of contamination of crude oil is the small amount of salt water remaining in the ship's tanks, pumps and ballast lines after discharging ballast. This small amount of salt water frequently results in costly damage and downtime to refining equipment and also presents many other problems. Therefore all tanks and lines must be pumped as dry as possible.

Draining of Hoses: Hoses are drained by gravity on all products and crude. Ship personnel must co-operate with terminal personnel in this operation to ensure complete draining of hoses into ship tanks and adequate drip cans must be placed to catch the remaining oil in line. Sand or equivalent must be on standby to clean up any oil leaks.

Loading Rates:

Commodity	*Available at berths*	*Size of line (in.)*	*Estimated max. barrels per hour*	*Hoses Pier 1 (in.)*	*Hoses Pier 2 (in.)*
Crude oil	1 – 2	24	27,000	3×8	2×8
Bunker C	1 – 2	24	17,500	3×8	2×8
Diesel	1 – 2	16	8,000	1×8	1×8
Unleaded gasoline	1 – 2	16	8,000	1×8	1×8
Leaded gasoline	1 – 2	16	8,000	1×8	1×8
Ship's bunkers	1 – 2	24/16/8	6,000	1×8	1×4
Lube	1 – 2	8	2,000	1×8	1×4

Loading rates will be reduced by the terminal when topping off tanks at the vessel's request.

Scuppers: Loading will not be started till all deck scuppers are properly sealed to the satisfaction of the terminal.

Simultaneous Deballasting and Loading: Vessels equipped with separate and completely segregated ballast tanks, and lines and pumps never used for oil may be permitted to discharge ballast and load simultaneously providing approval has been obtained from the terminal.

TUGS: Use of tugs compulsory. Usually 2 tugs, from 1,500 h.p. to 2,800 h.p. approximately, assist during docking and 1 (1,600 h.p.) during undocking.

MEDICAL: Medical treatment and hospitalisation, if required, are available at the Seguros Sociales in Puerto Cabello. Several dentists are located in Puerto Cabello. Authorisation for any medical and/or dental treatment must be made by the Master. Transportation is available at the Terminal Office. If the patient does not speak Spanish an interpreter should accompany him.

FRESH WATER: Not available.

FUEL: Bunkers are available only for vessels loading cargo. Disputes as to quantity should be registered by signing the bunker receipt under protest and noting the ship's quantities thereon.

CUSTOMS: While the vessel is in port, Venezuelan National Guard officials are assigned on board to ensure compliance with Customs regulations. The law requires that meals be supplied to these officials during regular meal hours.

Venezuelan laws are strict in regard to contraband and Masters are requested to instruct their crews not to take cigarettes or other articles ashore.

Cigarettes in cartons, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel), should be collected prior to arrival in port, listed with the items in the slop chest and placed in the custody of the Master for deposit in the slop chest which will be sealed for the duration of the vessel's stay in port.

CONSULS: French, Norwegian, Danish, Italian and Panama Consulates are represented in Puerto Cabello. There is no American Consulate. It is necessary for Masters of Panamanian flag vessels to visit the Panamanian Consulate at Puerto Cabello to present documents and receive dispatch as required by law. Regular office hours are from 0800 to 1200 hrs. and from 1400 to 1700 hrs. Mondays through Fridays; any dispatch issued outside of regular office hours is billed at double fees. Terminal Office will arrange transportation to Puerto Cabello upon request.

REPAIRS: Only emergency repairs of a minor nature can be made. Prices are very high.

REPATRIATION: The documents and personal effects of seamen left ashore for hospitalisation, repatriation or other reason, must be delivered to the Terminal Office before sailing. A letter from the Master is required advising the maximum amount of advances to the seaman and any other instructions concerning his repatriation. All expenses incurred by the seaman, including the cost of repatriation, are for the vessel's account. Venezuelan law at all times holds the Master, Agent or Owner responsible for any seaman left behind in Venezuela.

REGULATIONS:

Engines: No engine repairs will be made while the ship is in dock. Engines are to be kept at standby at all times while the ship is in port.

Rat-guards: Vessels must use rat-guards on all mooring lines.

Visitors: All visitors to vessels are prohibited, without written permission in each case by the Port Captain or his assistant. Mooring Master, petroleum inspectors, dispatchers, and terminal employees handling hoses may board ship in performance of their duties.

Pollution: The laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast or oil is to be pumped or allowed to escape over the side. No engine-room or pump-room bilges may be pumped overboard. All pump-room sea suctions and overboard discharge valves must be secured prior to loading or discharging cargo. Loading must be conducted with the utmost care and vigilance so that errors or delays may not result in spills. All deck scuppers must be plugged tight before loading so that in the event of a spill pollution of the harbour may not result.

Garbage: No garbage is to be thrown over the side while the vessel is in port.

Passengers: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include this information in his ETA.

Firearms: Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be noted on the store list. Officers must not carry firearms while the vessel is in Venezuelan waters and these sidearms and ammunition should be collected and held in the Master's safe custody.

AIRPORT: Distant about 4 miles.

TIME: Local time is about GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing and given to the National Guard watchmen on board.

Vessels are not permitted to sail until all crew members are on board, or special permission has been obtained to sail without a crew member.

GENERAL:

Bonded Stores: No cigarettes or bonded stores are available at El Palito.

Cash Advances: Cash advances are available in Venezuelan Bolivares only and should be included in the vessel's radio ETA, to permit delivery on board on arrival.

Charts: No charts or sailing directions are available at El Palito.

U.S.S. Club: There is no U.S.S. Club available at El Palito or film exchange service.

Inspection of Cargoes: According to prior arrangements between Owners/Charterers/Suppliers.

Laundry: Laundry facilities are available at El Palito.

Lubricating Oil: Certain types of Corpoven lube-oils only are available in small quantities. Requirements should be sent by radio with ETA.

Mail: Mail service posted from El Palito has been found to be fair.

Provisions: Provisions are available at El Palito.

Radio and Radar: Arrangements to be made with port Agents prior to arrival.

Gangways: Gangways are provided by El Palito Terminal.

AUTHORITY: Corpoven, S.A., – Refineria, El Palito, P.O.Box 102, Puerto Cabello 2023A, Edo Carabobo, Venezuela. *Tel:* (041) 422627, 421110, 421005, 423111 and 423115. *Telex:* 28013, 23571. *Cables:* Corpoven Pto. Cabello. *Contact:* El Palito Marine Terminal.

AGENT: See "Puerto Cabello".

GUANTA: 10.15 N. 64.35 W. **(See Plan Book)**

SHIPMASTER'S REPORT: 1978.

LOCATION: Lat. 10° 15′ N., Long. 64° 35.5′ W. About 5 miles East of Puerto La Cruz.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists (or negative).
6 Ship's Stores Lists.
6 Crew Personal Effects Lists (well detailed).
1 Declaration of Health.
Clearance from last port.
Cargo Manifests.
Full set of Manifests and B/Ls.

Entry Formalities: Normally carried out after docking unless there are no berths available; then vessel can be cleared at anchorage in Bahia Pozuelos, during daytime. At night only in case of emergency.

Accommodation ladder must be rigged.

Hours of entry: From 0700 till 1100 hrs. and from 1300 till 1700 hrs. Overtime outside these hours.

APPROACHES/PILOTAGE: A vessel bound for Guanta has to enter Bahia Pozuelos as she must first call at Puerto La Cruz to embark a Pilot. The anchorage area for waiting berth turn is also in Bahia Pozuelos. This anchorage is in depths of 48 ft. to 80 ft. and is well protected from swell by surrounding islands. No size limitation.

Bahia Pozuelos is the anchorage and Pilot embarking area for 3 ports: Puerto La Cruz, Guanta and Pertigalete.

The use of government Pilot is compulsory for all vessels docking or undocking. ETA: 48 and 24 hours in advance via the vessel's Agent.

Pilot boarding hours: From 0530 till 1700 hrs. every day. Vessel cannot dock after sunset. Sailing may be arranged at any time.

HEALTH: All vessels boarded by Port Doctor. No automatic Pratique.

RADIO: Curacao Radio PJC. No local station.

VHF: All Agencies maintain radio watch on Channel 16 during office hours. Tugs and launches also equipped with VHF (call: "Ramrey").

TUGS: 3 tugs available: 1 of 1,700 h.p. and 2 of 1,200 h.p. All privately owned. Sometimes vessels bound for Guanta or Pertigalete have to wait for 2 or 3 hours as these private tugs have contracts with oil companies in Puerto La Cruz and are available only when no tanker is docking or undocking. Tug's lines used. Normally tugs join the vessel inside Guanta Bay.

BERTHING: One concrete pier on piles, 763 ft. in length where vessels normally dock starboard side to. The apron is 20 ft. wide in centre, 42 ft. at ends.

One modern concrete pier on piles, 1,056 ft. in length where vessels normally dock port side to. The apron is 115 ft. wide in centre and 85 ft. at ends. The piers are well fendered with rubber hoses and used tyres.

Height of piers above HW: 10 ft. Mean tidal range: 1 ft. 6 in. Max. draft alongside small pier: 23 ft. 08 in. Minimum draft alongside long pier: 26 ft. 08 in. Depths varies from a minimum of 27 ft. to a max. of 34 ft. at the Western end of the long pier.

BULK CARGO FACILITIES: On the Eastern side of the Guanta Bay, there is a berth for loading coal by means of a fixed chute. Depth alongside 30 ft.

Grain Cargo: Receivers supply suction machines. There are 2 machines available, capacity 1,000 tons per machine during 24 hours. Grain vessels work round the clock.

Liquid Cargo: Sometimes tallow and liquefied gas are handled. Discharged by vessel's pump into tank trucks. Hoses normally supplied by vessel.

CARGO HANDLING FACILITIES: All cargo normally discharged by vessel's own gear, directly on to truck or trolleys. The piers are not connected to the railroad. No floating crane.

The following mobile cranes are available in the port area: 1 crane max. 120 tons; 1 crane max. 30 tons, with telescopic extension boom, max. 60 ft.; 2 small cranes max. 6 tons with a boom length of 30 ft.

Forklifts: 15 forklifts capacity 3.5 tons; weight 5.2 tons with fixed counterweight. To use these forklifts on board, the hoisting gear should lift over 6 tons.

2 forklifts capacity 5 tons, weight 12 tons; 1 forklift capacity 20 tons, weight 25 tons, specially for containers.

Flatbed trolleys: 30 trolleys capacity 8 tons; 1 trolley capacity 70 tons.

No lighters available.

All discharging gear normally supplied by Agency. For heavy lifts, it is recommended to have special slings on board.

CONTAINER HANDLING FACILITIES: No container berth. No crane. 1 forklift capacity 20 tons. There is a small container stacking area.

STEVEDORES: Normal working hours: 0700 – 1100 hrs. 1300 – 1700 hrs. (Monday to Friday); 0700 – 1100 hrs. (Saturdays).

Overtime: Monday to Friday, 1800 – 2300 hrs. (night shift); Saturday, 1300 – 1700 hrs.

Normally port does not work after 1700 hrs. on Saturdays or Sundays.

Ordering of gangs: For 0700 hrs. requested previous day before 1500 hrs. For 0900 hrs. requested same day at 0700 hrs.

Overtime rates: 50% for the night shift (Monday to Friday); 100% for Saturday afternoon shift.

The gangs consist of 12 longshoremen and 12 stevedores, including 2 winchmen, 1 signalman and 1 checker.

Capable supervision only available from Agency.

Rigging or cleaning gangs are available.

MEDICAL: Private hospitals at Puerto La Cruz. Private doctors generally do not visit ships. If medical attention is required on board, the Port Doctor will attend patient, unless he authorises another doctor to make the visit.

In case of emergency, when the vessel is anchored in Bahia Pozuelos, a launch can be arranged to pick up the sick crew member.

DENSITY: Salt water all the year round.

FRESH WATER: Available at 5 Bolivares per ton at the main pier only. Hoses supplied by ship. Rate: about 5 t.p.h.

Presently there is no water available at Berth No. 3 (Western end of pier).

FUEL: No Bunker "C".

Diesel: Delivered by trucks; arrangement must be made at least 24 hours in advance.

Gas Oil: Delivered by trucks under previous arrangement.

GARBAGE DISPOSAL: No facilities.

CONSULS: See "Puerto La Cruz".

REPAIRS: Only minor engine or electric motors can be repaired.

GANGWAY/DECK WATCHMEN: Not available. No shore gangway available.

DRY DOCK: Not available.

SURVEYORS: None.

CUSTOMS ALLOWANCES: 200 cigarettes and one open bottle spirits.

REPATRIATION: Can be arranged. No special requirements.

IDENTIFICATION CARDS: Passes for shore leave are issued by officials of the Port Captain's Office, when boarding the vessel for clearance. These passes should be filled out on board. They are valid for the duration of the vessel's stay in port only and have to be returned before sailing.

In order to comply with Immigration Regulations, crew should be carefully checked before departure and any missing seaman reported to the Agent. The same applies to passengers in transit.

AIRPORT: At Barcelona, about 15 miles by road. 3 flights daily to Caracas.

TIME: 4 hours slow of GMT, all the year round.

HOLIDAYS: New Year's Day, Holy Thursday, Good Friday, Holy Saturday, April 19th, May 1st, June 24th, July 5th, July 24th, October 12th, November 24th, Christmas. No labour available on these days.

TELEPHONES: No facilities at Guanta. Private calls can be made from the central office at Puerto La Cruz (5 miles) during the following hours: 0700–2100. Long distance calls dispatched quicker from the Hotel Melia at Puerto La Cruz.

SHORE LEAVE: From a ship anchored in Bahia Pozuelos: Allowed if the vessel has been cleared and if every crew member has shore pass. One private launch available but very expensive.

From Guanta berths: Allowed with shore passes.

DELAYS: Presently, Guanta is somewhat congested and the waiting time varies from a few days to 15 days, especially during the rainy season.

GENERAL: Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast or throwing garbage or dunnage in territorial waters. Heavy fines are imposed for pollution of waters and sometimes fishermen are quick to report any infringement.

Berthing Turn: On the basis "first come, first served" but Venezuelan vessels have some priority.

Supplies and laundry: Several private firms based at Pto. La Cruz. Nearly all kinds of fresh provisions are available.

Laundry service available; may be completed in 8 to 10 hours.

General: Guanta is a natural harbour surrounded by mountains which protect the bay completely in bad weather. The port has never been closed for bad weather.

Venezuelan Flag: Upon arrival at Pozuelos Bay ship should display the flag from the foremast at all times. When anchored or docked, the flag should be displayed only between sunrise and sunset.

Warehouses and Cargo Sheds: No transit cargo shed. No refrigerated storage available.

There are 5 warehouses with a total floor space of 75,000 sq.ft.

Open Space: A total of 5.7 acres, mostly covered with asphalt or concrete.

Weather: The rainy season starts in mid-May and ends in November or December. During the rainy season it is usually calm in the early hours of the day followed before mid-day by light Westerly or variable breezes. In the afternoon the breezes change to North-Easterly at about 12 knots until midnight. During the dry season the cycle is similar but the North-Easterly wind may reach 25 knots. This can prevent all communications between anchored vessels and the shore.

AUTHORITY: "INP" Instituto Nacional de Puertos.

SHIPMASTER'S REPORT: 1975.

LOCATION: Lat. 10° 14.7′ N., Long. 64° 35.5′ W.

Guanta is located in the Bay of Guanta. It is a well protected port against currents and winds.

The port is entered between 2 well lighted islets.

DOCUMENTS:

Maritime Declaration of Health (together with inoculation list of crew).
10 Passenger – (or non-passenger) Lists.
10 Transit passenger – (or non-transit passenger) Lists.
10 Crew Lists.
4 Personal Effects Lists. (new clothes, etc., to be mentioned).
4 Ship's Stores Manifests.
Clearance last Port.

PILOTAGE: Government pilotage is compulsory. Pilot is embarked and disembarked near the sea buoy of Puerto La Cruz, in position: 10° 15.5′ N., 64° 41′ W.

ANCHORAGE: On the Pto. La Cruz roads.

RESTRICTIONS: Entering: In daylight hours only: 0600 – 1800.

Sailing: Day and night.

TUGS: One powerful tug available, compulsory to use when ship's length more than 90 m.

BERTHING: *New Pier:* Length 322 m. *Old Pier:* Length 233 m.

Water Depth: According to Pilots information: *Old Pier:* 29 ft. *New Pier:* 34 ft.

STEVEDORES: *Working Times:* Monday to Friday: 0700 – 1100 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. Saturday: 0700 – 1100 hrs., 1300 – 1700 hrs. Sunday: No work is done.

Gangs have to be ordered by 1500 hrs. the day before required.

FRESH WATER: Ships can replenish their fresh water tanks without charge (Included in port charges). Own hoses to be used.

OPENING/CLOSING HATCHES: Opening/Closing hatches, setting derricks: Special Rigger gangs take care of this. It is absolutely forbidden for ship's crew to touch these kind of jobs.

GENERAL: *Waste Water:* Special care should be taken to prevent waste water, from sanitary or engine-room systems fouling the jetty. Heavy fines are made in case this happens and a special shore gang might be ordered to clean same.

Customs: 2 Customs Officers have to be provided with food.

OPERATORS: Servicio Portuario de Guanta.

GUARANAO: 11.40 N. 70.13 W.

SHIPMASTER'S REPORT: January 1983.

LOCATION: The port of Guaranao is located on the Gulf of Venezuela on S.W. coast of the Peninsula de Paraguana, Venezuela. It lies between Amuay Bay to the North and Punta Cardon to the South.

DOCUMENTS: Inward clearance is effected on board immediately after docking by Government Port Officials and a representative of the Marine Department.

The following documents must be ready on arrival:

Clearance from last port (Consul mail) 1 visaed.
Crew lists (7 copies).
Passenger lists if any (5 visaed copies).
Baggage lists if any (3 visaed copies).
List of Personal Effects (4 copies).
Store lists (2 copies).
Sailing Permit (Zarpe).

PILOTAGE: Compulsory. Vessels have to wait for Pilot about 0.5 miles offshore at anchorage. Ship's can make contact with pilot station by VHF on Channel 16 or 12.

ANCHORAGE: Generally ships must anchor about 0.5 miles offshore to wait for Pilot. Good anchorage is obtained in depths of 28 ft. (8.5 m.), muddy bottom and depths of less than 18 ft. (5.5 m.) extend up to about 0.25 miles offshore in this bay, and depths of less than 36 ft. (11 m.) extend about 7 cables NNW from Punta Zarobon (Guaranao).

APPROACHES: Masters when approaching the coast should keep a sharp lookout for fishing boats, nets, small craft or sunken wrecks. From Punta Zarobon the coast, which is bordered by cliffs from 85 ft. to 65 ft. (25.9 m. to 19.8 m.) high, trends about 2 miles SSW to Punta Gorda.

RADIO: Arrival notices and radio messages to and from ships at sea are usually transmitted through Curacao (PJC) and routed through Agent's head offices at Caracas, Venezuela. The port radio control is Las Piedras Paranagua.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: A pier extends about 3 cables Westward from ship at Salinas, Guaranao, and the Southern half of this pier is for Ro-Ro vessels stern to. A floating pier about 1 cable distance South of and parallel to the former, extends Westward from shore about 810 ft. (247 m.) and is 164 ft. (50 m.) wide.

CARGO HANDLING FACILITIES: There are fork lift trucks of all sizes, 6 mobile cranes at the floating pier, and some towing vehicles.

MEDICAL: Services available.

FRESH WATER: Not available.

FUEL: Available if advance notice is given. Fuel/diesel oil and lubricating oil can be obtained from either Amuay Bay or Punta Cardon.

FIRE PRECAUTIONS: This port is used for discharging general cargo, especially waste paper and timber. Waste paper is considered as dangerous cargo, therefore Masters are called to pay attention to their fire-fighting equipment and to have it ready during discharging waste paper.

WATCHMEN: Not available.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned before the vessel sails.

GENERAL: *Stores:* Provisions, deck and engine stores available but not bonded stores.

Garbage Disposal: No facilities.

LA GUAIRA: 10.36 N. 66.56 W. (See Plan Book)

PORT LIMITS: Between the points 10° 37′ 40″ N., 66° 48′ 30″ W. and 10° 37′ 40″ N., 67° 07′ 07″ W. and the coast line.

DOCUMENTS:

- Sealed envelopes for Customs.
- Visaed B/L and Sobordos not in envelopes.
- Consular Despatch for all Venezuelan ports.
- Despatch from last Venezuelan port, if any, or
- Zarpe from last foreign port, if arriving directly from abroad.
- Fumigation Certificate.
- Bill of Health.
- Vaccination Certificates of Crew.
- 4 Store Lists (with arms and narcotics).
- 4 Lists of Personal Effects.
- 6 Crew Lists.
- 12 Lists of Passengers for La Guaira, or negative Passenger List.
- 8 Lists of Passengers in Transit.
- 2 Lists of Luggage (only for passenger luggage).
- 1 Master's Declaration.
- 1 List of Vagrants, if any.
- 8 Cargo Lists.

PILOTAGE: Compulsory and vessels have to wait for Pilot in the pilotage zone N.W. of the entrance. Ships can make contact with the pilot station by VHF Channel 16 or 12.

ANCHORAGES: Generally ships must anchor in the N.E. area of the entrance, the depth varies from 8 to 20 fathoms. The bottom is sand and occasionally rocks.

RESTRICTIONS: There are no restrictions imposed upon entry.

MAX. SIZE:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
01-E	176	10.95	Roll-on/Roll-off
01-D	176	10.95	General Cargo
01-C	176	9.55	12 ton electrical cranes
01-B	176	8.55	12 ton electrical cranes
01-A	176	8.80	12 ton electrical cranes
01	155	9.15	12 ton electrical cranes
02	155	9.75	12 ton electrical cranes

TUGS: The use of tugboats within the port is compulsory, both for entering and leaving port, as well as for manoeuvres in the port area. Ships longer than 139 m. must be assisted by 2 tugboats.

Ship's lines are used in the manoeuvre. The Port of La Guaira has 2 tugboats of 1,800 h.p. each. Normally they join the vessel at the entrance of the port.

BERTHING: Normally a minimum of 24 ocean-going vessels can berth at one time. Berth Nos. 01-E, 01-D, 01-C, 01-B, 01-A, 01, 02 and 03 are along the breakwater pier East-West, parallel to the coast. At piers Nos. 01-C, 01-B, 01-A, there are 12 electrical cranes of 12 tons. At pier No. 03 ships discharge grain directly to a silo by 2 grain towers, average daily rate 2,000 tons. Silo capacity 12,000 tons.

Within the port is a finger pier, parallel to the breakwater pier, with 2 Customs warehouses alongside, with berths North and South, 2 each. The main pier is parallel to the coastline, East-West, with berths Nos. 10, 11, 12, 13, 14 and 15,, along which piers there is ample Customs warehouse space, including outdoor space on the roofs as well as ample uncovered storage area. There are 15 × 6 ton electrical cranes at this pier.

The Passenger Terminal is on a finger pier, in direction North-East with its land end in the corner of berth No. 15. There are 2 berths each side, namely Nos. 16 and 17 in the inner basin and Nos. 18 and 19 in the outer basin.

Passenger vessels have priority for berthing and they have to leave port within 24 hours.

BULK CARGO FACILITIES: Bulk carriers only discharge, at piers 01-D, 01-C and 03. There are no facilities for cargo.

SPECIALISED CARGO HANDLING FACILITIES: The only berth specially equipped for Roll-on/Roll-off traffic is pier 01-E but pier Nos. 04, 09 and 16 are also used for this kind of cargo.

There is no fixed equipment for handling containers but the Instituto Nacional de Puerto has some mechanical equipment for handling containers.

This port does not have any other facilities for specialised cargo handling.

HEALTH: Ships from Venezuelan ports obtain Free Pratique. Ships from abroad must send a cable to Health Authorities requesting Free Pratique, or advising illness.

RADIO: In order to enable Agents arrange for quick entry and berthing, Masters should give their ETA message at following intervals, via Curacao Radio (ITT): 72, 48 and 24 hours prior to arrival, indicating in the 48-hour message, the quantity of parcels (or tonnage if bulk cargo) per hatch. This is imperative for applying for the necessary personnel of the Instituto Nacional de Puerto (I.N.P.). Also, draft, passengers, requirements for bunkers, fresh water, provisions, repairs, medical assistance, etc. This telegram the Master to sign with his full name.

VHF: Communication with the Port Authorities and the pilot station are possible by VHF. Ship must make contact on Channel 16 and change after to some Channel between 1 and 70, Channel 12 is normally used for this manoeuvre.

BRIDGES: There are no bridges.

STEVEDORES: Supplied exclusively by Instituto Nacional de Puerto at costs per weight of cargo in accordance with governmental decrees.

The Port Agent applies for the necessary number of gangs per ship. Each gang consists of 11 stevedoremen (estiba) and 11 longshoremen (caleta).

Switching of gangs from one hatch to another is not permitted.

There are no longshoremen costs for cargo handled during straight time, but only for that handled during overtime.

(a) *Straight time*
Monday – Friday 0700 – 1100 hrs.
1230 – 1630 hrs.
Saturday 0700 – 1200 hrs.

(b) *Overtime*
Monday – Friday 1800 – 2300 hrs.

(c) *Saturday afternoon* work is not permitted, but if a vessel could terminate operation and sail within a maximum of 3 additional working hours, a special permit would be granted by Customs and Port Authorities. In such a case, the additional working hours are considered as overtime.

(d) *Work on Sunday* is not permitted except for passenger vessels (officially those carrying 69 passengers, but exceptionally vessels with fewer passengers might occasionally obtain same consideration by authorities).

EQUIPMENT:

(a) *Electric Shore Cranes:* Berths 01-C to 01-A have 12 electrical cranes on rails of 12 tons capacity each. Berths 10 to 15 have 15 on rails of 6 tons capacity each. The Instituto Nacional de Puerto allow 2 × 12 tons cranes to lift pieces up to 20 tons or 9 tons weight. At pier 10 the arms of the cranes reach the roofing of the warehouses. Use of shore cranes is not compulsory, unless the Technical Board of the Instituto Nacional de Puerto rules to use them. Other piers have no shore cranes.

(b) *Diesel-Driven Rolling Cranes:* There are a considerable number of these cranes which can lift heavy pieces of about 17 tons.

(c) *Floating Cranes:* Not available.

(d) Special lumber carriers of about 20 tons capacity.

(e) Tow trucks, fork-lifts, trucks and trailers up to 10 tons capacity.

LOADING/DISCHARGING: Cargo is discharged on the pier, when free it is taken away by fork-lifts and/or other mechanical equipment supplied by Instituto Nacional de Puerto. The use of such equipment is included in the handling fee for weight.

There are 2 grain towers on berth No. 3 leading via conveyor belts to storage silos of 12,000 tons capacity. Average daily discharge rate 2,000 tons approximately.

At berth Nos. 10 to 15 discharge to the roof of the warehouse or on the pier is possible.

OPENING/CLOSING HATCHES: Not performed by the Instituto Nacional de Puertos but by either the ship's crew, or the assistance labour of the Agent.

FRESH WATER: Available through pipe-line on the pier, day or night, by water trucks of up to 10 tons capacity in day time only.

GANGWAY/DECK WATCHMEN: The watchmen service is not necessary. It is recommended to use a seaman as watchman.

MEDICAL: There are several hospitals in the town and all the medical attention necessary. Should medical assistance be needed on board, contact the Agent.

DENSITY: The average salinity of water in the port is 1.025.

CONSULS: The following countries have consuls in La Guaira; West Germany, Belgium, Mexico, Norway, Panama and Sweden. The following countries have Vice-consulates; Denmark, Spain, Italy and Portugal.

REPAIRS: All kinds of deck and engine repairs are possible.

DRY DOCKS: There are no dry docks in this port. (The nearest is at Puerto Cabello).

SURVEYORS: All Classification Societies and P&I Clubs are represented in the port.

POLICE/AMBULANCE/FIRE: *Police:* 26148, 26347 and 27098. *Ambulance:* 22165. *Fire:* 22165 and 22587.

REPATRIATION: There are all kinds of facilities for making crew changes and arranging any necessary repatriation.

AIRPORT: The distance to the International Airport at Maiquetia is 10 km., this is served by different regular airlines.

TIME: GMT minus 4 hours. No change.

HOLIDAYS: January 1st, (New Year); February 18th/19th, (Carnival); April 3rd/4th (Easter); April 19th, (Independence Day); May 1st, (Labour Day); June 24th, (Carabobo Battle); July 5th, (Independence Day Declaration); July 24th, (Simon Bolivar's Birthday); September 4th, (Public Funcionary Day); October 12th, (America Discovery); December 25th, (Christmas).

TELEPHONES: It is not possible to place telephones on board, however calls can be made in the "CANTV" office.

SERVICES: There are no special services available. Radar repairs possible.

SHORE LEAVE: Crew members can go ashore with shore passes issued by the Port Authorities.

IDENTIFICATION: Shore passes are sufficient to go ashore.

REGULATIONS: *Dangerous Goods:*

1. Dangerous goods should be discharged directly to trucks.
2. When goods are grain or powder in bags, these should not exceed 50 kg.
3. Cargo with damaged packing will not be discharged and it should be repacked on board.
4. Cargo should be duly identified and with their dangerous goods labels.
5. Cleaning of the piers after loading or unloading should be done by the importer or exporter, otherwise they should cover the expenses if the INP has to do this cleaning.

OFFICIALS: Once the vessel is anchored at La Guaira, Representatives of Customs, Port Captain, National Guard, Health Service, Immigration and Agency board the vessel.

DEVELOPMENTS: Increase in draft to 35 ft. expected.

AUTHORITY: Harbour Master, Capitania de Puerto, Terminal de Pasajeros de La Guaira.

AGENT: Head Office (Control), Management/Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., P.O.Box 1632, Caracas 1010-A. Cables: "Selvic" or "Seltank" Tel: (02) 81.02.71, Telex: 21402, 21934, 22859, 21631. Local Office: P.O.Box 304, La Guaira. Tel: (031) 27092, 27566, 27340. GENERAL: The following "Depth Bulletin", dated June 1978, was received from a Shipmaster in February 1979.

REPUBLIC OF VENEZUELA
NATIONAL INSTITUTE OF CANALIZATIONS
ZULIA ZONE

Depth Bulletin No. BP – 6-78 Dated: 13-06-78

The following data represents the latest information reported and refer to the date shown for each section of the channel. Depths are expressed in metres and are related to the same level of the local Navigation Charts 1001, 1002, 1003 and 1004 of the M.M.M. Mean Monthly Lowest Low Water.

The controlling depths refer to the centre area of the channel demarked by parallel lines on either side at a distance of 60 m. in the outer channel and 45 m. in the rest of the channel. The Puerto Miranda Channel is of 30 m. The theoretical position of the buoys in the aforementioned navigation charts are located at a distance of 30 m. from the edge of the channel.

Main Channel

Channel	*From*	*To*	*Date*	*Depth (m.)*	*Remarks*
Outer Section	B – 1	B – 28	19-05-78	12.8	
Inner Section	B – 28	T – 56	10-05-78	12.8	
SOUTH PROLONGATION	T – 56	B – 59	28-04-78	12.8	Entrance to Puerto Miranda (B – 59)
	B – 59	B – 66	26-04-78	12.8	Entrance to La Estacada (B – 66)
	B – 66	B – 76	10-03-78	12.8	Entrance to the Port of Maracaibo
	B – 76	B – 86	24-05-78	13.1	Entrance to Bajo Grande (B – 86)
	B – 86	B – 96	07-02-78	13.1	Entrance to La Ensenada
	B – 96	Parallel 10° 22′ N	14-02-78	12.8	Entrance to La Salina Channel (B – 97 and 10° 22′ N)

Puerto Miranda Channel		AP – 2	11-05-78	11.6	

Signed............................. The Port Captain

Signed............................. The Director N.I. of Can. Zulia Zone

(N.B. Certain information common to all Vessels entering Maracaibo Lake is given below. For specific details of ports/terminals within the Lake, see relative Section as indicated above).

FLAG: Local authorities require that the Venezuelan ensign be flown at vessel's masthead, from the time of entering the outer channel until clear of the outer channel outbound.

DOCUMENTS: *(a) Inward Clearance for Scheduled Vessels:* Vessels arriving in ballast or with cargo in transit require following documents:

1 copy Sailing Permit from Last Port.
2 copies Ballast Certificate.
1 or more letters Consular Mail (in sealed envelope).
4 copies Passenger Lists.
4 copies Baggage Lists.
4 copies List of Passengers in Transit.
4 copies List of Slop Chest.
4 copies List of Personal Effects.
4 copies Store Lists.
5 copies Crew Lists.

Vessels arriving with cargo should have, in addition to the foregoing:

4 copies Sobordos (Venezuelan Inward Manifests).
6 copies Bill of Lading.
2 copies Inward Manifests.

(b) Inward Clearance for Diverted Vessels: Vessels diverted to Maracaibo Lake Ports to load cargo, should submit all documents indicated above, except consular mail, which they will not have.

Vessels diverted at sea to Maracaibo Lake Ports which do not have a Venezuelan clearance on board, must advise loading port via radio to arrival, the name of vessel, Master's name, vessel's flag, Venezuelan net tonnage (if available, if not, the registered net tonnage), last port of call, destination port for which originally cleared, ETA San Carlos Pilot station and grade and quantity of cargo to be lifted. This information is required in order that Inward Clearance may be arranged with government officials in ample time prior to vessel's arrival. Also 3 copies of the diversion telegram received by vessel and signed by Master, together with copies of those documents listed under *(a)* should be presented to the Port Authorities upon arrival at Maracaibo. In the absence of this information, or of presentation of each of these documents to the Port Authorities the vessel will be subject to a fine. Please note, that the documents covered under *(a)* have to be presented upon arrival, regardless, if the vessel is not arriving with consular clearance or arriving after being diverted at sea.

(c) In Maracaibo 2 clearances from Custom's authorities are needed: One for proceeding from Maracaibo to loading berth, and another after loading for proceeding from Maracaibo to destination. For this reason Custom Dispatch charges may be incurred twice.

(d) American Crew List. All non-American vessels loading for a U.S.A. port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service form No. I. – 418 (Crew List Manifest) and should contain 2 sections:

Section 1 should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 should list, in the alphabetical order of their last names, those alien crew men who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible. Occasionally the names of the crew men included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition.

The information requested under columns 1, 2 and 3 should be filled in completely. Column 1 should always contain the complete first name and middle initial of the crew man. Column 2 should show the nationality of each crew member and the number of his travel Document. Column 3 should always include the name of the port where the crew man was shipped, not simply the country.

At the time of vessel's first application for a crew list, the crew list must be presented in four copies: Original and 1 copy should contain only information requested under Columns 1, 2 and 3. 2 copies must include following information of those crew men to be included on crew list visa. Column 4 should list date, city and country of each crew man's birth. Column 5 should show place of issuance of seaman's travel document and name of Government which issued travel document. (It is not necessary to list date of issuance of travel document).

Below is a sample line correctly entered on the Master crew list.

(1)	(2)	(3)	(4)	(5)
Bello, Tomas E.	Z.23455 Venezuelan	Maracaibo Venezuela	December 8, 33 Caracas, Venez.	Cabimas, Venez

Upon subsequent crew list applications by same vessel within same year, the crew list need be presented in duplicate only, and the information in Columns 4 and 5 need be provided only concerning any new crew members who require visa documentation. When twelve months have elapsed since presentation of Original crew list, a crew list should again be prepared in 4 copies and should contain all the information required in columns 1 – 5. Such a Master crew list is required after each 12 months' period.

APPROACHES: Also see "General" above. The channels leading to the Lake of Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel. The controlling depths of the Outer Channel, Inner Channel and the channel Southward to buoys M1 and M2 are normally 45 ft. At certain times the controlling depth may be less. At such times suitable notices are published advising mariners of these temporary reductions of controlling depth.

Outer Channel. The Outer Channel starts at the E.M. Buoy in position 11° 13′ 47″ North and 71° 33′ 31″ West. The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles. The distance from E.M. buoy to the Southern end of the Outer Channel, marked by buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and has a normal controlling depth of 42 ft. minimum monthly observed lowest water (MMOLW) with tidal range varying about 2 ft. 3 in. This depth is maintained by periodical dredging. Tankers are required to have a keel clearance of at least 2 ft. and dry-cargo vessels a keel clearance of at least 3 ft. Vessels navigating the channel at the maximum allowable draft are confined from 2 hours before to 2 hours after high water. There are no turns in the channel and the course is 189°.

There is a breakwater 0.5 mile East of, and parallel to, the Outer Channel and extending 1.6 miles Northward from the North side of Zapara Island. The end of this breakwater is marked with a skeleton steel tower with a light 27 ft. above sea-level. Light characteristics – flashing white light every 8 seconds; visibility about 3 miles.

On Zapara Island there is a skeleton iron tower with a height of 136 ft. above sea-level.

Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at low water when the cross currents are strong. Overtaking at these points should be avoided.

There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the Buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge.

Inner Channel. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. Entire length of the Inner Channel is about 12 miles.

The beginning of the Inner Dredged Channel is marked by buoys B – 29 and B – 30. Channel is marked by beacons, and terminates at beacons T – 55 and T – 56. The channel is 800 ft. wide and the normal controlling depth is 43 ft. MMOLW with tidal range varying from 1.5 ft. to 2.5 ft.

The channel from beacons T – 56 to Maracaibo Harbour is a dredged channel, the end of which is marked by buoys Nos. B – 73 and B – 74.

About 0.2 mile South of buoys B – 29 and B – 30, there are located 2 towers – 1 on each side of the channel, and about 1 mile further South are 2 more towers. These 4 towers are marked E – 31 and E – 32 (North) and E – 33 and E – 34 (South). Towers No. E – 31 and E – 32 are of single steel pipe construction on a concrete pile base. Towers No. E – 33 and E – 34 are of skeleton steel construction (former oil-well derricks) each mounted on 4 concrete piles. The characteristics of these towers are:

Tower No.	*Height above LWS (ft.)*	*Light*
E – 31	43′	Green – Fl.
E – 32	43′	Red – Fl.
E – 33	123′	Green – Fl.
E – 34	128′	Red – Fl.

Vessels are not allowed to overtake each other in the Inner Channel between buoys B – 29 and B – 30 and light beacons T – 25 and T – 26. Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight.

Lake Channel. The channel starting at light beacons T – 39 and T – 40 and leading to Maracaibo Roads is called the Lake Channel. This is a natural channel 3,000 ft. wide and 11 miles long.

The Main Channel through Maracaibo Lake is approximately 83 miles long, not less than 244 m. wide and with a greater depth than the outer channels.

The access channels to the various ports and terminals branch off from the main channel as described under Section for each port.

CHANNEL NAVIGATION:

(a) Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

(b) Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

(c) Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

(d) Approaching vessels are to reduce speed in order to minimise the suction force of the displacing waters.

(e) Vessels must maintain a distance of 5 ship's lengths by day and 8 ship's lengths by night from other vessels navigating in the same direction.

(f) No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

(g) A grounded vessel is not allowed to start any manoeuvre when another vessel is passing.

(h) Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime

Black cylinder hoisted on side of yardarm: You can overtake me on the side on which the cylinder is shown.

Two black balls over the bridge: The channel is blocked.

Night

Green light on side of yardarm (a white light on mast-head helps to show on which side the green light is placed): You can overtake me on the side on which the green light is shown.

2 red lights over the bridge: The channel is blocked.

The tidal range is 4 ft. at neaps.

(i) Maximum speed for vessels navigating in lake channels has been limited to 10 knots. Masters should exercise the utmost care in complying with this regulation as heavy fines may be imposed to offending vessels.

PILOTAGE: (N.B. Maracaibo Pilotage Regulations require that inbound tankers, in ballast, while crossing the Bar, shall not have greater than 8 ft. difference between fore and aft draft. The Government Pilot will not take the vessel if this requirement is not met, unless he is satisfied that the actual draft of the vessel will permit safe navigation through the Outer and Inner Channels).

Every Master of a vessel navigating in Lake Maracaibo who desires to enter the main ship channel in Pilotage Zones No. 1 or No. 2 must first ensure that said Channel is free of traffic.

The limits of the Main Ship Channel in Pilotage Zone No. 1 are from buoys B1/B2 located at the entrance to the Outer Bar Channel and buoys B73/B74, of the city of Maracaibo. Pilotage Zone No. 2 begins approximately 1 mile below Maracaibo and extends Southward to lightfloats M36/M37. All other channels are considered as access channels to their respective port zones and subject to special local rules. Every vessel navigating to or from any port in Lake Maracaibo must follow the prescribed routes through the main and access channels leading to or from such ports, (unless special permission has been granted to do otherwise).

(a) Pilots are employees of the Venezuelan Government and act in an advisory capacity; the Master retains responsibility for the ship at all times. In the event it becomes necessary to disregard the Pilot's instructions in order to ensure the safety of the ship, the Master must prepare a full written report of the circumstances, for delivery to the Captain of the port.

(b) Inbound vessels have the option at present to embark government Pilot at the following areas:

(i) In the channel off San Carlos Pilot Station between buoys B – 24 and B – 26.

(ii) Anchorage area approximately 5.5 miles N.E. of Pilot station, San Carlos Island. Position 11° 04′ 22″ N., 71° 33′ 48″ W. East of buoy B – 17. This area is demarcated with green light buoy equipment with radar reflector.

(iii) At the E.M. Buoy.

(iv) At Punta Cardon. See "Note" and "Shipmasters' Reports" – August 1979, July 1981 and August 1981.

(c) The Port Captaincy of Maracaibo is unable to guarantee embarking or disembarking Pilots at the E.M. buoy or at anchorage area position. For this reason Masters should communicate with San Carlos Pilot Station for necessary instructions as to where to pick up Pilot, who usually embarks between buoys B – 24 and B – 26. The communication system between San Carlos Pilot Station and vessels will be by Morse lamp and radio-telephone. The stand-by frequency at San Carlos is 2182 kHz. Other existing frequencies are 2120 kHz and 2080 kHz; 156.6 and 156.8 MHz. Each pilot launch has a radio-telephone with 2182 kHz. frequency. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance between buoys and San Carlos is approximately 6 miles or 10 km.

(d) Pilot Permit to navigate the Outer Channel without aid of a Government Pilot will be granted to those Masters who desire to obtain same. In order to fill the application required, a blank sealed paper and 3 copies should be signed by Master on arrival. Copy of this solicitude duly endorsed by Port Captain of Maracaibo, will serve the Master as temporary permit until the official one has been received. Masters in possession of permits to cross the Outer Channel without a Pilot, have the option to enter channel either at the E.M. buoy or between any other buoy, taking into consideration the heavy traffic of the channel. Government pilotage through the Inner Channel is compulsory at all times.

(e) Outbound vessels will receive Pilot in Maracaibo, who will Pilot vessel up to San Carlos area approximately between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has instructed that all Masters should always in ample time identify themselves with the San Carlos Pilot Station by radio-telephone regardless of time of day. While inbound – between buoys B – 17 and B – 19 and sailing outbound – between markers T – 42 and T – 40. These instructions are obligatory and are required in order for the Pilot service to be aware, at any moment, of any emergencies which may arise, and also to avoid, especially during the night, the launch departing with an official Pilot aboard believing that the ship in sight needs his services, in which case, even though the launch or Pilot services are not rendered, the same will be charged to the company owning the ship, or its representative.

Note: A Master approaching the port for the first time must pick up a Pilot in Punta Cardon before entering Maracaibo Lake Channel. In the case of contravention the vessel will be intercepted by San Carlos Pilot Station and returned to Punta Cardon with a resulting loss of at least 1 day and the Master may also run the risk of a possible fine.

Furthermore, the Master should cable ETA via Curacao Radio 72, 48 and 24 hours before arrival in order to allow sufficient time for Agents at Maracaibo to send a Pilot to Punta Cardon.

TONNAGE: Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e.:

(a) On Registered Net Tonnage. Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement. As of this date, such countries are:

Norway
Great Britain
France
Sweden
Ireland
Germany
U.S.A.
Denmark
Netherlands
Portugal

(b) On Venezuelan Nett Tonnage. Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

(c) In practice, the procedure for stating the tonnage of all ships entering the Lake of Maracaibo is as follows: The inward Pilot boarding the ship presents Master a form on which among others the Master should fill in the tonnage of ship. Pilotage charges are based on this tonnage given by the Master. Master's attention is drawn to the fact that the Venezuelan nett tonnage is usually higher than the International nett tonnage. Care should be taken if an old Venezuelan nett tonnage certificate is on board, because the country in which the ship is registered might later have signed the reciprocal tonnage agreement with Venezuela. If the pilotage charges are made on basis of a higher tonnage than the one that should be applied, it is later very difficult, if not impossible, to get a refund.

CUSTOMS: *(a) Customs Watch.* While vessel is in port, Venezuelan National Guard Officials are assigned on board to ensure compliance with customs regulations. The Law requires meals be supplied to these officials during regular meal hours. Masters are requested to give them the privilege of eating in officers' messroom, to avoid difficulties.

(b) Firearms and Ammunition. Firearms must not exceed one per officer nor may the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be carefully declared on Store List and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

(c) Contraband. Strict compliance with the customs law of the country is enforced by the authorities, and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to very strict enforcement of the customs regulations, it is recommended that no goods be carried which are not shown on Store List. Any new articles (clothes, shoes, etc.) should be included in Store List and marked as personal belongings. If during a check-up by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS: The following nations maintain consular representative in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Portugal
Spain
Sweden
Switzerland
United States of America

TIME: Local time is GMT minus 4 hours.

VISITORS: All visitors to ships are prohibited except those company employees, petroleum inspectors, etc., whose duties require their presence aboard.

PASSENGERS: Passengers will not be permitted to disembark unless in possession of the required visa and documents. To facilitate clearance, if passengers are carried, the Master should include advice to this effect in his radio ETA.

POLLUTION: The Laws of Venezuela are very strict in regard to the pollution of harbour and coastal waters by oil, and heavy fines are imposed for violations. No dirty ballast, oil or bilge slops are to be pumped or allowed to escape overboard. All overboard discharge valves from cargo tanks and bilges are to be secured before loading or discharging commences. Loading is to be conducted with greatest care and vigilance in order that errors or delays in handling cargo valves may not result in overflows. All deck scuppers should be plugged before loading to avoid harbour contamination should an overflow occur. The Authorities require a written report to be submitted by the ship involved in the event of an oil spill.

SEAMAN LEFT BEHIND: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

SHIPMASTER'S REPORT: August 1979.

MARACAIBO/EL TABLAZO AND APPROACHES

Approaches: If making for the "EM" buoy direct, positions can be a bit vague due to the low lying coast.

A distance off the coast can be obtained before the "EM" buoy but no real firm position.

Often there is a strong N.E. wind.

Pilot: In the 'Pilot Book', etc., mention is made of picking up the Pilot at Punta Cardon.

From the Pilots and Agent I have a clearer idea of the official viewpoint and requirements.

There is NO compulsion to take a Pilot before San Carlos.

If you are unsure of the area and the visibility is poor from all sources and in my personal viewpoint it is advisable to take a Pilot at Punta Cardon, giving ETA 12 hours in advance.

If vessel is to pick Pilot up at San Carlos send cable 24 hours beforehand through Curacao "PJC" to 'Piloto San Carlos' requesting permission to use Canal Exterior, ETA at "EM" buoy and at San Carlos. Reconfirm 12 hours before "EM" buoy and by VHF an hour before arrival on Channel 12.

The difficulty lies in language, although there is meant to be a traffic control system in Canal Exterior it is only in Spanish and the Co-ordinator speaks little English. Little information is required or given if you only speak English.

The Punta Cardon Pilot costs about U.S.$150 extra plus transport charges and entails extra distance of 70 miles from the West and 15 miles from the East.

The San Carlos Pilot boards from a fast launch at "B28" buoy and usually leaves just before the buoy. He will use hoist, in spite of official regulations which require gangway ladder arrangement, and leaves on port side outward (boards on starboard side inward). This is nearly always the case with situation of pilot station and wind, but may change.

Communications: Venezuelan station La Guaria (YVG – ALRS 6225). Most vessels use Curacao "PJC", very good. Agents reply through "PJC". Telex very good.

VHF: Call 'Piloto San Carlos' on Channel 16 (working Channel 12). Agent at Maracaibo on Channel 16 (works Channel 14, only during office hours). Agent at La Salina on Channel 16 (works Channel 14, 24 hour service but very distorted at El Tablazo).

Canal Exterior: Leads from "EM" buoy to San Carlos pilot station. A speed of 10 to 12 knots essential to keep vessel in channel on account of strong N.E. winds and currents across channel. Takes about 1 hour 10 minutes from "EM" buoy to San Carlos.

The least advertised depth at LW is 12.8 m. but shoals quickly at sides of channel. We found 11.0 m. LW to West side of channel at "B18" buoy.

Buoys "B14", "16" and "18" had shifted about 200 m. to West (August 1979). On the outer section of channel between "B4" to "B8" buoys a Westerly set right across channel very apparent and near Malecon Breakwater. At "B22" buoy an Easterly set experienced. Wind N.E. 4 – 5 tide 1 hour before and 1 hour after HW Malecon both cases.

The "E 34" pylon light off Pta. Diablo is very conspicuous. A new dredger 'Wado' works this section with North end Canal Interior. A large suction dredger, pulls to side of channel to let vessel pass. Only Spanish and German spoken. The old 'Zulia' dredger has stopped working. Another dredger is being completed for the Government.

Canal Interior: About 1.5 hours pilotage to Puerto Miranda, speed above manoeuvring. This channel is generally deeper than Canal Exterior. The advertised depth of 12.8 m. seems reliable. Pilot told me they hope to get both channel Interior and Exterior deepened to 15 m. LW in the near future.

Pile light beacons "T46" and "T40" have been replaced by buoys.

Pratique: Given on berth.

Notice of Readiness: Can be tendered on arrival at berth. It is finally brought down with Bill of Lading on completion. This is normal practice. As we were cooling down it was received at completion of cooldown. Normally on berthing with lines connected.

EL TABLAZO:

Pilot: A Docking Pilot boards just before berthing and unberthing of vessel.

Tugs: 2 tugs of 1,800 h.p. Secure in "American" style using their lines.

Situation: For all intents and purposes part of Puerto Miranda but operated by different company.

Located just S.E. of Puerto Miranda berths. El Tablazo consists of 3 piers. Bulk, liquid and a small soda pier.

Anchorage: At El Tablazo – off berth, just East of main Maracaibo channel. Good holding – 3 shackles.

Pier: The bulk pier handles bulk and bagged urea fertiliser through 4 shiploaders fed from a conveyor. Three on the South side and 1 on the North side. Two of the loaders on the South side handle bagged urea down corkscrew chutes.

The liquid pier is to the South of bulk pier – berth both sides and handles ammonia, butane, propane, propylene.

Two Chicksans each side. The inshore being of 10 in. both sides and seaward being of 8 in. but fed by 10 in. line. Couplings are 300 ASA but 150 ASA spool pieces generally fitted.

Vapour lines are flexible stainless braided with rubber covering – ship's derrick required, 300 ASA coupling with 150 ASA spool piece. All berths – head IN. On the South side the outer edge of the dredged channel is marked by buoys.

All berths have good rubber fenders. Liquid pier outer end has two full faced mooring dolphins connected to main pier by catwalk. The least depth at all berths at LW is 6 fathoms, except small soda berth which has 2 fathoms at LW.

Moorings: 2-3-1 each end. Ship put alongside pier before moorings out. Plenty of mooring gangs. Very particular on position to within 0.5 m. Gangway no problem.

Fresh Water: At 15 t.p.h. from pipe at manifold amidships. There is a pumped supply at 70 t.p.h. used for loading small tankers to take to outports where supply is limited.

Operations: Language problems. There is one Loading Master who speaks good English. Surveyor on arrival and departure. Very co-operative. Venting allowed up riser.

Vapour return line goes to flare at ship's expense and can only be used if 100% product.

Max. rate ammonia 500 t.p.h., but initially can get plenty of stops. S.G. given at 15°C. The control of the rate is not very fine. You can get down to 20 t.p.h. but increase very broad. Usual notice for completion.

Dock Density: 1003.

Documentation: Carried out at berth inward, sometimes vessel taken off berth outward to local anchorage and clearance given there. Sometimes in the past inward clearance done at Maracaibo, NOT NOW.

There is much written in publications and passed around about visaed crew lists and deviation cables. I have tried, in talking to the Agent and to the Authorities to clarify the situation.

Visaed crew lists are NOT required now. But there is still a requirement that because the ship has no visaed crew list she must have deviated on passage.

Basically what is required is that the ship should be cleared on sailing for Venezuela to say, Trinidad, for orders or Curacao not Maracaibo, then on passage receive a message deviating her to Maracaibo. If she does not have deviation message a fine could be imposed but the Agent says all ships have required cable so do not know of fine being imposed.

Required:

7 Crew Lists.
3 Store Lists. Victualling only, can include bond.
3 Slop Lists. Could probably combine with above.
2 Ballast Lists. To give amount and cleanliness.
1 Vaccination List.
3 Crew Manifests.
1 Health Declaration.

I cabled in a pratique message as a matter of practice.

Shore Passes: Given by Agent for each crew member, no photos needed. Not required to be handed back on departure. Valid 3 days. After completion there seems to be a normal documentation delay to obtain clearance of up to 12 hours.

Shore Leave: The Agent will lay on a launch, but not really necessary as at El Tablazo liquid berth vessel is near the boat pier and fast launches run frequently to Maracaibo (takes 15 minutes). Arrange through Loading Master.

Can change sterling or dollars in local hotels, rate Bolivars to $, 4.30.

Films: Change Walport films at Puerto Miranda. Agent will send launch. Crew member has to go with films to change.

Agent: Only Agent on departure – no officials. Bill of Lading given by Terminal before Agent arrives.

SHIPMASTER'S REPORT: July, 1981.

Experienced following when entered Maracaibo Lake, mid-July, 1981.

Arrived EM buoy and obtained permission from San Carlos Pilot Station via VHF to enter outer channel and pick up Pilot at Buoy No. 26. During the piloting the Pilot asked asked me whether I had previously entered outer channel, which I confirmed with the remark *many years ago*.

After berthed my Agent informed me that a new regulation required Ship Masters to pick up Pilot at Punta Cardon inward bound, unless the Master with said vessel had actually entered Maracaibo Lake *within the past 6 months*, for which he was automatically permitted to enter outer channel and pick up Pilot at Buoy No. 26.

Fines might be enforced upon Masters neglecting this new regulation.

SHIPMASTER'S REPORT: August, 1981.

If the Master of a vessel enters the channel for the first time, or even if *more than six months* since the last visit, he must embark the Pilot close to Punta Cardon. The distance between Punta Cardon and "EM" buoy is approximately 80 miles.

If less *than six months* since the last visit, Master is authorised to pick up the Pilot when passing Buoy No. 26.

In the first case 24 hours prior notice should be given to the Pilot, and when approaching Punta Cardon vessel should call "Marina Cardon" on VHF Channel 16.

Section A

BAJO GRANDE: 10.29 N. 71.38 W. (See Plan Book)

(1) OPERATOR: Corpoven, S.A. Oil Terminal.

(2) OPERATOR: Corpoven, S.A. Natural gas liquids processing facilities.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

(1) **OPERATORS:** Corpoven, S.A.

LOCATION:

Maracaibo: On the North-Western shore of the Lake Maracaibo: Position: Lat. 10° 40′ N., Long. 71° 38′ W.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at terminals in the Lake of Maracaibo. Upon arrival to Maracaibo, a representative of the appointed Agency will go on board to assist vessel.

Bajo Grande: Loading Pier: Position: 10° 30′ 50″ N., 71° 36′ 8″ W., about 8 miles (12.8 km.) South of Maracaibo on the Western shore of the Lake and about 9,000 ft. (2,743 m.) offshore with its centre line North-South. Two vessels can berth simultaneously, one outside at Berth No. 1 and one inside at Berth No. 2.

The wharf is constructed as a pile-supported concrete island. It consists of 3 breasting platforms plus bow and stern mooring platforms. Pier Heads are 860 ft. apart.

DOCUMENTS: The following documents should be presented by the Master:

Clearance from Sailing Port with the following attached:

Store List.
Crew List.
Slop Chest Inventory.
Ballast Certificate.

Special ballast report made up by Master.

The Maracaibo Port Captaincy, requires that the Masters of all vessels entering this jurisdiction, deliver to the Maracaibo Port Captain's representative, during his visit to ships in the port of Maracaibo, a report which must answer the following questions concerning ballast:

(1) Port or place where ballast was taken.
(2) Quantity taken.
(3) Type of ballast and condition of same.
(4) Where deballasting operation was or is to be carried out.
(5) Approximate deballasting time.
(6) Any other pertinent information that may be required.

Crew List	6 copies
Store List.	6 copies
Slop Chest Inventory (Deck, engine and cabin stores listed separately)	6 copies
List of Personal effects.	6 copies
Derat Exemption Certificate	Original
Venezuelan Net Tonnage Certificate	Original
American Crew List.	4 or 2 carbon copies.

(If required: See under "American Crew List").

Boarding Party: The boarding party usually consists of the following persons:

One Quarantine Official
Two Customs Officials.
One Sanitation Department Official.
One Port Captain's Representative.
One Foreign Service Department Official.
One Vessel's Agent.

American Crew List: All non-American vessels loading for USA port should have the American Crew List ready on arrival in Maracaibo to be visaed by the American Consulate in Maracaibo and placed aboard ship before departure. The crew list should be prepared on Immigration and Naturalization Service Form No. 1–418 (Crew List Manifest) and should contain two sections:

Section 1 – Should list those crew members who are American or who possess individual visa documentation to the United States.

Section 2 – Should list, in the alphabetical order of their last names, those alien crewmen who lack United States visa documentation and therefore require inclusion in the visa of the crew list.

Only one name may be placed on each line of the crew list. Two names should not be placed in the space of one line, nor should a full line between two names be left vacant. All copies of the crew list presented must be legible (Occasionally the names of the crewmen included on the carbon copies of some crew lists presented at the consulate are blurred beyond recognition).

The information requested under column 1, 2 and 3 should be filled in completely.

Column 1 – Should always contain the complete first name and middle initial of the crewman.

Column 2 – Should show the nationality of each crew member and the number of his travel document.

Column 3 – Should always include the name of the port where the crewman was shipped, not simply the country.

At the time of the vessel's first application for a crew list, the crew list must be presented in 4 copies:

Original and 1 copy – Should contain only the information requested under Columns 1, 2, and 3.

Two Copies – Must include the following information of those crewmen to be included on the crew list visa.

Column 4 – Should list the date, city and country of each crew member's birth.

Column 5 – Should show the place of issuance of the seaman's travel document and the name of the Government which issued the travel document. (It is not necessary to list the date of issuance of the travel document).

Cargo documents:

1. *Master's copy of Bill of Lading* – The Bill of Lading form used is the usual Warshipoilvoy form. Masters wishing to use another form should furnish 20 blanks on arrival in Bajo Grande. Master is requested to sign 3 negotiable Bills of Lading (Originals).
2. *One copy of the Certificate of Quantity and Quality (Q. & Q.).*
3. *One copy of the Ullage Report.*

Outward Clearance:

Following documents are delivered on board by the local Agent before sailing:

1. *Customs Clearance* – Duplicate of "Conocimiento de Embarque" and Duplicate of "Manifiesto de Carga". (Both stamped and signed by Customs) or any other document specifically requested by the consignee or nominating source.
2. *Communication* – A letter from Maracaibo Customs Authorities to Authorities in port of destination.
3. *Zarpe* – Permission to sail signed by Maracaibo Port Captain. This is brought on board in Bajo Grande by the outbound Pilot.

Customs Guard: The Customs Guard will request Master to countersign his time on board the vessel. This is counted from the time the first hose was connected until all hoses were disconnected, regardless of whether the vessel was receiving cargo or not.

Accommodation Ladder: Vessels must provide an accommodation ladder. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations. Port authorities will board only by means of an *accommodation* ladder. it is recommended to rig this in advance in order to avoid unnecessary delays.

In order to guarantee the security and safeguard the lives of the officers that board the vessel inbound in Maracaibo, it is imperative that Masters strictly comply with the following precautionary measures:

(1) Each of the components and functional parts that holds together or supports the gangway ladder must be maintained in excellent condition.

Therefore, wire ropes, guide blocks and bolts etc., found to be defective or in bad condition must be immediately replaced.

(2) For maximum security, each time that your vessel arrives in this jurisdiction, the above mentioned mechanisms should be thoroughly checked and tested by the personnel aboard vessel before the gangway ladder is used by the boarding party.

APPROACHES:

Channels leading to Lake Maracaibo: The channels leading to the Lake Maracaibo are called the Outer Channel, the Inner Channel and the Lake Channel.

Outer Channel: The Outer Channel starts at the E.M. Buoy position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. and ends at the Zapara Island, a distance of about 14 miles. (About 22 km.).

The light characteristics of E.M. Buoy are: flashing white every 5 seconds, visibility approximately 5 miles.

There are no turns in the channel and the course is 189°. The channel is 100 ft. wide and has a normal controlling depth of 44 ft. LWS with tidal range varying about 2 ft. 3 in. Cross currents are sometimes encountered near Zapara, San Carlos and Pescadero Islands, especially at LW when the cross currents are strong. Overtaking at these points is forbidden. There is one anchorage zone in the Outer Channel which is a trapezoid on the port side when navigating inbound near the buoys B – 14, B – 15, B – 16 and B – 18. All buoys in the Outer Channel are equipped with radar reflectors.

The Southern end of the Outer Channel is marked by buoys B – 27 and B – 28.

Inner Channel: The beginning of the Inner Channel is marked by buoys B – 29 and B – 30. The Inner Channel continues on the same course as the Outer Channel for about 10 miles, whereafter the direction changes to 150°. The entire length of the Inner Channel is about 12 miles. Beacons T – 55 and T – 56 mark its Southern end. The normal controlling depth is 44 ft. LWS. The channel is 800 ft. wide. Vessels are not allowed to overtake each other in the Inner Channel between buoys B – 29 and B – 30 and light beacons T – 25 and T – 26.

Vessels may overtake each other in the Inner Channel between light beacons T – 39 and T – 40 after having exchanged prescribed signals with the vessels to be passed. This manoeuvre is, of course, allowed only if conditions are favourable and no vessel navigating in the opposite direction is in sight. From beacon T – 56 to Maracaibo harbour the channel is 800 ft. wide, depth 44 ft., its end is marked by buoys B – 73 and B – 74.

Navigation through Channels:

Inbound vessels leave to starboard side the buoys and beacons marked with even numbers and to port side the buoys and beacons marked with odd numbers.

Outbound vessels shall leave to port side the buoys and beacons marked with even numbers and to starboard side the buoys and beacons marked with odd numbers.

Vessels should pass as close as possible to the channel's edge on starboard side. Loaded vessels have preference.

Approaching vessels are to reduce speed in order to minimize the suction force of the displacing waters.

Vessels must maintain a distance of 1 nautical mile (1,852 m.) by day, or night from other vessels navigating in the same direction.

No vessel should start to manoeuvre to overtake another vessel before having received clearly the affirmative signal from the ship to be passed.

A grounded vessel is not allowed to start any manoeuvre when another vessel is passing. Dredgers are frequently at work in the channels and caution should be exercised in passing them. Signals used by the dredgers are as follows:

Daytime: Black cylinder hoisted on side of yardarm:

You may overtake me on the side on which the cylinder is shown.

Two black balls over the bridge:

The channel is blocked.

Night:

Green light on side of yardarm (A white light on mast head helps to show on which side the green light is placed).

You can overtake me on the side on which the green light is shown.

Two red lights over the bridge:

The channel is blocked.

The tidal range is 4 ft. at neaps. Observed squat in the channels is about 1 ft.

Maracaibo Lake Channel Guard Service Corps have had evidence of vessels travelling out of the navigation channel in the vicinity of buoys B – 3, B – 5 and B – 7; this risky procedure is considered very dangerous to the safety of the channel buoys and its installations.

Captain of all ships are reminded that all vessels inbound or outbound *must* pass the EM Buoy on the port side. This operation will be registered and controlled by their electronic devices installed at San Carlos Pilot Station.

Violators of this regulation, in addition to being economically responsible for damages to the buoys and related accessories, will be prosecuted in accordance with Article 118 Section I of the Venezuelan Law of Navigation.

In view of the above, and keeping in mind the protection of the interests of your owners, we ask that you comply at all times with this regulation emanated from the Port Captaincy.

PILOTAGE: Compulsory. Vessels proceeding direct to the Bajo Grande Terminal must enter outer channel and embark Pilot between buoys 25 and 27. After vessel arrives in vicinity of channel entrance, Master must contact *San Carlos Pilot Station* by radio telephone on Channel 16 requesting Pilot at buoys 25 – 27. The launch that leaves San Carlos Pilot Station with Pilot for ship, takes approximately 20 to 30 minutes to cover distance, and distance, between Buoys and San Carlos is approximately 6 miles (10 km.).

Master must advise Corpoven, S.A. and Agent ETA buoys 25 – 27, 72, 48 and 24 hours prior to arrival there.

Masters of Vessels entering Lake Maracaibo for the first time must cable their Local Agent notifying this fact, in order that the Agent may comply with the Port Regulations. This security measure makes it necessary for the ship to pick up a Pilot at Punta Cardon.

The Master should notify Agent or contact Maraven, Punta Cardon by radio on Channel 16. As no Pilots are available at Punta Cardon, the Local Agent for the vessel requires 48 hours' notice in advance to facilitate making arrangements to fly a Pilot to Cardon and then have Maraven place the Pilot on board the ship.

The co-ordinates of Punta Cardon are approximately Lat. 11° 36′ N., Long. 70° 15′ W. Maraven will charge approximately Bolivares 220.00 for this service. In addition, the ship will have to pay air fare, hotel expenses, and a higher Pilotage fee for this service. However, if the Master of a ship has previously entered the channel as an officer of a ship, he is not required to pick up a Pilot at Punta Cardon.

We remind you that Pilots are authorised to leave the Jurisdiction, only when they are disembarked in Venezuelan ports. With this understanding, when special circumstances arise in which the Pilot cannot be disembarked at San Carlos and the ship is unable to enter the nearest Venezuelan port to disembark the Pilot, in this case the port of "Las Piedras", it is required that the Agent as well as the Master of the vessel, forward to the Port Captaincy at the earliest opportunity a detailed report giving the reasons that compelled the Master to take the Pilot abroad.

Pilots act in an advisory capacity only, and therefore the Master of the vessel retains full responsibility at all times. In the event it becomes necessary to disregard the Pilot's instruction in order to ensure the safety of the ship, Master must forward to Local Agent a full written report on the circumstances for delivery of same to port authorities.

The Venezuelan Pilotage Law stipulates that Pilots must be provided with the same lodging as is given an officer. In case no extra officer's cabin is available, suggest the hospital be used by the Pilot. Also, Pilot should be seated at the officers' mess for his meals.

In case of accident to Pilot while performing his duty on board, it is the responsibility of the Master to furnish the Pilot with a full written report on the accident before the Pilot leaves the vessel. The Pilot must be able to present such a report in case of a legal claim.

As a result of accidents that caused the loss of lives, the Maracaibo Port Captaincy issued a Regulation with the view of safeguarding human life at sea and other navigable waters; Official Pilots that must embark on or disembark from undocked ships, must use an automatic-inflated type life vest. This procedure is also compulsory for all persons from private or public entities that are required to go aboard vessels that are anchored, stopped or navigating in the waters of Lake Maracaibo. Likewise, at the side of the boarding ladder where the Pilot boards or disembarks, a hoist or boatswain's chair shall be placed there, and within it a life line and a gas light ready to be used in case it becomes necessary. The Port Captaincy will see to it that this Regulation is strictly complied with.

Docking Pilot: The Government's Pilot will assist in docking operations. It should be borne in mind that Pilot acts as adviser only. The Master retains full responsibility at all times. Any damage incurred to vessel or loading platform which may be deemed to have been caused by the Mooring Pilot's fault or negligence, may be held against the ship.

Undocking: Government's Pilot will assist in undocking. Two tugs will be used as for docking and undocking.

ANCHORAGE: The Pilot will not manoeuvre the ship into anchorage, but will indicate the proper location to anchor. Care should be taken because of small boat traffic.

MAX. SIZE: The following restrictions in size and draft upon loading exists for vessels docking at Bajo Grande:

	Maximum Loading Draft	*Maximum Vessel Size*	*Max. displacement upon Berthing (tons)*
Outside Berth (No. 1)	40 ft. 00 in.	55,000 d.w.t.	34,000
Inside Berth (No. 2)	34 ft. 06 in.	36,000 d.w.t.	20,000

RADIO: *Information to be cabled to Local Agents 3 days prior to arrival:*

1. *Flag:* If the vessel has loaded in Bajo Grande before or is listed in the Tanker Register published by H. Clarkson & Company Ltd., London, the nationality of the vessel need not be cabled.
2. *Sailing port and at which other port vessel will call in this area:* For clearing the vessel in and out of Maracaibo, local ship Agents must know beforehand from where the ship comes and which other port it will call in this area. Therefore, it is of importance to inform Agents whether the vessel will load part cargo or bunker, at which terminal, and whether inbound or outbound.
3. *Port for which vessel is cleared:* In case the vessel was diverted *en route* and consequently is not cleared for Maracaibo or one of the terminals in the Lake of Maracaibo, the Local Agents must obtain from authorities special permit for the vessel to enter the Lake of Maracaibo.
4. *Ballast Certificate:* If the vessel arrives in ballast a "Ballast Certificate" is mandatory. A fine against the vessel will issued by the Port Authorities if vessel does not have this certificate.
5. *Estimated Time of Arrival:* Cable ETA San Carlos Pilot Station Buoys 25 – 27 (See "Pilotage") or, if the vessel is taking part cargo or bunkering inbound, cable ETA, bunker or first loading port. Please use local time if possible (4 hours behind GMT).
6. *Tonnage:* If the vessel has not loaded at Bajo Grande before, also cable the Gross and Net Tonnages. To determine whether the International or the Venezuelan tonnage should be mentioned, see General – "Tonnage Applicable".
7. *Master's Full Name:* Please sign your first message with Master's name and surname, which is also needed to clear the vessel in Maracaibo.
8. *Changed ETA:* An additional cable should be sent about 48 hours and 24 hours prior to arrival at pilot station Buoys 25 – 27 stating ETA.

Proper use of Radio Frequencies: We have received several circulars from the Maracaibo Port Captaincy, requesting Terminal Operators to caution all Masters of vessels calling at Bajo Grande Terminal on the improper use of the International Distress Frequency of (2182 kHz) for personal conversations. This procedure is contrary to the security of vessels.

A letter containing such caution will be delivered to the Master of each vessel loading at Bajo Grande by the Agent, requesting that the Master sign a copy signifying his acknowledgement of said letter of notice.

The International Distress Frequency was established specifically and exclusively for emergency calls such as shipwreck, fire and accidents. It is also used by ships and shore stations to make first contact (VHF Channel 16) but immediately after contact is made, the operator should switch to one of the 52 Channels available.

9. *Compulsory use of Single Side Band Radio:* A circular letter from the Venezuelan Ministry of Communications, states that no licence will be granted for the installation of radiotelephone stations of modulated amplitude (A3). The installation and use of Single Side Band radiotelephone equipment is obligatory.

In consequence, the Ministry has requested that the terminal inform all users of Double Side Band (A3) radiotelephone equipment in order that they proceed immediately to install in their ships, launches and all other marine vessels Single Side Band equipment with the same frequencies that are presently in authorised use, which is VHF Channel 16.

The listening and Safety Station YXW – 3 installed at the Venezuelan Nautical School is equipped to answer any calls on the International Distress Frequency with their transmitter of 1 kW.

As a result of the foregoing, a letter containing the above information has been prepared by the Terminal which will be delivered to the Masters of all vessels calling at the Bajo Grande loading terminal. The Masters of all vessels are required to sign a copy of this letter in acknowledgement of receipt.

TUGS: The Venezuelan Government has ruled mandatory the use of 2 tugs for docking and undocking. Vessels over 60,000 d.w.t. will use 3 tugs for docking and undocking.

NOTICE OF READINESS: Masters are free to tender their ships as being ready to load at any place and time which, in their opinion, conforms with the terms of the charter party. Terminal personnel authorised to countersign the Notice of Readiness have been instructed to indicate the time vessel was all fast. This does not imperil in any way the rights of the shipowner in his negotiations with the charterer and it limits the Terminal's liability to the consignee.

CARGO OPERATIONS:

Deballasting Facilities: A recent Circular letter from the Venezuelan Ministry of Communications, Maracaibo's Port Captaincy, states that as of October 1976, no ballast (either clean or dirty) can be discharged into Lake Maracaibo waters. Therefore, all ballast must be pumped ashore to the petroleum terminal on which vessel is to take cargo. Heavy fines are assessed for vessels violating this law and therefore we strongly recommend Masters to be particularly careful in this regard.

Shore deballasting facilities are available at Bajo Grande and are subject to no special regulations and procedures as yet. Tanker ballast water is pumped through two 8 in. hose connections into a 24 in. line of about 9,000 ft. in length to a 120,000 bbls. receiving basin situated on shore.

The deballasting basin is limited to receiving *only* petroleum hydrocarbons and petroleum hydrocarbons derivates. Emulsifiers, caustics, acids and chemical slops are absolutely unacceptable. Contamination of Lake Maracaibo waters with oily or chemical materials of any nature is strictly prohibited by Venezuelan Laws. The terminal is required to report to the Authorities any such contamination by vessels docked at Bajo Grande. HEAVY FINES ARE THEN ASSESSED AGAINST THE SHIPS. Vessel's cooperation is requested to prevent contamination from tank overflows, bilge oil, line leaks or from any other source.

Tank Cleaning and Drying: Precautions as are common for any heavy oil should be taken to ensure that no ballast is left in any tank. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lbs. per 1,000 bbls. for every 0.10% contamination by sea water. All cargo compartments must be stripped extremely dry.

Cargo pipe-line should be drained and or purged of water. On standard T – 2 type vessels, this can be done by draining the fore and aft main cargo lines, both suction and discharge sides, into the pump room bilges followed by opening of main suction valves on each individual compartment, thereby releasing water retained in dead and transverse lines. After this procedure is completed, each compartment should be restripped with stripping pumps and lines, followed by draining the stripping line to pump room bilges. On other ships equipped with looped systems it is possible to blow the system with air and drain water into the bilges. In other situations, fresh water might be used to flush cargo piping systems of salt water and in turn strip salt water and fresh water as outlined for T – 2 vessels. All deck scuppers should be securely plugged and all precautions should be taken to avoid pollution of lake waters.

Inspection of Tanks: Before loading can commence, tanks and loading system must be inspected and passed. This is usually done by the Terminal's own Cargo Inspector but, if consignee so requests, third party inspection can be arranged.

Inspection Companies available in Maracaibo are the following:

Chas. Martin Venezolana de Inspecciones	(CHAS MARTIN)
E. W. Saybolt & Co., S.A.	(SAYBOLT)
Redwood Petroleum and Petrochemical Division	(REDWOOD)
Analistas e Inspectores Venezolanos de Petroleo C.A. Inspecciones, S.A.	(AIVEPET)

Line Displacement: When a vessel is loading crude and products, it is usually necessary to displace lines once or twice during loading. Masters will be advised of necessary line displacements before loading starts and are required to take note because NOTICE HAS TO BE GIVEN BY VESSEL when pumping should be stopped and tanks changed. Once shore tanks have been changed, it will not be possible to change the quantity of the product already in the ship, as shore lines will then contain a product different from the one already loaded. *Ship's gauges and/or draft should be carefully checked when calculating required quantities.*

Spillage: In case spillage occurs, the Terminal Port Supervisor must be advised immediately, as any spillage must be reported to the Authorities without delay.

There has been considerable discussion in Venezuela concerning oil spillages resulting in contamination of Lake Maracaibo. Considerable pressure is being exerted by Government agencies to eliminate all spillage, and the Terminal is making every effort to avoid contamination of Lake Maracaibo.

While vessel is at Bajo Grande take special precautions to avoid dirty ballast, bilge water or any other contaminant entering the Lake.

If a spill should occur and Terminal representative, the Government's representative of the National Guard observes that the waters of the Lake are being contaminated by any substance from the vessel the Terminal will request that vessel suspends deballasting, loading or discharging operations immediately and all consequences that might arise from this operation such as short loading, the unmooring of your vessel, fines, damages to fishermen, clean up costs, etc., *will be strictly, for vessel's account.*

We strongly recommend to Masters to emphasise to the officers on deck to endeavour to avoid spillages and to make certain that the scupper plugs are installed prior to commencement of loading operations in order to withhold on deck any spillage that might occur.

After Loading: All Butterworth plates, tanks tops and ullage plugs should be inspected to ensure against entry of water. Inspection of ullage plugs should follow on completion of temperature readings because of the necessity of taking temperatures en route. Sea suction valves should be secured by positive means until all cargo has been discharged. This may be accomplished by numbered seals, chains and padlocks. The method of securing should be noted on the inspection documents. Regardless of which method is used, appropriate log entries should be made indicating the date, time and method used and under whose supervision, both vessel officer and/or Cargo Inspector, such method was applied.

About 1 hour is required for the preparation of the cargo documents which are normally delivered on board before sailing.

Temperature of Boscan Crude and Boscan Products at Sea: On short voyages, as for instance to the U.S.A., it has proved most practical to maintain the loading temperature. On longer voyages, as for instance to Europe, the temperature may be dropped to 130°F., which does no harm as long as sufficient time is given to bring the temperature up again to that required for discharging. Masters should, however, not expect a temperature rise of more than 5°F. per day, especially if the sea temperature is low. The heat transfer properties of Boscan Crude are very poor as are those of the heavy products made from this crude. Many ships have been delayed in the discharge port due to too low cargo temperature. A temperature of 160°F. is suggested for discharging Boscan Crude, Topped Boscan and cutback asphalts.

Discharge Cargo: Boscan Crude has a flash point of 110 – 160°F. and a maximum viscosity of 1400 SSF at 140°F. The viscosity at other temperatures follows the pattern of other petroleum products. Boscan Crude has been successfully handled in ships fitted with both reciprocating and centrifugal type pumps with forward and after pumprooms respectively. It is generally found that this crude can best be handled at a temperature which brings its viscosity to about 600 SSF – 160°F. Vessels with forward pumproom should control stern trim so that it does not exceed about 4 ft. while stripping the after tanks. Also a 5° list is very helpful when stripping. Once the cargo gets below heating coils, tanks must be pumped empty as fast as possible. At times it has been found helpful to gather tanks strippings into a single tank for discharge ashore, as it is very difficult to strip against heavy back pressures. Watch reciprocating pumps for vapourlock. Because of high viscosity, proper care should be taken that no oil is left in vessel discharge lines at low temperature.

Tank Cleaning After Discharge Cargo: Many Masters have expressed concern over tank cleaning after discharge. Assuming that the ship proceeds to sea for this operation and has sufficient time for proper execution, vessel may be cleaned quite thoroughly using the Butterworth system. However, it is of vital importance that the system be used at maximum pressure and temperature (not below 160 p.s.i. and 170°F respectively). At these conditions and with 2 machines, it has been found that about 4 hours are required for each tank. It is of importance to keep the tanks well stripped during the Butterworthing. Some prefer to steam out the tanks before Butterworthing. If this course is adopted care should be taken that the steaming does not last more that 1 hour as the heat will drive off the light ends of the oil and leave a rubbery residue that is very difficult to remove.

It has been found helpful to keep the machines in LOW position for about 1 hour and the HIGH – MIDDLE and LOW in order, in the usual manner.

Boscan Crude and Products/Light Products:

Loading Product	*API Gravity*	*Temperature °F*	*Loading Lines used*	*Normal Loading Rate B/H*
Boscan Crude	10.0 – 11.0	160	2×18 in.	10,000
Boscan Crude Blends	13.0 – 19.0	140	2×18 in.	10,000
Topped Boscan Crude	9.5 – 10.0	160	2×18 in.	10,000
Topped Boscan Crude Asph. Grade	8.0 – 10.0	160	2×18 in.	10,000
Cutback Asphalt	11.0 – 15.0	170	2×12 in.	5,000
Asphalt Cement (Pas)	5.0 – 8.0	300	1×14 in.	5,000
Gasoil	35.0 – 42.5	90	1×12 in.	6,000
Fuel Oil No. 2	38.0 – 40.0	90	1×12 in.	6,000
Fuel Oil No. 5	21.0 – 22.0	120	1×12 in.	5,000
Fuel Oil No. 6	16.0 – 18.0	160	1×18 in.	12,000
Light Naphtha (LSR)	70.0 – 73.0	85	1×12 in.	6,200*
Heavy Naphtha (HSR)	52.0 – 53.5	85	1×12 in.	6,200*
JP – 4	45.0 – 51.9	80	1×12 in.	6,200*

*Maximum rate due to Bajo Grande Terminal security regulations.

FUEL:

Advance Notice of Requirement: Should a vessel arriving at Bajo Grande require any bunkers, Owner or Operator must place their nomination with Corpoven, S.A. via Telex as much in advance of the delivery date as possible. Telex should indicate name of vessel, ETA at Bajo Grande and quantity and quality of Marine Fuels required. A cash deposit in U.S. Dollars covering the nomination must be made prior to the delivery date into the following account:

First National City Bank
339 Park Avenue
New York, N.Y.
U.S.A. 10022
Current Account No. 36990309
(Corpoven, S.A. Petroleum Income Account)

Owner or Operator must also request F.N.C.B. to confirm via Telex to Corpoven, S.A. that such deposit has been made in order to cover the cost of bunkers to be delivered to vessel arriving at Bajo Grande at the current ETA. Only after this Telex has been received will delivery actually proceed.

Bunker Facilities: Bunkers are available from pipe-line at Bajo Grande Terminal for vessels loading and unloading cargo at Berth Nos. 1 and 2. Bunkering rate is about 2,500 bbls.p.h. for Bunker "C", intermediate bunker fuels, marine diesel and marine gas oil.

Marine Fuels and Lubricants Available: Bunker fuel (sometimes called Bunker "C"), Intermediate Bunker Fuels, Marine Diesel and Marine Gas Oil.

Lubricants are generally available in the Maracaibo area. Should you require any, we recommend to contact vessel's local Agent.

Lighterage: Bunker fuel, intermediate bunker fuels, marine diesel and gas oil are also available for ships in the Maracaibo area. 72 hours' advance notice is required for barge deliveries of all products.

FRESH WATER: Delivery of boiler and potable water is made by barge, *minimum quantity 100 tons.* The barge holds about 160 tons and the pumping rate is about 25 t.p.h. Requirements should be cabled in advance to the Agent of the vessel in Maracaibo.

REPAIRS: No major repair facilities are available in Maracaibo but small repairs can be undertaken by local machine and electric shops. Shore labour can be furnished if required. Technicians are available for minor radio repairs. Nearest dry docks are at Curacao for vessels up to 30,000 d.w.t. and at Puerto Cabello, Venezuela for vessels up to 18,000 d.w.t.

CUSTOMS: *Contraband:* Strict compliance with the Customs Law of the Country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle cigarettes. 1 open package per person is allowed to be carried ashore, but a greater quantity will result in fine and imprisonment of the offender as well as lost ship's time. Due to the very strict enforcement of the Customs Regulations, it is recommended that no goods be carried which are not shown on the store list. Any new articles (clothes, shoes, etc.) should be included in the store list and marked as personal belongings. If during a checkup by Customs, articles considered as contraband are found, this will not only mean confiscation of these articles, but also hours or days of lost ship's time, while the case is handled at court.

CONSULS:

Following countries have consular representation in Maracaibo.

Argentina
Austria
Belgium
Bolivia
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Mexico
Netherlands
Nicaragua
Norway
Panama
Puerto Rico
Peru
Spain
Sweden
U.S.A.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo. Their services may be procured by cabling requests to the local Agent at Maracaibo.

HOLIDAYS: The Terminal office will be closed on the following days. New Year's Day (January 1st); Easter Thursday/Friday (March/April); Declaration of Independence (April 19th); Labour Day (May 1st); Battle of Carabobo (June 24th); Independence Day (July 5th); Birthdate of Simon Bolivar (July 24th); Columbus Day (October 12th); Chiquinquira's Day (November 18th); Christmas Day (December 25th); All Saturdays; All Sundays.

SHORE LEAVE: Shore Leave is permitted at the discretion of the Port Authorities; required number of shore passes will be brought on board on arrival in Maracaibo and have to be returned to the Customs Guard again before the vessel leaves Bajo Grande.

GENERAL:

Tonnage Applicable on Fees: On ships registered in countries which have a reciprocal tonnage agreement with Venezuela, the gross tonnage registered in such countries will be applied for calculating pilotage fees. Such countries are:

Denmark
France
Germany
Ireland
Netherlands
Norway
Portugal
Sweden
United Kingdom
U.S.A.

On ships registered in countries not listed above, such ships calling at Venezuelan ports for the first time must be measured for Venezuelan tonnage by the Port Captain. It is usual practice to take ashore the ship's Panama Canal or Suez Canal International Gross Registered Tonnage Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan Admeasurement Certificate, when later issued, is forwarded to the Owners. A fee is charged for this certificate, which is payable only on the ship's first call.

Firearms and Ammunition: Firearms must not exceed 1 per Officer nor may the ammunition exceed 18 cartridges per Officer. All firearms and ammunition must be carefully declared on the store list and should be collected and held in Master's safe custody while vessel is in Venezuelan waters.

Guards: Customs Guards are stationed on the platform at Bajo Grande. They must be provided with sleeping quarters on the ship and seated in the Officers' mess for their meals. Non-compliance may cause cargo stoppage and fines. Masters are reminded that these guards are representatives of the Venezuelan Government and any uncourteous action on the part of the crew or passenger will be regarded as a slight against the Country itself.

Gangways: The ship is to supply a safe gangway, which allows easy access to the vessel. The Terminal has a gangway which may be used on request with the understanding that any damage to the gangway or ship or shore personnel through its use may be held against the ship.

Safety: Vessel must be in readiness to move at all times. The attention of Masters of turbine steamers are called to this regulation.

Ship's fire fighting equipment must be ready for instant use while vessel is alongside. Shore personnel will render assistance in an emergency but, since no fireboats are stationed in the immediate area, vessels should be prepared to combat fire without outside assistance. It is necessary to obtain Terminal's approval for repairs of propelling machinery.

Normal safety precautions apply. Smoking is not allowed on the pier. No hotwork is permitted on vessels alongside without *written* permission from the Port Supervisor. *Swimming alongside pier is dangerous and absolutely prohibited.*

Launch Service: The launch is primarily for the use of the port staff.

Taxi: Taxi service will be generally available upon request to vessel's Agent.

Visitors: According to Port Regulations concerning access to ships and loading terminals and in the interest of industrial safety, only persons directly concerned with loading operations will be permitted to board vessel or visit the loading platform at Bajo Grande.

Plimsoll Marks: The Port Captaincy requires that Plimsoll Marks be readily visible. If they are not clearly legible, permission to sail may be withheld and a fine imposed. This is applicable to inbound and outbound vessels.

We therefore, request your full compliance with this Regulation from the Maracaibo Port Captaincy.

Marine Stores/Charts: Marine stores are available in limited supply. Marine charts are not available.

Compass Adjusters: There are no compass adjusters in Maracaibo.

Seamen Left Behind: Sailing may be withheld until all crew members are aboard with exception of those ashore for justified reasons. It is important that Masters bear in mind that the Venezuelan Law will at all times hold the vessel's Master, Agent, or Owner responsible for any seamen left behind in Venezuela.

Crew in Transit: In case a crew member is left ashore for a justified cause, such as hospitalisation, repatriation, etc., his documents and personal effects are to be delivered to the vessel's Agent before sailing. A letter is required from the Master with detailed instructions as to maximum cash advance, etc. All expenses incurred by such members are for vessel's account.

Port Supervisor: Masters or their representatives are invited to call at the Port Supervisor's Office on shore in Bajo Grande or over the telephone on the pier, for any further help, information or complaints.

Terminal: Cable Address: Corpoven, S.A., Maracaibo.

NOTICE: Issued by Corpoven, S.A., Bajo Grande Refinery, Maracaibo.

PROCEDURE FOR BERTHING AND UNBERTHING MANOEUVRES

To the Masters of all the tanker ships arriving to Corpoven's Refinery, Bajo Grande Marine Oil Loading Terminal, Lake Maracaibo, Venezuela.

Instructions concerning approaching and manoeuvres for berthing/unberthing at this Terminal.

With a view to prevent any possibility that your ship may cause damage to our installations, we shall highly appreciate if the Masters pay attention and respect the following procedures:

1. Entrance Bajo Grande Refinery Terminal (Lat. 10° 30′ 50″ N., Long. 07° 36′ 08″ W.) is done between the Main Navigation Channel Marker Buoys B86 – B88 and leaving between the Buoys BG2, BG1 and B86.

2. On ship's arrival to the Terminal Entrance Buoys, a Marine Officer, acting as a Liaison Officer of Corpoven, will board the ship in order to assist her Master and the Official Pilot in all matters concerning inter-communications and co-ordination with the Terminal and on basis of his technical and local knowledge and experience give advice relative with the vessel's safe berthing/unberthing and safe mooring/unmooring to/from the pier.

The Liaison Officer will have with him charts, drawings and information on the Terminal, which will be available to the Master and to the Official Pilot for consulting purposes.

It is understood that the Liaison Officer only acts as a consultant or technical advisor to the ship's Master and to the Official Pilot appointed for conducting the ship to the Terminal and only on the matters hereinbefore already described. The vessel's Master and the Official Pilot retain their duties and responsibility of commanding the ship and of safely piloting her to the Terminal, respectively.

3. For best manoeuvrability ships arriving on ballast or partially laden, must arrive with a draft forward which should not be less than given in the following table and a trim by the stern of about 0.75% of ship's length on ships of 400 ft. length or more.

Length	*Draft Forward*	*Trim by Stern*
400 ft.	10 ft.	3 ft. 00 in.
500 ft.	12 ft.	3 ft. 09 in.
600 ft.	14 ft.	4 ft. 06 in.
700 ft. ideal	16 ft. (nor less than 14 ft.)	5 ft. 03 in.
750 ft. ideal	17 ft. (nor less than 14 ft.)	5 ft. 08 in.

The ship's total displacement in any case should not exceed 34,000 tons for ships mooring at Berth No. 1 and 20,000 tons for ships berthing at Berth No. 2.

4. For more information please consult the instructions and information for the port which will be issued to you opportunely on your arrival for first time to this Terminal, please comply with them, and see that they are complied with.

5. *Mooring Lines:* Prior to arrival at the Terminal, the vessel shall have all the necessary mooring lines ready for use together with a sufficient number of heaving lines and the equipment and the personnel required for mooring. All the lines used for securing the ship to the berth should be of the same material, construction and of approved characteristics.

6. *Tugboats:* Minimum 2 twin-screw tugboats of adequate horsepower for the size of ships ordinarily berthing at this Terminal will assist the vessel in the berthing/unberthing manoeuvres. If the Master so request or in the case of the size of vessel and wind and/or current conditions so require, the Terminal may order the use of 3 tugboats for the manoeuvres. The tugboats, on arrival, will come alongside the ship before entering in the Terminal.

The first communication with the tugs is via VHF Channel 16 as first contact and then changed as per instructions.

7. *Berthing:* At Bajo Grande ships berth bow to North.

On approaching the berth it is to be avoided approaching bow to or at any angle with the berth.

No. 1 Berth (Outer Berth): The ship will be put in a position parallel and abeam to the berth at a minimum distance of about 50 m. or more, depending upon the prevailing conditions of wind and current.

Once in this position and with the ship motionless or almost motionless, the Liaison Officer will assist you and the Official Pilot in the manoeuvres to nurse the ship alongside sideways with the tugs which, generally, will be alongside the ship's side opposite to the side the ship will berth, already made fast and ready to push.

When the manoeuvre is carried out for berthing to No. 1 or Outer Berth, the starboard anchor will be in cockbill position ready for use in case needs arise and in such case the aft tugs or both immediately ordered to pull on reverse.

It will be avoided to haul the mooring ropes secured to the North platform bollards in order to pull the vessel forward. If need arises the ship's engines may be used to move the ship.

8. *Unberthing:* The use of spring lines must be avoided in order to veer the ship on the mooring platform for clearing the vessel's bow or stern while unberthing. These spring lines will be only used in case of extreme emergency.

After all the mooring lines have been cast off, the ship will be towed sideways away from the berth to a distance where she can safely proceed under own power.

The Liaison Officer will disembark when the ship is safely free away and offering no risk to the dock.

Corpoven will not permit berthing or unberthing without a Corpoven Liaison Officer being onboard.

9. *No. 2 Berth* (Inner Berth): The same procedure hereinbefore described for berthing at No. 1 Berth will be followed for berthing at No. 2 Berth. The ship will be put first parallel to the berth and then the vessel nursed alongside with the tugs. For unberthing, manoeuvres will be the inverse. During berthing and unberthing manoeuvres, ship's engine(s) will be used only when it becomes necessary.

At this berth anchors must not be used because of submarine pipelines laid there. In this berth the distance from it must not be more than 50 m.

10. *Emergency Towing-Off Wire:* Whilst berthed alongside the platform, emergency towing-off wire-ropes should be rigged both on the offshore bow and quarter of the ship, with their loops kept near the waterline at all times where the tugs can easily and quickly pick them up.

The wire-ropes should be in good condition and of suitable strength for the ship's size. The wires should be properly led outboard through the nearest fairleads leaving sufficient wire-rope coiled on deck and free to go when the tug hauls and of adequate length to tow her safely off the Terminal.

The overboard length of rope should be adjusted as the drafts decrease or increase.

11. *Mooring Lines Whilst at Berth:* Mooring lines should be periodically inspected and attended to ensure that they are kept taut in order to minimize and movement of the ship along or away from the berth.

In the case of ships equipped with automatic tension winches, the brakes of the winches should be applied and the mooring lines handled on manual operation when required to take up slack or pull them taut.

12. *Safety Practices:* While the ship is lying at the Terminal the Master will ensure that all the safe practices in loading or discharging oil products and related operations are complied with on his ship and also ensure the maximum co-operation between the vessel's crew and the Terminal personnel in their mutual interests of safe and efficient operations.

AUTHORITY: Corpoven, S.A. – Bajo Grande Refinery, Carretera a la Canada, P.O.Box 93, Maracaibo, Venezuela 4001A. *Tel:* (061) 202673. *Telex:* 61254, 61161. *Contact:* Mr. Adriel Fernandez, Terminal Supervisor.

(2) **OPERATORS:** Corpoven, S.A.

LOCATION: S.W. of channel buoys B – 87 and B – 88.

The installations for processing natural gas liquids at Bajo Grande processes liquids for Corpoven, S.A., and they are known as Product Owners. The Plant is situated in Bajo Grande, approximately 10 miles to the South of the Port of Maracaibo, on the West bank of Maracaibo Lake.

FLAG: The local authorities require the Venezuelan flag to be hoisted to the top of the vessel's mast from the time it enters the outer channel on arrival, until it leaves the outer channel on departure.

DOCUMENTS: *Customs Clearance for Programmed Vessels:*

Vessels which arrive in ballast or with cargo in transit, require the following documents (with additional file copies if these are required):

(A) Clearance from the last port
2 copies – 1 visaed Ballast Certificate
1 or more letters Consular Correspondence (in sealed envelope)
4 copies – 2 visaed Passenger List
4 copies – 2 visaed Lists of Equipment
4 copies – 2 visaed List of Passengers in Transit
4 copies – 2 visaed List of Mess Equipment and Spares
4 copies List of Personal Effects
4 copies – 2 visaed List of Stores
5 copies Crew Lists.

Vessels which arrive with cargo must have, apart from the foregoing:

(B) 4 copies – 2 visaed Venezuelan Entry Manifests
6 copies – 2 visaed Bill of Lading
2 copies visaed Entrance Manifests.

In the absence of a Venezuelan Consul at the last port, the Customs clearance documents must be signed by the Consul of a friendly nation, one of the Port Authorities, Notary Public, the Chamber of Commerce, or by two recognised signatories.

Clearance through Customs of diverted vessels:

Vessels diverted on the high seas to Maracaibo to load at Bajo Grande must present all the documents indicated in (A) above, except the consular correspondence, which they will not have.

Vessels diverted on the high seas to Maracaibo (Bajo Grande) which do not have a Venezuelan Customs Clearance on board, must advise their Agents by radio prior to their arrival, the name of the vessel, the name of the Master, nationality of the vessel, net Venezuelan tonnage (if available, if not, the net registered tonnage), last port of discharge, port to which it was originally sailing and the ETA at the Pilot station at San Carlos. This information is required to obtain the Entry Permit prior to the arrival of the vessel. Three copies of the diversion telegram received by the vessel, signed by the Master, together with those documents detailed above, must be presented to the Port Authorities on arrival at Maracaibo. Non-presentation to the Port Authorities of the documents or the information mentioned will occasion a fine to the vessel.

Inspection by Customs: All vessels arriving from foreign ports destined for the dock at Bajo Grande must anchor in the Port of Maracaibo for Customs inspection by the Port Authorities before proceeding to Bajo Grande. The vessel's gangway must be in position prior to arrival at Maracaibo.

A member of the National Guard of Venezuela will come on board every vessel at Bajo Grande to observe the activities in connection with the operations of loading and unloading. This official is authorised as representative of Customs and is known as the "Vigilante de Aduana". He must be fed and lodged at the same standard as ship's officers.

Loading Documentation: The loading and Customs papers will be delivered to the Master by the Agent of the ship on his arrival at the Port of Maracaibo, on his voyage outwards.

PILOTAGE: Vessels entering currently have the option of taking on the official Pilot at:

(a) The channel in front of the pilot station at San Carlos, between the Buoys B – 24 and B – 26.

(b) In front of Amuay Bay or Punta Cardon. However, to arrange this service, Agents must be advised at least 48 hours in advance of this requirement.

The Pilot who boards the vessel in front of San Carlos will take it to Maracaibo, where he will disembark.

Due to weather conditions, the Port Captaincy of Maracaibo cannot guarantee the embarkation or disembarkation of the Pilots at the "EM" buoy. For this reason, Masters must communicate with the pilot station of San Carlos to receive necessary instructions as to where the Pilot will be embarked, the latter usually coming on board between Buoys B – 24 and B – 26. The system of communication between the pilot station of San Carlos and the vessels will be via radio-telephone. The San Carlos frequencies are: 2182 kHz. and 156.6 MHz. (VHF Channel 16). Other frequencies are: 2122 and 2080 kHz. and 156.8 MHz.

Pilotage to navigate through the inner and outer channels is compulsory at all times. The maximum speed of navigation in the dredged channels is 10 knots.

Vessels leaving will take the Lake Pilot on board at Bajo Grande and on reaching the port of Maracaibo the Pilot will be changed for another to take the vessel through the channel. The channel Pilot will pilot the vessel up to the San Carlos bank, generally between Towers E – 31 and E – 33, where he will disembark. The Port Captain of Maracaibo has issued instructions to all ships' Agents so that they may inform the Master and/or Owners of the vessels that all vessels must identify themselves with the pilot station of San Carlos by radio-telephone, regardless of the time of day, when they are entering between Buoys B – 17 and B – 19 and when they are leaving between Buoys T – 42 and T – 40.

Every time a launch with an official Pilot on board leaves to attend to a vessel in sight, the costs will be charged to the company which owns the vessel or to its representative, even when service has not been given.

A government Pilot will assist each vessel from Maracaibo to Bajo Grande and on the outbound trip to Maracaibo. The government Pilot will also assist in the berthing and unberthing operations. The ship's Agent will inform the Master of each vessel, as well as the government Pilot, the schedule for berthing the vessel.

The Plant Mooring Supervisor will board each vessel prior to approaching the dock. Mooring Supervisor will assist in the mooring and unmooring operations. It should be understood that the Mooring Supervisor acts only in an advisory capacity to the Master. The vessel's Master retains full responsibility at all times. The Plant assumes no responsibility in connection with any acts or advice given by the Mooring Supervisor.

APPROACHES: The buoy which marks the entrance to the outer channel (buoy "EM") is situated in approximately position 11° 13′ 47″ N., 71° 33′ 31″ W. The characteristics of the light of the "EM" buoy are: white flash every ten seconds, visibility approximately 5 miles. The distance between the "EM" buoy to the Southern extremity of the outer channel, marked by the Buoys B – 27 and B – 28, is approximately 15.75 miles. The channel is 1,000 ft. wide and normally has a depth of 42 ft. minimum at low tide observed at the time of neap tides with a tidal amplitude varying 2 ft. 3 in.

There is a breakwater 0.5 miles to the East of and parallel to the outer channel which extends 1.6 miles to the North from the Northern side of the Island of Zupara. The end of this breakwater is marked by a steel frame tower with a light 25 ft. above sea level. Characteristics of the light are: white flash every 8 seconds, visibility about 3 miles.

Commencement of the inner dredged channel is marked by the Buoys B – 29 and B – 30. The length of this channel, which is marked by buoys, is approximately 12 miles, and ends at Buoys T – 55 and T – 56. The channel is 800 ft. wide and the normal checked depth is 43 ft. neap tides with a tidal amplitude varying between 1.5 ft. to 2.5 ft.

The channel from the Buoys T – 56 as far as the port of Maracaibo is a dredged channel, whose end is marked by Buoys B – 73 and B – 74. It is some 800 ft. wide and has a depth of at least 43 ft. The distance is about 11 miles and the tidal amplitude range is insignificant.

RESTRICTIONS: Bridge clearance at MHHW 146 ft.

MAX. SIZE: The maximum permissible fresh water draft at the dock is 36 ft. and the maximum overall length vessel the dock will accept is 700 ft. Vessels with a berthing displacement up to 20,000 long tons will be accepted, providing the approach velocity can be controlled to 0.3 ft. per second or less.

Vessels with an overall length greater than 700 ft. or with a fresh water draft of more than 26 ft. or a displacement greater than 20,000 long tons will not be accepted for loading at Bajo Grande, unless they have obtained the prior authorisation of Corpoven, S.A. If the vessel is not equipped to moor, load and unmoor in a safe manner, the vessel will not be loaded. In such cases, there will be no responsibility on the part of Corpoven, S.A.

RADIO: Corpoven, S.A. Export Department also has radio-telephones with the following frequencies: 2080, 2120, 2182 (stand-by), 2638 and 2738 kHz and 156.6 (stand-by) and 156.8 MHz. operated in accordance with the following schedule:

Monday through Friday:	From 0730 until 1130
	From 1300 until 1700
Saturday, Sunday and Holidays:	From 0730 until 1030 approx.

Any tanker or vessel bound for Bajo Grande shall cable Corpoven, at least 5 days in advance of its scheduled arrival time in Maracaibo, giving notice of its estimated time of arrival, loading capacity, amount and type of product to be lifted and condition of ship's tanks.

At least 48 hours in advance of arrival at the San Carlos Pilot Station, the vessel's estimated time of arrival, nationality, Venezuelan net tonnage (if available, otherwise its registered tonnage), quantity and type of cargo required, condition of ship's tanks, name of Agent, last port, Master's name and all requirements of the vessel while in port should be cabled to "Corpoven, Maracaibo" and to the ship's Agent. As the cable office in Maracaibo is not able to communicate directly with vessels at sea, messages to "Corpoven, Maracaibo" and to Agent should be routed via PJC Curacao, and should be prefixed "Via AAC" (All America Cables and Radio Inc.). Failure to give such proper notices shall absolve the Plant from any claim for delays or demurrage.

TUGS: 2 tugs, each 1,600 h.p.; will be used for mooring and unmooring operations.

BERTHING: The dock proper may be identified by the overwater pipeline trestle that connects the dock with shore.

The dock is located approximately Lat. 10° 30′ N., Long. 71° 36′ W., which is 2 miles off shore from the Bajo Grande Natural Gas Liquids Processing Plant and S.W. of channel buoys B – 87 and B – 88 on the Maracaibo channel. The dock is single sided and consists of 4 breasting pilings, 4 mooring dolphins and a loading platform.

The dock is equipped with a compressor and auxiliary equipment to assist the ship in compressing and re-condensing the ship's vapours. No liability will be assumed by the Plant Operator for unavailability of the Dock's vapour compressor. The dock is also equipped with a vent system to dispose of contaminated vapours.

A tie-up crew will handle all mooring or pick-up lines before and after loading.

The Plant tie-up crew will assist the ship's crew in positioning and connecting the cargo loading arms and in removing same on completion of loading. The dock loading arms are equipped with 10 in. ASA 300 lb. RF flanges. It shall be the responsibility of the ship to furnish its own fittings to mate with the dock's 10 in. ASA 300 lb. FR flanges.

Mooring procedure: Any vessels calling at Bajo Grande must be equipped with mooring hawsers of sufficient length and strength to run a line to each of the 2 bow and 2 stern mooring dolphins and shall use such equipment while at the dock. Vessels equipped with tension winches and cables shall utilise these in addition to the mooring hawsers or alone if the vessel has sufficient cables to meet the minimum requirements of running a cable to each of the bow and each of the stern mooring dolphins. For added security of those vessels not equipped with tension and/or cables, 1 steel cable will be furnished for a bow and another for a stern mooring dolphin by the Plant. It should be recognised by all parties that while the use of these cables is strongly recommended, the Plant accepts no responsibilities for loss or damage to any vessel or to any facility or to any person that may result from the failure of this equipment.

For the convenience and safety of all personnel boarding or disembarking while at Bajo Grande it is recommended that the vessel's accommodation ladder be rigged on the port side, this being the side normally laying against the dock. The ladder should be suspended after the Mooring Master boards and during docking operations to avoid being fouled.

BALLAST: There are installations for unloading dirty ballast. Vessels which arrive at Bajo Grande with dirty ballast must advise 48 hrs. in advance with regard to any emulsifiers, detergents or chemicals which may be present in the ballast and which are going to be unloaded. If these emulsifiers, detergents and chemicals are not acceptable, Corpoven, will advise the ship and the latter must arrive at Bajo Grande with clean ballast.

The ballast will be unloaded at a rate of approximately 5,000 bbls.p.h., nevertheless in the case of unexpected damage or malfunction of the system at Bajo Grande, Corpoven, will give instructions to the Master of the vessel so that he may arrive with clean ballast and Corpoven, will not be responsible for the delays which may be suffered by vessels in cleaning their tanks prior to arrival.

It is strictly prohibited to discharge into the lake any liquid or solid waste resulting from tank cleaning. Therefore it is recommended that the Master gives instructions to all personnel so that they avoid any possible leak or contamination in the lake.

In the event that the representative of the Plant or the National Guard observe that dirty ballast is being discharged into the lake, or even residues or other contaminatory organisms whilst clean ballast is being unloaded, such operations will immediately be suspended and the consequences will be strictly for the account of the ship.

LOADING: *Notice of Readiness:* On arrival at Bajo Grande and after inspection by the Customs Authorities, and having obtained any other official approval required before loading, the Master of the vessel will notify Corpoven in writing that the vessel is ready to load. This notification must include a report of the conditions of the tanks of the vessel, specifying in detail the temperature, pressure, last loading, list of vessel and trim, possibility of contaminatory organisms and any other conditions which may affect the loading.

The Master of the vessel may request any equipment and/or service which he considers necessary for the safe and efficient loading of his vessel and Corpoven will make every effort to fulfil this request.

It will be the responsibility of the vessel to provide its own connections to join up with the RF 10 in. 300 ASA flanges of the dock.

It will be the responsibility of the ship's Master to ensure that prior to commencement of loading, the atmosphere inside the tanks, which are to receive products are within the safety limits stipulated. Nevertheless, Corpoven reserves the right to inspect at any time, to verify the fulfilment of these safety precautions and to refuse to load any vessel which in the opinion of Corpoven does not fulfil the safety requirements stipulated.

LPG refrigerated vessels will not be considered ready to load at Bajo Grande unless all the LPG tanks contain LPG vapours and are sufficiently cooled to permit shipment of the nominated products.

Vessels which receive completely refrigerated products must be capable of receiving at their boiling point from 0.5 to 2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all the vapours resulting from the shipment at the rate specified and including those vapours which form as a result of the heat gained by the vessels' tanks.

Loading Procedure: The positioning and connection of the loading arm must be effected to the satisfaction of the personnel in charge of the vessel. After approval of the personnel in charge of the vessel, the loading valves may be opened to check that the connections do not have leaks and loading may commence.

The maximum loading rate is 8,000 bbls.p.h. (750 – 775 metric t.p.h for completely refrigerated products and petrol) and a minimum loading rate of 250 bbls.p.h. (23 metric t.p.h.).

The pumps are designed to supply a minimum flow of 250 bbls.p.h. at a pressure of 225 p.s.i.g. and, since the installations at the Bajo Grande Dock do not have facilities for controlling the pressure of LPG which is being loaded, they are not responsible for any damage or delay which may occur due to the request for reduction in flow and pressure of LPG in order to cool or purge the vessel's tanks.

There are no installations for generation of inert gases. LPG vessels which require cooling, purging or any other assistance in Bajo Grande can be accepted after prior request in writing from the Master of the vessel; however, these services will be charged to the vessel. The responsibility for helping to effect purging and/or cooling is charged at 733 Bolivares per hour, during the time that such operation of purging or cooling causes the vessel to exceed the permitted period of stay.

The quantity of products used in such purging or cooling will be for the account of the vessel.

In the event that the dock vapour compressor is operated at the request of the vessel's Master for a purpose other than for purging or cooling, this will be charged at the rate of 500 Bolivares per hour to the ship.

All loading and unloading operations must be suspended whilst there is bad weather and the tank covers of the vessel must be closed and secured. During periods of calm, petrol or other products with a low flash point can be loaded at reduced rates or the loading operation can be interrupted if the heavy vapours are not being dispersed with sufficient speed to avoid dangers of gas accumulation. Officers on the vessel must be alerted so that they may be on watch whilst such conditions apply.

Under normal operational conditions it may be necessary to displace the loading line. This will require the person in charge of the vessel advising the representative of the Plant when the loading is nearing completion in order to complete an equal quantity to the capacity of the loading line.

Permitted Period of Stay: (a) The permitted period of stay, as is defined hereunder, shall commence to be counted from 6 hours after arrival of the vessel at Bajo Grande. The permitted period of stay will be terminated when the final mooring cable has been withdrawn from the quay.

For the purpose of these instructions, the Notice of Readiness, may be delivered after the vessel has tied up at the dock; nevertheless, the arrival at Bajo Grande shall be defined as the time when the vessel passes between Buoys B – 87 and B – 88, which mark the Maracaibo navigational channel and are situated approximately 1,000 m. in front of the Bajo Grande Dock.

(b) In the event that a vessel arrives at a different time to that confirmed in the shipping programme, and unless Corpoven has approved a different arrival time, vessel must await mooring of other programmed vessels before arriving and which vessels may have arrived at that time and the permitted period of stay will commence when the loading operation commences, or 6 hours after receiving Notice of Readiness, whichever is the later. It is agreed that a vessel shall be included in the loading programme if it arrives at Bajo Grande between the hours of 12.01 hrs. on the accepted date and 0600 hrs. of the following day.

(c) Except for the provisions in (b) above, all vessels arriving at Bajo Grande will have the right to moor in the order in which they appear in the shipping programme. Corpoven at their discretion, may change the order of shipment when it may be necessary for reasons of safety or for the purpose of obviating a closure of the Plant or reduction in production.

(d) The waiting time permitted shall be 24 hours, plus one (1) hour for each 6,000 bbls. of product loaded in excess of 114,000 bbls. This waiting time shall be that permitted to load the complete cargo or part of the cargo of the vessel, it being understood that any time spent in deballasting operations will not be taken as waiting time. If the loading operations are delayed or interrupted by *force majeure*, which shall include the closure of the shipping terminal due to bad weather, the time thus lost will not be counted as permitted waiting time.

(e) The loading operations shall be considered as terminated when the loading hoses are disconnected. Every vessel will leave the quay as quickly as may be practically possible after having completed shipment of the cargo and the personnel of the vessel and those on land have arrived at an agreement as to the quantity of products shipped.

(f) In the event that a vessel is moored at the quay for 6 consecutive hours after Corpoven has notified the Master of the ship that the installations are ready to deliver the product, if the vessel on completion of this time is not in a position to receive products, then at the discretion of Corpoven the vessel may be withdrawn from the quay, to prevent the products burning or a reduction in production.

A vessel may be withdrawn from the quay at any time for reasons of safety.

Verification and Measurement: Determining factors to arrive at the official figures of a shipment:

(A) Petrol and Butane:

(1) Correction factors of the individual meters less than 1%. In this event the terminal shall always use the figures of the meters as official (and not take into account the absolute difference in barrels) taking always the precaution of carrying out a comparison between the figures of the ship and those of the land.

(2) Factor of correction in any of the meters greater than 1%. In this event the vessel's figures will be used, comparing them in all aspects with the figure of the meters without applying the correction factor and with the land tanks.

In those cases in which the vessel's figures are used, it is appropriate to suggest that they check their figures.

(3) In the event of the measuring system not operating, and the vessel cannot give its own figures, as a last recourse the figures of the shore tanks will be used.

(B) Propane:

(1) The vessel's figures will be taken proceeding in exactly the same way as in point (2) of sub-section (a) above.

(2) In the event that the vessel cannot supply figures, the figures of the shore tanks will be used.

All volumes will be adjusted to the volume equivalent to 60° F in accordance with the applicable sections of Standard API 2534 and the corresponding tables of the Measurement Tables of Oil ASTM (latest edition) or other methods or standards selected by Corpoven.

If the product delivered is LPG, the content of the ship's tanks will include the quantity of the product in the form of vapour.

All volumes will be calculated in U.S. liquid barrels at 60° F and the adjustments at this temperature will be made in accordance with the Oil Measurement Tables ASTM – 1P, American Edition 1952 (or the ruling tables which may replace these).

In the event of the products being loaded in a vessel whose tanks, pipes and equipment are empty when loading commences, the gross volume of products which may remain in the pipes and equipment on completion of shipment and at the time of final measurement, shall be calculated on the basis of the volumetric capacity of those pipes and equipment, adding the calculated volume loaded in the vessel's tanks and including in the total volume delivered to and received by the vessel at that time. In the event that the procedure described is used to determine the volume of products delivered and if during the time of this delivery vapours from the vessel's tanks be vented then the quantity of vapours vented shall be determined as shall also be the liquid volume equivalent to these vapours in normal conditions and this will be added to the quantity determined in (a) and (b) above.

Permissible Composition of the Atmosphere of the Tank for purging: Maximum percentage per volume of air or oxygen permissible for the safe shipment of the product when the vessel's tanks are purged with CO_2 or N_2:

	Air		*Oxygen*	
Product	(CO_2)	(N_2)	(CO_2)	(N_2)*
LPG	50	40	8	7
Petrol	50	40	8	7

*The percentages of nitrogen do not include the nitrogen of the air in the mixtures.

Example: If a vessel is going to load LPG and it is going to be purged with N_2, it must add sufficient N_2 to ensure that the mixture does not contain more than 40% by volume of air. The other 60% will be N_2.

Ref. Principles & Practices of Purging, 1954. American Gas Assoc. – Chapter 2, page 28.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available in the area. Lubricating oils in limited quantities are also available from local contractors. All bunker, lubricating oils, water and other requirements should be cabled to the ship's Agent. For reasons of safety, no bunkers may be taken on the vessel while berthed at Bajo Grande.

FRESH WATER: Available at Maracaibo Harbour.

MEDICAL: Complete medical services are available in Maracaibo.

REPAIRS: Maracaibo: No major repair facilities are available, minor repair jobs can be taken care of through local machine and electrical shops. Shore labour can be furnished if required. Radio, radar and gyro compass technicians are available upon request.

Bajo Grande: No repair facilities are available, but when required, personnel from shops in Maracaibo will travel to Bajo Grande to effect repairs.

CONSULS: The following nations have Consular representation in Maracaibo:

Belgium
Chile
Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
West Germany
Great Britain
Guatemala
Italy
Netherlands
Norway
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

SHORE LEAVE: Launch service for official business purposes and emergencies is readily available in Maracaibo. Launch service for shore leave can be arranged through contact marine service and will be the responsibility of ship's personnel. Arrangements for shore leave transportation can be made through the ship's Agent. No shore leave facilities are available at Bajo Grande.

CLASSIFICATION SOCIETIES: American Bureau of Shipping and Lloyd's Register of Shipping, U.S. Salvage Association, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale, and Germanischer Lloyd have Agents in Maracaibo. Surveyors are available by appointment from any of these Agents.

CURRENCY: The Venezuelan unit of currency is the Bolivar (Bs) and is the only currency recognised as legal tender within the country. Masters desiring a cash advance should make the request to their Agent when advising ETA.

MAIL: Outgoing mail for ship's account may be given to the Agent's representative who boards the vessel on arrival at Maracaibo inbound. Personal mail will be accepted only if carrying the correct amount of Venezuelan postage, or if postage is authorised by the Master for the vessel's account.

GENERAL: *Maracaibo Port Captaincy:* Directive which must be observed by vessels entering and leaving Maracaibo Lake:

OBJECTIVES:

To increase the safety of Human Life at Sea, to take all necessary measures to avoid marine accidents in general and to ensure that vessels are navigated with safety in the navigable channels and waters of Maracaibo Lake.

1. All radio-telephone communications between the Control Offices of Maritime Transit under the control of the Port Captaincy of Maracaibo and vessels, shall be made, for the first contact, via Channel 16 (156.8 MHz) and immediately it shall be agreed that for the transmission of required information they will change to Channels 12 or 14. Also this procedure will be adopted in communication from ship to ship.

2. Any vessel which navigates in the vicinity of the buoy "EM" of the outer channel being 10 miles from the latter shall call the pilot station at San Carlos, requesting permission to enter the zone and will supply the following information:

(a) Name and type of the vessel.
(b) Nationality.
(c) Draft.
(d) Last port of call
(e) ETA at the "EM" and "B – 26" buoys.

3. The Port Captaincy will authorise by radio, via the pilot station of San Carlos, to Masters of vessels who have reported to that station request to cross the outer channel, or part of it, with the assistance of the Official Pilot, in accordance with the sequence of arrival.

4. Every 5 miles, the Master of the vessel will call up San Carlos, indicating any information which he may have and giving his position within the channel, by reference to the buoys which are on his starboard side.

5. When communication in item 1 has occurred, San Carlos will inform the vessel as follows:

(a) The location of any dredger (mobile or stationary) which is operating in the outer channel, buoys whose lights are out, changes in buoys' positions or where buoys have disappeared, vessels which have sunk, etc.

(b) If there are vessels leaving the port, to give the position of these by reference to the odd numbered buoys.

6. Vessels shall establish radio-telephone communications with the dredger when they are 5 miles from it. In this communication, they will indicate the place they estimate that the vessel will meet the dredger and any other information which they consider necessary for the safety of navigation of both.

7. San Carlos will keep vessels informed of all the circumstances mentioned above, especially the time and place that each of them estimate to pass close to any dredger which is operating in the outer channel, and in order that they do not meet the dredger simultaneously.

8. Masters of vessels will inform the pilot station at San Carlos of any other information which the latter may request.

9. Masters of vessels will keep a watch on Channel 16, on the order of the Official Pilot, until their arrival at port of destination in Maracaibo Lake and on leaving until the Pilot has left the vessel.

10. Pilots, when they are bringing a vessel into the port, at the level of the parallel of Palmas del Norte Point (Buoys T – 55 and T – 56), will call up the Port Captaincy and transmit the following information:

(a) Name of vessel
(b) Time
(c) Port where operations will be effected
(d) Name of Pilot calling.

11. When the vessel continues to navigate to the South of General Rafael Urdaneta Bridge, the Pilot will inform the Control Office of Maritime Transit in Maracaibo, the time at which the vessel will pass Buoy "B – 79".

12. The average speed of vessel in the navigable channels will be ten (10) knots, Masters being authorised as are also Official Pilots, to alter this, when the safety of navigation may require it.

13. San Carlos will check by radio-telephone the transit of vessels from the entrance buoy "EM" to the level of the parallel which passes in front of Palmas del Norte Point (Buoys T – 55 and T – 56 and vice versa).

14. Loaded vessels navigating outwards, and being in the outer channel, will have priority over vessels coming in to the same channel, provided that these do not meet with those coming out in the critical zone, included between Buoys B – 21 and B – 22 and E – 33 and E – 34. For this purpose, the San Carlos Pilot Station will inform entering vessels the situation of leaving vessels so that they may take necessary measures to avoid meeting those vessels coming out in the referred zone.

15. The Port Captaincy will check via the office of Control of Maritime Transit, the Navigation of vessels, from the parallel passing Palmas del Norte Point (Buoys T – 55 and T – 56), as far as the terminals and ports to the South of General Rafael Urdaneta Bridge and vice versa.

16. Every Official Pilot navigating outwards when passing the Buoy B – 72, will call up San Carlos by radio-telephone and will supply the following information:
(a) The time that he is passing Buoy B – 72.
(b) The time that he is arriving at San Carlos.

17. When the dredger receives any call from a vessel it will give information as follows:
(a) Location where it is at that time.
(b) Direction of dredging (South North or North South).
(c) The side on which the vessel must pass.
(d) Time necessary to make the manoeuvre indicating on which side of the channel dredging will continue after the manoeuvre.

18. The pilot station at San Carlos will be attentive to all communications made and will take note of them, in the event that their intervention may be required by dredgers or by vessels.

19. Any vessel sailing from any port in the No. 2 pilotage area of Maracaibo, will inform the Port Captain as follows:
(a) Type and name of vessel.
(b) Where from and time of leaving the port.
(c) Speed and port of destination.
(d) Estimated time of passing Buoy B – 72.
Signed – Port Captain.

Section B

LA ESTACADA: 10.42 N. 71.32 W.

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATOR: Corpoven, S.A.

LOCATION: Loading Terminal in the Lake of Maracaibo at La Estacada, located at Lat. 10° 42′ 30″ N., Long. 71° 31′ 40″ W. Entrance to and leaving this terminal is made between Buoys B-65 and B-66.

DOCUMENTS: As soon as vessel is safely moored Agents' representative will board the ship together with Port Authorities. The following documents are needed on arrival:

1. Clearance from last port with the following attached:
   Store List
   Crew List
   Slop Chest Inventory
   Ballast Certificate
   All visaed by Venezuelan Consul in sailing port.
2. Crew List (6 copies).
3. Store List (6 copies).
4. Slop Chest Inventory (Deck, engines and cabin store listed separately) (6 copies).
5. List of Personal Effects (6 copies).
6. Derat Exemption Certificate (original).
7. Venezuelan Net Tonnage Certificate (original).

See "Tonnage applicable".

The Health Officer sometimes requests to see the Vaccination Certificates of crew members.

RADIO: *Information to be cabled to Agent, Maracaibo.*

Upon vessel's departure from the last port bound for La Estacada cable 72, 48 and 24 hours ETA at San Carlos Pilot Station, including in this message last port, Master's name, if A.C. current on board and any requirements. If diverted, cable original destination, also have 5 copies of diversion cable ready on arrival. If the vessel is nominated to load a part cargo only at La Estacada, indicate at which port cargo will be completed. All cables should be sent via PJC (Curacao Radio) and via ITT All American Cables.

A separate cable should be sent to Corpoven, S.A. Maracaibo indicating ETA at San Carlos only.

PILOTAGE: (See "Maracaibo Lake"). Pilotage Compulsory.

1. All vessels must call Corpoven, S.A. and Agent on VHF Channel 16, when passing the E.M. Buoy and when embarking the Pilot at San Carlos.

2. Reduce speed approaching Inner Channel Buoy B-63; rig accommodation ladder starboard side properly illuminated. Company Cargo Co-ordinator will board between B-63 and B-65.

3. Listen during transit on 2182 kHz and VHF Channel 16.

4. In event of unforeseen circumstances requiring vessels to anchor, area West of Estacada Northern Buoy mooring outside of channel limits will be used.

Vessels proceeding to La Estacada Terminal must enter the Outer Channel and embark the Government Pilot between Buoys B-25 and B-27. After vessel arrives in the vicinity of the E.M. Buoy, Master must contact San Carlos Pilot Station by radio-telephone on frequency 2182 kHz or VHF Channel 16 requesting Pilot between Buoys B-25 and B-27.

Caution: Masters are warned to keep adequate speed in the Outer Channel even when embarking the Pilot as strong cross currents are encountered near San Carlos and Zapara Island. Pilot boats are fast and fitted with a flying bridge. Once the Pilot is on board the vessel will proceed to La Estacada, reducing speed in the vicinity of Inner Channel Buoys B-63 and B-65 where Corpoven, S.A. Cargo Co-ordinator will board. Accommodation ladder must be rigged up on starboard side.

MAX. SIZE: Water depth in both buoy moorings is 40 ft. mean monthly observed lowest water (MMOLW). Because of the depth of the surrounding approaches, 39 ft. (MMOLW), admissible mid-ships maximum draft in both moorings is 37 ft. (No. 1) and 36 ft. (No. 2) freshwater. Under certain tidal conditions, however, with vessels over 60,000 d.w.t. and LOA exceeding 750 ft., it may be necessary to restrict loading to 36 ft. 6 in. Masters are requested to be guided by the Cargo Co-ordinator in appropriate draft to be loaded.

Berth No. 2 will accommodate vessels up to 850 ft. LOA, and Berth No. 1 up to 720 ft. LOA. Beam in both berths is unlimited.

TUGS: Use of 2 tugs of at least 1,600 h.p. is compulsory for mooring and unmooring at La Estacada (Government Decree). Use of 2 mooring launches with crew including a diver, who inspects the submarine loading hoses, is compulsory at La Estacada. These mooring launches remain alongside ship during stay in berth order act in any emergency.

BERTHING: *(a) Description:* Marine Oil Loading Terminal, is an off-shore installation and consists of two permanent buoy moorings, No. 1 to the South, and No. 2 to the North.

Berths No. 1 and No. 2 consist of 4×14 ft. cylindrical steel buoys, each fitted with a pelican hook to which ship's mooring lines are attached by contractor's mooring launches. On each buoy there are 2×1.625 in. improved plow steel wirelines to supplement mooring lines in order to provide additional security during strong winds. In Berth No. 1 the plow steel wires are 520 ft. long and in Berth No. 2 585 ft. long.

Both berths are two directional; ships moored heading North or South according to prevailing current.

(b) Deballasting: There are no facilities at La Estacada to receive and treat dirty ballast therefore *same must be clean.* All ballast is discharged ashore through a 16 in. line.

(c) Mooring: All ships should have an adequate supply of stoppers or other special equipment necessary to handle wires attached on mooring buoys. Vessels mooring in berths must be equipped with 4 ropes forward and 4 ropes aft. Vessels are cautioned that good quality ropes are essential and that they will be held liable for any damage occurring through improper or poor mooring ropes or inability to properly handle same.

Vessels in buoy moorings must have deck winches in readiness for use at all times. Method of berthing will be at discretion of the Government Pilot, as weather and other conditions permit.

During berthing and unberthing, ship's engines, tackle and all other gear must be in operative condition and in a state of readiness for use on immediate notice.

Weather permitting, and berths being available, vessels may be berthed at any hour of the day or night. Mooring buoys are properly lighted.

Government Pilots will assist in mooring the vessel in Berths No. 1 or 2. Loading hoses can be connected both port and starboard side, according to ship's position. The Company Cargo Co-ordinator will remain on board ship to advise on connecting and disconnecting loading hoses, and loading of cargo.

The Government Pilot will later unmoor the vessel and take her out to the channel for departure.

Please keep in mind that he acts as adviser only and the Master retains full responsibility at all times. When ship is in position and mooring wires tautened, mooring winches such as tension winches must have their manual brakes put on securely, and should not rely on automatic rendering devices.

During time vessel is at the berth, frequent and regular inspection of mooring essential to ensure that mooring lines are kept taut and that movement of ship is kept to a minimum. When tugs are alongside or assisting a tanker, all cargo openings, permanent ballast tanks, lids and pump-room doors must be closed no matter what grade oil is being or has been carried, unless these spaces are gas-free.

The mooring operations are carried out by 2 mooring launches and 2 tugs.

TANK INSPECTION: As soon as all ballast is discharged and hoses connected, production supervisor or cargo co-ordinator will inspect ship's tanks. If same are dry and clean he will sign corresponding certificate.

LOADING: Berth No. 1 has 1×24 in. loading line with the corresponding manifold and Berth No. 2 also has 1×24 in. line. 12 in. – 150 lb. marine loading hoses are used. Each berth capable of a max. loading rate of 22,500 bbls.p.h., with an appropriate reduction for topping-off.

However, maximum loading rate entirely at Company's option and will vary according to circumstances and type of tanker concerned. When completing loading, stoppage of cargo will be determined on board, and Masters are requested to inform Cargo Co-ordinator at least 30 minutes in advance in order reduce pumping rate for topping-off. Cargo Co-ordinator will be in continuous contact with pumping station by means of portable radio. Should this means of communication fail, the following signals on ship's whistle will apply:

One long blast	Stand by
Two long blasts	Commence pumping
Three long blasts	Stop pumping

Upon completion of loading, Cargo Co-ordinator, together with ship's officer, will gauge ship's tanks and later prepare cargo documentation.

FUEL: Bunkers and marine fuels supplied by barge before or after loading operation at anchorage. Agent should be given prior notice.

FRESH WATER: Must be ordered with first ETA cable to Agents so that arrangement can be made with supplier. A water barge and a tug must be hired.

DENSITY: 997 – 1003.

REPAIRS: Only smaller repairs can be effected locally; however, technicians available for radio and radar repairs. Contact Agent.

SURVEYORS: American Bureau of Shipping and Lloyd's Register have Agents in Maracaibo.

SHORE LEAVE: Launch is primarily for use of authorities and company staff, but will effect trips for crew if required by Master. Contact Agent who will make necessary arrangements.

CONSULS:
The following have consular representatives in Maracaibo:

- Belgium
- Chile
- Colombia
- Costa Rica
- Denmark
- Ecuador
- El Salvador
- France
- Germany (West)
- Great Britain
- Guatemala
- Italy
- Mexico
- Netherlands
- Nicaragua
- Norway
- Panama
- Peru
- Spain
- Sweden
- Switzerland
- U.S.A.

GUARDS: One National Guard stationed on board. He must be provided with sleeping quarters and seated in officers' mess for meals.

He is the representative of the Venezuelan Government and therefore any courtesy extended to him will be appreciated.

CLEARANCE: Immediately after termination of loading operations, hoses are disconnected and Government Pilot will proceed to unmoor vessel. In the meantime, cargo documents are prepared by Terminal personnel, and as soon as vessel is cleared, she will proceed to her destination.

CURRENT/TIDE: Current velocity max. 4 knots. Nature of bottom, mud. The tidal range in feet for the Estacada Terminal is Springs 1.5, Neaps 0.5.

GENERAL: *(a) Cash Advance:* Cash advance will be in local currency (Bolivares). Cable in advance any such requirements to Agents.

(b) Mail: Outgoing correspondence may be given to the marine dispatcher. For personal mail (crew) a list should be made, indicating name of crew member, quantity of letters and destinations, and handed to Agents.

(c) Ship Chandlers: 2 ship chandlers in Maracaibo who can supply vessels with fresh meat, fish, vegetables, fruits, etc. Requirements should be transmitted in first ETA cable to Agents.

TONNAGE APPLICABLE:
The Venezuelan Port Authorities base part of their pilotage charges on the size of the vessel, i.e. on registered net tonnage or on Venezuelan net tonnage.

On Registered Net Tonnage:
Venezuela will accept the tonnage of ships registered in countries with which they have a reciprocal tonnage agreement.

As of this date, such countries are:

- Denmark
- France
- Germany
- Ireland
- Netherlands
- Norway
- Sweden
- Portugal
- United Kingdom
- U.S.A.

On Venezuelan Net Tonnage:
Ships not registered in countries listed above, when calling at Venezuelan ports for the first time, must be measured for Venezuelan tonnage by the Captain of the Port. It is the usual practice to take ashore the ship's Panama Canal or Suez Canal Certificate, which is used as a basis for recalculating tonnage under the Venezuelan regulations, and return it before sailing. The Venezuelan admeasurement certificate, when later issued, is forwarded to the owners. A fee is charged for this certificate, which is payable only on the ship's first call.

AUTHORITY: Capitania De Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226480, 226880. *Cables:* Caripuerto.

Section C

LA SALINA (Lacustre): 10.22 N. 71.28 W.

(See Plan Book)

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake").

OPERATORS: All terminal facilities are under the control of Lagoven, S.A.

APPROACH: Entrance and leaving this terminal is made between buoys B – 97 and B – 98.

LOCATION: La Salina located on Eastern shore of Lake Maracaibo, in Lat. 10° 22′ 18″ N., Long. 71° 27′ 49″ W. about 60 miles from the entrance buoy "EM".

DOCUMENTS: These are generally placed on board prior to departure. Vessels whose Master accepts the early departure procedure may sail with documents in blank. Figures are then radioed for inclusion in blank documents. Outward clearance documents are placed on board the vessel prior to departure.

PILOTAGE: In the event that no contact can be made with San Carlos Pilotage Station, or if there is a language problem, contact should be made with Vensport, at La Salina by voice radio on VHF Channel 16 (156.6 MHz).

The Docking Master boards by tug or launch at the waiting anchorage or in the outer part of the navigation channel leading to the terminal.

ANCHORAGE: The waiting anchorage off La Salina is located immediately Eastward of buoys B – 97, AS – 1 and AS – 3 (Old numbers M – 1, M – 1a and S – 1); it has a depth of between 40 ft. and 41 ft. and fair to poor holding ground in soft mud.

RESTRICTIONS: None. The port is open for navigation during the day and night, allowing ships to enter and sail at any hour.

MAX. SIZE: Up to 112,000 d.w.t. LOA 900 ft. and max. draft 39 ft. (brackish water) at Berth Nos. 6N, 6S, 7N and 7S. Max. distance bow to manifold 450 ft.

Pier No. 3 (West Side) LOA 690 ft., draft 26 ft. and 36,000 d.w.t.

Pier No. 3 (East side) LOA 575 ft., draft 26 ft. Max. 18,000 d.w.t.

No restrictions on vessel's beam at any of the berths.

The access channel to La Salina has a least depth of 41 ft.

Special Note: Maximum draft for loading vessels at La Salina Lacustre Terminal is actually restricted to 39 ft. Vessels loading at this maximum draft of 39 ft. must cross the outer bar channel at HW.

RADIO: The cable and telegraphic address for the Lagoven, at La Salina is "Lagoven La Salina". Radio messages to and from ships at sea are routed through the Government radio station at Maiquetia (La Guaira) call letters YVG. This station operates on a 24 hour continuous watch on 500 kHz and 2182 kHz.

Listening frequencies: long wave: 500 kHz; medium wave 2182 kHz; short wave Channels 5 and 6.

Working frequencies: long wave 417 kHz and 464 kHz; medium wave 2120 kHz; short wave 4222 kHz, 6351.5 kHz, 8461 kHz and 17141.5 kHz.

Answering frequencies: long wave 500 kHz.; medium wave 2182 kHz.

Hours of watch:

4222, 6531.5 kHz	0100 – 1300 hrs. GMT
8461, 17141.5 kHz	1300 – 0100 hrs. GMT

Cables for vessels may also be routed via Curacao Radio, call sign PJC.

Radio notice of arrival should be sent 72 hours prior to arrival at La Salina and corrected if weather or other conditions delay the vessel.

Vensport La Salina handle all communications between vessels and Lagoven terminal control tower. VHF radio-telephone Channel 16 (156.6 MHz) may be used for initial contact. Channels 6, 10, 13 and 14 are also available on a 24 hour basis.

All vessels en route to La Salina may also communicate with Lagoven Amuay or Caripito Marine Offices and request that messages dealing with corrected ETAs, Pilots and other business be relayed to Vensport La Salina.

VHF: Transmit on VHF when passing Aruba or Amuay Bay updated ETA messages to either Lago Marine or Amuay Marine for relay to La Salina. Contact Vensport La Salina on VHF when within reach (normally after passing General Urdaneta Bridge) for latest berthing instructions.

TUGS: Lagoven S.A. maintains one 3,000 h.p. diesel tug and one 1,300 h.p. diesel tug. Tug-boat assistance is considered essential and is afforded to all vessels entering, leaving or shifting in the harbour.

Additional tugs can, in an emergency, be ordered from Maracaibo. The tugs are usually employed in the alongside mode and are made fast using their own ropes (2.5 in. diameter nylon).

BERTHING: At La Salina, Lagoven maintains a deep-water terminal (Lacustre) consisting of an island where are located 2 finger piers, each 1,100 ft. in length and 500 ft. between piers, providing 4 berths to accommodate tankers up to 112,000 d.w.t. Berths are numbered 6N, 6S, 7N and 7S, from North to South. At these berths various products can be loaded simultaneously namely – 6N and 6S – Crude, Naphtha and Butane; 7N and 7S – Crude; Pier No. 3 (West side), Propane and Butane; Pier No. 3 (East side), same as West side but not concurrently with West side. In addition there is an offshore platform (Pier No. 3) where liquefied petroleum gases (Butane and Propane) can be loaded.

Instructions concerning berthing are given by Vensport La Salina by means of radio-telephone.

The use of an anchor when docking is permitted at all berths. It is considered prudent to have the outboard anchor hove-out prior to entering the harbour in order to facilitate speedy release if necessary while docking. The Pilot will advise whether the ship is to be berthed port or starboard side to the dock.

The tugs are made fast on the seaward side, one forward and one aft. Vessels berth under normal circumstances always with head in, which is a relatively simple manoeuvre. Vessels are berthed starboard side alongside berths 6 North and 7 North; portside alongside at berths 6 South and 7 South.

When the vessel's bow is between two and three ships' lengths from the head of the pier, the engines are stopped or reversed. The vessel then slowly enters the berth parallel to and about 40 ft. from the continuous fender face. When the vessel's bow is just past the berth's manifold area, the forward spring line is sent in by heaving line. The vessel is then positioned by using its ropes and is pushed alongside by tugs. The current sets mostly in a general Northwesterly direction with a velocity between 0 and 2 knots. This should be taken into account, particularly when berthing at the South facing berths where the vessel may be set onto the pier.

Moorings: Mooring bollards spaced with 80 ft. intervals are located on both sides of the pier, and provide the basis for a potentially excellent mooring configuration consisting of:

3 Headlines
3 Sternlines
2 Breastlines
1 Forward, Spring line and
1 Aft Spring line.

BALLAST: Vessel should arrive at La Salina with sufficient ballast to permit safe handling. Government Pilot requirements in this connection under normal weather conditions are interpreted as drawing approximately 8 ft. forward, 18 ft. aft, on a T – 2 or similar type tanker, and 11 ft. forward, 20 ft. aft on a 26,000 d.w.t., on larger type vessels the minimum draft required is 14 ft. forward and 22 ft. aft.

Ballast should be carried in a minimum number of tanks, and all other tanks stripped, so as to minimise deballasting time.

It has been established that one of the major causes of contamination of crude oil is the relatively small amount of salt water remaining in the ship's tanks, pumps, and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and downtime to refining equipment, besides presenting many other processing problems.

It is therefore requested that the full co-operation of the Master and Officers of ships loading for Aruba, be given to ensure that all ballast tanks and lines are flushed with lake water and stripped as dry as possible.

Vessels equipped with a separate and completely segregated system of ballast tanks, lines and pumps, will be permitted to discharge ballast and load cargo simultaneously, providing approval of both the pier foreman and Petroleum Inspector is secured.

A pier supervisor who is in direct communication with the loading pumphouse is stationed at each pier during the entire time the vessel is discharging ballast or cargo or receiving cargo.

All dirty ballast must be discharged ashore. The terminal has a 100,000 bbl. reservoir connected to two high capacity separator units. Max. ballast discharge is 40,000 bbls./hr. with max. 130 p.s.i. at rail. One or two hard arms (12 in.) are usually connected for ballast discharge.

If it is desired to follow the "load-on-top" procedure it is requested that the marine representative be informed on arrival.

LOADING: Instructions as to grade or grades of cargo, and the approximate loading rate anticipated, will be given to the Master on arrival. Supplementary information including number and size of lines and Chiksan arms will be furnished to the Chief Officer before loading commences. Loading rates will be reduced as required when topping off.

If vessel's loading orders from owners or charterers do not agree with the terminal's orders, either as to grades or quantity, the marine representative should be advised immediately. The terminal is authorised to load 10% more or less than the quantity nominated.

A terminal employee is stationed at each pier during the entire time the ship is discharging ballast, bunkering, or loading cargo. Fifteen minutes "standby" notice should be given to this man prior to completion of ballast, bunkers, or cargo.

Shut-down controls for all crude oil pumps are available at each loading berth at ship's rail of loading vessels for use in case of emergency only.

LOADING RATES: Loading operations at La Salina Terminal are normally carried out at relatively high pumping rates; up to an average of 40,000 bbls.p.h. Ship's officer will be advised by the pier supervisor at what rate the cargo will be loaded. LPG is loaded up to an average max. rate of 7,500 bbls.p.h. at Platform No. 3.

During periods of calm, loading of gasoline or other similar low flash products may be at lower rates or loading stopped if the heavy vapours are not being dispersed quickly enough to prevent hazards from accumulated gas pockets. Ships' officers are cautioned to be on their guard during such conditions.

Loading rates will be reduced when topping off, if requested by the ship's officer.

Cargo Handling: The terminal is mainly a crude exporting facility, but also LPG, bunkers, condensate and gasoline are handled.

The cargo transfer facilities are:

Berth 6 North and South:

3 × 12 in. Chiksan arms for crude loading.

1 × 8 in. Chiksan arm for bunkers (located aft of manifold).

Berth 7 North:

4 × 12 in. Chiksan arms for crude loading.

1 × 8 in. Chiksan arm for bunkers (located aft of manifold).

Berth 7 South:

4 × 12 in. Chiksan arms for crude loading.

3 × 12 in. Chiksan arms for pressurised gas loading (located forward of crude loading manifold)

1 × 8 in. Chiksan arm for bunker (located aft of manifold).

Gasoline, condensate and pressurised butane are handled at Berth 6 at both sides of the manifold.

All connections are standard 150 ASA bolt hole flanges.

The emergency cargo stop button is located in the operators' shelter on both piers.

Crude loading rates up to 50,000 bbls./hr. can be provided.

The loading and discharging of all crude petroleum and its products will be stopped during the passage of an electric storm and ullage covers must be closed and dogged down.

Cautionary Advice: Whenever non-matching flange sizes necessitate the use of reducers (spool pieces), Masters should insist that the reducer or hard arm be adequately supported by a proper jack, and should refuse to let cargo transfer operations commence before a satisfactory vessel manifold and hard arm connection has been provided.

FIRE PRECAUTIONS: The recognised fire alarm signal is 4 long blasts with ship's or tug's whistle. An 8 in. fire water main line runs alongside all 4 berths with numerous double 2.5 in. outlets for connection to ship's hoses. Four elevated water/foam monitors are located on each pier providing relatively good fire fighting protection for the main deck area.

The 2 tugs are also equipped with elevated fire water/foam monitors, though on board foam storage capacity is relatively limited.

POLLUTION: There are no shore facilities to recover an oil spill. The Venezuelan authorities take a very serious view of oil pollution and heavy fines are imposed for violations of the strict pollution rules. A government representative is stationed at the terminal. It is therefore important that all precautionary measures be taken and spills avoided. In case of a spill, the port services section should be informed immediately by VHF or telephone, which is located on the pier. The use of dispersants or detergents on the water is not permitted

MEDICAL: Complete medical, dental and hospitalisation facilities are available at La Salina. Medical treatment is provided at a private clinic.

Authorisation forms for medical treatment are provided which require the Master's signature. Transportation will be supplied by Vensport La Salina.

If the patient does not speak Spanish or English, an interpreter should accompany him.

FUEL: Bunker C fuel oil, marine diesel and intermediate fuels are available at La Salina Terminal Lacustre. Delivery is made alongside Piers 6 or 7 by 8 in. diameter Chiksan hose, located about midships.

Loading Rates: Bunker "C" and intermediate – 3,000 bbls.p.h. Diesel – 2,000 bbls.p.h.

It is the responsibility of the ship's engineer to give "stand-by" notice to the terminal employee and advise him when to shut down.

Supplies of lubricating oils in drums are available. Delivery will be effected while loading and requirements should be incorporated in the radio ETA.

FRESH WATER: A limited supply of fresh and boiler water is available at La Salina Lacustre Terminal. Delivery is made through 2.5 in. National Standard Fire Hose Thread hydrants. Ship's personnel must provide hoses and connect up.

DENSITY: The average density at the berth is 1002 but varies dependent upon amount of rainfall. The temperature ranges from 82°F. to 86°F.

REPAIRS: Vensport's Port Staff will assist with emergency repairs as may be required in each case depending upon availability of competent personnel and equipment. The company's shop facilities while not equipped for extensive ship repairs, may be made available to fabricate or repair items that are urgently required.

The nearest dry docks are those at Puerto Cabello and Curacao, N.A. Several contractors in the area provide labour for hull painting and for tank cleaning. Contracts for these services are made by the ship's Master directly with the contractor.

Radio technicians are available for minor repairs. With sufficient advance notice a radar specialist can be arranged to board the ship at La Salina.

CONSULS: The following countries have consular representatives in the area:

Belgium
Chile
Colombia
Costa Rica
Denmark
Dominican Rep.
Ecuador
El Salvador
France
Germany (West)
Great Britain
Guatemala
Italy
Netherlands
Norway
Nicaragua
Panama
Peru
Spain
Sweden
Switzerland
U.S.A.

TIME: GMT minus 4 hours.

SHORE LEAVE: Shore leave is permitted and a representative of the Captain of the Port boards on arrival and issues the required number of passes. Shore passes are to be collected prior to sailing, and given to Pilot undocking the vessel. Vessels are not permitted to sail until all crew members are on board, unless hospitalised or prior arrangements made for disembarking. No launch service for liberty parties is available while vessel is anchored off La Salina awaiting berth.

GENERAL: Representatives of Vensport La Salina board vessels immediately on arrival, and it is particularly requested that Masters indicate at that time all ships' requirements. The office building is located at the Pier Head Trestle and personnel are available for assistance at all hours.

(a) Bonded Stores. Cigarettes or other stores in bond are not obtainable in La Salina.

(b) Cash Advances. Cash advances are made in local currency, the Venezuelan Bolivare. Cash requirements should be included in the radio ETA.

(c) Charts. On first arrival of each tanker, the Agency Dispatcher will furnish a set of local charts if required. No supplies of U.S. Hydrographic or British Admiralty charts, or sailing directions, are available.

(d) Classification Societies. American Bureau and Lloyd's Register have non-exclusive Agents in Maracaibo, and qualified Masters and Chief Engineers are available for appointment as Surveyors when required.

(e) Gangways. All vessels using the port of La Salina must provide a safe gangway. The use of rung ladders, pilot ladders, etc., is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

(f) Plimsoll Marks. The Captain of the Port requires that the Plimsoll Marks of all vessels using the port be clearly visible. Vessels may be checked on completion of loading, and if the Plimsoll Marks are not readily legible, permission to sail may be withheld.

(g) Port Services. On arrival at La Salina Terminal, a company representative boards vessels, so it is particularly requested that Masters make known to him all ship's requirements. Master should bear in mind that while vessels are within Venezuelan territorial waters, Government Authorities do not permit the use of ship's radio equipment. Cables and radiograms should be handed to the company representative for transmittal via shore radio communication system. La Salina also has radio telephone communication with North and South America and Europe. For further information contact Vensport in the terminal building, tel. 88491 and 88492.

(h) Rat-guards. By order of the Port Authorities, vessels are required to use ratguards on all mooring lines.

(i) Personnel – Seamen left ashore. In the case of seaman left ashore for hospitalisation, repatriation or other reason, his documents and personal effects are to be delivered to the Vensport Office in La Salina before sailing. A letter is required from the Master advising maximum advances to be made to seaman if any, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account.

It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, Agent or Owner, responsible for any seamen left behind in Venezuela.

(j) Provisions and stores. Fresh and dry provisions are supplied by various Ship Chandlers in Maracaibo and Cabimas (La Salina). Master should deliver his signed requisition to the Vensport Office representative who boards on arrival. Provisions would then be delivered to the vessel while loading. The prices and quality of some items, such as fresh fruit, fish, shrimps, vegetables, etc., are competitive; dry stores are considerably higher than in most ports. The Fleet Steward will assist in filling requisitions. It is important that the Master sign the Ship Chandlers invoice as authorisation for the Marine Department to make settlement.

(k) Mail. Any pending ship's mail will be delivered on board by the Vensport Dispatcher on arrival at La Salina. At same time he will receive ship's mail to be dispatched. The Vensport Dispatcher will accept personal mail only if it carries the proper amount of Venezuelan postage, or if Master authorises the postage by signing 7 copies of the Company Postal Transmittal form. Masters interested in knowing the individual postage amounts to be paid by each crew member, should provide a list, in duplicate, of the senders, and number of letters sent by each one identified by a number written on each letter.

Copy of this list will be returned aboard the vessel when leaving this port outward bound. If not ready on time, it will be airmailed to the vessel's next port of call.

(l) Inspection of Petroleum Products and Crude Oil. Chas. Martin & Company and E. W. Saybolt petroleum inspectors are available if specified.

(m) Laundry. Laundry service is available between 0700 hrs. and 1700 hrs. on week-days. No guarantee can be given on time of delivery.

Section D

MARACAIBO: 10.42 N. 71.39 W.

On the N.W. shore of the Lake Maracaibo.

Maracaibo is the capital of the State of Zulia and seat of all Government and Consular Offices, as well as the port of entry for all vessels loading at one of the Terminals in the Lake of Maracaibo. (N.B. For information details of Documentation, Pilotage etc., see "Maracaibo Lake").

Also see "Shipmaster's Report" before Bajo Grande.

ANCHORAGE: The Pilot will not con the ship into the anchorage, but will indicate the proper location to anchor. Care should be taken because of small boats and ferry traffic.

ACCOMMODATION LADDER: Vessels must provide an accommodation ladder. The use of trunk ladders, pilot ladders, etc., is contrary to port regulations. Port Authorities will board only by means of an accommodation ladder. It is recommended to rig this in advance to avoid unnecessary delays.

BOARDING PARTY: The boarding party usually consists of the following persons: One Quarantine Official, Two Customs Officials, One Port Captain's Representative, Two representatives (Agent and Mooring Master).

RADIO: "Radio Marina" transmits information of interest to navigation every day from Monday to Friday from 1000 hrs. to 1015 hrs. and from 1600 hrs. to 1615 hrs. on frequency of 4,420.7 kHz in the 60 m. band, output 1 kW. All bunker, lubricating oils, water and other requirements should be included in the cable giving ETA of the vessel.

TUGS: Service not compulsory, assistance is rendered if required by the Harbour Master.

BERTHING: The manoeuvring area within Maracaibo harbour has a depth of 26 ft.

	Length	*Depth alongside*
Wharf No. 1	106 m.	15 ft.
„ „ 2	106 m.	15 ft.
„ „ 3	159 m.	15 ft.
„ „ 4	159 m.	22 ft.
„ „ 5	135 m.	25 ft.
„ „ 6	135 m.	26 ft.
„ „ 7	135 m.	26 ft.
„ „ 8	135 m.	26 ft.
„ „ 9	120 m.	25 ft.
„ „ 10	120 m.	22 ft.
„ „ 11	120 m.	22 ft.
National Brewery Wharf	125 m.	19 ft.
Regional „ „	120 m.	21 ft.
New Pier (2 berths)	—	30 ft. – 33 ft.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil are available at Maracaibo from local contractors with barges. Supplied only by barge at the wharves or anchorage. Lubricating oils are also available.

FRESH WATER: All wharves supplied with fresh water by 2 in. hoses. Rate 15/20 t.p.h. Fresh water also available from local contractors with barges.

MEDICAL: Complete medical services are available.

CONSULS:

	Telephone		Telephone
Belgium	3235	Italy	
Colombia	72232	Mexico	6781
Costa Rica	6511	Netherlands	4621
Denmark	6531	Nicaragua	76703
Dominican Rep.	6511	Norway	78911
Ecuador	74055	Panama	78110
El Salvador	74241	Peru	4545
France	5297	Portugal	80870
Germany	76061	Spain	71118
Great Britain	6169	Sweden	6511
Guatemala	71193	United States	2123

STEVEDORES: Normal working hours 0700 – 1100; 1300 – 1700 and 1800 – 2300 hrs.

TELEPHONES: There is no service for connecting telephones on board vessels. Public telephones are situated in the warehouses adjacent to all wharves.

HOLIDAYS: All Sundays; 1st January; Good Thursday and Friday; 19th April; 1st May; 24th June; 5th July; 24th July; 12th October; 24th October; 18th November; 17th December; 25th December.

AIRPORT: International Airport "Granode Oro" situated N.W. of Maracaibo City served by many national and international airlines. A second airport with cargo and passenger services is situated at Santa Barbara del Zulia, on the banks of the Escalante River.

POLICE/FIRE/AMBULANCE: Police tel. 3821; Fire tel. 6585; Ambulance tel. 2209.

REPAIRS: No major repairs facilities are available; however, repair work can be done through local machine and electrical shops, and shore labour can be furnished if required. Radio and radar technicians are also available.

PROVISIONS: Fresh and dry provisions are available through ship chandlers in Maracaibo for delivery at Maracaibo Harbour or at the terminal.

SHORE LEAVE: Launch service in the Maracaibo harbour is readily available for official ship business. For personnel shore leave, depends on launch availabilities on arrival.

SHIPMASTER'S REPORT: 1976

Communication: Considerable difficulty was experienced raising La Guaira radio station (YVG) for transmitting the necessary ETAs. Our messages were transmitted via Portishead (GKR). Agents, however, advised that messages are normally transmitted through Curacao (PJC).

Pilotage: Masters making their first visit to the port are to embark the Pilot at Punta Cardon (Paraguana Peninsula). Ample notice must be given to the Agents as the Pilot has to be flown there from Maracaibo. Masters making their first visit to Maracaibo must also disembark the Pilot at Punta Cardon on departure. Masters may thereafter proceed directly to San Carlos pilot station.

Communications can be made through the Harbour Master's Office Punta Cardon.

Delays experienced off Punta Cardon did not occur on this particular occasion. Pilot boards and normally rests in the pilot's cabin until 30 minutes from the "EM" buoy.

Berthing: 2 tugs are compulsory for vessels berthing/unberthing when the vessel's length exceeds 476 ft. All other vessels 1 tug compulsory.

Stevedoring:

Normal working hours	
(Monday – Friday)	0700 to 1100 hrs.
	1300 to 1700 hrs.
	1800 to 2300 hrs. (Overtime)
(Saturday)	0700 to 1200 hrs.
(Sundays & Public Holidays)	*No work.*

Vessels must be fully rigged and hatches open and ready in all respects to load or discharge at least 15 minutes before stevedores arrive. If necessary shore labour is available to assist.

SHIPMASTER'S REPORT: 1975.

Arrival Messages: Cable Agent – Maracaibo via La Guaira Radio on departure Cristobal with ETA Punta Cardon, draft, cargo stowage, gangs required and requirements. (For subsequent calls vessel will be permitted to proceed to San Carlos pilot station to embark Pilot).

24 hours prior to arrival repeat ETA Punta Cardon, to be sent as described above.

2 hours before arrival at pilot station – Punta Cardon call on Channel 12 VHF to update time of arrival.

Pilotage: Pilot boards at Punta Cardon about 1 mile off the tanker berths from a launch with a "roof landing", therefore the pilot ladder must be about 6 ft. from the water. This Pilot travels from Maracaibo to meet the vessel at Punta Cardon and takes the vessel all the way to Maracaibo. Punta Cardon to "EM" Fairway Buoy – 78 miles. "EM" Buoy to Maracaibo – 35 miles.

Once the vessel has made a call at Maracaibo the Master is then exempt and may take his vessel direct to the "EM" Buoy and negotiate the buoyed channel for 12 miles to San Carlos Pilot Station. The channel is straight, wide and the buoys are well lit and marked. A Westerly set is said to prevail across this channel from the "EM" Buoy to San Carlos Pilot Station but it was not evident on our passage in or out. However, a strong ebb tide was noticed running out to sea off San Carlos Pilot Station. The channel from the "EM" Buoy to Maracaibo is dredged to 41 ft. but off the berths at Maracaibo the maximum draft is 26 ft. There had been a lot of unseasonal rain prior to our call and we noted that the density of the dock water was 1001.

Documents:

1 Health Declaration.
8 Stores Lists.
8 Crew Lists.
6 Passenger Lists (If no passengers these papers have to be entered as "Nil" passengers).
8 Crew Declaration Lists.
2 Venezuelan Manifests (Sent from N.Z.)
2 Sets Bills of Lading (Sent from N.Z.)
12 Sets Tally Books (Sent from N.Z.)

Stevedores: "Servicios Portuarios De Maracaibo".

They have 24 gangs in the port and mechanical equipment to support 16 gangs. Normal working hours are 0700 – 1130 and 1300 – 1630 hrs. Overtime 1800 – 2230 hrs. Saturday 0700 – 1200 hrs. No work on Sunday.

The labour works well but is not accustomed to working refrigerated ships and when the gangs work into the wings the Agent had to supply the men with warm clothing and hot coffee. Their discharge rate for cartons of frozen cream was 18 t.p.h. In hindsight I would suggest that it would be advisable to stow frozen cream for Maracaibo in a hatch square if possible to obviate the need for the labour to go into the wings as the complaint about the "cold" does not arise until this happens. They had 14 open trucks laid on to take the cartons of cream direct to the butter works and they had an unbroken flow so the "hook" was not held up on this account.

Berthing: There are berths for 6 ocean going ships and they say they can berth these ships up to 26 ft. Tugs are available and because of berthing starboard side to we used 2 tugs. The berths are concrete with rubber fenders and there is plenty of working space for the mechanical vehicles. The Pilots speak a little English but sufficient to make themselves understood and are capable. Fresh water is available alongside but I understand if bunkers are required they have to be brought by barge and there is a minimum charge of $1,000 irrespective of the amount of fuel required. They have a repair facility which is in the hands of a local engineering company. Fresh vegetables are available and can be recommended, supplied by the only providore. He maintains a listening watch on Channel 16 VHF and has a liaison with Agents for any messages sent prior to arrival at the berth. His station is called Automercado Venezia.

AGENT: Head Office, (Management and Control), Brokers, Chartering and Tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 1010–A Venezuela. Cables "Selvic" or "Seltank". Tel. (02) 81.02.71 Telex: 21402, 21631, 21934 and 22859.

Local Office: PO Box 496, Maracaibo. Tel. (061) 224960. (061) 224962. Cables: "Seltank Maracaibo", or "Selvic Maracaibo". Telex: 62166.

Monovinyl Chloride	420	,,	37.8°C
Ethylene	80	,,	−104°/−70°C

Cargo Equipment:

North Berth:	One urea in bulk loader Cargo capacity 650/700 t.p.h.
South Berth:	Three urea in sacks conveyors. Cargo capacity 2,400 sacks of 50 kg. each per hour.

FRESH WATER: Available, 8 t.p.h., but expensive.

DENSITY: 997 – 1003.

OPERATOR: Pequiven, S.A., Calle Caliz, Las Mercedes, Venezuela. *Telex:* 23206.

PUERTO MIRANDA: 10.46 N. 71.34 W. (See Plan Book)

(N.B. For important details of documentation, Pilotage, etc., see "Maracaibo Lake").

LOCATION: Situated at Eastern shore of entrance to Lake of Maracaibo, in position Lat. 10° 46′ N., Long. 71° 34′ W.

OPERATOR: Maraven, S.A.

CLEARANCE: Pratique and Customs clearance will be granted on arrival either at the anchorage or after the vessel has been berthed. Masters therefore requested to have the accommodation ladder ready on arrival to avoid delays, since the Government Officials do not board the vessels by pilot ladder.

On arrival when Pratique is requested, all vessels should fly international flag signal "Q", or show a yellow light during hours of darkness.

PILOTAGE: On arrival Puerto Miranda under Government Pilot's advice the vessel will be boarded by Government Berthing Master, who will assist Master in docking vessel. He will also assist in undocking.

CHANNEL: Channel has a leading mark formed by the towers "P" and "M" and is marked by buoys.

(1) Incoming traffic bound for Puerto Miranda must leave the main channel between the buoys B – 57 and B – 59 towards the anchorage.

(2) Vessels coming from the Lake in ballast or to complete cargo at Puerto Miranda must leave the main channel when passing the buoy B – 65 on their starboard side and proceed in the direction of Jetty 3 towards the anchorage.

(3) All vessels on leaving Puerto Miranda should enter the main channel by the buoyed exit channel marked by the buoys numbered AP3, AP2, AP1 and B – 59.

Once the ship is unmoored, the Berthing Master on duty at Puerto Miranda will emphasise to the Official Pilots the route to be followed in each case.

MAX. SIZE: See "Berthing".

RADIO: Port Services Office equipped with radio-telephone installation operating on 24 hours basis, transmitting on following frequencies (simplex press to talk system).

		VHF Channel
Approach calling and safety	156.8 MHz	No. 16
CSV and other tankers port operations	156.6 ,,	No. 12
Emergency calling	2182 kHz	

ARRIVAL ADVICE: Vessels equipped with radio-telephone installation operating on above frequencies are requested call Puerto Miranda about 3 hours before arrival at port. Calls made in Spanish language will be answered promptly, since there is always a Spanish-speaking clerk on duty. Calls in English will be answered by Berthing Master on duty, except when he is occupied, in which case the call should be repeated later on, as an alternative, the Master could ask Government Pilot to report in Spanish his vessel to Puerto Miranda. During hours of darkness all vessels must identify themselves on arrival, either by radio-telephone or Aldis lamp.

TUGS: 2 motor tugs of 2,800 h.p. assist all vessels in docking and undocking. Also one or two mooring launches will be standing by to take ropes.

BALLAST: Discharge of oil or water polluted by oil into lake waters is prohibited and will incur heavy fines and compensation to beach owners and fishermen for cleaning nets.

All dirty ballast must be discharged ashore. Clean ballast in cargo tanks may only be pumped overboard after prior consultation with Port Services Dept. Deballasting line pressure must not exceed 100 p.s.i. Vessels equipped with a special separate and clean ballast system are to discharge their ballast into lake.

Ocean vessels should be ballasted on arrival E.M. Buoy for inward passage with minimum ballast necessary for safe handling, taking into consideration Article 31 of Maracaibo Pilotage Zone Regulations, which states all vessels entering lake Maracaibo shall have a trim of no more than 8 ft., to permit safe navigation through channels.

One of the major causes of contamination of crude oil is relatively small amount of salt water remaining in ship's tanks, pumps and ballast lines after ballast discharge. This very small amount of salt, nevertheless, frequently results in costly damage and down-time to refining equipment, besides presenting many other processing problems. It is therefore requested that full co-operation of Master and officers be given to ensure that all ballast tanks and lines are stripped as dry as possible.

BERTHING:

Jetties/Berths	*Depth M.M.O.L.W. ft.*	*Maximum Permissible Draft ft.*	*Maximum Permissible Length ft.*	*Maximum Permissible Displacement tons*

	90,000	x		x	7 (5)*	7 (5)*
	70,000	x			7 (5)*	7 (5)*

Remarks: Alongside UKC for ships up to 700 ft. O.A.L. = 1 ft. Alongside UKC for ships over 700 ft. O.A.L. = 2 ft.

(*) When vessels are fitted with tension winches – Forward and Aft.

(†) O.A.L. in Berth No. 3: This can be increased up to 620 ft. whenever vessels of Berth No. 1 have O.A.L. up to 665 ft.

(‡) O.A.L. in Berth No. 4: This can be increased only for LPG vessels up to 610 ft. if Berth No. 2 or 5 are empty when vessel arrives, then Berth No. 2 has to be temporarily restricted to vessels up to 665 ft. O.A.L.

General: Nature of bottom soft mud, but near buoys B – 59 and AP – 1 is partly hard.

Density of Water at Berths 997 – 1003.

Density of Water outer channel 1015 – 1025.

These alongside drafts are subject to reduction owing to depth in inner and outer channels.

Recommended under keel clearance (UKC) in Exit Channel 2 ft.

Vessels drawing 37 ft. and over will proceed according to monthly sailing draft table issued by Maraven, S.A.

MOORING: Vessels are to be moored to satisfaction of Pier Master. A suitable gangway will be provided by shore installation. When it is out of order vessel's gangway has to be used, which will be notified on VHF telephone before arrival at E.M. buoy.

Vessels of any deadweight must secure with at least: *Forward:* 4 headlines; 4 breasting fibre ropes in berths 1 and 2; 1 spring. *Aft:* 2 sternlines; 4 breasting fibre ropes and one spring in berths, 1 and 2. In berths 3, 4 and 5, *Forward:* 2 headlines; 4 breasting lines; 1 spring. *Aft:* 2 sternlines; 4 breasting lines; 1 spring.

When vessel is fitted with tension winches (forward and aft) the following ropes are required:

Forward: 2 headlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring. *Aft:* 2 sternlines; 2 wires from tension winches as breasting lines in berths numbered 1, 2, 5 or 6; 1 spring.

When vessels are nominated to load at berth 1 or 2 of Jetty 2 one extra headline and a second spring is required. Vessel's best ropes or wires should be used as breasting lines.

LOADING: Vessels should load in accordance with International Load Lines Regulations taking into account maximum permissible draft at this Terminal and also at Maracaibo Bar Channel.

The Captain of the Port requires that the load-line marks of all vessels using the port be clearly visible. If Harbour Authorities should refuse to pilot an out-going vessel due to being overloaded, Master will be held responsible for all delays and expenses, in connection with discharging any overloaded cargo and all further losses.

Vessels' maximum permitted loading rate should always be required. Maximum shore loading rate is 7,000 tonnes per hour, using 2 shore lines and 4 hoses.

Following ship's whistle signals should be used for loading: 2 blasts = Stand by (15 minutes prior to completion of cargo and or part cargo). 1 blast = Stop (2 minutes prior to complete cargo and or part cargo).

BALLAST: *Tank cleaning and dirty ballast facilities:* Maximum quantity acceptable, no limit. Rate 4,000 t.p.h. Owing to the closeness of the fishing industry to this terminal, Masters are warned that heavy fines will be imposed for polluting the Lake waters. Cargo-tank ballast whether clean or dirty has to be discharged ashore. Segregated ballast might be discharged into the Lake.

The terminal only accepts ships' ballast up to a maximum of 25% of vessel's deadweight. Masters are therefore advised to deballast at sea to the appropriate level.

EMERGENCIES: In order to deal quickly and efficiently with any emergency during loading/deballasting operations, the following equipment is available:

(a) Control for quick closing of shore manifold valves. This is a red-painted hydraulic valve situated on the ship/shore gangway. In the event of a spillage aboard, this valve must be opened. Within 90 seconds the shore manifold valves will close against the loading pumps.

(b) Direct ship/shore telephone. This is a red telephone and in order to obtain instant communication with the Loading Supervisor in the Control Room it is only necessary to lift the receiver. An Alarm Bell will alert the Supervisor and a light will advise him from which berth the call originated.

FUEL: Available ex-wharf: Bunker "C", thin fuels from 200 to 3,500 seconds Redwood 1 at 100°F., and marine diesel. Delivery rate 400 and 80 tons respectively. Gas oil, fuel oil and thin fuels may be supplied by barge ex-Maracaibo delivered at anchor, at a max. rate of 110 and 140 tons.

FRESH WATER: Available on all jetties with a loading rate between 20 t.p.h. and 30 t.p.h. This depends on number of vessels at the same time.

MEDICAL: Ship's personnel may visit local doctor on week-days between 0700 and 1130 hrs., or 1400 and 1700 hrs. Outside these hours, or in cases which require special treatment, patients receive attention in Maracaibo. Written request for medical attendance, as well as a shore pass, is always required.

CUSTOMS: 1 opened packet of cigarettes allowed to be taken from vessel by each crew member when going ashore. Masters advised to strongly caution crew against attempted smuggling.

SHORE LEAVE: Not granted until shore passes are stamped and signed by Authorities. Passes must be shown to guards at gangway and gates. Crew members must be properly dressed (long trousers and shirt) before proceeding ashore. Master must collect all passes and return them to Agent before vessel's departure.

GENERAL: *(a) Tides:* In view of the available depth in the channels which allow navigation to vessels up to about 70,000 d.w.t. fully laden at high water, permanent predictions of sailing draft tables have been prepared by Maraven S.A., and they will send these on board ships of over 47,000 d.w.t.

(b) Currents: The tidal current (Lunar tide) at this port can at times be very strong and subject to changes. Usually outgoing tide runs for 7 to 8 hours against 4 to 5 hours for incoming tide. Direction approx. at right angles to jetty.

(c) Movement of Passengers: Embarkation or disembarkation of passengers through this port is not allowed by Venezuelan Law, as this Terminal is only authorised by the Treasury Ministry (Ministerio de Hacienda) exclusively for exporting crude oil.

(d) Short Dispatch Procedure: This procedure is available for ships loading cargoes consigned to Shell Companies.

(e) Failure to Rejoin Vessel: If any member of crew is not aboard at sailing time, Authorities will not clear vessel although permission may be given to proceed to anchorage if the berth is required. If sailing permission is granted, Master is required to sign letter accepting all costs in connection with missing crew member to be for Owner's account.

(f) Launch Service: A charge will be made for a round trip to Maracaibo, but launches are only available on written request by Master. Masters who have to go on business to Maracaibo (Agency or Consulates) can make use of public service launches.

(g) Proceeding to Cardon: Vessels proceeding to Cardon to load or to take bunkers, are required to have ready on arrival at Cardon:

4 Lists of Deck and Engine Stores and Spares.
4 Lists of Stewards Stores.
6 Lists of Personal Effects.
6 Crew Lists.

In order to prevent delays it is imperative that these documents are presented to the Port Officials when they board to clear the vessel.

(h) Loading for Curacao: Unless Master requests otherwise, arrangements will be made for Goverment Pilot to board ship 1 hour after vessel has signalled "Stand-by".

(i) Guards: Custom Guards (Guardia Nacional) will be posted on all vessels and Masters are reminded that these guards must be accommodated and treated in the same manner as ships' officers. Non-compliance entails not only a fine but will result in delays in clearance and cargo operations.

(j) Visitors: Only persons on business allowed on piers. Visitors, as guest of Master, allowed board vessels provided a written and signed request presented by Master to Port Services Department. Further particulars covering procedure for obtaining permits for visitors can be obtained from Port Services Office.

(k) Cables and mail: Crew mail list forms put on board all vessels when entering Puerto Miranda. Crew's private mail accepted for posting provided all letters bear the sender's name and a list in duplicate is prepared showing addresses and sender. 1 copy of list will be forwarded to Master showing individual charges. Cables can be dispatched at all times.

(l) Norwegian Government Seamen Service: A field representative of the above service is stationed at Puerto Miranda providing Norwegian and Swedish film exchange and other usual services.

(m) Charts – Nautical Publications: On arrival of each tanker the Agency Representative will furnish a set of lake charts if required. No supplies of U.S. Hydrographic or British Admiralty charts or Sailing Directions, Nautical Almanac, etc., are available at this port.

(n) American Crew List: Vessels sailing for U.S. ports requested have American Crew List ready on arrival, so it can be forwarded to U.S. Consulate without delay.

(o) Films Exchange: Films may be exchanged at this Terminal.

(p) Fire Alarm: Each Friday morning at 1000 hrs. there will be a test of fire alarms including sirens at the wharves. Before the test will be a warning message in English and Spanish.

(q) Cash Advances: Local currency is Venezuelan Bolivar and cash advances are made only in this currency. It is requested that any requirement for cash advances be included in vessel's ETA radio, to permit delivery on board on arrival.

REGULATIONS: Following regulations should be strictly observed by Master of vessels alongside jetties. Non-compliance with these instructions entails not only a fine but delays in cargo operations.

Use of rafts for painting the ship's sides is strictly prohibited.

Lifeboats should not be lowered without the special permission of the Government Port Captaincy (obtainable on request).

Swimming in the harbour is strictly prohibited.

Waste water, sanitary or other must not be discharged on jetty.

It is strictly prohibited to paint ship's name or others on jetties. When this occurs the vessel will be charged for the cleaning.

Painting in ships alongside is strictly prohibited.

Before commencing loading, all dock scuppers should be securely plugged.

It is necessary to keep a close and constant watch on moorings and to adjust when necessary. When adjusting, call for assistance of harbour tugs before slackening off any mooring lines.

TELEPHONES:
Head Port Services Operations Office 228 during day.
Head PRDP Operations Office 222/310/323 during day.

Section F

PUNTA DE PALMAS: 10.24 N. 71.34 W.

(See Plan Book)

(N.B. For important details of Documentation, Pilotage, etc., see "Maracaibo Lake".)

OPERATORS: Corpoven, S.A.

FLAG: The Authorities require the Venezuelan flag to be flown from the mast head from the time the vessel enters the outer channel to come into the port until it leaves again by the same channel.

LOCATION: The terminal is located at Punta de Palmas del Sur, approximately 13 miles South of the port of Maracaibo on the West shore of Lake Maracaibo. The terminal proper may be identified by a 300 ft. radio tower, having 2 small red lights 200 ft. from the base, and 1 large red light on top of tower. The top light flashes every 2 seconds.

PILOTAGE: Vessels which arrive have the option of taking on the Official Pilot at the following places:

(a) In the outer channel of the Lake of Maracaibo, between buoys B-24 and B-26.

(b) In the anchorage area, located approximately 5.5 miles to the N.E. of the Island of San Carlos and to the East of the buoy B-17. This area is identified by a green light buoy, equipped with a radar reflector (position: Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W.).

(c) On the "EM" buoy (i.e. Entrance to Maracaibo), there is also a radar reflector (position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W.).

The Official Pilot who comes on board at San Carlos will take the vessel to Maracaibo. At times, due to bad weather, the Maracaibo Port Captaincy cannot guarantee the embarkation or disembarkation of Pilots at the "EM" buoy or in the anchorage at Lat. 11° 04′ 22″ N., Long. 71° 33′ 48″ W. For this reason, Masters must contact the pilots station at San Carlos so that they may give him appropriate instructions as to the place of boarding or disembarkation of the Official Pilot, who, generally speaking embarks between buoys B-24 and B-26.

The system of communications which vessels use with the pilots station of San Carlos will be the morse lamp, radio-telephone or radio.

The frequencies on which San Carlos listens out are: Radio 2182 kHz. Radio-telephone 156.6 MHz. It also operates with frequencies 2080, 2120, 2638, 2738 kHz R/T and 156.8 MHz VHF.

Vessels sailing from Punta de Palmas will take on the Official Pilot at the mooring where they are located after having terminated their loading operations. This Pilot must be requested one hour and forty-five minutes before the estimated time of being ready to sail. Vessels which embark their Official Pilot at Punta de Palmas to sail to Maracaibo will change their Pilot again on arriving at that port. The Pilot who embarks will guide the vessel to the proximities of the Island of San Carlos, between the towers E-31 and E-33, where he will disembark onto a pilot launch. The Port Captaincy of Maracaibo has given instructions to shipping Agents for the purpose of informing Masters and Owners of vessels that every Master must identify himself in advance to the pilot station at San Carlos at any time of the day, when they are arriving at buoys B-17 and B-19, and when they are sailing at T-42 and T-40. These instructions are of an obligatory nature in order to keep the Pilots' service informed at all times of any emergency that may arise. Also to avoid an Official Pilot going out unnecessarily from his base, especially during the night in the belief that the vessel which is in sight requires his services; in this case both the service of the launch and that of the Pilotage not given will be charged to the ship's Agent or Representative.

Lake Pilotage: An Official Government Pilot will assist every ship in crossing from Maracaibo to Punta de Palmas and in its exit voyage from Punta de Palmas to Maracaibo. This Pilot will also assist in the operations of mooring and unmooring. The Agent will inform the Master and the Official Pilot of the time determined for berthing the vessel when it arrives at Maracaibo. Vessels which load in Punta de Palmas must request a Pilot for their exit journey at least 1 hour 45 minutes in advance of the time at which they consider the vessel will sail.

CARGO DOCUMENTS: Vessel's clearance and cargo papers will be delivered to the Master on arrival in Maracaibo Harbour outbound. Corpoven S.A. will accept no responsibility for delay in clearing a vessel due to unavailability of personnel from offices of the Port Authorities.

APPROACHES: The buoy which indicates the entrance to the outer channel ("EM" buoy) is located in the geographical position: Lat. 11° 13′ 47″ N., Long. 71° 33′ 31″ W. The light of the "EM" buoy has the following characteristics: white light, with 1 flash every 10 seconds, visibility approximately 5 miles. The distance between the "EM" buoy and the inner extremity (South) of the inner channel, marked with buoys B-27 and B-28 is approximately 15.75 miles. The outer channel has a width of 300 m. between the limit on both sides. The navigable portion for loaded vessels is 240 m. wide. The average depth which has been checked at low tide is 13.72 m. (45 ft.) and the tidal amplitude is up to a maximum of 1.49 m. (4.9 ft.). There is a breakwater located a half a mile to the East and parallel to the external channel which extends for 2,574 m. (1.6 miles) to the North from the Northern coast of the Island of Zapara. In its outer extremity there is installed the lighthouse of the steel lattice type construction, with a height of 7.62 m. (25 ft.). The characteristics of its light are: white, with 1 flash every 8 seconds, visibility approximately 5,556 m. (3 miles).

The commencement of the internal dredged channel is marked by buoys B-29 and B-30. The extension of this channel is 19.31 km. approximately (12 miles) and ends at towers T-55 and T-56. The channel is 244 m. wide (800 ft.) and its normal checked depth is 13.72 m. (45 ft.) at average low tide, with a tidal amplitude which varies between 0.49 m. and 0.89 m. (1.5 ft. and 3 ft.), at tower T-66, and from 0.82 m. to 1.46 m. (4.5 ft.) at buoy B-29.

The channel from tower T-56 as far as the Port of Maracaibo is dredged and its termination is marked by buoys B-73 and B-74. It is 244 m. wide (800 ft.) and has a depth of 13.72 m. (45 ft.). Its distance is 17 km. (11 miles).

The depth in all the channels may vary in accordance with the sedimentation to which they are subjected and the formation of sand banks. The Port Captaincy at Maracaibo issues Notices to Mariners keeping them informed as to changes in depths in the channels. Navigators are advised to keep themselves up-to-date with these notices of variations of depth when they calculate their exit draft of their respective vessels.

MAX. SIZE:	*Berth*	*Max. LOA*	*Max. Draft*	*Max. d.w.t.*
	No. 1	835 ft.	38 ft.	80,000 tons
	No. 2	835 ft.	37 ft. 6 in.	80,000 tons
	No. 3	890 ft.	42 ft.	100,000 tons

Also see "Berthing".

RADIO: *Time of Arrival (ETA):* When a vessel leaves its previous port destined for the Terminal of Punta de Palmas, it must inform both its Agent and Corpoven S.A. in Maracaibo as to its best estimate of the date and time of arrival in Maracaibo. Then at least 24 hours prior to arrival at the San Carlos pilots' station, it must send another message to confirm the time of arrival at Maracaibo. The nationality of the vessel, name, nett Venezuelan tonnage (if it does not have this, its registered tonnage), last port, name of Master, permanent ballast or cargo in tanks or both, and any other information which is pertinent must be included in this message. The cable address of Corpoven S.A. is as follows: Corpoven, Maracaibo, Telex 61126. By virtue of the circumstances that the Cable Office in Maracaibo is not equipped to communicate with vessels on the high seas directly, messages sent to Corpoven S.A. and to the Agent of the vessel must be transmitted through "PJC" (Curacao), with the prefix "Via ACC" (All American Cables and Radio, Inc.).

We wish to emphasise that by virtue of the fact that our undertaking rents a part of its equipment which it uses for mooring vessels in accordance with the last message of arrival of the vessel, this message must be compiled with the greatest accuracy possible. Any alteration in the time and date of arrival affecting the vessel before or after the time indicated in its message, will be for the account of the vessel as will be the cost of rental of the equipment used.

Corpoven S.A. is in no way obligated to carry out the mooring of any vessel, except at the estimated time of its arrival at Punta de Palmas, although exception is made where the vessel may have been delayed in Maracaibo by virture of reasons beyond the control of the Master.

TUGS: Tug service consisting of 2 tugs of not less than 1,600 h.p. each is provided by the terminal operator for all vessels. Both tugs will assist all vessels in mooring and unmooring operations. Should it be deemed necessary by the terminal operator to require a tug in addition to the 2 terminal tugs for mooring or unmooring vessels exceeding 750 ft. in length, charges for this additional service will be for the account of vessel.

Vessels which exceed 835 ft. overall length, and destined for Berth No. 3, require the assistance of at least an additional tug. This additional tug will remain at the convenience of the Terminal for the time that the vessel remains at the berth.

In all cases where there are adverse weather conditions, without taking into account the size of the vessel, the Operator of the Terminal, at his convenience, may request the services of an additional tug to protect the installations of the Terminal and the ship, which will be for the account of the vessel.

The Terminal Department will make the necessary arrangements through the intermediary of the ship's Agent, for contracting additional tugs. These services will be charged to the ship's Agent by the tug operator who is contracted.

MOORING: *Berth No. 1:* Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the West of buoys D-95 and D-96 in the Maracaibo Channel. Distance between the bow and stern buoys is 364.90 m. (1,200 ft.).

This berth is equipped, apart from the mooring buoys, with a transversal mooring pile on its Eastern side, submerged, with chain and cable the same as those of the buoys. This does not interfere with the operations of mooring and unmooring.

Berth No. 2: Located approximately 8.85 km. (5.5 miles) from the Terminal and 2 km. (1.25 miles) to the East of the buoys D-95 and D-96 and to the N.E. of berth No. 1. Distance between the bow and stern buoys is 350.50 m. (1,150 ft.).

This berth is equipped, apart from the mooring buoys with a transversal submerged mooring pile equal to that of berth No. 1.

Berth No. 3: Located approximately 9.65 km. (6 miles) from the Terminal, 1.2 km. (0.75 mile) to the West of the buoys D-95 and D-96 and approximately 914 m. (3,000 ft.) to the East of berth No. 2. Distance between the bow and stern buoys is 365.76 m. (1,200 ft.).

This berth is equipped similarly to berths Nos. 1 & 2 with a transversal submerged pile on the Western side of the berth.

Conditions applicable to all berths: (a) Vessels which have a total overall length of 239.26 m. (785 ft.) or more must be equipped with 2 tension capstans at the bow and on the after deck, with sufficient cable to reach the stern and bow buoys respectively.

(b) Every vessel loading at any of the berths must take into consideration that due to Government regulations, the vessel must have a minimum clearance of 0.984 m. (3 ft.) below the keel at any point during its transit through the Maracaibo Channel, without taking into account the limitations of the channel assigned to the 3 berths by the Terminal Operator. In view of this regulation and the constant variations of the depths of the channel, Masters must be guided by the most recent "Depth Bulletins" which are issued by the National Channel Institute, and by the tide tables when they are planning their transit time through the channel, and the maximum draft to which they may load their vessel.

Mooring procedures and rules applicable to mooring points: Every vessel carrying out mooring operations at any of the 3 berths must arrive with a minimum draft of 3.65 m. (12 ft.) forward and respect the following procedure and rules for berthing:

(a) Anchor: Vessels approaching the berths from the East, in the most convenient manner and safely as possible they must drop their starboard anchor in its location once the vessel has been berthed, the chain facing East, with a length of not less than 137.16 m. (450 ft.).

(b) Mooring cables: One of the following alternatives for mooring cables at each side of the vessel must be fulfilled:

1. Two cables of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 1 steel cable which has a minimum diameter of 1.25 in.
2. One cable of synthetic fibre (Nylon or Polypropylene) with 9 in. circumference and 2 steel cables also supplied by the vessel and which have a minimum diameter of 1.25 in.
3. One cable of synthetic fibre with a 9 in. circumference and a safety cable of 1.5 in. diameter which will be supplied by the Terminal.

(c) Countertension cables: A countertension cable will be attached to the stern or fore deck. Vessels which have a length exceeding 800 ft. must use countertension cables on both sides of the deck simultaneously.

(d) Transversal cable: The transversal cable which will be supplied by the Terminal will be attached to the after deck on the starboard side. Vessels mooring at berth No. 3 must also attach an additional transversal cable to the after deck on the port side.

(e) All cables which are attached to vessels must have 6 turns around the bitts, and these must be secured so as to prevent them from unwinding.

(f) The pressure capstans must be secured in the braked position, once all other cables for mooring the vessel have been secured. These mooring cables must be maintained tight as the vessel goes down in the water whilst it is being loaded.

(g) Vessels must be supplied with sufficient cables as spares which can be used as the Terminal may require. All cables must be maintained in good condition and are subject to acceptance by the representative of the Terminal. Vessels must maintain sufficient personnel on deck during the whole time that the vessel is at the berth to attend to the cables for mooring purposes whenever this may be required by the Terminal.

It is understood by both parties that, when the Terminal may require safety cables to be used, and where such are required, Corpoven S.A. accepts no responsibility for damages or losses occasioned to any vessel, installation or person due to the use or failure of this equipment.

The vessel's gangway must be in position so that the mooring supervisor or other personnel from the Terminal can come on board the vessel when it arrives at Punta de Palmas.

This gangway must be suspended whilst manoeuvres are being carried out, this for the purpose of obviating any damage to it occasioned by tugs or launches.

Berthing Supervisor: The Berthing Supervisor of Corpoven S.A. will come on board every vessel prior to its entrance to the berth to establish radio contact between the vessel, the Marine equipment and the Office at the Terminal.

Mooring gangs and equipment: The mooring equipment will be handled by the launches employed in the manoeuvres. The tug service will be available 24 hours of the day through the intermediary of the Terminal Port.

The mooring gangs will assist the vessel personnel in the operations of hoisting, connecting and disconnecting the 2×12 in. diameter loading hoses. The approximate weight of the loading hoses is 4 tons.

The launches used for the manoeuvres will place on board equipment to facilitate the work of connecting the hoses. This equipment will be at the disposal of the vessel's personnel when required as are also the launches to transport personnel.

Responsibility: The Master may request any equipment or service which he may consider necessary for a safe and efficient operation of his vessel and the Terminal Operator will do everything within his power to fulfil this requirement. Therefore all owners and operators of vessels arriving at Punta de Palmas will accept the responsibility of the safety inherent in the manoeuvring of their vessels and their movements to and from the Terminal. Corpoven S.A. will accept no responsibility for losses or damages occasioned to the ship, its installations and others unless such loss and damage be occasioned due to the faults in the installations belonging to the Terminal or operated by the Terminal with the exception of the security equipment.

Operational checklist: At the time when the vessel is moored and the hoses are connected, prior to the commencement of the operations of loading, the representative of Corpoven S.A. on board will deliver to the Master an operational checklist. The Master is required or whomsoever he may appoint to carry out this work together with Terminal representative, to check very carefully that all the safety regulations have been fulfilled.

Berthing Supervisor: The Berthing Supervisor will have charts and plans which will be at the disposal of the Master and his advice if he should require it. The representative will also be available to inspect the vessel's tanks and to act as liaison between the Master of the vessel and the Agent or with the Terminal of Punta de Palmas, to transmit any information relative to the ship. This supervisor must receive lodging and treatment at the same level as the ship's officers.

Unmooring procedure: When the loading operations are completed, the launches will proceed to remove all mooring cables from the buoys under the supervision of the official entrusted with the vessel or the Official Pilot, assisted by the Berthing Supervisor of Corpoven S.A.

Documentation: The departure and loading documents will be delivered to the Master by his Agent or his representative, when he passes through the Port of Maracaibo.

BALLAST: *Deballasting:* It is understood that it is not permitted to discharge ballast in the lake, even though this may come from tanks used solely for ballast. Ballast will be discharged with the pumps of the vessel to the deballasting system which exists at the Terminal. As soon as the loading hoses are connected, the personnel of the Terminal will align the system with its respective valves. Once these operations are completed the Berthing Supervisor on board will inform the Master that he may commence deballasting and in turn will keep him informed as to the pressures which will be used in the operation. Once the deballasting operation has been completed, the personnel of the Terminal will align the system again and its valves so that the vessel can receive cargo through the same hoses which are used for unloading ballast and simultaneously the personnel of the vessel will align their systems on board to receive cargo. The personnel of the vessel responsible for receiving the cargo will inform the Representative of Corpoven S.A.(Berthing Supervisor) when the vessel is in a condition to receive and he in turn will inform the personnel of the Terminal that they may commence pumping.

LOADING: *Oil leakage:* In order to obviate contamination of Maracaibo Lake and possible legal actions, we recommend strongly that Masters of vessels emphasise to their deck officers in order to obviate leakage that they make sure that all necessary measures have been taken on board to this end prior to commencing the loading operations. The purpose of this is to maintain on deck any leak or wastage which may occur in the vessel.

Guarantee of responsibility: In the event of an oil leakage or any other contamination or any other damages to installations caused by a vessel, the operator of the Terminal, prior to the vessel sailing, will require the Agent to deposit bond in favour of Corpoven S.A. to cover the fine or other charges which may be incurred in collecting, cleaning, repairing the installations of the Terminal and also to cover any claims from third parties.

Loading procedure and pumping rates: The position of the loading hoses, supports and connections must be to the satisfaction of the personnel on board. The valves of the hoses for loading purposes will be opened in order to test the connections, detect leaks and then ultimately to commence operations.

The responsibility and custody of the cargo passes to the personnel of the ship from the moment when the cargo arrives at the connection which is the property of the ship.

The minimum loading rate at berths Nos. 1 and 2 is 4,000 b.p.h. The average pumping rate, under normal conditions is 13,000 b.p.h. Sudden stoppages in loading will not be permitted during loading except in cases of emergency.

Personnel on board, responsible for the loading operations, must notify the Terminal representative, not less than 30 minutes in advance of the completion of loading. This will enable the representative to instruct the operator to reduce the rate of pumping or to continue loading by gravity as he sees fit.

For reasons of security, loading may be suspended and the hoses disconnected from the vessel's manifold when weather conditions are not favourable or at any time that the Terminal considers it convenient to do so due to *force majeure* or other reasons.

Displacement of the line: Sometimes it will be necessary to displace the submarine line in combination with the loading operation. To carry out this operation it is required that the personnel responsible for receiving the cargo notify sufficiently in advance the Berthing Supervisor when the amount of cargo lacking is equal to the capacity of the line.

The capacity of the line is a fixed quantity. Therefore it must not be considered with shortcomings or excesses.

Therefore when it is necessary to effect a displacement, the loading must be calculated carefully by the vessel personnel responsible for this operation.

It is understood that any error or negligence on the part of the vessel personnel in calculating the initiation point of the displacement of the line, will require a land pump to correct the displacement. Due to the submerged manifold it will be necessary to employ a diver to operate the valves and this operation may result in a fairly costly procedure and involve a lot of time. All costs involved in fulfilling this operation, together with the time lost will be for the account of the vessel.

Increase in pumping rates: At the request of the Master and subject to the approval of Corpoven S.A., it is possible to suppy a pumping rate of 17,000 b.p.h. up to a maximum of 30,000 b.p.h., provided the operations of the Terminal permit this to be done.

MEDICAL: *Maracaibo:* Complete services are available.

Punta de Palmas: Emergency cases only will be transferred to Maracaibo for treatment, at the request of the official in charge of the vessel.

FUEL: Heavy and medium marine diesel, intermediate fuel, and bunker "C" fuel oil available. Lubricating oils also available. Pumping will be affected during daylight hours and with prior permission of the Terminal.
FRESH WATER: Available from local contractors with barges. Pumping will be affected during daylight hours and with prior permission of the Terminal.
STORES: Fresh and dry provisions procurable through ship chandlers in Maracaibo for delivery at the Terminal.
REPAIRS: *Maracaibo:* There are no facilities available for carrying out major repairs. Nevertheless, repair work may be carried out through local workshops and labour can be supplied if this is required. Technicians in radio, radar, gyro compass repairs are also available.

Punta de Palmas: No type of repair will be effected here, which may prevent the unmooring of the vessel without the authority of the Marine Supervisor. Neither may boiler tubes be "blown" whilst the vessel is moored.
SHORE LEAVE: Launch service for business purposes and emergencies is readily available. Launch service for shore leave can be arranged through contract marine service and will be responsibility of ship's personnel. Arrangements for shore leave transportation can be made through Loading Master on board.
CUSTOMS: All vessels entering from foreign ports and bound for Punta de Palmas Terminal are required to anchor in Maracaibo Harbour for formal customs clearance and visit of government port authorities prior to proceeding to destination.

The vessel's accommodation ladder should be rigged prior to the vessel's arrival at Maracaibo. A member of the National Guard will board each vessel at Punta de Palmas to observe all activities connected with loading or unloading operations. This official is authorised as the customs representative, and is referred to as Customs Watch. Food and accommodation similar to officers should be made available to him by vessel.
CONSULS: See "Maracaibo".
GENERAL:

Transportation: Transportation will be supplied by launch between vessel and Punta de Palmas to the following persons, without exception:

1. Master of the vessel or the Chief Engineer, to attend to matters relating to the ship.
2. Sick personnel who require emergency medical attention.
3. Official Pilot.
4. Members of the National Guard and other Government Officials whose services relate to the tanker.
5. Doctors, when these may be required by Master, in the event of emergency only.
6. Inspectors of the oil industry.

Consular representatives, ship's suppliers, engineers, naval experts, representatives of the oil companies, suppliers of fuel and water and any other person who requires to come on board tankers when they are in Punta de Palmas must make their own arrangements for transportation to and from the ship through the intermediary of the ship's Agent. Also Agents must make their own arrangements for their own transportation.

Personnel of the ship with licence to disembark: The transportation of personnel with licence, when this is required by the Master, must be arranged through the intermediary of the Agent. Also passengers must embark and disembark at the Port of Maracaibo.

Personnel with licence are not permitted to go ashore at the Terminal of Punta de Palmas.

Classification Societies: American Bureau of Shipping, Lloyd's Register of Shipping, Salvage Association of London, Det Norske Veritas, Bureau Veritas, Registro Italiano Navale and Germanischer Lloyd have Agents in Maracaibo or in Caracas. There are experts available through the intermediary of the Agents mentioned above.

Monetary System: The monetary system of Venezuela is the Bolivar (Bs.), and is the only money legally recognised in the country. A Master who requires a cash advance must request same from his Agent when he notifies his ETA. Payment of all invoices for Terminal charges must be made in Bolivares at the Office of Corpoven S.A. in Maracaibo, unless other instructions are given.

Mail: Mail for the vessel can be delivered to the representative of the Agent who comes on board the vessel at the time of its arrival or sailing from Maracaibo.
AUTHORITY: Corpoven S.A.

Capitania de Puerto, La Ciega – Maracaibo, Venezuela. *Tel:* 226488.
AGENT: Head Office. (Management and Control), Brokers, chartering and tramp Agents, Victor H. Selinger S.A., PO Box 1632, Caracas 1010-A. Venezuela. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 22859, 21402, 21934 or 21631. New Boe Code.

Local Office: P.O.Box 496, Maracaibo. Tel. (061) 224960, (061) 224962. Cables: "Seltank Maracaibo" or "Selvic Maracaibo". Telex: 62166.

Section G

SAN LORENZO: 09.47 N. 71.05 W.

OPERATOR: Maraven, S.A.
LOCATION: S.E. side of Lake Maracaibo.
APPROACHES: Vessels have to arrive at Maracaibo Roads through a dredged channel with controlling depths of 45 ft. in outer bar, inner channel and Punta Palmas area. In vicinity of terminal the controlling depth is 36 ft.
PILOTAGE: It is compulsory from San Carlos to Maracaibo. Pilot normally boards vessel at buoy B–26 (Position Lat. 11° 01′ N. Long. 71° 35′ W.). It is also compulsory for all vessels which have to load at any terminal located South of the bridge Rafael General Urdaneta. This bridge has a horizontal clearance of 656 ft. and a vertical one of 148 ft. at 45 ft. MMOLW level. Pilots have to embark and disembark at Maracaibo.

When Masters have no Pilot exemption Certificate for crossing outer bar, permission has to be requested by VHF or 2182 kHz prior to arrival, which is being granted on request.
ANCHORAGES: Masters may use the following:

(a) Near E.M. Buoy, (not recommended because of the distance from San Carlos. The pilot launch never reaches this point).

(b) At Maracaibo Roads.

(c) At terminal approaches, in accordance with depths available in the area, and ship's draft.
LIGHTENING POSITION: In the Southern lake Area, arrangements have to be made in advance. Also at Maracaibo.
HEALTH: Quarantine officials board vessels at Maracaibo Roads. Pratique cannot be granted by radio.
RADIO: San Carlos Pilot Station has VHF Channels 12 & 16. Emergency call 2182 kHz. Terminal has VHF Channel 12.
TUGS: Compulsory. When vessel is over 25,000 d.w.t. a second tug is required, which is available in the area, 1,200 h.p. each. There is also a launch to assist the vessel during manoeuvring.
BERTHING: Continuous wharf 2,340 ft. in length with dolphins. This terminal is only for handling crude and its products. Maximum berthing displacement: 20,000 tons.

	Berth No. 1	*Berth No. 2*	*Berth No. 4*
Max. LOA	560 ft. 00 in.	665 ft. 00 in.	
Max. Depth	24 ft. 06 in.	35 ft. 06 in.	Out of Service
Max. Draft	23 ft. 06 in.	34 ft. 06 in.	
Loading Rate	1,450 t.p.h.	2,000 t.p.h.	

These depths are referred to the minimum monthly observed lowest water level (MMOLW).
DENSITY: At berths 998 and at outer bar between 1020 and 1025.
FRESH WATER: Available ex-barge at Maracaibo Roads.
FUEL: Any grade. In case vessels require grade not available at berth it may be supplied ex-barge at Maracaibo, which has mixing equipment able to supply the grade involved. Rate 20 – 140 t.p.h.
MOORING-UNMOORING: Carried out by Official Pilots. Mooring is Head-out to facilitate departure.
DEBALLASTING: Installations have ballast pit with capacity 650 cu.m. Max. discharge rate 600 t.p.h.
TANK CLEANING FACILITIES: Carried out by outside contractor.
REPAIRS: Minor repairs only, including electronics.

LA CEIBA: 09.28 N. 71.04 W.

SHIPMASTER'S REPORT: 1979.

BERTHING: There is a cement loading installation about 2 cables South of the 160 m. long pier at La Ceiba suitable for vessels up to 120 m. in length.

The approach channel is dredged to 9 m.

END OF MARACAIBO SECTION.

MORON: 10.32 N. 68.11 W.

This Terminal finished operations in 1981. All installations are being dismantled.

Vessels loading/discharging operations are now performed at El Palito Marine Terminal operated by Corpoven, S.A.

ORINOCO RIVER

Including Section A – MATANZAS
Section B – PALUA
Section C – PUERTO ORDAZ
(CVG Ferrominera Orinoco)
Section D – PUNTA CUCHILLO
(Lagoven S.A.)
Section E – VENALUM TERMINAL

IMPORTANT: VHF compulsory. Vessels without at least a VHF radio aboard will not be attended to by the Pilots at the Barima pilot station and so will not be allowed to enter the Orinoco River.

GENERAL:

1. As early as possible, advise Puerto Ordaz Radio Station, call letters YVM, giving ETA at Buoy EO of North (natural) channel, or at Buoy 0.1 of South (dredged) channel.

Shipmaster's Report: October 1982.

Contact with YVM was made 48 hours before arrival buoy 0.1; accordingly, 72 hours ETA sent via Curacao Radio.

2. 24 hours prior to arrival, send another ETA to YVM.
3. Upon arrival, depending on whether Master intends to enter Orinoco waterway through North or South channel, adhere to following procedure:
   - *(a)* *North Channel.* Notify Port Captain, Ciudad Bolivar, via YVM, of time of arrival at Buoy EO and give ETA at Buoy 27.
   - *(b)* *South Channel.* Request permission to enter from "Amacuro Pilot", via Channel 16. *Do not enter* until granted permission; while awaiting, lay to or anchor at least 1 mile outside of Buoy 0.1.
   - *(c)* All vessels must also communicate with the Point Barima pilot station, call sign "Amacuro Pilot" 2182 kHz HF or 43.18 VHF to be informed of traffic.
4. While navigating waterway, inbound or outbound, report position to YVM hourly on the hour.
5. No Pilot required nor available for navigation along North or South channel at the Boca Grande of the Orinoco River.
6. The International Rules for Preventing Collisions at Sea apply outside of Buoy 27.
7. Given the case of 2 vessels navigating North and South channels respectively the one navigating the South channel is the privileged vessel.
8. Anchoring either in North or South channels is forbidden.
9. Throughout Orinoco waterway, the down-bound loaded vessel is the privileged vessel.
10. It is compulsory to fly Venezuelan ensign inside of Buoy EO or Buoy 0.1.
11. Vessels can only carry clean ballast within Orinoco Waterway.
12. Pilotage compulsory within Pilotage Zone No. 1 of the Orinoco. Pilots board at outer boundary of said pilotage zone in upstreamward vicinities of Buoy 27.
13. Regulations for the Pilotage Zone No. 1 of the Orinoco apply inside of Buoy 27.

APPROACHES: (Also see "Radio" – paragraphs *(b)* and *(c)*).

1. *The Waterway*

A Radio Direction Finder (non-operational October 1982), located at Lat. 08° 03′ 45″ N., Long. 60° 28′ 28″ W., transmits following signal continuously: YV – AYV. The transmitter has an output of 500 watts with a range of about 200 miles and operates on a frequency of 305 kHz. While navigating the waterway, ships should favour the shore on their starboard side to the extent possible, giving preference of manoeuvre to loaded vessels in all cases. Ships navigating upstreamward (inbound), upon approaching narrow channels should await the passing and give way to downbound vessels. It follows, therefore, that downbound loaded vessels are the privileged vessels.

2. *The Boca Grande (Barima Bar) Channels*

There are 2 navigable channels across the Boca Grande (Barima Bar), identified as follows: North channel (or natural channel), and South channel (or dredged channel). The 2 channels have converging courses and meet at mile 27.7 in the vicinity of Buoy 27. Vessels navigating the South channel are privileged, regardless of the direction in which they travel.

(a) The North (Natural) Channel

This channel has a min. depth of 12 ft., referred to Mean Low Water. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the letters EO. This buoy is located in 46 ft. of water at Lat. 09° 00′ 10″ N., Long. 60° 18′ 20″ W. Its characteristics are: colour of light, white; flash, 1.0 seconds; eclipse. 6.0 seconds; height above water, 10.7 ft., visibility, 7 miles. From seabuoy EO, the channel develops for 7.3 miles to Buoy EOA on a course of 213° 40′ True, then for 2.8 miles to Buoy EOB on a course of 198° 57′ True. From this point the channel follows an approximate straight course of about 205° True for a distance of 17 miles to Buoy 27. Starting from EOB distances between successive navigation aids are as follows: G1 at 1.9 miles; G1A at 1.5 miles; G3 at 2.1 miles; G3A at 2.3 miles; G5 at 3 miles; EL 24 at 2.6 miles; Buoy 27 at 3.7 miles. All navigation aids are black buoys fitted with white lights, except Buoy 27 and EL 24 which is a range structure indicating the West side limit alignment of the South (dredged) channel. This structure has been fitted with a white flashing light to mark the North (natural) channel.

(b) The South (Dredged) Channel

The South channel is a 400 ft. wide dredged channel. Depths therein accommodate the maximum draft authorised by the Port Captain. The approach from the sea is marked by a battery-operated electric flashing black buoy, identified with the number 0.1. This buoy is located in 45 ft. of water at Lat. 08° 55′ 52″ N., Long. 60° 11′ 17″ W. Its characteristics are: colour of light, white; flash, 0.5 seconds; eclipse, 11.5 seconds; height above water, 25 ft.; visibility, 11 miles. From seabuoy 0.1, the channel develops along 4 different courses over a total distance of 27.7 miles to Buoy 27. The course reduces by about 7° True at each of 3 turning points, located at miles 9, 15 and 21 respectively. The initial course of 234° 18′ True continues to mile 9 where it changes to 227° 07′ True. Upon reaching mile 15, the course again changes to 219° 51′ True to mile 21. At mile 21, the course changes to 212° 45′ True to Buoy 27 at mile 27.7. The centreline of the channel on all courses is visually marked by range structures fitted with green flashing, directionally beamed lights. The West (right ascending) side limit of the channel through mile 21 is also visually marked by range structures fitted with amber flashing, directionally beamed lights; the alignment given by the side ranges develops 200 ft. to the West and parallel to the centreline of the channel. Battery operated electric flashing navigation aids are located along both sides of the channel. All navigation aids along the East (left ascending) side of the channel are located 325 ft. from centreline or 125 ft. outside of the channel lateral limit. White flashing navigation aids are located at 1 mile intervals through mile 25.1; all aids along this side are black buoys, except beacons 8.1, 9.1, 14.1, 15.1, 20.1, 21.1, 22.1, 23.1, 24.1, 25.1, 27.1 and 27.7 (Buoy 27). All navigation aids along the West (right ascending) side of the channel are located 200 ft. from centreline or on the exact lateral limit of the channel. Red flashing buoys painted red are located at 1 mile intervals from mile 1.6 to mile 11.6. From mile 11.6 to mile 27.7, there are only 2 aids; red buoys 13.6 and 26.0.

3. *The River Channel*

From mile 27.7, the navigable channel develops upstream. The river channel is generally deep and wide, except for the following 12 reaches which require periodic dredging: miles 27.7 to 36.5; miles 37.3 to 38.6; miles 53.1 to 54.2; miles 99.0 to 106.5; miles 109.1 to 111.0; miles 131.7 to 131.9; miles 136.6 to 139.0; miles 141.2 to 145.8; miles 146.2 to 149.4; miles 167.6 to 170.8; miles 178.4 to 182.4; miles 183.5 to 184.1. Dredged channels are normally 300 ft. in width, but occasionally can be restricted to a minimum of 250 ft. The depth maintained therein can accommodate the maximum draft authorised by the Port Captain. By Notice to Mariners, the Port Captain has instructed all Masters and Pilots to reduce speed and to proceed with caution while navigating the aforesaid reaches, especially during the low water season.

4. *River Stages*

In response to the cycle of wet and dry seasons, the flow of the Orinoco River follows a relatively regular pattern of rise and fall each year. The river normally begins rising in late March or early April and continues to rise until it peaks at crest in late August. In September, the river begins a fairly steady recession until the extreme low-water stage is reached, generally in March. The amplitude of stage variation above the low water plane of reference (0.0 ft.) at Palua (Mile 181.7) averages about 35 ft. with min. variations of 31 ft. and max. variations of 39 ft. The effects of the flood rise decrease progressively below Palua and practically vanish in the upstreamward vicinities of the Boca Grande.

5. *Tides and Currents*

- *(a)* The indicated mean tidal range is 5.4 ft. Tidal influence is not experienced above mile 60 during high river stages. At low river stages, a tidal effect can be observed throughout the waterway, although it progressively diminishes, moving upstreamward. However, the tidal effect is still significant at Puerto Ordaz, mile 184, where a max. semidiurnal change of 1.7 ft. has been recorded.
- *(b)* The strength of river currents is generally commensurate with flow, the strongest currents occurring at high river stages. The velocity of currents at any one time generally decreases moving downstreamward. However, in certain locations, this pattern is affected by particular characteristics of river width and shape as well as by bottom gradient. Max. velocities of about 6 knots have been recorded.

6. *Navigation Aids*

- *(a)* The navigation aids installed along the waterway consist of buoys, beacon and ranges. All aids are lighted. Identification is provided by means of numbers representing the approximate mileage of each aid, to the nearest one-tenth of a mile. The last digit of numbers identifying white lighted aids is odd, while the last digit of numbers identifying red lighted aids is even. White lighted aids mark the left ascending limit of the navigable channel, while red lighted aids mark the right ascending limit. Aids are placed as to be intervisible, to the extent that — when abreast of any one aid — the preceding and following ones can be sighted. Consecutive aids always carry different light characteristics. Buoys are normally placed on the exact lateral limit of the channel (except for black buoys along the South channel at the Boca Grande); beacons, instead, are located at variable distances outside of the channel.
- *(b)* During the execution of dredging along any of the reaches which require periodic maintenance, buoys are generally moved 100 ft. outside of the channel lateral limits. This information is made available to ships by YVM.
- *(c)* The Ministerio de Comunicaciones, Direccion de Marina Mercante, publishes semi-annually a complete list of navigation aids. Monthly lists of changes are also published so that the complete current list can be maintained up to date.
- *(d)* Upon encountering damaged, inoperative, or misplaced navigation aids, vessels should immediately notify YVM.
- *(e)* Vessels are forbidden to make fast to any navigation aid.

7. *Dredging Aids*

Range structures, generally located close to shore or over the bank, are normally used to mark the lateral alignments of the channel along the reaches which require periodic dredging. These ranges are generally fitted with amber flashing, directionally beamed lights. The lights are extinguished except during execution of dredging. Dredging ranges *are not* to be used for navigation.

8. *Navigation Charts*
Navigation charts of the Orinoco Waterway should be aboard vessels for use by the Master. These charts are sold by the Instituto Nacional de Canalizaciones and are also available for purchase from the Orinoco Mining Company. If requested, CVG will, if possible, arrange to make the charts and latest revisions available through the Pilot who boards at Punta Barima, provided such request is received by radio (YVM) at least 48 hours in advance of the Pilot's boarding. A set of navigation charts, corrected to latest revisions, is maintained in the office of the Traffic and Ships' Agency of CVG in Puerto Ordaz. Masters may use this facility to keep their charts up to date.

DOCUMENTS: (Clearance, documentation and other requirements).
1. *Consignment of Inbound Vessels*
The official documents of all vessels proceeding to Puerto Ordaz should show the following consignment: to: CVG Ferrominera Orinoco, Ciudad Bolivar, Zona de Puerto Ordaz. The proper consignment of vessels proceeding to Palua, on official documents, is as follows: Iron Mines Company of Venezuela, Ciudad Bolivar, Zona de San Felix.
2. *Customs Requirements*
Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require the following documentation:

The vessel must have a clearance certificate (Certificade de Zarpe) or sailing authorisation issued by the Customs Authorities of the port of departure, representing the government of the country the vessel is departing from. No consular certification need be placed upon this document.

Spare Parts List (Lista de Repuestos). It must contain a note of all the spare parts and objects for the service of the vessel, including fuel. To be signed by the Master and to be current as of the day of entering the Venezuelan port.

List of Effects for use of Captain and Crewmen (Lista de efectos personales de la dotacion). To be signed by the Master and to be current as of the day of entering the Venezuelan port. The Customs are very strict and will confiscate any article that appears new.
3. *Health, Immigration, and Police Requirements*
Vessels bound for Venezuela in ballast, without passengers, from foreign ports outside the West Indies or Guianas, require following documentation.
(a) Current individual International Vaccination Certificates for each member of the crew.
(b) Derat Exemption Certificate.
(c) Crew Lists (original and seven copies).
(d) Panama or Suez Canal or any comparable type measurement certificate.

Contraband: The Venezuelan law is very strict on this subject. It cannot be emphasised too strongly that all new articles, clothing, cigarettes, liquor, etc., must be declared and sealed-up upon arrival.

Meals for Pilots and Government Officials. It is requested these men be granted the privilege of eating in the officers' dining salon.

N.B. Masters of vessels calling at Trinidad for bunkers before proceeding to Venezuela must also have the documents stamped by the Venezuelan Consulate at Port of Spain.

PILOTAGE: In order to expedite the movement of shipping in the waterways, Masters are requested to establish contact with YVM station as soon as possible, giving ETA Seabuoy 0.1. At the same time a radio-telegraph message must be sent to Agents giving ETA Barima and cargo required. When vessels is 24 hours from pilot station, send another ETA via YVM.

After reporting the ETA in advance of arrival, try to contact directly, by VHF, "Amacuro Pilot" when the ship approaches Seabuoy 0.1 off the bar entrance (about 2 hours before arrival at the pilot station). (It is possible to contact Pilots 100 miles before arrival Seabuoy 0.1.)

After taking the Pilots aboard, report to Radio Marina and continue giving the ship's position according to the mile, up-river, at exactly every hour on the hour, and receive from Radio Marina the pertinent information concerning the traffic in the river waterway. If no communication can be established by voice radio aboard, comply by radio-telegraph by way of the YVM station. See "Ship's Officer's Reports" in 1st Section – "General".

Ship's Officer's Report: July, 1980.

Hourly position reports are made on W/T to YVM when the Pilot is aboard (He writes the telegrams in Spanish).

Pilots are the employees of the Venezuelan Government and act in an advisory capacity. The Master retains responsibility for the ship at all times.

(1) Pilotage is not required and Pilots are not available for navigation outside the pilotage zone. Masters will take charge of inbound and outbound navigation on the North or South channel outside Buoy 27 at the Boca Grande, without Pilot's assistance.
(2) Pilotage is mandatory within the Pilotage Zone No. 1 of the Orinoco. Inbound vessels will embark the government River Pilot in the upstreamward vicinities of Buoy 27. It is important that vessels pass Buoy 27 and be in sight of the pilot station at Barima in order to avoid any delay, as Pilots may not proceed until vessel is sighted. The government River Pilot will pilot the vessel while navigating the waterway; a special government Docking Pilot will generally take the vessel into and out of the Puerto Ordaz harbour.

Signals
(1) All signals used outside of the pilotage zone (that is to say. seaward of Buoy 27 – mile 27.7) shall conform to the International Rules for Prevention of Collisions at Sea.
(2) Within the pilotage zone (that is to say, inside of Buoy 27 – mile 27.7) the signals used shall be in accordance with the "Regulations for the Pilotage Zone No.1 of the Orinoco". It should be noted that these signals are peculiar to the Orinoco Waterway, and are not necessarily in conformance with the International Rules.
(3) Within the pilotage zone, special signals are used for passing dredgers at work along the waterway.

Speed
The Captain of the Port has the authority to impose speed restrictions. By means of "Notices to Mariners", the Port Captain has ordered that all vessels reduce speed while navigating by the following locations: San Felix Dock, mile 179.8; El Toro, miles 95.4 to 96.6. It is recommended that speed be also reduced while navigating by the Palua Dock (mile 181.8), Barrancas (mile 143.2), and Curiapo (mile 60.4). At the inception of the low water season each year (generally in early January), the Port Captain has in the past issued a "Notice to Mariners" instructing all vessels to reduce speed and proceed with caution while navigating the following river reaches: (1) miles 184 to 178, (2) miles 171 to 167, (3) miles 150 to 141, (4) miles 140 to 137, (5) miles 133 to 131, (6) miles 112 to 109, (7) miles 106 to 98, (8) miles 55 to 53, (9) miles 39 to 36.

ANCHORAGES:
(1) No ships are permitted to anchor either in the North or South channel at the Boca Grande. Vessels are to anchor at least 1 mile outside of Buoy EO or Buoy 0.1.
(2) Within the pilotage zone, no vessel is allowed to anchor in narrow channels, nor close to a turn.
(3) Between Buoy 27 — mile 27.7 and mile 137, vessels which need anchoring may do so by coming as close as possible to shore on the ship's starboard side.
(4) Between mile 137 and mile 184, the Pilotage Regulations provide for 3 permanent anchorages and 1 seasonal anchorage, as follows: Area No. 5 (permanent); miles 139.3 to 140.4. Area No. 6 (permanent): miles 150.1 to 151.7. Area No. 7 (permanent): miles 178.0 to 179.0. Area No. 8 (seasonal): at the junction of the Caroni and the Orinoco. It should be observed that Area No. 7, as determined in the Pilotage Regulations, partially encroaches on the narrow (dredged) channel and on shore. Vessels are to anchor in the naturally deep and wide part of the area.
(5) The low-water anchorage (for 1 ship only) previously established by the Port Captain between miles 182 and 183 is no longer in use. This area is currently used as the turning basin for vessels exiting the Palua Channel, upon sailing from the new Palua dock at mile 181.8.
(6) If due to emergency a ship is required to anchor in places other than the designated areas, it should do so in such a way as not to obstruct the channel and by taking the necessary precautions to avoid swinging around.
(7) Upon anchoring vessels should notify YVM.

MAX. SIZE:
(1) *Max. permissible draft.* The Port Captain of Ciudad Bolivar can establish the permissible draft for the Orinoco waterway to a max. of about 43 ft.

(2) *Controlling Depths and Authorised Draft*
The draft authorised by the Port Captain for the Orinoco Waterway is made public by means of a "Daily Bulletin of Depths and Draft" (Boletin Diario de Profundidades y Calado). Each daily bulletin issued by the Port Captain carries the following information, in Spanish and English:
(a) Controlling (minimum) depth between miles 184 and 133, and corresponding location.
(b) Controlling (minimum) depth between miles 133 and 42, and corresponding location.
(c) Controlling (minimum) depth between miles 42 and 0, and corresponding location.
(d) Predicted high tides (height and times) at mile 13.5.
(e) River stage (height of river level above low water plane) at Puerto Ordaz and Palua.
(f) Authorised draft, in feet and inches.

The controlling depths given for locations comprised between miles 184 and 42 are actual depths, and reflect depth conditions as of the date of the bulletin. The controlling depth given for locations comprised between miles 42 and 0 is referred to mean low water springs and does not include the height of tide at high water.

The authorised draft may be predicted either on the controlling depth existent between miles 184 and 42 or between miles 42 and 0, dependent upon whichever is the least.

When the controlling depth between miles 184 and 42 is the significant factor, the permitted draft authorised is at least 2 ft. less than the controlling depth in this sector.

When the controlling depth between miles 42 and 0 is the significant factor, the permitted draft authorised is generally less than the mean low water springs controlling depth but occasionally can be equal to the mean low springs controlling depth.

Whenever the MLWS controlling depth existing between miles 42 and 0 does not provide sufficient clearance under the keel of the vessel at low water, the Master is expected to navigate by the site where the controlling depth is located only at times when the height of tide will assure a safe passage.

(3) *Variations in authorised draft:*

(a) The authorised draft is generally increased or decreased by multiples of 6 inches.

(b) Throughout the year the authorised draft is susceptible to variations, according to the conditions of the depth and width existing in the channel at any one time. On the basis of average river stages it is estimated that the authorised draft should be about 33 ft. in the dry season from December to May.

During the rainy season, from June to November, the max. permissible draft may be as high as 43 ft.

HEALTH: Radio Pratique may be obtained by sending a message, after picking up Pilot, to the Port Health Officer, advising that there is no sickness on board, name of last port, ETA, number of crew and nationality of vessel and name and nationality of Master (This does not apply at Palua).

RADIO:

(a) Communications: Communications are generally handled through the radio-telegraph station at Puerto Ordaz, call letter YVM. This station is operated on a 24 hour basis. The operating frequencies are: 440 kHz; 472 kHz; 4322 kHz; 6505.5 kHz. The GMT — CQ times and frequencies are: 0900 hrs., 4322 kHz; 1200 hrs. 6505.5 kHz; 1430 hrs. 8722 kHz; 2000 hrs. 8722 kHz; 0030 hrs. 8722 kHz; 0300 hrs. 4322 kHz.

There is no charge for messages from ship to shore or from shore to ship handled directly through YVM. A VHF frequency modulated radio system provides voice communications along the Orinoco Waterway. Master sets for the system are installed in the Puerto Ordaz Radio-telegraph Station (voice call: "Master Radio"); Marine Radio handles shipping matters exclusively, The system consists of a high-band VHF frequency modulated voice radio network. To ensure a more efficient and satisfactory coverage, this system operates on dual frequencies alternating according to location, so that ships can either transmit on 161.700 MHz receiving on 159.000 MHz, or transmit on 161.150 MHz receiving on 159.850 MHz. For best results, ships should select frequencies according to the following: From sea to mile 50: transmit on 161.700 MHz, receiving on 159.000 MHz; From mile 50 to mile 112: transmit on 161.150 MHz, receiving on 159.850 MHz; From mile 112 to mile 159: transmit on 161.700 MHz, receiving on 159.000 MHz; From mile 159 to mile 184: transmit on 161.150 MHz, receiving on 159.850 MHz.

Pilot station at Barima Bar, Palua and Matanzas are equipped with this system. For the Puerto Ordaz area, ships will transmit to Marine Radio on a frequency of 43.02 MHz and to others on a frequency of 43.18 MHz, receiving in both cases on a frequency of 43.18 MHz.

Ship's Officer's Report: July, 1980.

The VHF Channels listed are not available on standard marine sets. All VHF work is done on Channel 16 (Pilot to Pilot), and reporting on W/T to Radio Marina.

(b) Control of Navigation:

(i) Navigation on the North (natural) channel at Boca Grande is free. However, vessels are requested to notify the Port Captain, Ciudad Bolivar, via "Amacuro Pilots" on Channel 16, upon arrival at Buoy EO, giving ETA at Buoy 27, mile 27.7.

(ii) Simultaneous navigation in opposite directions by 2 or more vessels is not permitted on the South (dredged) channel at the Boca Grande. The restriction is placed on inbound traffic, to the extent that any vessel wishing to enter the South channel requires prior authorisation from the Port Captaincy of Ciudad Bolivar. The request for permission to enter the South channel is to be addressed to the Port Captain, Ciudad Bolivar, via "Amacuro Pilots" on Channel 16. and is to be transmitted before the vessel reaches Buoy 0.1. Upon receipt of the request, the Port Captain will notify the vessel via "Amacuro Pilots" on Channel 16, whether permission is or is not granted, indicating, in the latter case, the approximate waiting time. Until permitted to enter, vessels are to anchor at least 1 mile outside of Buoy 0.1. Once that authorisation has been granted, vessels are to enter the South channel at the earliest opportunity. Any vessel which has been notified to wait may elect to proceed and enter through the North (natural) channel; in this case, the vessel will have to satisfy the requirements outlined in paragraph (1) above.

(iii) While navigating the Orinoco Waterway inbound or outbound vessels are to report their position to YVM hourly on the hour. Seaward of Punta Barima, to "Amacuro Pilots".

(c) Accident, Stranding, etc.

(i) Should a collision, stranding or other accident occur in the waterway, or should it be found necessary to take control of the vessel away from the Pilot for any reason, the Venezuelan law requires that a written report be made to the Captain of the Port by the Master of the vessel involved within 24 hours. The report is to be addressed to the Captain of the Port and may be handed to the Pilot or the ship's Agent for delivery. The Master need not appear in person before the Captain of the Port unless specifically ordered to do so.

(ii) Slight groundings or touching of banks and bottom may simply be noted on the reverse side of the receipt for pilotage signed by the Master.

(iii) In case of collision, stranding, slight grounding, touching of banks and bottom, or other accidents, vessels should immediately notify YVM.

Section A

MATANZAS: 08.17 N. 62.52 W. (See Plan Book)

N.B. See "Orinoco River" for all important entry requirements.

LOCATION: At Mile 195 from sea on Orinoco River.

ANCHORAGES: Between miles Nos. 195 and 197, Orinoco River.

MAX. SIZE: Length 600 ft., breadth 74 ft., distance between rail and hatch coaming 23 ft., max. draft 41 ft. in rainy season May to November, and 28 ft. in dry season.

RADIO: See "Orinoco River". Cables address of Matanzas terminal operators is "Sidor Matanzas – Telex 86366" and cables may be routed through Caracas, Curacao or Trinidad Radio.

TUGS: Every vessel over 2,000 registered tons is required to use a tug when berthing. Tug is 1,600 h.p.

BERTHING: Reinforced concrete structure consisting of 3 different sections running in a straight line, bearing 065°.

From West to East, 3 sections should be pointed out:

The first section, some 320 m. long, is used mainly for unloading bulk cargoes. Depth 10 m. below MSL.

The second section, 400 m. long, is for handling steel products. Depth 11 m. below MSL.

The third part, some 280 m. long, is for general cargo. Depth 11 m. below MSL.

The level of the river fluctuates from 0.6 m. over MSL at low river water in the dry season (February – March) to 14 m. over MSL at high river water in the rainy season (July – August).

The river bed drops sharply from the edge of the pier to the navigation channel where the depth reaches 30 m. below MSL.

Berth No. 1: Runs from bollard No. 1 to No. 7, length 155.30 m.
Berth No. 2: Runs from bollard No. 7 to No. 14, length 176.38 m.
Berth No. 3: Runs from bollard No. 14 to No. 24, length 204.25 m.
Berth No. 4: Runs from bollard No. 24 to No. 33, length 182.75 m.
Berth No. 5: Runs from bollard No. 33 to No. 39, length 160.45 m.
Berth No. 6: Runs from bollard No. 39 to No. 44, length 158.85 m.

In addition there is another berth, length 149 m., South of No. 6, with 24 ft. of water under MSL, that runs from bollard No. 38 to No. 44.

The reinforced concrete platform is 25 m. wide at the first section and 20 m. at the second and third sections. The surface of the pier is 15.5 m. over MSL.

CRANES: Berths No. 1 and No. 2 are served by 2 "Ceretti Tanfani" bulk unloaders of 22 tonnes capacity, able to handle clamshells of 4.5 cu.m., for iron ore, lime stone and other heavy bulk, 10 cu.m. clamshells for coke and other light bulk and orange peeler and magnets for unloading scrap iron.

The reach of these cranes is 10 m. from the pier edge. The working field is from bollard No. 2 to bollard No. 13.

Berths No. 3 and No. 4 are served by 6 "CMI" gantry/trolley cranes fitted with 2 hoists of 15 tonnes each, with a total capacity of 30 tonnes with the 2 hoists in tandem. The working field is from bollards No. 15 to No. 31.

Berths No. 5 and No. 6 are served by 3 "Ansaldo" gantry/trolley cranes of 16 tonnes capacity. The working area is from bollards No. 35 to No. 44.

At bollard No. 34 there is a stationary rotary derrick of 400 tonnes capacity and a reach of 18 m.

In addition, there are 3 "Grove" auxiliary moving cranes, of the telescopic type, with a rated capacity of 80 tonnes able to work at any part of the pier.

WAREHOUSES: From bollard No. 14 to bollard No. 29, running along the South edge of the pier, there are 10 adjoining warehouses, 30×100 m. each, 3 of them open at either end and the four in the middle roofed. All of them are provided with 1 gantry crane of 25 tonnes each.

STEVEDORES: Operations are round the clock, 7 days a week.

MEDICAL: Private hospital and several doctors available.

FRESH WATER: Available at rate of 12 t.p.h.

FUEL: Available ex-barge.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed per crew member for personal consumption.

IDENTIFICATION CARDS: Provided by authorities, and necessary if crew going ashore.

REPAIRS: Local workshops undertake minor repairs.

AIRPORT: Matanzas is served by Puerto Ordaz Airport with several daily flights from Caracas.

POLICE/AMBULANCE/FIRE: The entire length of the pier is fitted with fire hydrants and at the steel mill, about 6 km. away, there is a well equipped fire brigade with firetrucks, ambulances and rescue vehicles.

A first aid centre is located close to the fire station.

TELEPHONES: No telephones or telex services are available at Matanzas for the use of vessel's personnel. Local telephones only available at the pier and dock supervisor's office. Recommend vessels use their VHF to communicate with their Agents while at anchorage and when alongside.

REGULATIONS:

Pollution: Venezuelan law and Sidor's port regulations are very strict on air and river water pollution, the following restrictions being in force:

1. No smoke to be ejected from vessels' funnels while moored at Sidor's pier.

2. No waste, refuse or garbage to be dumped in the river while in the river channel, at Matanzas roads or laying alongside the pier.

3. All waste, refuse or garbage kept on deck, to be sprayed with anti-vermin and kept covered.

4. No salt water ballast, bilge water, oils, refuse water from galleys and lavatories, etc., to be pumped into the river.

In addition to whatever penalty the vessel shall incur under Venezuelan law, Sidor reserves its right to place the offending vessel "off hire" until she has complied with the regulations.

Safety: Under Sidor's security norms, every person which, for whatsoever the reason or business, has to transit or stand on the pier's platform is bound to use a hard hat. People doing any kind of work on the pier have also to use safety shoes.

GENERAL: Sidor's pier will discharge and/or load cargoes for other industries of the area provided a berth is available and no Sidor vessels are waiting. Permission for such operations must be requested prior to vessel's arrival.

Sidor require Agents to provide stowage plan and cargo documents prior to vessel's arrival otherwise Notice of Readiness will not be accepted.

OPERATOR: C.V.G. Siderurgica del Orinoco C.A., Codigo Postal 8016, Matanzas, Ciudad Guayana, Estado Bolivar, Venezuela. *Tel:* 991111 and 991118. *Telex:* 86366 and 86229 (Sidor). *Cables:* Sidor Matanzas. *Contact:* Superintendent, Port Services.

Section B

PALUA: 08.21 N. 62.41 W.

N.B. See "Orinoco River" for all important entry requirements. Specific details, relevant to Palua only, are as follows:

SUPPLIER: The ore supplier is CVG Ferrominera Orinoco C.A., cable address "Ferrominera". Their Palua office is fitted with VHF radiotelephone on 161.150/159.850 MHz and 2182 (call) kHz.

CLEARANCE: Agent will secure the Clearance dispatch.

Note: The Palua dock and facilities are the private property of CVG Ferrominera Orinoco C.A. All Company regulations must be obeyed by vessels and vessels' personnel.

The Bill of lading will be prepared by CVG Ferrominera Orinoco C.A., also the Commercial Invoice on the Consular Invoice form 138. The Inward Foreign Manifest, U.S. Customs form 7527–B, should be prepared by Master after sailing from Palua.

MAX. SIZE: Max. Draft 43 ft. Max. d.w.t. 70,000 tons.

HEALTH: The vessel will be boarded by the Public Health Doctor after docking at Palua; unless instructions to the contrary.

In the event that the Authorities have to board the vessel anchored out in the stream, an accommodation ladder should be rigged, preferably on the starboard side, to keep the port side clear for docking. Venezuelan authorities and workmen will not use Pilot ladders.

RADIO: Should a vessel receive radio advice at sea to proceed to Palua, and the clearance is to another port, it is requested to send following information to "Ferrominera" at earliest convenience. i.e. Master's full name and nationality, vessel's nationality, port and number of register, net and gross tonnage, type of vessel M/V or S/S, vessel's overall length and width, last port of call, original port of destination. This is necessary in order to comply with the Venezuelan Custom Law.

BALLAST: To provide the best manoeuvring trim on docking, it will be at the discretion of the Master to properly ballast the vessel. But in order to lose no time on loading operations, as well as to prevent short loading, the ballast should be pumped out as soon as possible, using utmost caution not to pump oil or sludge overboard in the port area.

APPROACH AND DOCKING IN PALUA: After passing the village of San Felix, and before reaching the turn off from the main channel, a tug and a Docking Pilot will meet the vessel and will assist in the docking manoeuvre. Although the Master will always be responsible for the vessel's movements either in the case of docking or undocking, the Docking Pilot will actually pilot the vessel to, and dock the ship at Palua.

At mile 180.5 the ship should leave the main channel, turning to the left to follow the new dredged entrance channel of approach which is marked by 2 flashing buoys: white on the port and red on the starboard side. Diamond-shape range marks of 6 ft. side, painted white with black diagonal cross, indicate the centre line of the approach channel. The front range, fastened on the ore loading pier, shows flashing green light, and the rear range, set on a tower shows flashing green light, and the rear range, set on a tower approximately 2,000 ft. away, has fixed green light.

The docking shall be port side to in all events; and please stow all hatch boards, or pontoons, or steel battens, etc., on the starboard side of the hatch as this will keep the gear cleaner and lessen the work of the ore handling gang.

Vessel's accommodation ladder is used. Nothing should overhang the port side of the vessel on docking.

If the loading berth is not available the arriving vessel would be instructed to anchor at an anchorage just below the entrance to Palua approach channel at mile 179.

LOADING DOCK: The ore loading port is located at mile 181.5 of the Orinoco waterway, along the left bank going up-river. The new steel dock here is aligned up and down stream in the general direction of the current. It is 907 ft. long between its pointed heads, with 791 ft. of boarding side along, the deck fixed at about 6 ft. over the maximum rise of the river in the flood season. It has a strong fender system of steel structure covered with timber overhanging the side, down to near the lower river stage; and is fitted with 14 bollards plus 2 more, one on each head, for proper docking and securing the vessel.

Once the vessel is moored alongside the new ore loading dock, there shall be no further shifting necessary to load, as the loading tower moves along the dock on rails to facilitate the loading through the various hatches.

LOADING: The ore handling and loading equipment for Palua has a capacity to load 3,000 metric tons of ore per hour, for the time being. With this capacity, the vessel's mooring lines should be tended during the operation.

The boom of the loading tower is so designed as to allow free movement in any direction, fore and aft. The gantry and boom travel along the dock for a distance of 518 ft., and can place the ore at a distance horizontally out from the dock fenderline of 23 ft. minimum and 62 ft. maximum at the highest water stage, and from minimum 29 ft. to maximum 67 ft. horizontally out at the lowest stage.

Care must be taken during the course of loading to avoid piling the ore too high in the holds, as this necessitates hand trimming before the hatch covers can be properly secured, and incurs unnecessary trouble.

UNDOCKING: The Master, assisted by a Docking Pilot, if required, will handle the vessel on leaving the dock, going upstream from the dock not less than 0.75 miles distance to the turning basin in the same heading as when the ship moored alongside. One tug (or 2 tugs if required), will go alongside the ship prior to undocking and will assist the vessel until it is headed downstream in the main Orinoco channel. The amber lights at the heads of the dock form a range to mark the shoreside boundary of the local dredged channel. A red light high up on the loading gantry will come in the same range as the 2 amber lights. In the turning basin a tugboat will assist the vessel swinging downstream.

When the ship is in the main channel, properly headed downstream, the Docking Pilot will leave on the tug, and the River Pilots (2 of them) will assume the navigational direction. Report to Radio Marina by voice radio and give ETA at mile 31.

Report again to Radio Marina giving position every hour, and try to contact Barima Pilot station sometime before arrival at mile 31, where the Pilots will disembark.

If voice radio communication is not possible, comply by radiotelegraph by way of the YVM station.

REGULATIONS: The Venezuelan law is very strict on the subject of contraband. It cannot be stressed strongly enough that all *new* articles, clothing, cigarettes, liquor, etc., must be declared and sealed up on arrival.

Concerning passes, the regulation states that "members of the crew who are not officers of the vessel, in order to go ashore and return aboard, have to be supplied with an identification card to be issued by the Purser of the vessel or his substitute, which card will contain the name of the vessel, the name of the crew member and the date of issue. This card will have to be signed by the person issuing same and has to be authorised by the respective officer of the Port Captain's office for the district".

GAS-FREE CERTIFICATE: Vessels reporting to Palua to load ore should have the holds and cargo compartments swept clean and ready to receive cargo. Also, any combination ore/tanker vessel tendering to load iron ore at Palua shall present, along with the notice of readiness, a Gas-free Certificate if said vessel has in the past been employed in the carriage of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. But they are advised that around Palua in Venezuela there is no chemist available for granting such a Gas-free Certificate. It may be secured before arriving at Venezuela by calling at Trinidad, reporting to cable address: Harriman, Port of Spain.

In case of necessity, or for convenience, it could be arranged for the chemist to travel to Venezuela to meet the ship in Palua, advising Harriman (Port of Spain) at least 3 days before arrival at Palua.

If the vessel is equipped with a gas-indicating meter (explosimeter), CVG Ferrominera Orinoco C.A. will accept the Master's certification in writing that the vessel is gas-free. However, they reserve the right to check the vessel with their own equipment prior to acceptance.

CONSULS: At the present time there are no Consular Agents located around Palua, the nearest being in Ciudad Bolivar or Caracas.

FLOOD SEASON: The port experiences a yearly flood season from the middle of June to the middle of November, to a max. of about 38 ft. at the last days of August, above the lowest stage (during the first days of April) in the dry season that occurs from the middle of November to the middle of June.

TIDE: The wind in the locality blows generally upstream, and on exceptional occasions during the dry or low-river season, when the current is weak, does overcome the current and cause the anchored ships to tend with stern upstream.

REPAIRS: Minor emergency repairs of mechanical, electrical and electronic types may be carried out in the shops by the personnel of the Iron Mines Company of Venezuela. The American Bureau of Shipping has a surveyor at Puerto Ordaz, near Palua.

MEDICAL: There is a medical dispensary at Palua, and a hospital of the Company at El Pao, where seamen may be admitted when requiring hospitalisation in emergency cases.

FUEL: All grades of bunker fuel are available at Palua, delivered by barge.

FRESH WATER: Drinking water is available at the dockside in limited quantity of about 100 tons every 24 hours. Small amounts of fresh provisions may be obtained in the locality.

Section C

PUERTO ORDAZ: 08.21 N. 62.43 W.

OPERATORS: CVG Ferrominera Orinoco.

LOCATION: The operations of the CVG Ferrominera Orinoco are centred in the State of Bolivar in Eastern Venezuela and iron ore is loaded into ocean-going vessels at Puerto Ordaz 08° 21′ N., 62° 43′ W., at the junction of the Caroni and Orinoco Rivers, approximately 184 nautical miles from the open sea.

GAS-FREE CERTIFICATE: Any combination ore-tanker vessel tendering to load iron ore at Puerto Ordaz shall present, along with the notice of readiness, a gas-free certificate if said vessel has in the past been employed in the transportation of petroleum products. Such certificate shall be dated subsequent to the discharge of the vessel's last petroleum cargo. Gas-free certificates can be obtained through an approved surveyor in Puerto Ordaz.

HEALTH: Vessels will be boarded by the Public Health Doctor in the stream off Puerto Ordaz. He will not come up a Pilot ladder and will insist on an accommodation ladder which should be rigged and ready when he approaches. In order not to delay docking, this accommodation ladder should be rigged on the port side during low river stage, and starboard side during high river stage.

RADIO: Should a vessel receive radio advice at sea to proceed to Puerto Ordaz, and the clearance is to another port, the Master must radio station YVM Puerto Ordaz, and advise the name of the vessel, flag, port of embarkation, original port of destination, Master's name and number of members in the ship's crew. This is necessary in order to comply with article 17 of the Venezuelan Customs Law.

TUGS: All vessels touching at Puerto Ordaz will be assisted by a tug in docking and undocking manoeuvres. Line-handlers are available on the dock to secure mooring lines on vessel's arrival, and to release them on vessel's departure.

BERTHING:

1. **The Harbour:** The Puerto Ordaz Harbour extends from mile 183.5 to mile 184.1 of the waterway. The harbour consists of a natural basin formed by the mouth of the Caroni as it flows into the Orinoco. The width of the turning area within the basin varies from a min. of about 1,600 ft. at low water to a max. of about 2,000 ft. at high water. The lighted buoys marking the navigable limits on either side of the harbour are moved to different positions according to river stages in order to achieve full utilisation of navigable waters. The bottom of the harbour is generally rock, with scattered layers of sand overburden deposited as sediment by the river. This sand is regularly removed by dredging in order to maintain depths which will accommodate the maximum draft authorised by the Port Captain. The bottom configuration across the harbour consists of a rocky shelf extending about 900 ft. from the face of the dock. Beyond this shelf the bottom slopes steeply into a deep gorge, then rises to form a sandy beach along the opposite shore. The velocity of river currents at this site varies according to stage levels. A slower current is generally experienced over the rocky shelf adjacent to the dock, with velocities averaging about 1.5 knots at flood stages and about 0.5 knots or less at reduced river stages. The velocity of the current over and along the deep gorge averages about 3.5 knots at flood stages and 1.5 knots or less at reduced river stages. During extreme low water, the basin is subject to tidal influence and the velocity of currents is minimal, although there is no reversal of flow. The direction of the current is aimed slightly toward the face of the dock at its S.E. end but deflects away from the pier about 500 ft. downstreamward. Access to the harbour is by way of a naturally deep and wide fairway which is the continuation of the gorge as it enters the Orinoco River.

2. **The Dock:** The Puerto Ordaz dock is located along the right ascending side of the harbour and extends outward from shore on a S.E. by East alignment. The all-steel fixed-height dock is 1,885 ft. long; its elevation is 41 ft. above low water plane (0.0 ft. stage). This dock is fitted with a strong fender system and with a sufficient number of accessible bollards for proper docking and securing.

3. **Arrival:**

(a) Notice of Readiness: When completely ready to receive cargo, vessels will submit "Notice of Readiness" to CVG Ferrominera Orinoco. Vessels will be loaded in the order in which Notices of Readiness are accepted by CVG Ferrominera Orinoco. The Company will advise when the vessel may proceed alongside the dock.

(b) Docking: Special Docking Pilots are provided for the docking and undocking of vessels at Puerto Ordaz. These Pilots are qualified River Pilots, thoroughly familiar with local conditions. All vessels will dock starboard side to. During the low water stage, which is from the middle of November to the middle of June, no gangway should be rigged and nothing should overhang the starboard side of the vessel. When the river is sufficiently high which is from the middle of June to the middle of November vessels are requested to have starboard gangway or accommodation ladder rigged and ready to lower immediately after docking in order to expedite the commencement of loading. Venezuelan authorities and workmen will not use Pilot ladders. Vessels reporting to Puerto Ordaz to load ore should have holds and cargo compartments broom clean and ready to receive cargo. Considerable time will be gained if this requirement is met prior to reporting.

(c) Hatches: On arrival at Puerto Ordaz all hatch boards or pontoons, beams, tarpaulins, steel battens, wedges, etc., should be stowed on the port side of the hatch. This will keep the hatch gear cleaner and lessen the work of the ore handling clean-up gang.

(d) Ballast: In order to lose no time with the loading operations, as well as preventing short-lifting, all ballast should be pumped out before arrival at the dock. Use utmost caution not to pump oil or sludge overboard in the port area. CVG Ferrominera Orinoco Ships' Agency Representative will contact vessel on arrival and will assist in every way possible.

4. **Departure:** All vessels which have completed loading at Puerto Ordaz and have received the latest river information from the port offices, and are ready for their river transit in every respect, will proceed outward via the Orinoco Waterway, disembarking the Pilot at mile 31. Once the Pilot has disembarked, vessels shall proceed over the South (dredged) channel to mile 0, and exit the waterway.

TANKERS: See "Punta Cuchillo".

MEDICAL: There is a hospital at Puerto Ordaz which will admit seamen requiring hospitalisation.

FRESH WATER: Drinking water is available alongside the dock.

FUEL: Bunker "C" and diesel oil is available.

CONSULS: An Italian consulate Agent at Puerto Ordaz, nearest consuls for other countries at Cuidad Bolivar or Caracas.

REPAIRS: Minor emergency repairs may be carried out in the shops of CVG Ferrominera Orinoco.

TIME: The legal time of Venezuela, which is 4 hours behind GMT, shall be used in Pilotage Zone No. 1 of the Orinoco river.

SHORE LEAVE: Permitted, but it is mandatory that all crew members should report back to their respective ships before sailing time.

GENERAL: 1. *Ore Loading Equipment:* The ore handling and loading equipment installed on the pier has a speed ratio of 6,000 long tons of ore loaded per hour. Due to this great loading capacity the vessel's mooring lines must be tended at all times.

2. *Handling Facilities:* A movable 110-ton, rail mounted stiff-leg derrick is installed on the dock for the handling of general cargo.

3. *Provisions:* Small amounts of fresh provisions are available.

4. *Surveyor:* The American Bureau of Shipping has a non-exclusive surveyor in Puerto Ordaz. Lloyd's has an Agency in Ciudad Bolivar with a branch office in Puerto Ordaz, and will appoint surveyors upon request.

AGENT: Mailing Address: CVG Ferrominera Orinoco C.A., Agencia de Barques, Puerto Ordaz. Telex No. 86249 (ORINADM).

CVG Ferrominera Orinoco acts as ship's Agent for all vessels consigned to load iron ore at Puerto Ordaz. This function is performed by the Superintendent, Traffic & Ship's Agency and his staff, whose offices are located adjacent to the loading dock at Puerto Ordaz.

PUNTA CUCHILLO, (Puerto Ordaz Terminal):
08.20 N. 62.47 W. (See Plan Book)

N.B. See "Orinoco River" for all important entry requirements. Specific details relevant to Punta Cuchillo only are as follows:

OPERATORS: Lagoven S.A.

LOCATION: The terminal and dock is located near Mile Post 192 on the South side of the river.

PILOTAGE: Government Pilot will pilot vessel to Puerto Ordaz. In some cases this same Pilot will act as Mooring Pilot and dock vessel at the terminal. If River Pilot does not also act as Docking Pilot, the River Pilot will disembark at mile 178 during low water, and mile 183, in high water, and a Docking Pilot will embark and take the vessel to mooring.

Pilots are obtained at Buoy 27 of the old channel, which is the same as Buoy 27.7 of the new channel and is located 5 miles West of the old lighthouse at Punta Barima at Lat. 08° 36′ 00″ N., Long. 60° 30′ 40″ W. It is important that vessels pass this buoy and be in sight of the Pilot Station (1 mile E.S.E. of Punta Barima Lighthouse), as Pilots will not proceed to the vessel until it has been sighted.

MAX. SIZE:

Gauge Reading	*Maximum Draft*	*Tide Required at Bar*
12 ft. – 14 ft.	33 ft.	None
14 ft. – 17 ft.	34 ft.	None
17 ft. – 20 ft.	35 ft.	None
20 ft. – 23 ft.	36 ft.	None
23 ft. – 26 ft.	37 ft.	None
26 ft. – 29 ft.	38 ft.	None
29 ft. – 32 ft.	39 ft.	None
32 ft. – 35 ft.	40 ft.	None
35 ft. – 38 ft.	41 ft.	half of high tide
38 ft. – 41 ft.	43 ft.	half of high tide

TUGS: The use of tugs is necessary in docking and undocking manoeuvres of boats at this Marine Terminal. Alcoa has a 2,100 h.p. tug available for this service. A tie-up launch will be provided to assist in the mooring of the vessel, and will handle all the mooring lines before and after loading.

BERTHING: The dock at the terminal consists of a docking platform, 2 breasting dolphins and 2 mooring dolphins. The docking platform is connected to shore by a 10 ft. causeway capable of carrying a light truck.

At mean low river stage, water depth at the face of breasting structures is 40 ft. The bank rises sharply from face of dolphins toward shore. The 40 ft. depth contour extends parallel to shore for a considerable distance upstream and down stream from the dock, allowing a flat approach angle.

Current is negligible during low river stage and is approximately 6 knots at midstream at high river stage. Current runs generally parallel to the face of the dock at the dock site.

Top of dock elevation is 45 ft. above low water stage. Buffering system extends from a point below low water stage to a point immediately below top of dock. Nothing should overhang the shoreward side of the vessel when docking during the lower stages of the river. The buffering system is designed to accommodate forces exerted by a vessel of 47,000 tons displacement, approaching the dock with a velocity component perpendicular to the dockface, of 0.5 ft. per second.

Bollards for vessel's lines are provided at the mooring dolphins and at the breasting structures. Mooring dolphins will safely withstand 200,000 lbs. of mooring line tension.

The facilities include a 24 in. diameter submarine pipe-line which crosses the river a short distance down-stream of the dock. The crossing is marked by triangular-shaped signs on both banks of the river. Masters are cautioned against use of vessel anchors in this area.

The terminal pumps are capable of loading oil aboard ship at the rate of approximately 14,000 bbls.p.h.

INWARD CLEARANCE FOR DIVERTED VESSELS: Vessels diverted to Puerto Ordaz to load cargo should submit all documents, except consular mail, which they will not have. In lieu of this, they should submit 4 copies of the cable to divert, leaving enough space for the translation in Spanish. Vessels diverted at sea to Puerto Ordaz (Lagoven Terminal) which do not have a Venezuelan clearance on board must advise Lagoven at Puerto Ordaz, by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessel's flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessels will be subject to a fine.

SAFETY: The following is a condensation of the safety precautions that should be observed when the vessel is alongside the dock:

(i) All passageway doors leading to the cargo deck areas are to be kept closed during cargo-loading operations.

(ii) Ship's firefighting equipment must be kept ready at all times while berthed at Lagoven dock.

(iii) Smoking or carrying lighted or unlighted pipes, cigars or cigarettes on the weather decks of the vessel, or on the dock, is strictly prohibited under all circumstances. Masters are requested to instruct their crew not to throw lighted cigars or cigarettes over the side or out of the portholes.

(iv) An efficient watch must be maintained on deck and in the engine-room on the vessel, and a sufficient number of men must be on board at all times to move the vessel any time, in case such is required.

(v) If the galley is located near oil-handling operations of any nature, the skylight lids should be kept down and secured to prevent the galley being sprayed with oil in the event of a burst hose.

(vi) Ventilators in the vicinity should be turned away from the scene of operation.

LOADING: Monagas crude is the only cargo available at the Puerto Ordaz Terminal. This crude has an API gravity of 11.9° to 12.5° F. (6.490 – 6.517) U.S. barrels per long ton. This cargo must be heated to approximately 140° F. in order to attain normal discharge rates.

Loading is accomplished through 3×10 in. hoses provided with 10 in., 150 lb. ASA flanges. Hoisting gear is provided for handling the hoses. A dock crew will connect the cargo hoses and disconnect them on completion of loading. Some adapters and other tools are available on dock. The oil will be loaded at an elevated temperature.

Precautions, as are common for any heavy oil, should be taken to ensure that no ballast water is left in any tank to be filled with this oil. If the cargo is contaminated with water, the water will not separate from the oil. The salt content of the oil will be raised approximately 10 lb. per 1,000 barrels for every 0.10% contamination by sea water.

All cargo compartments must be stripped dry. Cargo pipe-lines should be drained and/or purged of water.

There is no provision at the Puerto Ordaz Terminal for disposal of dirty ballast or tank washings. Tankers bound for Puerto Ordaz for loading must dispose of all dirty ballast and tank washings before entering the Orinoco River.

Prior to proceeding to sea, all Butterworth plates, cargo tank hatch covers and ullage plugs should be inspected to ensure against entry of salt water.

HEALTH: Vessel will be boarded by the Public Health Doctor in the stream off San Felix or Puerto Ordaz or occasionally at the Terminal. If he boards before docking, an accommodation ladder should be rigged and ready when he approaches, as he will not come up a pilot ladder.

RADIO: Vessels diverted at sea to Punta Cuchillo which do not have a Venezuelan clearance on board, must advise Lagoven by radio as soon as they receive their orders to change destination. The following information must be given: Master's name, vessels flag, net tonnage, last port of call, port to which originally cleared and ETA. This information is required in order that inward clearance may be arranged with government officials in ample time prior to vessel's arrival. In absence of this information, vessel will be subject to a fine.

FRESH WATER: Fresh water is available ex-barge; cable advice of 24 hours is required. Dry provisions may be obtained in very limited quantities.

FUEL: Bunker fuels are available at all hours from Astilleros Orinoco C.A., who operate a floating storage and blending facility in the Orinoco River. Bunker fuels may be received at Lagoven dry dock while loading crude. Full cargoes can be made available.

TIME: GMT minus 4 hours.

MEDICAL: Medical assistance can usually be arranged, particularly in the case of an emergency.

REPAIRS: No major repair facilities are available. However, small repairs can be taken care of through local machine and electrical shops, and shore labour can be obtained if required.

AGENCY: Lagoven handles all papers and documentation connected with the ship's business. Lagoven will also help the ship's Master in providing required land transportation, limited provisions, or any other assistance that may be required for the operation of the ship's normal business. Alcoa will also assure that the ship's requirements are met in regard to Sanitary Inspection, Customs Inspection and Guardia Nacional.

Section E

VENALUM TERMINAL: 08.18 N. 62.50 W.

SHIPMASTER'S REPORT: February, 1981.

LOCATION: Mile 194 on Orinoco River. See "Matanzas – San Felix" in "Plan Book".

ENTRY: See "General, etc." under Orinoco River.

TUGS: Are summoned by Pilot when required.

BERTHING: Modern quay built on piles parallel to the bank with access by two piers, one at either end of the general cargo quay, allowing a one way system to be operated.

Length of general cargo quay – 215 m.
Length of bulk cargo quay – 85 m.
Depth alongside at lowest state of river – 12 m.

CRANES: The general cargo quay has two container cranes of 35 tonnes S.W.L. each. Aluminium ingots are the main cargo but other cargoes are handled. Container spreaders are available and also electro-magnets for use with the cranes.

BULK CARGO FACILITIES: Also see "Berthing".

The bulk cargo quay is served by an elevator with two suckers and is used exclusively for the discharge of alumina. An average rate of 200 tonnes/p.h. is claimed.

STEVEDORES: Working hours – 24 hours a day, 7 days a week.

AUTHORITY: Industria Venezolana de Aliminio C.A., Zona Industrial Matanzas, Puerto Ordaz – Edo Bolivar. *Tel:* 27177 (ext. 359 – 530). *Telex:* 86302, 86437. *Contact:* L. Rene Siampon, Traffic Chief.

END OF ORINOCO RIVER SECTION

PERTIGALETE: 10.15 N. 64.34 W.

LOCATION: Situated in a sheltered bay about 2 miles East of the port of Guanta, or about 4 miles from the pilotage zone situated in the North.

PILOTAGE: The pilotage zone in Pozuelos Bay is the same as for Guanta, i.e. an area situated between the islands of Borracha and Chimana, in the Bay of Pozuelos (formerly called Bergantin Bay).

From the pilotage zone for the port of Guanta/Puerto La Cruz, the private pier Pertigalete is to be approached by sailing between the Isla de Plata and the island of Cachicamo. Pilotage is compulsory in and out and is performed by well-trained government Pilots. The navigation is considered very safe.

MAX. SIZE: The depth of water for ocean-going vessels alongside the Pier is 20 ft. (shore side) to 40 ft. (sea side).

TUGS: Available from inward clearance port at Guanta/Puerto la Cruz.

BERTHING: The private pier in Pertigalete for berthing ocean-going vessels is up to 150 m. (492 ft.) long. The apron is ample and allows easy manoeuvre of trucks with cement. On the same pier the cement factory is regularly receiving raw material and machinery, but the berthing is along the West side of the pier for coastwise trade, so does not interfere with operations for ocean-going vessels. There are chutes, conveyor belts from the nearby silos, and a heavy crane.

TANKERS: Berth at private wharf at Pamatacualito, operated by Baroid de Venezuela SA. Length of berth 113.60 m., depth alongside 10 m.

LOADING: The cement factory is able to deliver to the pier 2,000 to 2,300 bags per hour, to be loaded simultaneously into arrived vessels. According to experience load rate is about 300 bags per hour and gang by steam winches, and about 400 bags per hour and gang by electric or hydraulic winches.

STEVEDORES: Loading operations are performed exclusively by the personnel of the cement factory. Winchmen are also supplied by the cement factory. All costs, including overtime, are for account of the cement factory, inclusive of stowing and trimming the vessel.

Under normal conditions on Saturday afternoon there is no work, but almost without exception the cement factory works overtime on Saturdays if by doing so the vessel can be despatched that day. On holidays, if circumstances call for urgent operation, the cement factory has the option to work overtime. Work on Sunday is prohibited.

AUTHORITY: Private pier of C. A. Venezolana de Cementos and is under the jurisdiction of Customs and Harbour Master of Guanta/Puerto la Cruz, Eastern Venezuela. All charter business and general administration is covered by Caracas Headquarters of C. A. Venezolana de Cementos.

AGENT: Head Office (Management and Control), Brokers Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas. 1010-A. Cables: "Selvic" or "Seltank". Tel. (02) 81.02.71. Telex: 21402, 21934, 22859, 21631. Local Office: PO Box 4194 Puerto La Cruz. Tel. (081) 662107, 662665. Telex: 81340. Cables: Selvic Puertolacruz, Seltank Puertolacruz.

PUERTO CABELLO (inc. Borburata): 10.29 N. 68.01 W.

(See Plan Book and Late Plans)

DOCUMENTS:

Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
3 Narcotics Drugs Lists.
2 Lists of Personal Effects.
1 Vaccination List.
Derat Certificate.

PILOTAGE: Pilotage is compulsory, but vessels must first anchor in roads 1 mile North of Punta Brava to await entry formalities and berthing orders.

MAX. SIZE: Bulk Cargo Pier: up to 32 ft. draft.
Inner Port: up to 28 ft. draft. Also see "Tankers".

TUGS: The use of tug-boats within the port is compulsory both for entering and leaving port, as well as for manoeuvres in the port basin, for foreign flag ships over 300 tons.

BERTHING: The port entrance is 100 m. wide in direction West to East. Berth No. 1 and half of Berth No. 2 are along the same entrance channel, where ships are berthed only as an exception or when the port is rather congested. The total length of the North (main) Pier for the berthing of ocean-going vessels is 1,025 m., room enough for 6 to 8 vessels. For administrative reasons the pier is divided into 8 berths of about 128 m. each. Between Berths No. 2 and 3, the pier is bent Southwards. Along the pier there are warehouses which under normal circumstances provide sufficient indoor space.

Along the East Pier, of 350 m. length, there are no warehouses. This pier gives berthing facilities to 3 or 4 middle-sized vessels.

Along the South Pier, of 500 m. length, there are 2 warehouses. This pier is exclusively used for coastwise shipping, fishery and small craft in general.

The dredged channel along the East Pier is only 80 m. wide. This is the only channel which connects the main basin of the port with the South basin of the port, the latter served through the South Pier.

Ro-Ro facilities available.

BULK HANDLING FACILITIES: 400 m. long new pier, designed exclusively for the handling of bulk cargoes.

This bulk cargo pier has an apron of about 25 m. and allows ships with a draft of 10 m. at any time.

Ships moored along this new pier are not able to take water there, but have to be shifted to the general cargo piers in the port of Puerto Cabello.

There is no telephone installation on the new pier.

Tug-boat service and assistance of Pilots is compulsory to negotiate the distance to and from the bulk cargo pier.

General cargo is not allowed to be handled at this pier. There are no cargo handling facilities whatsoever and no kind of rolling equipment either. All the vessels, unless they have up-to-date discharging equipment of their own, have to provide derricks of minimum 5 tons capacity to support the SKT discharging equipment of receivers. The cargo is discharged in bulk cargo trucks, fully closed and with only rather narrow manholes for the SKT arm.

The new grain terminal has been opened. The wharf is 400 m. long and allows 2 vessels to berth. Max. depth 30 ft. Average discharge rate 1,500 tons per day.

TANKERS: *Borburata:* The Maraven Terminal lies about 2 miles East of the port entrance.

Berth No.	*Max. length*	*Max. beam*	*Max. draft*
1	400 ft.	—	20 ft.
2	575 ft.	72 ft.	31 ft.

No. 1 berth is used for bunkering only.

No. 2 berth is used for the discharge of refined products and bulk chemicals. It is fitted with 4×8 in. Chicksans and a range of hoses from 4 in. to 8 in.

A Pilot is compulsory, and boards at Puerto Cabello. If the vessel is cleared outwards at Borburata, the Pilot may return to the pilot station by road.

Berthing and unberthing in daylight only.

Also see "Shipmaster's Report".

Lagoven Terminal: The buoy mooring is used for the discharge of petroleum products. Max. length 198 m. Max. beam 28 m. Max. draft 34 ft., will be increased to 38 ft. Max. Tonnage 40,000 d.w.t. Vessels berth using 5 shackles on the port anchor, and 6 stern lines to 3 mooring buoys.

Terminal Marino Holanda: Consists of 3 buoys situated in a depth of 45 ft. near Guaguaza Lighthouse. Used for loading/discharge of Chemicals.

STEVEDORES: *Straight time:* Monday to Friday: 0700 – 1100 hrs. and 1300 – 1700 hrs.

Overtime: Monday to Friday: 1800 – 2300 hrs. Normally overtime beyond 2300 hours is not permitted.

Relief Gangs: Obtainable, if there are not too many ships working in the port at a time, for the hours from 1100 – 1300 and 1700 – 1800.

Work on Sunday: Not permitted except for passenger vessels, and considered as such are those carrying more than 60 passengers, and with a medical doctor on board.

Saturday afternoon work: Not permitted. But if a vessel can terminate operation and sail with a maximum of 3 additional hours' work, a special permit can be obtained from Customs and Port Authorities. In such case, the additional working hours are considered straight time work.

FRESH WATER: Water is supplied through pipe-line on the pier, day or night. Ship's hoses used.

For night work, a special gratuity to watermen is customary.

The drinking water in Puerto Cabello is tropical treated, well-filtered and wholesome.

Every vessel of over 600 net tons calling at Puerto Cabello, and other ports in Venezuela, should arrange to take water only at Puerto Cabello in order to avoid double water dues.

OPENING/CLOSING HATCHES: Is not performed by the National Port Services, but instead either the ship's crew or hired assistance labour must be used. Recommended that ship's crew open and close hatches.

WATCHMEN: A very careful watch must be maintained in and around the accommodation as ships' safes and cabins have been broken into.

REPAIRS: The adjacent Naval Yard, the entrance to which is within the main port, opposite the North Pier, is equipped for minor repairs both on engine and hull. For emergency purposes, the dry dock could be used. Its capacity is for ships up to 30,000 to 35,000 tons. All repairs on the hull are effected by a special crew transferred from the Naval Yard.

At the dry dock there is 1 crane of 15 tons capacity. Within the Naval Yard there are 2 slipways for ships of 125 ft. max. and 210 ft. length max. respectively.

Venezuelan Navy ships always have priority.

REGULATIONS: Port regulations referring to contamination of the port waters will be strictly applied and fines for contravention will be imposed.

No maintenance to bridgehouse, hull or deck should be carried out whilst in port unless special permit issued by the Port Captain has been obtained.

SHIPMASTER'S REPORT: November 1984 (see "Late Plans").

Vessel: LOA 170 m., beam 26 m.

Berth: Maraven Berth at Borburata.

Pilot: Pilot boards off Puerto Cabello during daylight hours only.

Max. Draft: 32 ft.

Tugs: When berthing, 2 tugs are made fast on the Main Deck fore and aft.

When unberthing 2 tugs are used, 1 tug tows aft and the other stands by forward.

Charts: BA 1523 and 1966.

AGENT: Head Office (Direction and Control). Brokers, Chartering and Tramp Agents, Victor H. Selinger, S.A., PO Box 1632, Caracas, 1010–A Venezuela. Cables: "Selvic" or "Seltank". Tel. (02) 810271. Telex: 21402, 22859, 21631, 21934. Local Office: PO Box 174 Puerto Cabello. Tel. (042) 63750, (042) 63549. Cables: "Selvic Puertocabello" or "Seltank Puertocabello". Telex: 42479.

PUERTO DE HIERRO: 10.38 N. 62.05 W.

DOCUMENTS:

Last Port Clearance.

6 Crew Lists.

6 Passenger Lists.

6 Stores Lists.

6 Narcotic Drugs Lists.

2 Health Declarations (forms provided and filled by doctor on arrival).

Derat Certificate.

PILOTAGE: Pilot boards at Sea Buoy Lat. 10° 37′ N., Long. 62° 06′ W. If no pilot boat meets vessel on arrival, ship must anchor to wait orders. Send 7 day, 48 and 24 hour ETAs to cable address "Transterm Guiria". Vessels should anchor in the vicinity of Sea Buoy. No radio-telephone available.

ANCHORAGE: Vicinity of Sea Buoy. Good holding ground.

RESTRICTIONS: Vessels may have to wait at anchorage until slack water for docking when tide/current is strong.

MAX. SIZE: Dock, East berth: 30 ft. at LW; 33 ft. at HW; 690 ft. length, 90 ft. beam. Dock, West berth: 19 ft. at LW; 32 ft. at HW; 600 ft. length, 60 ft. beam. Also see "Berthing".

HEALTH: Doctor boards at berth and grants Pratique. Any suspected disease or fever to be reported at that time. Vessels arriving from a Venezuelan port do not require Pratique.

RADIO: La Guaira, Venezuela.

TUGS: None available.

BERTHING: Berthing at times limited to slack water period depending on strength of tides. Pilot will advise.

Bauxite Terminal: Max. draft 37 ft. Depth alongside 40 ft. Max. d.w.t. 40,000 tons. Loading rate 3,000 t.p.h.

STEVEDORES: Bulk cargoes: discharging rate 700/800 t.p.h., loading rate 800/1,000 t.p.h. No facilities available for handling general cargo.

MEDICAL: No notice required. Venezuelan Navy Hospital with limited medical assistance.

TANKERS: No oil carriers.

DENSITY: LW – 1020. HW – 1023.

FRESH WATER: Available in limited quantities at berth. Rate of delivery 30 t.p.h.

FUEL: In an emergency. Diesel fuel medium, specific gravity at 60° F. 0.85, API gravity at 60° F. 35, viscosity SSU at 100° F. 37, viscosity engler at 20° C. 1.40.

CUSTOMS ALLOWANCES: Two cartons of 200 cigarettes each or equivalent in tobacco. Two 0.75 litre bottles.

IDENTIFICATION CARDS: Issued locally by Navy on arrival.

REPAIRS: None. Small company workshop.

CONSULS: None.

AIRPORT: Nearest airport (1 hour voyage on launch) is Guiria with 2 weekly flights to Caracas and the same number to Port of Spain, Trinidad. Next nearest (1 hour launch plus 2 hours car) is Carupano with 4 daily flights to Caracas.

TIME: GMT minus 4 hours. Permanent.

HOLIDAYS: Cargo worked 24 hours a day, 365 days a year.

GENERAL: The whole of Puerto de Hierro is a Venezuelan Navy Supply Base. The dock and cargo installations are operated by Puerto de Hierro, S.A., a subsidiary of Caribbean Steamship Company, S.A. Only bulk cargoes transhipped by Caribbean Steamship are handled.

DEVELOPMENTS: Possibility of increasing draft to 42 ft. at loading berth, and to 30 ft. at discharging berth.

AUTHORITY: Puerto de Hierro, S.A.

PUERTO LA CRUZ, (Puerto La Cruz Terminal): 10.13 N. 64.38 W. **(See Plan Book)**

OPERATORS: S. A. Meneven. Postal Address, Apartado 4064, Puerto La Cruz, Venezuela. Radio Address, Meneven, Puerto La Cruz. (Venezuela). Telex: 81147 Meneven.

FLAG: Venezuelan flag must be displayed from the foremast when entering zone as well as in docking operations regardless of the hour. At all other times the Venezuelan flag must be displayed between sunrise and sunset.

LOCATION: Puerto La Cruz located on Pozuelos Bay on the N.E. coast of Venezuela. Its harbour is well protected by numerous islands against sea currents. The hurricane path is several hundred miles to the North and has never affected the flow of navigation in the Puerto La Cruz area.

The lighthouse marking the entrance to Pozuelos Bay is located: Lat. 10° 18′ 18″ N., Long. 64° 41′ 07″ W. Visibility is 20 miles.

DOCUMENTS: Arrival clearance is effected on board vessel shortly after docking by Government Officials and a representative of the Company. The following documents are required:

1. Ship's Register.
2. Dispatch issued by Venezuelan Consul at last port (1 copy).
3. Ballast Manifest (1 copy).
4. Crew List (6 copies).
5. Passenger and Baggage List, if any (5 copies).
6. List of Passengers in Transit, if any (5 copies).
7. List of Personal Effects (4 copies).
8. Store List (5 copies).
9. List of Slop Chests (4 copies).
10. Sailing Permit issued by Marine Authority at last port of call.

*Store List should indicate separately all deck, engine and cabin stores.

PILOTAGE: The use of Government Pilots is compulsory for all vessels entering or leaving territorial waters. The Company will arrange for this service at all times. If it becomes necessary for the Master of the vessel to disregard Pilot's orders in order to ensure safety of the ship a written report from the Master shall be submitted promptly to the Government Port Captain in Spanish. Meneven will assist in translation, when necessary.

The zone for Pilot to board or to anchor awaiting Pilot is delineated by the following 3 lines: South by parallel 10° 15′ N., East by meridian 64° 40′ W., and West by an imaginary line from Punta Puinare on Isla Chimana del Oeste to the North point of Morro de Barcelona.

When ready to dock, a Pilot will be despatched by launch to ship.

MAX. SIZE: No limitation is placed on width of tankers. Ships up to 1,000 ft. in length can be turned around in the inner harbour area. Max. safe draft alongside (Berth No. 5) is 55 ft. (Also see "Berthing".)

HEALTH: In theory the Government Port Doctor is to board each incoming vessel and board only outgoing vessels which carry passengers. In practice, however, the doctor boards at his discretion.

Ships cleared between the hours of 1700 – 0800. Mondays through Fridays and all day Saturday, Sundays and holidays are charged by Immigration Service for the issuance of shore leave passes. There is no charge for this service from 0800 – 1700 hrs. Mondays through Fridays. Transportation and immigration clearance fees on movement of seamen are billed at cost.

TUGS: 2-tug service is compulsory by law in this port. The Company has available a first-class diesel-electric tug of 1,600 h.p. and a contract tug of 2,100 h.p.

BERTHING: The loading facilities consist of 6 berths. Products available and safe draft are as follows:

	Berth 1	*2*	*3*	*4*	*5*	*6**
Crudes	×	×	×	×	×	×
Heavy fuel oil					×	×
Refined products			×	×		
LPG		×	×			
Bunker "C" fuel	×	×	×	×	×	
Diesel fuel	×	×	×	×	×	×
Intermediate fuels	×	×	×	×	×	
Fresh water	×	×	×	×	×	×
Max. safe draft (ft.)	38	38	38	55	55	39.5
Max. d.w.t. (thous.)	45	45	45	110	110	55

*El Chaure Terminal – Now Pier No. 6. Also see "El Chaure".

Upon arrival at dock the following rules must be observed:

(a) Masters must ensure that mooring lines are properly tended during the discharge of ballast and loading of cargo, and that sufficient personnel is on board at all times to handle same. Discharging or loading will be temporarily suspended upon infringement of this regulation.

(b) Masters are requested to remove the blank flanges from their vessel's loading manifold before docking, so as to expedite the connecting of the shore hoses by company personnel. Vessels using berth No. 5 are also requested to have their derrick and gangway ready for use.

Note: Vessels normally dock with starboard side to dock, unless otherwise advised.

(c) While docked, discharge of sea water, hot water or steam on dockside of ship is prohibited. Hot water or steam may activate the automatic sprinkler system as well as damage piping located under the dock surface.

(d) Rat-guards must be placed on all ropes connected with the shore.

(e) Heavy exhaust smoke from vessel's funnel is not permitted. Any infringement of this rule will result in Government fine and/or removal of ship from dock.

(f) Meals must be provided in officers' mess-room for Venezuelan National Guard personnel who may be assigned to the vessel during stay in port.

LOADING: After the vessel has been cleared, the Company Dock Supervisor on watch will give the Master of the vessel written instructions as to grade or grades of cargo, loading rates, information on size of hoses and lines, and other information pertinent to the loading of the vessel.

During loading operations, company employees are on watch to administer to the needs of each vessel.

Upon termination of loading cargo, hoses are normally displaced with air at controlled rates prior to disconnecting. If the ship's officers request that the alternate procedure of draining hoses be effected, shore personnel will be happy to comply provided the following steps are observed by ship's officers:

1. Advice be received prior to termination of loading cargo.
2. Ship's receptacles be situated to receive oil drained on board. It should be noted that heavy fines are imposed for spills or overflows which contaminate the bay.

Shortly after completion of loading company personnel will take ship's ullages and, later, deliver cargo and sailing papers to an officer of the vessel.

Ships must vacate berth upon completion of loading and await papers at anchorage if the berth is needed for another vessel. The Dock Supervisor on duty will advise ship's officer of this matter.

BALLAST: Although climatic conditions in Puerto La Cruz are relatively mild, vessels should arrive with sufficient ballast to permit safe handling. Venezuelan regulations strictly prohibit the pumping overboard of dirty ballast in territorial waters. All ballast must be pumped ashore with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump overboard after first being inspected and approved by shore personnel. Heavy fines are imposed for pollution of waters and industrial fishermen are quick to report any infringement. Max. discharge pressure to shore installations is 90 p.s.i. through the 16 in. line which dumps into ballast lakes approximately 300 m. South of dock.

No vessel will be allowed to discharge ballast if last previous cargo was sour crude and/or could result in unpleasantness to area inhabitants.

RADIO: Masters are requested to advise Meneven Puerto La Cruz by radio 48 hours in advance of estimated arrival giving vessel's name, date and hour of arrival, bunkers, name of Master, port of departure, draft (arrival), Venezuelan gross tonnage, flag of ship. Vessels may contact the terminal by radio-telephone on 2182 kHz and VHF Channel 16. There is standby attention 24 hours a day. The terminal also has the frequencies 2080, 2120, 2638, 2738 and VHF Channel 13.

Ship-to-shore radios are installed on the oil dock and on both tugs. A 350-watt AM transmitter-receiver is monitored 24 hours a day.

FRESH WATER: Fresh chlorinated water is available at an average rate of approximately 10 t.p.h. Total volume of water that can be supplied during the normal period alongside averages about 150 tons. As water is not held in special reserve for vessels' requirements but supplied from terminal water system, availability may be limited dependent on time of year and other conditions.

FUEL: The terminal is not a general bunker station. Only ships loading petroleum may take bunkers.

Bunker "C", heavy diesel fuel and complete range of intermediate fuels are available in quantity. Delivery rates to the ships are approximately as follows: Bunker "C", 200 t.p.h.; heavy diesel, 150 t.p.h.; intermediate fuels, 150 t.p.h.

Bunkers are delivered concurrent with the cargo and should be taken as soon as clearance is granted.

Meters are installed on all bunker systems and are calibrated in net barrels.

The dock valves on the bunker lines will only be opened and closed upon advice from the ship's personnel.

Lubricants and gasoil are available through the vessel's Agent.

CUSTOMS: Crew members should be warned against taking knives or other lethal weapons ashore, as this is strictly prohibited. All firearms and ammunition must be noted on stores list. They cannot exceed 1 per officer and 18 cartridges per gun. No arms may be carried while ship is in Venezuelan waters or tied up at dock. Contraband of any description will be confiscated. Each man is allowed 1 package of cigarettes on his person and this package must be opened. No liquor is to be taken ashore. It is prohibited to carry liquor from shore to ship without authorisation from Master of vessel. It is further strictly prohibited to consume liquor in dock area.

It is normally forbidden to take photographic cameras ashore. However, upon written request to the National Guard contingent on the oil dock, special permission may be obtained. This is subject to 2 limitations: (1) that the camera is returned to the ship; (2) that no photographs are taken of the petroleum installations.

IDENTITY CARDS: Passes for shore leave are issued by the officials of the "Capitania de Puerto", who board with the Customs authorities upon the vessel's arrival at dock. These passes are valid for the duration of the vessel's stay in port and must be returned before sailing to the guard assigned to the vessel.

In order to comply with Immigration Regulations, crews should be carefully checked before sailing, and any missing seamen reported to the vessel's Agent. Crew members left behind when the vessel sails will be held in custody until deported at the vessel's expense.

CONSULS: The following foreign countries have consular offices in the vicinity of Puerto La Cruz:

Belgium
Brazil
Colombia
Denmark
Dominican Rep.
France
Great Britain
Italy
Netherlands
Norway
Sweden

Vessel's Agent should be appraised of vessel's consular requirements promptly upon docking.

REPATRIATION: Seamen discharged from hospital for transfer to another port, seamen arriving from another port or those being repatriated are handled by the vessel's Agent, who must comply with all Venezuelan Regulations.

In the case of seamen left ashore for any reason, Masters are requested to furnish a letter accepting responsibility for all expenses incurred, advances if any, and instructions for repatriation. Venezuelan regulations, at all times hold the vessel responsible for a seaman during his stay in the country. Close contact is maintained by radio with ship owners regarding disposition of their seamen.

TIME: GMT minus 4 hours. Permanent.

REGULATIONS:

Excessive Smoke. It is absolutely prohibited to exhaust heavy smoke through a ship's funnel while tied up at the Company's docks. It is also prohibited to blow boiler tubes. Failure to comply with this regulation will result in any or all of the following actions:

1. Vessel's discharge of ballast or loading of crude or products will be immediately shut down.
2. Vessel will be subject to fine from authorities.
3. Vessel may be removed from dock.
4. Owners will be advised of infractions of this regulation.
5. Fines, time lost, and other related expenses will be charged against the vessel.

Pollution. Venezuelan laws are very strict on this subject and local authorities quickly enforce existing statutes. For this reason each Master is handed a circular that emphasises the necessity of complying with federal and local laws and customs.

The spilling or discharge of dirty ballast, crude oil or petroleum products into coastal waters is defined as pollution, as is also the throwing overboard of garbage, trash or other unwanted objects while the vessel is at anchor or dockside. Prior to the start of loading operations all discharge valves, bilges and scuppers must be closed and strict vigilance exercised during deballasting and loading operations.

When a spill does occur, the Master, Government officials and a company representative evaluate the quantity and submit a report to the Government Petroleum Inspector. This report becomes the basis for a federal fine that is practically incontestable. An additional expense occurs when local authorities require assistance in cleaning beaches and shorelines after a major spill and can pinpoint the responsible vessel or source.

REPAIRS: Request for repair work by local contractors must be accompanied by a written request from the Master of the vessel.

TONNAGE CERTIFICATE: Due to reciprocal agreements between Venezuela and the following countries, ships flying the flag of any of the below-named countries are exempted from Arqueo compliance and payment of fees: Denmark, Great Britain, France, Germany, Netherlands, Ireland, Norway, Portugal, Sweden, United States.

Ships bearing the flag of any other nation shall require a Venezuelan Arqueo Certificate. The cost of measuring is contingent on the size and tonnage of vessel. The certificate is usually issued after the ship sails from port. It is then sent to the marine department of the Owners of the vessel by airmail.

GENERAL:

Charts. No charts or sailing documents are available in the terminal. Same should be forwarded by airmail to the vessel's Agent for delivery to the ship.

All ship requirements such as chandlery supplies, mail, cash advances, medical, dental, consular requirements, repair work, laundry service, bonded stores, transportation etc. should be obtained through the vessel's Agent.

BANKS: Banco Royal Venezolano. Tel: (081) 691921.

EMERGENCY CO-ORDINATION CENTRE: Seccion de Seguridad, Busqueda y Salvamento Maritimo. Telex: 31154. Tel: (02) 513395, 512156.

STORING: See "Prelims" page.

1. Vessel can be stored by truck.
2. No need for barge storing while ship is alongside.
3. Trucks can proceed to the berth gate only. Distance from gate to ships berth 200 ft.
4. Fork lift trucks cannot be permitted inside the berth while the ship is either deballasting or loading.
   No fork lift trucks whatsoever permitted alongside LPG ships.
5. No Customs regulations in force regarding storing.
6. Local riggers can be employed to assist with storing through ship's local Agent.

SURVEYORS: 1. Saybolt, Caleb Brett, Chass Martin, Aivepet cargo inspectors available at the Terminal Office.

2. Lloyd's Register, American Bureau, Bureau Veritas, P & I available locally or from Caracas via the ship's agent.

TELEPHONES: There is a telephone booth on each dock. The supervisor on duty may be contacted by calling number 308 or 906.

SHIPMASTER'S REPORT: February 1979.

Documents:

3 Copies of list of passengers or nil passengers.

3 copies of a letter by Master stating that vessel was diverted after sailing from previous port and explaining why clearance destination is wrong.

3 copies of cable ordering diversion.

Anchorages: Good holding ground in N.W. part of anchorage area, thick mud.

Restrictions: Maximum height of manifold about 18.95 m. so necessary for vessels of 140,000 d.w.t. to load some cargo before completion of ballast.

Max. Size: If draft less than 30 ft. on arrival vessel can approach berth direct from West, and use 2 tugs. If more than 30 ft. draft then vessel must use channel to the North of berth and use 3 or 4 tugs. This for vessels of 140,000 d.w.t.

VHF: Tankers call "Meneven" on Channel 16, then change to Channel 12 or 13. Also call Agents on Channel 16.

Berthing: Back springs to bollards on jetty. Breasts and heads and stern lines to hooks on dolphins. These hooks are secured to bollards by wire of circumference 19 cm. or diameter 6 cm.

Consuls: No U.S. Consul available and Agents will give Master letter to this effect for U.S. Immigration.

General: Ballast, if clean, may be pumped overside. If dirty, advise Meneven prior to arrival of quantities to be pumped ashore. They will also accept slops if not sour crude or smelling too badly.

Notice to Shipmasters:

We wish to advise the Masters of all vessels calling at this port that it is strictly prohibited to take photographs.

It is likewise contrary to regulations to carry ashore a camera. Same is liable to be confiscated by the Government Authorities.

Signed S. A. Meneven.

AUTHORITY: Capitan de Puerto, Capitania de Puerto, Guanta, Puerto La Cruz. *Tel:* 081-660534, 081-660367. *Telex:* Capipuerto 81386.

AGENCY:

All incoming ships to lift cargoes at this Terminal must have a local Agent to render all services required for a prompt and efficient tanker turnaround and to cancel all ships disbursements during the port stay.

S.A. Meneven as operator of the Terminal charges a fixed fee for General Services such as supervising the docking and undocking manoeuvres, hose connections, loading and documents required by the cargo buyers or consignee. Handling of Telexes, documents and air postage will be charged at cost.

Offices of Meneven loading and marine personnel are located on the first floor of the building between berths Nos. 1 and 2. Any matter concerning loading, bunkering, is handled through this office, which is open 24 hours of every day. On the ground floor of this same building is located the Documentation Section.

PUERTO SUCRE (Cumana): 10.28 N. 64.12 W.

(See Plan Book)

SHIPMASTER'S REPORT: August 1980.

DOCUMENTS: As for Guanta. Entry formalities, normally after berthing but if at anchor will board about 0900 hrs.

PILOTAGE: Pilotage is compulsory for berthing and unberthing. Pilot will anchor vessel if required.

APPROACHES: Approaching Puerto Sucre at night, the lights of the city are visible for many miles, but the light indicated at the end of the pier is non-existent, also the water tower marked on the chart with red lights is non-existent.

Two vessels were alongside when this vessel approached so the pier was clearly visible with the lights of the ships, otherwise there are no lights on the pier.

The pier indicated on the chart just North of the main pier is no longer there although at low water parts of the supports are still visible. Further North there are 3 piers, approximately half cable long, used by fishing boats. They start approximately 1 cable North and 1 cable between each, also there are car ferry terminals before the mouth of the river South of Pta. Carenero. This river mouth is undergoing extensive work which is apparently to be a fishing harbour.

A tall white building is situated in approximate position Lat. 10° 27.8′ N., Long. 64° 11.1′ W., it has a fixed red light and an occulting red light at night. A silo is situated in approximate position Lat. 10° 26.7′ N., Long. 64° 11.25′ W., this has 3 red lights in a horizontal line at night. There is an air light on the control tower at the airport, alternating white and green every 5 seconds, but this is only lit when an aircraft is due.

ANCHORAGE: Anchorage is limited in pilotage area "A". This vessel anchored 3 cables off the shore line and 3 cables off the pier in 30 fathoms of water, vessels also anchor 2.5 to 3 miles S.W. of pier in 25 fathoms, however Pilots prefer vessels to use nearer anchorage.

VHF: Pilots occasionally on Channel 16, but very little English spoken, the ship's chandler has a VHF set and can be very helpful as he speaks very good English.

TUGS: One tug is available to assist with berthing/unberthing.

BERTHING: Vessels use both sides of the pier and ro-ro vessels tie up stern to the head of the pier. Soundings were taken around the pier (See Plan).

CARGO HANDLING FACILITIES: There are numerous fork lift trucks of all sizes, 4 mobile cranes and some small towing vehicles. This vessel had a cargo of bagged fertiliser which was discharged onto lorries and there was no shortage of these, even when working 2 ships with 10 gangs no delays were caused due to lack of transport. Ship's gear is used at all times but the mobile cranes can be hired if required.

MEDICAL: Services available.

FRESH WATER: Available using ship's hoses.

FUEL: Diesel oil is available but difficult to obtain as it has to be brought from Puerto la Cruz by road tankers.

WATCHMEN: Not available, one member of National Guard on board, requires a cabin if one available. This vessel had no spare accommodation but the guard must still be fed.

SHORE LEAVE: Permitted, but shore passes must be carried and passes returned when vessel leaves.

GENERAL: *Provisions and Laundry:* Available.

Garbage Disposal: No facilities.

PUNTA CARDON: 11.38 N. 70.14 W.

OPERATORS: Maraven, S.A.

PORT LIMITS: The area enclosed by the parallels of Lat. 11° 38′ 00″ N. and Lat. 11° 36′ 38″ N. and the meridian of Long. 70° 14′ 25″ W.

FLAG: It is compulsory to display the Venezuelan flag at the foremast starboard yardarm during daylight hours for ships anchored or berthed in Venezuelan waters. The ship's Services will provide a Venezuelan flag at any time for ship's account.

LOCATION: The port of Punta Cardon is located on the Gulf of Venezuela, on S.W. coast of Paraguana Peninsula, Venezuela. Punta Cardon is an open sea port with practically no swell, due to the Easterly winds prevailing almost all year from the shore side.

ESSENTIAL REQUIREMENTS:

1. Incoming vessels must send ETA at least 3 days before arrival at Punta Cardon.

2. If a ship, originally cleared for another port (including any other Venezuelan port) is diverted at sea to Punta Cardon, certain information must be radioed prior to arrival in order to avoid heavy fine(s) and/or delays.

3. No dirty ballast may be pumped overside in port in Venezuelan coastal waters. Ballast disposal facilities are available at Punta Cardon Terminal.

4. The use of Venezuelan Government Pilots is compulsory for berthing and unberthing.

5. In addition to other clearance documents, 5 copies of an itemised list of articles in the ship's slop chest must be presented to the authorities on arrival.

6. The emergency fire signal is 5 long blasts on the ship's whistle or siren. No other signal is to be given in cases of emergency.

7. Rat-guards must be placed on all mooring lines.

DOCUMENTS: Clearance (inward pratique). Inward clearance is effected on board by Government Port and Customs Officials and a representative of the Oil Movements Department immediately after berthing. The following documents must be ready on arrival:

(1) In ballast:
- *(a)* Clearance from Last Port (1 copy).
- *(b)* Ballast Manifest from Last Port (1 copy).
- *(c)* Crew List (7 copies).
- *(d)* Steward's Store List (all foodstuff, liquors, tobacco, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(e)* Deck and Engine Stores and Spare Parts List (paints, varnishes, chains, ropes, etc.), to be declared on a separate and independent sheet (5 copies, see note (2)).
- *(f)* Medicine Chest Lists (including narcotics accurately itemised) (5 copies).
- *(g)* Slop Chest Lists (5 copies).
- *(h)* Personal Effects Lists (4 copies).
- *(i)* Sailing Permit (issued by Maritime Authority at Last Port of call) (1 copy).
- *(j)* Passenger and Baggage Lists (if any) (2 copies).
- *(k)* List of Passengers in transit (if any) (4 copies).

(2) Both the Steward's Store List, the Deck and Engine Stores and Spare Parts List may be prepared on board prior to the vessel's arrival. The Steward's Stores List must be comprehensive and accurate, especially with regard to cigarettes and liquor. All new clothing, gifts, souvenirs, etc. are to be clearly marked. All personal effects of the crew are to be collected and placed in the Bonded Stores Locker, ready for sealing by the Customs Authorities on arrival.

Although vessels proceed directly to Punta Cardon, clearance documents should be made out showing the port as "Las Piedras, Paraguana (Punta Cardon)". Failure to comply with this requirement may result in fines up to a max. of U.S. $600.00.

(3) Clearance documents out-bound: Outward clearance and cargo documents are delivered on board by the Ship's Services Representative.

In the event that the berth is required by another vessel, a vessel having completed loading may be required to vacate the berth promptly and proceed to anchorage to await cargo documents and clearance.

PILOTAGE: Pilots are employees of Venezuelan Government and pilotage is compulsory for vessels entering or leaving harbour. The Ship's Services Office will arrange for this service at any time. If it becomes necessary for Master of the vessel to disregard Pilot's orders in order to ensure safety to the ship, the Master must promptly submit a written report to the Harbour Master on the matter, via the Ship's Services Representative, stating reason for this action.

Pilots sustaining injuries: It is compulsory to submit a full report in cases where a Pilot is injured while performing duties on board vessels.

ANCHORAGE: The anchorage at Cardon roads within a radius of 2 miles from end of jetties has depths varying from 54 ft. to 100 ft. (LWS) and a bottom consisting of mud with some patches of small stones, sand and shells. There are no known obstructions from West to N.W. of the Piers and there is ample water for a clear approach when coming from West and N.W., but the anchorage is limited on the South by a sandspit projecting 1 mile S.W. off Punta Cardon Cape. A beacon is located on this Sandspit in position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W. Fl.R. ev. 1 sec. 17 ft. 5 miles (U).

APPROACHES: Restricted Fishing Area. Masters when approaching coast should keep a particularly sharp lookout for fishing boats, nets and small craft.

Mechanically propelled vessels drawing more than 5 ft. are prohibited from navigating in the restricted fishing area that extends off Paraguana Peninsular from Punta Macolla, Lat. 12° 05′ 32″ N., Long. 70° 12′ 55″ W. to Punta Estanques (Los Taques), Lat. 11° 48′ 45″ N., Long. 70° 16′ 45″ W., and a line connecting the position indicated below:
- *(a)* Lat. 12° 07′ 40″ N., Long. 70° 14′ 25″ W.
- *(b)* Lat. 12° 03′ 15″ N., Long. 70° 19′ 23″ W.
- *(c)* Lat. 11° 49′ 25″ N., Long. 70° 21′ 50″ W.

Leading Lines

	Position			*Height in Metres*
Jetty	*Latitude* N.	*Longitude* W.	*Colour*	*(LWS)*
I	11° 37′ 19.2″	70° 13′ 54.6″	Green	4.70
	11° 37′ 23.1″	70° 13′ 47.6″	Green	14.20

Land Marks

2 radio towers, very conspicuous, with micro-wave antenna at the middle painted in aluminium white, in position, Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W. Height 205 ft. (62.5 m.).

Navigation aids

A light is located on the outer radio tower.

Position: Lat. 11° 38′ 03″ N., Long. 70° 13′ 56.2″ W.

Characteristics: Fl. White and Red, ev. 10 sec. Height 205 ft. (62.5 m.) 21 miles (U).

Sectors: Red 340° – 009°, White 009° – 202°, Eclipsed 202° – 340°. (All bearings are true from seaward).

Beacon: Located on sandspit of Punta Cardon.

Position: Lat. 11° 36′ 03.4″ N., Long. 70° 14′ 15.6″ W.

Characteristics: Fl. Red. ev. 1 sec. Height 17 ft. (5.2 m.) 5 miles (U).

2 large chimneys are very conspicuous in the Refinery Area. The North chimney is situated Lat. 11° 37′ 54.6″ N., Long. 70° 13′ 10.8″ W. Height above MLWS 399.6 ft. (121.8 m). The South chimney is situated Lat. 11° 37′ 52.9″ N., Long. 70° 13′ 09.8″ W. Height above MLWS 396.3 ft. (120.8 m.). For daylight distinguishing marks, both are painted with broad red and white bands and at night both have a string of all round fixed red lights at the top and the same at the middle height.

A steel tower. A commercial radio tower is situated outside the Refinery Area in position: Lat. 11° 36′ 29″ N., Long. 70° 13′ 42″ W. Height above MLWS 164.7 ft. (50.2 m.). This is not very visible during the day, but at night it has at the top, flashing every second, an all round Red Light, visible at 12 miles.

MAX. SIZE:

	Jetty/Berth		*Depth LWS*	*Draft*	*Length in feet*	*Displac. in tons*
No. 1	North Outer	(3)	42′ 00″	39′ 06″	710	25,000
	South Outer	(4)	42′ 06″	40′ 00″	710	25,000
	North Inner	(1)	31′ 06″	30′ 00″	575	25,000
	South Inner	(2)	32′ 06″	31′ 00″	575	25,000

TUGS: 2 tugs of 1,200 h.p. and 1,600 h.p. respectively are available, and their assistance is compulsory for berthing. Number, disposition and manoeuvres of tugboats are directed by the Pilot. The following tug signals in practice in this port are listed below for Master's guidance:

Short blasts are used to give orders to the tug situated ahead.

Long blasts are used to give orders to the tug situated aft.

1 blast means *push* tug engine, ahead (if it is stopped); *stop* tug engine, stop (if it is moving).

2 blasts, *pull* tug engine, astern.

1 long, 1 short, 1 long and 1 short whistle, "Calling tugs".

2 long and 2 short whistles, "Tugs Dismissed".

RADIO: Arrival messages (ETA). Master of vessels bound for or diverted to Cardon are requested to radio the following information to "Maraven. Caracas" via "La Guaira Radio", call sign YVG, 72 hours in advance of estimated arrival, or as soon as possible.
- *(a)* Name of vessel
- *(b)* Flag
- *(c)* ETA
- *(d)* Last Port.
- *(e)* Master's name
- *(f)* Number of crew and passengers
- *(g)* Port for which the vessel is cleared
- *(h)* Quantity of clean ballast on board
- *(i)* All requirements

This information is of the utmost importance to the Harbour Authorities in facilitating the entry of vessels in general, and in case of diversion.

VHF Radio Telephony. The radio and communication centre is located in the Oil Movements Office Building situated at the foot of No. 2 Pier at a height of 50 ft. above sea level. The roof of the building is painted black and the word "Marine" painted across in large white letters.

There is an RT set operating 24 hours a day on the following frequencies, and manned by English speaking operators:

156.6 MHz	FM	VHF	(Channel 12)	Range limit	25 miles
156.8 MHz	FM	VHF	(Channel 16)	,, ,,	25 ,,
2120 kHz	AM	HF		,, ,,	150 ,,
2182 kHz	AM	HF	(Channel 1)	,, ,,	150 ,,
7620 kHz	(SSB)	HF	(Channel 3)	,, ,,	300 ,,

Call sign: "Marine Cardon".

Vessels not equipped with radio telephone may call the installation by signal lamp (Aldis lamp) whereupon the service launch will be sent out to vessel to pick up any message it may have.

BERTHING: Without exception ships always moor head-in on all berths. It is considered prudent to have the outboard anchor hove out prior to approaching piers to facilitate speedy release while docking if necessary. Vessels are to be moored to satisfaction of the Port Services Superintendent or his deputy; mooring lines must be tended regularly and kept hove taut to prevent surging and possible damage to ships, docks or hoses. When adjusting mooring lines, the assistance of harbour tugs should be requested before slackening off any mooring line.

BALLAST: It is suggested that vessels nominated to load at this installation arrive with the minimum of ballast on board, necessary for the safe handling of the vessel under normal conditions. In this connection experience has shown that, under normal weather conditions, vessels can be safely berthed and unberthed with a quantity of ballast of approximately 20% of their respective Summer deadweights. Clean ballast can be pumped into the sea, but Masters are reminded that pollution of the sea incurs heavy fines. Dirty ballast can be received ashore. Maximum discharge pressure to shore installation is 150 p.s.i. in the 20 in. ballast line of Jetty No. 2; Jetties Nos. 4 and 1 have a 24 in. ballast line, and Jetty No. 3 has a 16 in. line. Masters are requested to endeavour to arrive at this port with 20% SDW ballast.

MEDICAL: Facilities are available for medical and dental treatment, vaccination and hospitalisation in a private clinic.

The doctor's working hours for out-patient treatment are as follows: Monday to Friday, 0900 to 1100 hrs., 1400 to 1700 hrs. Saturdays, Sundays and holidays, only urgent cases will be attended to.

Emergency cases will be attended to at all times.

Masters requiring medical or dental service or vaccination for their crew members should call Ship's Services by dialling 2105. Our representative will make the necessary arrangements with the clinic and arrange for transportation to pick up the crew members on the pier and to take them to the clinic and back. Any crew member who is sent ashore for medical or dental treatment, and who does not speak English or Spanish, must be accompanied by a crew member who speaks one of these languages.

Doctors do not attend patients on board. In serious cases where the patient is unable to walk an ambulance will be provided to take him to the hospital.

FRESH WATER: Fresh water is available at all berths. Loading rate is 30 t.p.h.

FUEL: Available if advance notice given. Funds at to be remitted to Chase Manhattan Bank, One Chase Manhattan Plaza, New York, 24 hours in advance to Maraven S.A. (Account No. 001-1-992773).

CUSTOMS: Venezuelan National Guards are stationed at the piers to ensure that vessels in port comply with regulations.

1. *Smuggling.* Strict compliance with the Customs laws of the country is enforced by the Authorities and Masters are strongly advised to caution crew members against attempting to smuggle ashore cigarettes in carton lots, cigars, tobacco, souvenirs, gifts (particularly items of women's apparel) or other articles. A maximum of twenty cigarettes per person for personal use is allowed to be carried but a greater quantity will result in the imprisonment of the offender with possible heavy fines and delay to the vessel.

2. *Bar.* On Customs Authorities instructions vessels maintaining a "Bar Service" on board for the use of officers, crew, passengers and visitors, must keep the bar closed during the vessel's stay in port.

3. *Firearms.* Firearms on board any merchant vessel calling at Venezuelan ports must not exceed one per officer, nor can the ammunition exceed 18 cartridges per officer. All firearms and ammunition must be declared on stores list. Officers must not carry firearms while ship is in Venezuelan waters. Said arms should be collected together with the ammunition and held in the Master's safe custody. Crew members should be warned against taking knives or other weapons ashore as these will be confiscated and the bearer fined.

CONSULS: Brazil, Great Britain, Italy, Netherlands and Norway have Consular representatives in this area.

TIME: Local time is GMT minus 4 hours.

CERTIFICATES: All ships arriving in Venezuelan ports for the first time must be measured by the Maritime Authorities for issuance of a Venezuelan Tonnage Certificate, known as "Certificado de Arqueo". This document gives the measurements and weight of the vessel in accordance with existing laws. The cost of measuring and issuing of the Certificate is contingent on size and tonnage of vessel.

It is usual practice to take ashore the ship's "General Arrangement" and "Capacity" plans, which are used as a basis for calculations. These plans and the Venezuelan Tonnage Certificate are later forwarded to ship's Owners.

Vessels registered in following countries are exempt from above regulations, due to existing reciprocal agreement with Venezuela: U.S.A., Great Britain, Denmark, France, Germany, Netherlands, Ireland, Sweden, Norway, Portugal.

The Venezuelan Tonnage Certificate is used in calculating Venezuelan Government Port charges, such as Port Captain Habilitation for entry and despatch of vessels and Pilotage Dues, for all vessels except those registered in the countries mentioned above, in which case the Lloyd's Registered Tonnage is used.

HOLIDAYS: By order of the local Port Authorities it is requested that all ships in port be fully dressed on the following national holidays: January 1st, April 19th, July 5th, July 24th, October 12th, December 25th.

REPAIRS: Shore facilities are available for emergency repairs of a minor nature. The nearest dry docks are located at Puerto Cabello and Curacao, N.A. Request for repairs should be mentioned in the ship's ETA message.

SHORE LEAVE: Shore leave is permitted and Harbour Master's representative who boards vessel on arrival issues the required number of shore passes. These passes must be shown when proceeding ashore to the Government and Company Guards at the gangway and refinery gates. They are to be collected by Master prior to sailing and handed to Pilot unberthing the vessel. Masters are reminded that in accordance with the instructions of local police, crew members be properly dressed before leaving the vessel, i.e. long trousers and shirts.

Masters are requested to have shore leave expire at least 2 hours before expected departure. Men then found missing should be reported to the Ship's Services Office, tel. 2105, who will endeavour to locate them. An officer must accompany shore personnel in order to identify the missing crew member.

Vessels are not permitted to sail until all crew members are on board, unless said crew members are hospitalised or previously signed off by the Master through the Ship's Services representative. If any crew member is missing at sailing time and cannot be found, his passport and other personal documents must be handed to the Ship's Service representative, as well as written instructions as to his repatriation, when found. All costs and expenses of a crew member so left behind will be for ship's account.

GENERAL:

1. *Animals:* The importation and transit of all birds belonging to the genus parrot or parakeet is prohibited. For other birds a valid health certificate is required. For so-called "small animals" e.g. dogs, cats, monkeys, rabbits, etc. a valid health certificate and a valid rabies vaccination certificate are required.

2. *Bonded Stores:* Stores in bond are not obtainable in Punta Cardon. The nearest port with bonded stores facilities is Curacao.

3. *Board of Trade Gangway:* A safe gangway must be provided by the vessel and should be rigged as soon as possible after mooring to allow the Port Authorities to board, and should not be taken in until Pilot has boarded to unmoor vessel. The use of rung ladders, pilot ladders, etc. is contrary to Port Regulations and Port Authorities will not board except by means of a safe gangway or accommodation ladder.

4. *Damage during Manoeuvres:* When a vessel or the pier sustains damage during manoeuvres with an official Pilot on board, it is the responsibility of the Master to submit to the Ship's Services representatives, immediately after the accident, a report in quintuplicate, for presentation to the Harbour Master. Such reports should give full details of the accident and of all engine movements as ordered by the Pilot, as well as a sketch in triplicate of the ship's manoeuvring position at the time. These will be translated by the Agents into Spanish and forwarded to the Harbour Master.

5. *Cash Advance to Masters:* Cash advances to Masters are made only in Venezuelan currency, which is the Bolivar. Cash requirements should be included in the vessel's ETA message. Foreign currencies are accepted in the United Seamen's Service Club.

6. *Rat-guards:* By order of the Port Authorities rat-guards must be fitted to all mooring lines. Non compliance entails a fine of 200 Bolivares for each unguarded line.

7. *Kerosene, Motor Gasoline, Gas-Oil, Solvents:* Supplies for ship's purposes are available in drums. The return of empty drums ashore is prohibited by Customs regulations. Therefore the cost of each drum will be billed to the vessel in the Port Disbursement Account.

8. *Lubricants, Oils and Greases:* Supplies of products are available. Vessels arriving at Punta Cardon on Saturday or Sunday or on a holiday should give ample notice of their requirements by cable in order that the necessary labour arrangements for delivery can be made. This procedure also applies to the delivery of white oils mentioned under 7 above, when required outside working days.

9. *Laundry Service:* Laundry service is available throughout each working day. Such service should be requested in the vessel's ETA message.

10. *Wireless Transmitters in Port:* It is strictly prohibited to use vessel's wireless transmitters in the Port of Cardon. Non-compliance with this regulation may result in a fine being imposed on the vessel by the authorities.

11. *Mail:* On vessels' arrival, blank Mail List Forms will be handed to the Master to be completed in sextuplicate and duly signed by him, when sending ship's and crew mail ashore for posting. Ship's mail received after ship has sailed, or for vessels on which no advice has been received, will be held for 15 days and then returned by airmail to the owners or operators or senders, at ship's expense unless specific instructions have been received beforehand.

12. *Marine Surveyors:* Both the Lloyd's Agents at Maracaibo and Norske Veritas at Caracas have a representative in Punta Cardon who acts on their behalf when a surveyor is requested. However, in the case of continuous or classification surveys, advance notice of 4 days should be given in order to arrange for an appointed surveyor to come from Caracas. There is also a representative of the American Bureau of Shipping in this area (Caracas).

13. *Miramar Club:* Masters, chief engineers and their wives can visit the Miramar Club. For this purpose entrance passes should be requested from the Ship's Services Office, tel. 2105.

14. *Manaure Bathing Beach:* The above mentioned bathing beach is open to all ship's staff and crew members.

15. *Norwegian Government Seamen Service:* A Norwegian Vice Consul and Welfare Officer is stationed at Punta Cardon, and provides the usual services to seamen of this nationality. His telephone number is 4359.

16. *Navigation Charts:* Navigation charts are not available at this port.

17. *Passengers:* Movement of passengers over Cardon Piers is subject to restriction under terms of agreement with the government. Passengers will not be permitted to disembark unless in possession of the required Venezuelan visa and travel documents. If passengers are carried, Master should so advise in his radio ETA so that arrangements can be made for Immigration Authorities to visit vessel on arrival and thus facilitate clearance.

18. *Petroleum Inspection:* Charles Martin & Co., and E. W. Saybolt, petroleum inspectors, are available in this area. Contact can be made through the Loading Supervisor (tel. 2821).

19. *Personnel – Seamen Left Ashore:* In the case of seamen left ashore for hospitalisation, repatriation, desertion or other reasons, all documents and personal effects are to be handed to the Oil Movement Department's representative before sailing. A letter is required from the Master advising the maximum advances, if any, to be made to the seaman, and instructions concerning his repatriation. All expenses incurred by seamen left ashore, including cost of repatriation, are for ship's account. It is important that Masters bear in mind that the Venezuelan law will at all times hold the vessel, her Master, or Owner responsible for any seaman left behind in Venezuela.

20. *Photographing:* The taking of photographs within the boundary fence of the Cardon Refinery is prohibited. Taking cameras ashore is likewise prohibited.

21. *Provision and Stores:* Provisions and stores are available. Requisitions should be conducted through the Ship's Services Office. Telephone number 2105 or the Ship's Services representative when he calls on board with the authorities on arrival. Ships' chandlers are not permitted to visit ships, unless specifically instructed to do so by the Agents.

22. *Radar and Radio Repairs:* Repair and maintenance services for radar, radio, gyro compass, radio direction finder, echo sounder, etc. are available. The repair man should be contacted through the Ship's Services Office, telephone number 2105.

23. *Safety of Personnel:* It will be appreciated that persons intoxicated by alcoholic drinks can create risks of accidents; therefore we ask the Master's co-operation to ensure that these persons do not enter the refinery gates and/or board their vessel unless accompanied by sober members of their crew. In this connection we will advise the Master or one of his officers, so that measures can be taken to ensure the safety of the forementioned person(s) e.g. by sending one or more of the crew to the gate to accompany him (or them) to the ship.

24. *Visitors:* Visits to ships are prohibited except from those company employees, petroleum inspectors, etc., whose duties require their presence on board.

25. *Walport Film Exchange:* Subscribers to the Walport service may exchange films at the U.S. Seamen's Club situated at the foot of No. 2 Pier, from 0730 to 2200 hrs. every day, by telephoning 2803.

26. *Staff and Crew Changes:* No staff and/or crew should be engaged or discharged without consulting Ship's Services (telephone 2105). In case of discharge, identification documents must be handed to the Ship's Services representative or the Norwegian Consular Officer in the case of Norwegian vessels.

27. *Tank Cleaning and Mopping:* Several contractors in the area provide labour for tank cleaning and mopping. Masters in need of this service should submit their requirements to the Ship's Services Office (telephone 2105), who will contact and request a contractor to go on board to discuss details and estimate costs of work to be effected. It must be pointed out that the Master of the vessel is solely responsible for the proper fitness of the ship's tanks for loading his next cargo, and will therefore be held liable for any contamination of the cargo after loading, due to inadequate tank cleaning. Therefore it is up to him to decide the degree of tank cleaning necessary. He may, of course, seek advice from the installation representative in this respect, whenever there is any doubt.

28. *Turnaround:* To promote the economical operation of their vessel, Masters are requested to co-operate with installation representatives in minimising their in-port time. Any delays which are considered unnecessary or extensive should be reported to the loading Supervisor (tel. 2133) so that corrective measures can be taken.

29. *U.S.S. Club:* All seamen are welcome to the club operated by United Seamen's Service which is located at the shore end of Pier No. 2. Shore passes are required to reach this Club. Beer, soft drinks, ice-cream, candies and various souvenirs and presents can be purchased at reasonable prices. Free cinema shows are usually held twice weekly. A letter-posting service is available as well as recreational facilities, e.g. billiards, table tennis, darts, etc. A barber shop operates during daytime.

TELEPHONES:

Communications Office (General and Port Information, 24 hours service), 2604. Ship's Service Office (All services to ships: mail, doctor, taxi, papers, etc., 24 hours service), 2105. Agents' Office (Weekdays) (0700 to 1200 – 1300 to 1600 hrs.), 2125. Loading Supervisor (Re cargo and bunkers), day, 0700 to 1600 hrs., 2821/2133; at night, after 1600 hrs., 2133. U.S.S. Seamen's Club, 2803.

AUTHORITY: Maraven, S.A.

NOTES

Please also advise Shipping Guides Ltd.

Vietnam, Socialist Republic of

BEN THUY: 18.39 N. 105.42 E.

SHIPMASTER'S REPORT: July 1982.

LOCATION: 10 miles upstream from the entrance of the Song Ca river. Vessels exceeding 4.5 m. draft discharge cargo at anchor off the entrance to the river into self propelled barges which transport the cargo to Ben Thuy.

PILOTAGE/ANCHORAGE: Vessels anchor in position Lat. 18° 47′ N., Long. 105° 47′ E. 1.5 miles S.E. of Hon Niem Island in 14 m., soft grey mud and sand. Pilot and officials board at this position. After clearance granted vessel shifts to discharge anchorage in position Lat. 18° 49′ N., Long. 105° 45′ E. 1 mile N.W. of Hon Niem Island in 10 m. This anchorage was approached by rounding Hon Niem Island to the Eastward, not less than 0.5 miles off, there is a dangerous rock awash at LW in position Lat. 18° 50.7′ N., Long. 105° 46′ E. It is prudent to approach the port in daylight due to the large amount of unlit fishing craft in the vicinity.

DOCUMENTS/OFFICIALS:

Officials boarding with Pilot on arrival:

3 Security Officers.
2 Customs Officers.
2 Immigration Officers.
2 Quarantine Inspectors.
1 Agricultural Inspector.
1 Agent.
1 Harbour Master.

To be accommodated and victualled during stay of vessel in port:

3 Security Officers.
2 Customs Officers.
1 Agent.

Agent is the only person who speaks/understands a limited amount of English.

Documents required:

6 Crew Lists.
2 Store Lists (deck, engine and cabin).
1 Health Declaration.
2 Stores Lists (provisions).
2 Crew Customs Declaration Lists.
2 Currency Lists (foreign monies in crew's possession).
2 Bonded Stores Lists.
4 copies Cargo Manifests.
4 copies of Bills of Lading.
2 Cargo Stowage Plans.
3 Forms (supplied) for Sextants, Binoculars, Cameras, etc.
3 Forms (supplied) for Arrival details and times.
1 Form (supplied) Report concerning where water taken during the voyage, drinking and ballast in tons and tank being used at present for drinking water.

Certificates of Registry, Radio, Load Line, Safety Equipment and Derat sighted also Clearance from last port.

All Passports/Seamen's Identity cards collected and taken ashore, require to see each crew member and compare with passport photo. Discharge Books were not required. All Vaccination Certificates sighted and returned. Inspection of all crew cabins and each crew member's foreign money counted at the same time.

RESTRICTIONS: Main switch for Radio Transmitter/Receiver sealed.

All Cameras sealed. Bond and beer lockers sealed. (Release of bonded stores available at any time from Customs Officers on board).

GENERAL: There is no Radio or VHF contact with Ben Thuy. ETA/Health messages, etc, via Haiphong Radio XVG to VOSA Haiphong.

No fresh water or oil fuels are available at the anchorages off Ben Thuy.

Limited quantities of fruit and vegetables are available when in season.

There are no facilities for sending or receiving mail.

Draft survey is carried out at commencement and completion of cargo, 3 surveyors attend from Hanoi, a journey of approximately 10 hours by road.

Bulk cargoes are discharged by ship's gear using shore grabs (which are in poor condition) each grab capacity approximately 1.5 tons (bulk wheat) also burlap savealls, sewn on to cargo nets are used.

Cargo loaded into self propelled barges, each carrying 40/50 tons bulk grain, approximately 20 barges are available when none are under repair, which is quite frequent, journey to discharge wharf takes 3 hours, 6 hours to discharge and 3 hours to return to the ship.

Stevedores work two shifts 0600 – 1800 hrs. and 1800 – 0600 hrs. with one meal interval between 1130 – 1230 hrs.

1 gang's average discharge per day (24 hours) 250/350 tons.

DANANG: (Tourane): 16.04 N. 108.13 E.

(See Plan Book)

SHIPMASTER'S REPORT: 1976.

DOCUMENTS: On arrival usually dealt with immediately by the Immigration Service, Police Service, Customs Service, Agency and Health Service.

Ship's Documents: Certificate of Registry, Radio Certificate, Load Line Certificate, Safety Equipment Certificate, Port Clearance from last port.

Cargo Documents: Bill of Lading (8 copies), Cargo Manifest (8 copies), Stowage Plan (5 copies), In Transit Cargo Manifest (if any).

Immigration: Crew List (7 copies), Store List (7 copies), Crew's Effect Declaration (2 copies), Passports of the Crew.

Health: Vaccination List (2 copies), Provision List (2 copies), International Vaccination Certificates.

All documents to be ready on arrival. Cameras and binoculars to be collected and placed in a locker, to be sealed. Bonded stores not sealed.

PILOTAGE: Pilot station at a position Lat. 16° 10′ N., Long. 108° 11′ E. Pilot boards from a tugboat and moves the ship to a position about 1 mile West of Phare de l'observatoire. Pilot boarding during daytime only. Ships arriving at night should anchor in a position close to the pilot station. Pilot will board the ship at 0600 hrs. in the morning. ETA should be given 48 hours and 24 hours prior to arrival at the pilot station.

RESTRICTIONS: There are no restrictions for entering the bay.

HEALTH: A 24 hours cable should be sent to the Agent, stating that all crew are fit and healthy. If any sickness on board cable 48 hours in advance.

RADIO:

Callsign	*Frequency*	*Working hours GMT*
XVT	500 kHz	0001 – 1200 hrs.
XVT 2	417.5 kHz	0001 – 1200 hrs.
XVT 2	8,570 kHz	0130 – 0145 hrs.
		0830 – 0845 hrs.
		1200 – 1315 hrs.

VHF: There is no VHF station.

RADAR: There is no radar post.

TUGS: There are 3 tugboats available, 1×1,200 h.p., 2×800 h.p. each. Tug's lines are used if necessary.

BERTHING: There is one finger pier of 250 m. and another under construction. The latter to be ready towards the end of 1976. A tanker berth is situated in position Lat. 16° 04′ N., Long. 108° 15′ E. called My Khe. Tankers proceed to this position, after clearance, with Pilot rounding by the peninsula. (See Plan). At the cargo pier all discharging is done by ship's gear.

CRANES: There are no cranes available. There is 1 heavy lift floating crane of 100 tons capacity.

BULK HANDLING FACILITIES: Bulk cargoes are sometimes handled at the port (i.e. maize) but there are no special facilities.

BRIDGES: No bridges.

STEVEDORES: Ordered by the Agent. No ETA necessary. Working hours 0001 – 0400 hrs., 0800 – 2400 hrs. Approx. discharging rate general cargo 400 tons/gang.

MEDICAL: Six hours' notice required for medical assistance. There is a hospital in town. Inoculations required for cholera, smallpox and yellow fever.

TANKERS: Two submarine hoses of 8 in., all kinds of white spirits discharged through both lines. Maximum back pressure 8 kg. at ship's manifold. Average discharging rate 200 t.p.h. per line.

DENSITY: Cargo pier brackish depending on the season. At the tanker berth salt.

FRESH WATER: Available by barge, rate of delivery 50 t.p.h.

REPAIRS: Repairs taking longer than 2 hours are not permitted unless permission is granted by the Port Master. Small repair facilities can be carried out ashore. There are no drydocks at this port.

DECK WATCHMEN: Cargo ships alongside the pier are provided with a gangway watch. Tankers discharging at My Khe will have two security guards on board during the stay in port.

HATCHES: Old type hatches opened and closed by shore labour. Special patent hatches by crew.

CUSTOMS ALLOWANCES: The bonded stores are not sealed. There are no restrictions for quantity of spirits, cigarettes, beer, etc. It is strictly prohibited to supply any bonded stores to shore personnel.

CARGO GEAR: There is 1 floating heavy lift crane of 100 tons.

REPATRIATION: Possible, but takes some time and can be very difficult. Haiphong is a better place for crew changes.

AIRPORT: There is an airport about 7 km. from the town. Air services to Ho Chi Min City and Haiphong, local flights only, twice a week.

TIME: GMT plus 7 hours (no Summertime) is kept along the whole coast.

HOLIDAYS: There are no special holidays.

POLICE/AMBULANCE/FIRE: Via local Agent, telephone number 21161.

SERVICES: There are laundry facilities (2 days ashore) with a 24 hour service. Shipchandler available at all times. Good fresh vegetables and fruits, depending on the season. Also good sea food.

SHORE LEAVE: Permitted via local Agent with 6 hours' notice. Persons with invalid passport are not allowed to go ashore.

REGULATIONS: It is strictly prohibited to throw any garbage into the bay, heavy fines. Garbage collected by barge.

DELAYS: Remittance has to be granted by Owners or Charterers before sailing. Without a sufficient remittance the vessel does not receive a clearance.

Alongside the pier berthing and unberthing only between sunrise and 1400 hrs. due to strong winds in the afternoon. At any other time when strong winds are experienced berthing and unberthing not allowed. The fore mentioned also for the tanker berth at My Khe, here berthing is normally carried out during the morning hours, when there are weak winds. During a strong monsoon it is sometimes necessary to stop discharging operations and unberth the ship.

GENERAL: Ships calling for the first time at Danang port should give their ETA and call sign, nationality, all other necessary particulars so that the ship can be identified by the Navy. Ships, chartered by the Vietnamese Government should state this also and whether time or voyage charter. Ships carrying general cargo should also give all particulars about the stowage of the cargo, whether any deck cargo, heavy lifts etc.

AGENT: Ocean Shipping Agency, 1a Quang Trung, Danang. Cable: OSA Danang, telephone 21161.

SHIPMASTERS' REPORT: September 1980.

DOCUMENTS: See "General".

PILOTAGE: Compulsory. Pilot boards in position Lat. 16° 10′ N., Long. 108° 11′ E. Notice required 24 hours. Daylight only for berthing except in cases of emergency.

ANCHORAGE: In the Bay of Tourane; depth up to 19.0 m.

RESTRICTIONS: No restrictions in the bay and anchorage, depth of water up to 19.0 m.

RADIO: Danang Radio.

VHF: Pilot on Channel 16.

TUGS: Two tugs available; 1 of 1,200 h.p., the other being used for barge work only.

BERTHING: Location Lat. 16° 07.1′ N., Long. 108° 12.6′ E. Two piers available. Distance from sea to berth 4 miles. Max. size permissible: LOA 190 m., beam 26 m. and deepest draft 11 m. Least depth of water in channel from sea to berth 13.0 m. Mean tidal range at berth 0.5 m. Nature of bottom at berth – mud and sand. Average density 1016.

Cargo Handling Facilities: No bulk handling facilities or quay cranes available. There is a quarter ramp for Ro/Ro vessels and a 50 ton floating crane. Security is good as armed police are on duty throughout the vessel's stay. There is adequate storage space for break bulk and palletised cargoes. No container handling facilities. Stevedore gangs are available as required and work throughout 24 hours except for meal breaks.

BARGES: There are steel barges of various sizes which are towed by tugs.

SERVICES: The following are available: Fresh water; fresh provisions; minor repairs facilities; airport with internal flights only; laundry services; bunker fuel oil; diesel oil; lubricating oil; doctor and hospital; groceries and meats.

GENERAL:

Officials Boarding on Arrival with Pilots:

Two armed police who remain aboard during vessel's stay at anchor.

Officials Boarding when Vessel Anchored:

Agent and assistant.
1 Customs Officer.
1 Immigration Officer.
1 Agriculture Inspector.
2 Quarantine Inspectors.
2 Security Officers.

Documentation:

8 Crew Lists.
2 Stores Lists – Deck, Engine and Provisions.
2 Crew Customs Declaration Lists.
2 Currency Lists for foreign money in Crew's possession.
2 Bonded Stores Lists.
1 Health Declaration.
2 Crew Vaccination Lists.
All Vaccination Certificates.
4 Copies of Bills of Lading.
7 Copies of Cargo Manifest.
2 Copies of Cargo Manifest – Cargo in Transit.
1 Form (Supplied) for Ship's Sextants, Binoculars, Cameras, etc.
1 Form (Supplied) for Arrival Details and Times.
All discharge books (passports of Officers' wives collected for safe keeping ashore).

Restrictions:

Main and Emergency Transmitters sealed.
Stornos (Walkie Talkies) sealed.
Cameras sealed.
Bond sealed.
Inspection of all cabins on arrival.

General:

Vessel on 4 hours' notice at all times for sailing or shifting berth. Although bond sealed release of spirits available at any time from Customs.

Very strict on cigarettes with issue of only 200 per week per person. Shore passes issued to all personnel. Shore leave very restricted but bus service available to Seaman's Club nightly from 1800 – 2130 hrs. accompanied by a guard.

Maximum of 20 cigarettes per person for shore leave.

Seaman's Club takes sterling (£5 notes and above only) and U.S. dollars.

One sight seeing tour was to have been arranged this call but cancelled due to adverse weather conditions. (Limited number of cameras would have been available on this occasion).

Remittances from Owners take at least 1 month before any cash is made available.

One typoon warning received this call when vessel had to vacate berth and proceed to anchorage.

One emergency vacation of berth at 0300 hrs. this call when heavy swell built up alongside pier.

On departure full inspection of cabins and personnel, discharge books (passports of Officers' wives returned). Shore passes collected. No mail received this call due 1 month delivery time. No restriction on bond for coastal passage Danang to Haiphong.

HAIPHONG: 20.52 N. 106.41 E.

SHIPMASTER'S REPORT: 1976.

DOCUMENTS:

8 Crew Lists.
2 Ship's Stores Manifests.
2 Crew Personal Effects Declaration (especially: cameras, binoculars, and Foreign Currency).
2 Vaccination Lists: smallpox and cholera. All International Vaccination Certificates. All Passports (are taken into custody by Security Officials).

Special Documents: Special forms which are handed to vessel on arrival.

Health Dept:

1 Declaration of Health on arrival.
1 List of Provision Store (incl. vegetables, fruits, fish, shellfish, meats etc. and where taken).
1 Report of water taken on board: (Drinking — or Ballast water, tons, ports where taken) — tank now being used to supply drinking water.

State Security Dept.:

4 Copies List of Articles forbidden to be used in port: ie. radio transmitter/receiver — Numbers and power; radar; VHF; radio direction finder; echo sounder; sextant, signal gun, signal rockets, flare signals, arms, ammunitions, cameras, binoculars, tape recorders, band recorders.

Note: The radio transmitter, VHF, radar, binoculars, cameras are sealed.

2 Copies Declaration of Arrival.

Note: Cameras, binoculars of the crew have to be collected and placed in a locker which is sealed. Bond is *not* sealed, and consumption is free.

PILOT: Boards at Zero buoy.

Note: There is no VHF radio contact possible and there is no signal station available, ETA should be given as exact as possible.

RESTRICTIONS: Max. draft to enter: 25 ft. (HW).

If ship's draft is more than 25 ft. ship has to lighten into lighters. This is done in Baie d'Halong. The procedure is that after embarking the pilot at Zero buoy, the ship is brought to this bay (in daylight hours only) via: Bai de Lan Ha – Entree Profonde – Rade du Crapaud – Chenal du Volta – Chenal de la Cathedrale.

In our case we anchored in Chenal de la Cathedrale; Lat. 20° 52′ N. Long. 107° 03′ 06″ E. and discharged our gas oil cargo into tanker barges varying in size from 125 – 400 long tons. Some coastal tankers (1,500 – 2,000 long tons) are also available for accepting the cargo.

When discharging into lighters ship should provide suitable hoses.

GENERAL:

1. Ship was cleared by Authorities at this anchorage. In view of the distance to Haiphong – 5 hours by motorboat – this clearance is only given in daylight hours. Often the ship's Agent stays on board during cargo operations.

2. Because the radio transmitter is sealed, no direct contact with the outside world is possible. All messages for the Agents at Haiphong should be given to the lighters going there.

3. Medical assistance: A doctor and Hospital is available in Hongay – on the other side of the Baie d'Halong. The doctor inspects the patient first on board before permission to go ashore is given.

4. Outward clearance: Same procedure as inward clearance. Authorities come by motorboat from Haiphong (boat leaves there at about 0600 hrs. and arrives in Halong Bay at about 1100 hrs.). Passports are handed back to crew.

5. On inward as well as on outward clearing, crew has to stay in their cabins for inspection by Customs and security officials.

AGENT: Vietnam Ocean Shipping Agency, 11 Dai 1ô Tran Phu, Haiphong. Phone: 166-245-513. Telegrams: VOSA Haiphong.

SHIPMASTER'S REPORT: April 1979.

PILOTAGE: Boarding position: Lat. 20° 41′ N., Long. 106° 58′ E.

The pilot boat is a 25 m. long steel vessel with white hull and superstructure. A Vietmanese flag is printed on the white funnel.

The Pilot boarded without notice, also the Agent (VOSA) did not reply to any cables requesting information. Pilotage carried out during night time only in the Winter.

Two soldiers board with the Pilot and if vessel is to anchor for lightering the Pilot and soldiers remain onboard.

BUOYS: The marking of the channel by buoys is good, but for day time only. At night the lights are poor and vessels have to keep a good lookout for them.

CUSTOMS: Bond is sealed when the vessel is alongside. Very strict allowance for cigarettes.

SHIPMASTER'S REPORT: October 1980.

DOCUMENTS: See "Shipmaster's Report" for Danang dated September, 1980.

PILOTAGE: Compulsory. Pilot boards in position Lat. 20° 41′ N., Long. 106° 58′ E. 24 hours' notice required.

ANCHORAGE: The inner anchorage is between the outer bar and the channel cut, depth at LW 8 m.

RESTRICTIONS: It is not advisable to enter or leave during hours of darkness as there are only a limited number of lights and buoys.

MAX. SIZE: Max. LOA 200 m., beam 26 m., draft 7.5 m. Lightening facilities are available at Baie D'Halong for vessels with draft of up to 10 m.

HEALTH: Quarantine Authority require 24 hours' notice of arrival.

RADIO: Haiphong Radio handles vessel's traffic.

TUGS: Available. 1×600 h.p., 1×500 h.p.

VHF: The Agency (Vietnamese Ocean Shipping Agency – VOSA) on Channels 6 and 16. They will forward messages to the Pilot.

BERTHING: Berth situated in position Lat. 20° 52′ N., Long. 106° 43′ E. The berth was built in 1976 and is down river from the town berths. In all there are 12 berths available. Our berth was 18 miles from the entrance. Max. size acceptable at the berth, LOA 200 m., beam 26 m. and deepest draft 7.4 m.

Cargo Facilities: No bulk handling facilities; no cranes at this berth but some were sighted at the town berths; no Ro-Ro facilities visible. There is a floating crane with a capacity of 60 tons (approx.). Security is good as armed guards stay aboard the vessel throughout. No container facilities of any kind sighted. Labour works around the clock in 3 shifts.

BARGES: Wood and steel barges available, some have engines.

CONSULS: None, nearest are in Hanoi.

SERVICES: The following are available: Fresh water; fresh provisions (depending on time of year); minor repair facilities; airport; laundry service; diesel oil; lubricating oil; doctor and hospital; small amounts of groceries and meats.

GENERAL: Any vessel intending to remain at the port for a long period of time should have onboard sufficient stores and fresh water prior to arrival, as if vessel at anchor, stores and fresh water can take up to one week to arrive.

SHIPMASTER'S REPORT: November 1981.

PILOT STATION: The Pilot boards the vessel at the anchorage which is about 2 to 3 miles S.S.E. from Zero Buoy. Pilot boat is a metal boat about 20 m. length. The funnel is painted buff with a red stripe and a yellow star.

RESTRICTIONS: There are 2 mud banks up river. One after the buoyed channel and one after the ship-canal about 1.5 miles before the berths. River draft depends on the tide which varies from 6.4 m. to 7.2 m. at HW. Haiphong port draft about 6.9 m.

PILOTAGE: The channel from Zero Buoy to Haiphong has buoys but no lights visible and the buoys are often out of position. The channel is very narrow having few cm. bottom clearance. Pilots are good.

ANCHORAGE: For deeper draft than 6.9 m., ships are lightened at Halong Anchorage. Pilots, Security Officers and Customs Officer board at Zero Buoy and the vessel proceeds to the anchorage via Passe Henriette. Depths are 18 m. to 21 m. and good holding ground. The place is sheltered from all winds except North.

DOCUMENTS: 1 more copy of Crew List and Money Declaration necessary than stated in "Shipmaster's Report", September 1980 for Danang.

Also see "General".

SECURITY POLICE: At Halong Anchorage 2 security policemen remain on board, requesting accommodation and food.

AGENCY: During the vessel's lightening, Agent's clerk remains continuously on board requesting accommodation and food. Any communication with the Agency at Haiphong is done by telegram. Ship's transmitter is unsealed by Security Officer, message sent, and then resealed. Whilst alongside, Agent visits every day and they are quite efficient.

STEVEDORES: At Halong Anchorage, a barge with quarters for the stevedores comes alongside the vessel. Chief Stevedore is always available speaking efficient English. Discharging performed by vessel's derricks with shore grabs. Rate about 1,500 metric tons per day. At Haiphong berth discharging performed by shore cranes with a rate of about 1,800 – 2,000 metric tons per day. Haiphong port has a berth accommodating ten large ships. There are about 25 shore cranes from 10 to 15 tons capacity and we have seen 1 floating crane of about 200 tons.

SHIP CHANDLER: Fresh provisions are poor quality and only small quantities available. Low prices. Also ship chandler takes care of sick crew members for hospital and doctors.

SHORE LEAVE: From Halong Anchorage crew are not allowed to go ashore. At Haiphong berth shore leave allowed from 0700 – 2300 hrs. All foreign currency, rings, watches, must be declared at the gate.

REPATRIATION: Agent assures Master that repatriation is very easy, however the need of formalities and permissions will take a long time.

HEALTH: Quarantine doctor will revaccinate any crew member with expired certificate.

COMMUNICATIONS: VOSA Agency has VHF Channel 16 and it is possible to contact them from Zero Buoy. Communication with Owners is very slow and the cable needs 2 to 3 days to reach the destination. Crew mail requires more than 40 days to reach the vessel.

DENSITY: Halong anchorage 1020. Haiphong port 1000.

GENERAL: A lot of people visit the vessel claiming that they are Harbour Officers, Chief Stevedores, Receivers, Surveyors, Stevedores, Customs Officers, Security Officers.

IMPORTANT: Stevedore's barge which is alongside the vessel at Halong Anchorage is full of rats, which come on board via ladders and other ropes, with result that the vessel becomes infested with rats.

Ships must have on board, from their previous port of call, sufficient quantity of rat poison to kill them after sailing from Vietnam.

DEVELOPMENTS: *1st Phase:* Construction of graving dock (150 m. ×25 m.×6.3 m.) and 200 m. length berth with depth 6.5 m.

2nd Phase: Construction of Dry Dock (180 m.×30 m.×7 m.) and small piers length 100 m. and 150 m.

HO CHI MIN CITY: 10.45 N. 106.45 E.

DOCUMENTS: On arrival at Nha-be or at the Port. As usual, the examination is executed immediately by the Officers representatives of: Sanitary Service, Immigration Service, Customs Service, Police Service, Stevedoring Agencies.

Stevedoring Agencies:

8 Ho Chi Min City Inward Cargo Manifests or In-transit Cargo Manifests at Ho Chi Min City.
2 Crew Lists.
All Original Cargo Manifests.
3 Landing or In-transit Passenger Lists.
2 Landing Passengers Luggage Lists.
2 Free of Tax Goods Lists.

Ho Chi Min City Port Authority:

Following Documents are to be presented to the Ho Chi Min City Port Authority by the Stevedores:

1 Report, informing the arrival of the ship.
2 Cargo Plans on board.
3 Cargo Manifests.
3 Cargo Unloading Plans.
1 General Cargo Unloading Permit.
6 Requests to Sanitary Officer for sanitary examination operation.

Important Notices:

(1) Manifests of Ho Chi Min City Inward Cargo are to be compiled by complete set, each set comprising original port's manifests; a recapitulation table will be added to each set indicating the total amount of parcels, tonnage or volume loaded on board for each port. This total amount will be repeated in all letters, stating: "This total amount has been visaed by the Customs Office."

(2) On arrival at Vung-Tau, (Cape St. Jacques), the Master of the ship should collect all required documents and get them ready to be presented. The Quarantine Officials may possibly come unawares on board for prior examination.

PILOTAGE: Upon arrival at pilot station the pilot service should be informed by cable of the exact position of anchorage, draft of the vessel, and the maximum speed the ship can do in the river.

Every evening from 2000 hrs. to 2200 hrs. (local time) radio watch should be kept with Ho Chi Min City XVS on the frequency of 500 kHz. In case the vessel is to proceed up the river the next morning the pilot service will cable the Captain the exact hour of departure from Cape St. Jacques (Vung Tau).

The pilot service will not send any Pilot to ships that do not give the information as to draft, speed of vessel, and exact position at the anchorage station at Cape St. Jacques (Vung Tau).

Pilot station at Vung Tau, Tel: 6. Pilot station at Ho Chi Min City, Tel: 21222 and 90503. Pilot boards at Vinh Dua (Gulf of Coco Trees).

ANCHORAGE: In depths of about 30 ft.

RESTRICTIONS: River transits, berthing and unberthing are effected in daylight hours only. Vessels should arrive 2 hours before daylight HW. At least 1 ft. keel clearance required. Least depth in channel, 27 ft. below chart datum.

MAX. SIZE: Length 673 ft. Vessels can proceed with draft 27 ft. depending on daily tide.

HEALTH: Port officials board at Vung-Tau if vessels call at Vung-Tau. Free Pratique will be obtained from local Authorities. For vessel calling at Ho Chi Min City, Port Officials will board upon docking alongside at Ho Chi Min City. Port and Free Pratique will be granted at Ho Chi Min City.

RADIO: Ho Chi Min City Radio, call sign XVS.

TUGS: Available up to 2,600 h.p. Tankers usually berth without tug assistance.

BERTHING: Depth at quays 26 ft. to 36 ft.

TANKERS: Discharge at Nha-Be: Ex-Caltex Terminal, narrow pier with mooring buoys, depth in berth 27 ft. Ex-Shell Terminal, "T" jetty with mooring buoys, depth in berth 31 ft. Ex-Stouvae Terminal, pier with mooring buoys, depth in berth 30 ft. No slop disposal facilities.

DENSITY: About 1005 at berths.

MEDICAL: Doctors and hospital facilities available.

FRESH WATER: Can be supplied by barge subject to advance notice of 24 hours.

FUEL: Diesel oil can be supplied.

REPAIRS: Machine shop facilities only.

AIRPORT: Situated about 5 miles from the city. International services.

Virgin Islands

FREDERIKSTED, St. Croix: 17.43 N. 64.53 W.

DOCUMENTS: All forms are standard U.S. Government Forms:
Passenger List (I-418) – 3 copies.
Crew List (I-418) – 3 copies.
Clearance from Last Port.
Inward Customs Manifest (1302) – 4 copies.
Ship's Stores Declaration – Customs Form 1303 – 2 copies.
Crew Effects Declaration – Customs Form 1304 – 1 copy.
(Also see separate headings – "Health" – "Customs" – "Immigration").

PILOTAGE: Services available day or night. Payment for Pilot services is mandatory whether Master uses Pilot or not. (Vessels commissioned by the U.S. or foreign government, yachts and vessels under 100 gross tons are exempt from pilotage fees, except when the services of a Pilot are requested).

ANCHORAGE: Open roadstead on the lee (West) side of St. Croix, providing a good anchorage with no significant tide.

HEALTH: See "Health Regulations" before first U.S.A. Port (Albany).

Garbage should be disposed of beyond the 3-mile limit. On passing the 3-mile limit all garbage disposal units which open to the sea should be closed. All garbage should then be placed in covered cans and retained on board until the ship is again beyond the 3-mile limit.

RADIO: *(a)* Vessels may communicate with Island via:

Mackay Radio, Amagansett, New York	Call Letters WSL
Chatham, Massachusetts Radio	Call Letters WCC
Lantana Radio, Florida	Call Letters WOE
Barbados Radio, Barbados	Call Letters VPO
Destrellan Radio, Guadeloupe	Call Letters FFO
Fort de France Radio, Martinique	Call Letters FFP

All stations maintaining 24-hour service. These radio stations then relay the messages by cablegram to Frederiksted via either ITT World Communications Inc. or Cable and Wireless, Western Union International.

(b) Master of every vessel arriving Frederiksted is required to give at least 24 hours advance notice of arrival to Captain of the Port, U.S. Coast Guard – San Juan, Puerto Rico, by wireless on 500 kHz or by radio telephone 2182 kHz. Call Letters for U.S. Coast Guard, San Juan, Puerto Rico – NMR.

(c) Masters are requested to advise Agent their expected time of arrival as far in advance as is possible, vessels arriving from ports other than U.S. or Caribbean Islands should give at least 7 days' notice, and vessels arriving from U.S. ports should give at least 4 days' notice. In addition, a message should be sent verifying arrival at least 48 hours in advance, with delays reported as necessary. Arrival messages should include information regarding repairs, stores, number of crew and passengers on board. If cash is required, a minimum of 7 days' (prior to date of arrival) notice is mandatory.

(d) While vessels are in Frederiksted the Authorities do not permit the use of the ship's radio transmitters.

(e) Vessels equipped with VHF equipment should commence radio watch on Channel 16 when vessel is 100 miles from St. Croix. Contact with Agents and shore facilities can be made direct or via Virgin Islands Marine Operator – Station WAH – Call Letters WAH.

TUGS: None readily available – tugs can be arranged with 48 hours advance notice.

BERTHING: A government-owned pier with a 1,400 ft. long approachway, bridging Maritime Zone to a pier-head 240 ft. long by 60 ft. wide. Vessels 600 ft. and over with a max. forward draft of 25 ft. have been accommodated.

FRESH WATER: Very limited, delivered by truck.

TIME: GMT minus 4 hours. Atlantic Standard Time.

HOLIDAYS: The following are legal holidays: Sundays; January 1st (New Year's Day); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; Last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 2nd (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President or the Government may by proclamation declare as holidays.

The following are legal half-day holidays, commencing at Noon, viz: Every Thursday during the months from April to November, inclusive, except Thursdays in those weeks where there already is a legal holiday other than Sunday. Whenever any holiday falls upon a Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands. Local Port Regulations are similar to those applying in U.S. Mainland Ports.

CUSTOMS: Customs Officers will board at anchorage or wharf berths, and will require an accommodation ladder.

Vessels required to enter and clear through Customs House:
Vessels loading or unloading cargo;
Vessels embarking or disembarking passengers;
Vessels remaining in port over 24 hours;
Vessels requesting permission for their passengers to go ashore during the stay of the vessel in port.

Vessels in above categories must present following documents:
Clearance from Last Port;
3 copies of Crew List (Form I-418) or substantially similar form – see note *
3 copies Passenger List (Form I-418) or substantially similar form – see note *
4 copies Inward Foreign Manifest covering all cargo for discharge at St. Croix, V.I., showing weights or measurements (of basis of how cargo is freighted) on all items (Customs Form 1302).
2 copies Stores List (Engine-Deck-Commissary-Narcotics).
1 copy Crew Effects Declaration (Custom's Form 1304).

* List of passengers and crew shall be on Customs and Immigration Form I-418 or on a substantially similar form, except that where no steerage passengers are aboard upon arrival, the listing of the passengers may be in the form of a vessel "Souvenir List" or similar list, in which the names of the passengers are listed alphabetically by class.

Sealing of Stores: Upon arrival of a vessel from a foreign port, or a vessel engaged in foreign trade from a domestic port, sea stores and ship's stores not required for immediate use of consumption on board while vessel is in port and articles acquired abroad by officers and members of crew, for which no permit to land has been issued, shall be placed under seal, unless Customs Officer is of the opinion that circumstances do not require such action. Customs Inspectors in charge of vessel, from time to time, may issue stores from under seal for consumption on board by passengers and crew.

Passengers disembarking must present personal baggage declaration if from foreign.

IMMIGRATION: Recommended that Masters who are unfamiliar with U.S. Immigration Procedure should seek clarification from Agents as far in advance as is possible.

If a vessel arrives direct from a United States mainland port or from Puerto Rico no Immigration inspection will be performed. If a vessel arrives direct from a foreign port the vessel shall undergo Immigration inspection.

Vessels arriving without a visaed crew list, may be able to obtain a waiver from Officer in Charge of U.S. Immigration & Naturalisation Service, by making application on Form I-193. A fee of $10.00 is required to obtain a waiver.

In order to expedite the clearing of the vessel, it is suggested that prior to arrival all passengers subject to inspection should be assembled where the inspection is to be performed.

Stowaways must be reported in ETA Message and listed on a Passenger Manifest (Form I-418) and on Form I-94, and must be reported to the U.S. Immigration Officer as soon as he boards.

All non-resident alien crew members, whether shore leave is required or not, are required to have in their possession valid Passports, Seamen's Book or Identification Card (with photo) and Form I-95 (crewman's Landing Permit) or Form I-184 (Alien Crewman's Permit and Identification Card) on arrival. All resident alien crew members are required to have in their possession Alien Registration Receipt Card (Form I-151) on arrival.

SHORE GANGWAYS: Available.

LAUNCHES/TENDERS: Not available.

AIRPORT: Distant 8.5 miles.

AUTHORITY: Virgin Islands Port Authority.

LIMETREE BAY, St. Croix: 17.41 N. 64.44 W.

(See Plan Book)

LOCATION: The facilities of Hess Oil Virgin Islands Corp. (HOVIC) are located in Limetree Bay on the South coast of the island of St. Croix, U.S. Virgin Islands. St. Croix is 32 miles South of St. Thomas and St. John Islands and 50 miles S.E. of the island of Puerto Rico. It is the largest of the U.S. Virgin Islands being 19 miles long and averages 3.5 miles in width.

The sea buoy "ELB" No. 2 marking the entrance to Limetree Bay channel is located in 60 ft. of water on the Westerly side of the channel: Lat. 17° 40′ 42″ N., Long. 64° 44′ 18″ W.

The sea buoy is painted red and is equipped with a flashing white light having a 1 second flash, 9 second eclipse with a visibility of 7 miles.

DOCUMENTS: Clearance (U.S. – Foreign). Inward clearance is effected on board immediately after docking. Clearance should be made for Christiansted, St. Croix, via Limetree Bay.

The following documents are required by the Customs and Immigration Authorities for entry and clearance:
Master's Certificate on Preliminary Entry.
Master's Oath.
Stores List.
Crew Purchase List (Curio List).
Inward Foreign Manifest.
Quarantine Free Pratique.
Derat Certificate.
Crew List (Certified).
Clearance from Last Port.
Crew Landing Permits.
Passenger List (if any passengers).

PILOTAGE: Service is available 24 hours a day and is compulsory for all vessels using HOVIC facilities in Limetree Bay. The HOVIC Harbour Master acts as Pilot and will assist the Master in docking and undocking vessels using Hess Oil facilities; however, the Master of the vessel retains full responsibility for the ship at all times. The Pilot can be contacted by VHF Channel 16. Pilot boards at the sea buoy, position 17° 40.7′ N., 64° 44.3′ W. Vessels over 45,000 d.w.t. are subject to movements in daylight only. Vessels should remain outside the sea buoy until boarded by the Pilot. The Pilot will be placed aboard by a company tug.

The tug "Hovic 1" is equipped with a radio-telephone having the following crystals: 2182 kHz U.S.C.G., 2638 kHz Ship to ship. 2738 kHz Ship to ship, 2134 kHz San Juan, Puerto Rico and Galveston, Texas. Ships having the above crystals should call the "Hovic 1" three hours before their arrival at the sea buoy, and advise of any change in their ETA.

ANCHORAGE: There is no suitable anchorage for deep draft vessels off the port. Normal practice is to stop engines and wait 6 to 8 miles from the sea buoy if required to wait instructions. In bad weather vessels should proceed to Frederiksted and anchor in the vicinity of the long pier in depths of 30 ft. to 60 ft. Vessels shall have their anchors ready to let go upon entering the channel into Limetree Bay.

APPROACHES: Entrance to channel marked by a black sea buoy, equipped with a white flashing light, visible 7 miles. The buoy (ELB No. 2) (flashing every 10 seconds) is at the West side of the channel (Lat. 17° 40′ 42″ N., Long. 64° 44′ 18″ W.). At sea buoy there is 60 ft. of water and the channel has a depth of 60 ft. to Nos. 3 and 4 berths.

The turning basin opens up Eastward from the channel line and is approximately 1,200 ft. long and 1,000 ft. wide. The West turning basin is 1,500 ft. by 1,200 ft. with a max. depth of 35 ft.

RESTRICTIONS: Navigation permitted 24 hours a day except for ships over 50,000 d.w.t.

The Harbour Master will check and report on each vessel's draft before piloting them inbound or outbound.

HEALTH: National quarantine laws are enforced in the U.S. Virgin Islands by officers of the U.S. Public Health Service. All vessels are subject to inspection.

RADIO: Masters are requested to advise both HOVIC – St. Croix and their Agents by radio 48 hours and 24 hours in advance of their ETA giving the vessel's name, date and hour of arrival (local time), bunkers and water required.

TUGS: Tug assistance in the channel, docking and undocking is mandatory and is provided by 3×1,800 h.p. diesel tugs stationed in the port to provide this service. All tugs are under the orders of the HOVIC Harbour Master and are equipped with fire pumps and monitors to assist in fire fighting.

There are also 2 tugs of 7,000 h.p. available for the mooring of large tankers.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the ship's equipment (including, but not limited to tanks, pumps, valves, and pipe-lines) is ready and fit to load or discharge petroleum and/or petrochemical products. Notice of Readiness will not be accepted unless the vessel is in all respects ready to load or discharge as appropriate. Vessel will not be deemed ready to load or discharge and pumping will not commence until the senior deck officer shall have executed and delivered to HOVIC a "Declaration of inspection prior to bulk cargo transfer" as required by U.S. Coast Guard Regulations.

BERTHING:

Hess Hovic Terminal: A shore gangway is provided.

There are at present, 7 berths on finger pier, 3 on East side and 4 on West side.

Deepest berths are No. 3 and No. 4 each with 60 ft. depth of water alongside.

Port Alucroix: Situated to the West of Hess Oil Terminal. The port is entered via the Krause Lagoon Channel with a controlling depth of 35 ft. at MLW, and width of 300 ft. At the head of the lagoon is the Martin Marietta Alumina Terminal.

Pilot boards approximately 2.5 miles South of Martin Marietta Alumina sea buoys Nos. 1 and 2.

Container Port: Situated close West of the Hess Oil Terminal. The port is entered via the Krause Lagoon channel and the container port channel. Length of pier 1,200 ft. Depth in channel and turning basin 35 ft.

1×30 ton "Paceco" portainer with telescopic spreader to handle 20 ft., 35 ft. and 40 ft. containers.

BALLAST: United States laws prohibit the pumping overboard of dirty ballast while a vessel is within U.S. coastal waters. All ballast must be pumped to facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after first being inspected and approved by the Dock Master.

In pumping dirty ballast ashore, the ballast is received through 1×12 in. shore line at a max. discharge pressure to shore installations of 125 p.s.i. The ballast is pumped into a ballast facility about 1 mile North of the dock. Due to the limited facilities and to the possibility of 2 vessels deballasting at the same time, it is requested that vessels arrive with the minimum possible ballast.

The U.S. Oil Pollution Act of 1924 applies to the Pollution of Coastal Waters. Violators are subject to fines and a year's imprisonment for offence.

LOADING: Loading operations are normally carried out at relatively high pumping rates. Loading rates may be reduced by request. Loading cargo overall will not be permitted without specific written authorisation from HOVIC's General Manager.

Hose pressures should not exceed 125 p.s.i. during loading or discharging.

Oil Dock is serviced by: 1×24 in. diameter crude line, 1×24 in. diameter No. 6 oil line. 1×20 in. diameter gasoline line, 1×20 in. No. 2 oil line, 1×10 in. diameter kerosene line, 1×12 in. diameter ballast line, 1×8 in. diameter fresh water line.

4×10 in. hoses are available for connecting up to each of the 20 in. and 24 in. shore lines – single 10 in. hoses are available for the kerosene and ballast lines.

Oil Dock 2 serviced by: 1×24 in. diameter crude line, 1×24 in. diameter No. 6 oil line.

MEDICAL: Medical attention is generally available from the public hospital at any hour of the day or night to crew members of all vessels. The representative of the ship's Agent should be contacted by the Master with any requests for medical attention for the crew. For each man needing medical or dental attention, a form should be completed in duplicate and signed by the Master, or in his absence, by the Chief Officer. The form should provide the date, patient's name, rating, and the name of the vessel. In case of emergency, or when a patient cannot be moved from the vessel, the Master should advise the ship's Agent by radio if at sea, or on the telephone if in port.

DENSITY: 1025.

FRESH WATER: The island of St. Croix is dependent almost entirely on rainfall for its supply of fresh water. There are wells but many of them are rather saline in nature. As a result fresh water is scarce and expensive. In conjunction with its refinery operation HOVIC operates a desalination plant and limited quantities of fresh water are available providing at least 48 hours' notice of these requirements is given prior to the ship's arrival. All fresh water is metered aboard ship.

FUEL: Both No. 6 fuel oil (Bunker C) and light marine diesel are available by prior arrangement. Advice concerning quantities should be given in the vessel's arrival message (ETA) sent 48 hours prior to arrival.

AIRPORT: Situated 5 miles from port facilities.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration Authorities on shore liberty. Masters are requested to have all crew members on board at least 1 hour prior to departure time, to avoid delay "awaiting crew members". If crew members of foreign vessels are to be given shore leave, Form I-95 must be prepared for each member of the crew.

TIME: The U.S. Virgin Islands use Atlantic Standard Time, which is 4 hours slow of Greenwich Mean Time.

GENERAL: *(a) Immigration:* The United States Immigration laws apply in the U.S. Virgin Islands. Passports and visas are required.

(b) Customs: The Customs collection district of the U.S. Virgin Islands is under the jurisdiction of the U.S. Treasury Department but has its own Customs laws.

(c) Liquors: The transportation of alcoholic beverages inside HOVIC's property is strictly prohibited; consequently, no liquor or beer may be removed from vessels. The only exception to the foregoing is in the case of bonded stores ordered by Masters.

(d) Visitors: No visitors are permitted in the dock area. Only persons on official ship's business are permitted on the piers.

(e) Laundry: Only limited facilities are available to handle ship's laundry.

(f) Surveyors: Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available in San Juan, Puerto Rico on 12 to 24 hours' notice. The ship's Agent will assist Masters in soliciting their services.

(g) Mail: Official and personal mail will be delivered on board by the ship's Agent when vessels are being cleared inwards. Mail received for vessels while in port will be delivered on board prior to sailing. Outgoing mail is accepted from Masters, provided it is accompanied by a mail transmittal slip to support disbursements.

(h) Transportation: Walking through the refinery is not permitted. Arrangements for transportation will have to be made through the ship's Agent or the Refinery General Manager's Office.

(i) Supplies and Repairs: Limited supplies of provisions and marine hardware are available on the island. There are no facilities for major repairs closer than San Juan, Puerto Rico. Machine shops in Christiansted and Fredriksted can assist in making minor repairs.

(j) Overloading: Masters are advised that the international laws are strictly enforced with regard to overloading and should be guided accordingly. In cases where overloaded cargo has to be discharged, all expenses incurred, including ship delay, will be for the vessel's account.

(k) Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any electrical storm. Ullage screens or ullage plugs must be in place. Loading gasoline or other similar low-flash products will be stopped during periods of calms when the heavy vapours cannot be dispersed quickly enough to prevent hazards from accumulated gas pockets. Ship's officers are cautioned to be on their guard during such conditions. In the event of abnormal weather conditions in the area, such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters will be told to suspend all operations and proceed to sea until normal weather conditions again prevail.

(l) Demurrage: Vessels are required to vacate berth promptly upon completion of cargo handling operation (loading or discharging operations, as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Dock Master. The Harbour Master will keep vessels advised of other vessels awaiting berth. If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible for penalties and demurrage as follows:

- *(a)* To pay dock demurrage.
- *(b)* To hold HOVIC blameless for any demurrage and damages incurred as a result of other vessels awaiting berth.

The following rules shall govern the determination of demurrage:

- *(a)* One hour free laytime will be allowed after completion of cargo handling operations. This free time will start at the time cargo hoses are disconnected from the ship's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.
- *(b)* Three hours free laytime will be allowed for ballasting after discharge operations.

SHIPMASTER'S REPORT: October 1984.

Vessel: 140,000 d.w.t.

The Pilot boards from one of the large tugs. He can normally step straight on to the accommodation ladder. On departure he uses a pilot ladder only, on the starboard side. 2 large tugs put up 2 lines each forward and after end of main deck. 1 smaller tug puts up 1 line starboard side main deck aft and a fourth tug pushes. Moorings were 2 back springs, then 3 breasts, then 3 head/stern lines. Original I-418 (Crew List) to Immigration and 3 copies for Agent. 1 each of Customs Forms 1300, 1301, 1302 and 1303. The minimum draft requirements apply to departure and arrival.

AUTHORITY: Hess Oil Virgin Islands Corp.

Virgin Islands Port Authority, P.O.Box 597, St. Thomas, Virgin Islands, U.S.A. 00801.

ROAD HARBOUR & PORT PURCELL, Tortola, British Virgin Islands: 18.25 N. 64.37 W.

PORT LIMITS: All the area of water North of an imaginary line drawn from Burt Point to Hog Point (see BA Chart 2020).

DOCUMENTS:

Clearance from last port;
1 Declaration of Health Certificate;
4 Crew Lists;
2 Crew Store Lists;
2 Ship's Stores Lists;
2 Passenger Lists.

PILOTAGE: Only compulsory for vessels of 200 n.r.t. and over, when proceeding alongside or leaving Port Purcell unless a vessel is in possession of a valid Exemption Certificate issued by the Ports Manager. Pilot boards at Port limits after receiving advice from Agents preferably 12 hours prior to arrival. Link calls made through Tortola Radio, Channel 27 daytime and Channel 16 at night.

Vessels arriving ahead of ETA sound "G" on whistle if unable to advise Agent.

No inward pilotage at night, unless emergency, night Pilotage outwards by special arrangement.

ANCHORAGES: Between Buck Island and Beef Island or immediately South of Port limits, approximately 12 fathoms.

Tanker anchorages independent of Port Authority and maintained by Shell and Esso, for small vessels only, little tidal influence.

RESTRICTIONS: Anchorage within Port limits prohibited unless authorised by Ports Manager. Max. draft alongside Port Purcell 22 ft.

HEALTH: Customs issue Pratique for vessels with clear bill of health, otherwise request doctor to board on arrival alongside or at anchor.

RADIO: Call sign "Port Purcell" – can be reached by VHF Channel 16. Cable and Wireless maintain a Public Coast Station on Tortola, call sign "Tortola Radio", with an approximate range of 50 miles and provides linked telephone calls between ships and any shore based telephone subscriber. From 0700 – 1900 hrs. watch is kept on Channel 16, at night for emergencies only.

For distances in excess of 50 miles any other convenient shore station, (eg. Barbados, St. Thomas) that will accept messages for onward cabling or telephoning to Tortola.

TUGS: None available.

BERTHING: Port Purcell quay is 800 ft. long, max. draft 21 ft. at any state of tide, salt water. Ships discharge with own gear.

CRANES: Port Purcell has 1 mobile shore crane, max. lift 8 tons. Prior advice required for use.

MEDICAL: Hospital facilities available, no routine inoculations, etc., required unless specially notified.

DENSITY: Entirely salt water within port limits.

FRESH WATER: Available in limited quantities at Port Purcell, approx. delivery 20 t.p.h. and costs US$5.00 per 1,000 gallons.

FUEL: Diesel only for small vessels delivered by road tanker to Port Purcell, 2 hours' notice.

REPAIRS: Minor repairs only.

SURVEYORS: Available.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: No sealing of tobacco, wine or spirits.

AIRPORT: Beef Island, 7 miles, regular local flights to St. Thomas, Puerto Rico, Antigua which connect with several main lines to Europe and the Americas.

TIME: GMT minus 4 hours.

HOLIDAYS: Port Purcell closed Christmas Day, Good Friday and August Monday (1st in month).

POLICE/AMBULANCE/FIRE: Dial 999 (emergency). Police station 43422.

TELEPHONES: Telephones available for use on board ship, cost for connecting US $25.00 and 8 cents for local calls.

SHORE LEAVE: No restrictions for crews.

IDENTIFICATION CARDS: None required.

DELAYS: None should be expected. Cargo working is geared to ship's arrival, irrespective of time and 24 hours continuous working if required.

AUTHORITY: Ports Manager and Harbour Master, Road Town, Tortola.

ST. THOMAS: 18.20 N. 64.56 W. (See Plan Book)

Harbour of St. Thomas, U.S.V.I. situated on South side of Island of St. Thomas. It is 1,434 miles from port of New York. Northern side of Island borders on Atlantic Ocean, and Southern side on Caribbean Sea. The Harbour is one of the best in the West Indies, being almost landlocked.

WEATHER: The weather is usually mild with little wind. Squalls when they occur, usually come from the N.E.

DOCUMENTS: *Quarantine, Customs and Immigration* – see "Frederiksted".

Agent:
1 Copy Crew List (Form I-418).
1 Copy Passenger List (Form I-418).

PILOTAGE: Compulsory and available day and night. Pilot Boat has letter "P" on deck house and flies International Code flag "P". Pilots will meet vessels 1 to 3 miles outside harbour, boarding via Jacob's ladder.

ANCHORAGE: Outer Harbour Anchorage located beginning at Scorpion Rock Lighted Buoy No. 1 (Lat. 18° 19′ 25.6″ N., Long. 64° 55′ 08″ W.) thence 180° 1,580 yards; thence 263°, 2,490 yards; thence due North 1,255 yards; thence due East to the Southerly tip of Sprat Point, Water Island; thence to Cowell Point, Hassel Island, and thence to point of beginning. This anchorage is considered good and is about 8 fathoms with sand bottom.

RADIO: The St. Thomas Marine Operator will guard the following from 0600 to 2100 hrs.: Channel 26, 16 VHF, 2009 – 2506 and 2182 AM, and the upper side band (2010.4 – 2507.4) of the same frequency. The Harbour Master's Office maintain a 24 hour watch on VHF Channel 16 (working on Channel 12).

(b) Master of every vessel arriving at St. Thomas is required to give at least 24 hours advance notice of arrival to Captain of the Port U.S. Coast Guard – San Juan, Puerto Rico by wireless on 500 kHz or by radio telephone 2182 kHz.

(c) Masters are requested to advise Agents their ETA, at least 36 hours in advance. Arrival messages should include cash requirements (local currency U.S. Dollar) and advice regarding repairs, stores, etc. This information is particularly necessary in the cases of vessel arriving on weekends or holidays. For cruise vessels the arrival messages should also include the number of passengers and crew on board.

(d) While vessels are in St. Thomas Harbour, the Authorities do not permit the use of the ship's radio transmitters.

(e) U.S. Coast Guards: This organisation maintains a small Marine Safety Detachment in St. Thomas to observe, service and effect repairs to navigation aids in vicinity of St. Thomas. An 82 ft. Coast Guard Patrol Boat "Point Whitehorn" (82364) is attached to the station for primary purpose of search and rescue work. Maintains watch on VHF Channel 16. Radio telephone marine information broadcasts, including Notices to Mariners, will be made on 2670 kHz, after first making a preliminary announcement on 2182 kHz. Radio telephone urgent and safety broadcasts or Marine Information will continue to be made on 2182 kHz.

TUGS: Normally not considered necessary for docking, however tugs are available for docking and undocking ships.

BERTHING: Wharf of the West Indian Company Limited, located on Eastern shore of harbour basin. Wharf is bulkhead type, 2,234 ft. long, running N.E./S.W., and is well protected to seaward. Mooring bits are spaced at intervals of 50 ft. There is a "cut out" in the wharf 950 ft. from N.E. corner, which is 22 ft. wide and approximately 3.5 ft. above low water. This ramp is slanting from 8.3 ft. to 3.5 ft. over a distance of 20 ft. Similar type of ramp located on West Corner of wharf. Safe depth alongside from 27 ft. near N.E. end to 30 ft. on S.W. end. Bulwark is 8.3 ft. above mean tide. Average difference between high and low tide is 11 in.

Dockages dues are payable to the West Indian Company Limited, as per tariff.

In the Crown Bay area (access via East or West Gregerie Channels) the V.I. Port Authority maintains facilities which include a "T"-head pier extending 500 ft. from shore, where ships up to 25,000 g.t. can moor to breasting dolphins 200 ft. on centres, and mooring dolphins 200 ft. fore and aft from them. Controlling depth presently 30 ft. This pier is used for berthing tourist and tanker vessels only. A curved bulkhead at top of Crown Bay, approximately 900 ft. long, is used for Roll-on/Roll-off, container and break bulk cargo. Controlling depth 15 ft. 24-hour arrival notice is required.

CARGO HANDLING: Containers are handled at the West Indian Company and the Crown Bay area (V.I. Port Authority), but no special gantry cranes are available. Roll-on/Roll-off cargo handled at these facilities as well. No liquid chemicals facilities exist here but there is a small privately-owned LPG plant limited to 20 ft. draft and 250 ft. length. Shell uses this facility for gasoline and light diesel. The "T"-pier in Crown Bay is used for the V.I. Water and Power Authority for movement of fuel and water, and Texaco has its own pipe-line on the same pier for their products.

STEVEDORES: Discharging and/or loading arranged by the West Indian Company Limited for account and risk of vessels.

Rates of discharging and/or loading dependent on vessel's equipment and stowage. However, following may be considered average:

General Cargo 6 weight tons per gang hour.
Bagged Goods 8/10 weight tons per gang hour.
Lumber 10/12 weight tons per gang hour.

Each stevedore gang normally consists of 12 stevedores (10 on board and 2 ashore), 2 winchmen, 1 signalman, 1 foreman.

FUEL: Bunkers are not available except for small craft.

FRESH WATER: Mostly rain water which when available is supplied by the West Indian Company Limited. This supply is limited and is on an emergency basis only. Water may also be requested from the Government of the Virgin Islands in cases of emergency only. Delivery effected by pipe alongside wharf. Water by barge can be delivered in St. Thomas.

MEDICAL: Local hospital is the Knud-Hansen Memorial Hospital, which is equipped with facilities for operations, etc.

TIME: Official St. Thomas time is Atlantic Standard Time, which is 4 hours behind GMT.

HOLIDAYS: The following are legal holidays in St. Thomas: Sundays; January 1st (New Year's Day); January 15th (Martin Luther King); January 30th (Roosevelt's Birthday); February 12th (Lincoln's Birthday); The third Monday in February (Washington's Birthday); March 31st (Transfer Day); Holy Thursday; Good Friday; Easter Monday; Whit Monday; The last Monday in May (Memorial Day); June 22nd (Organic Act Day); July 4th (Independence Day); July 25th (Supplication Day); The first Monday in September (Labour Day); The second Monday in October (Columbus Day); The fourth Monday in October (Veterans' Day); November 1st (Liberty Day); The fourth Thursday in November (Thanksgiving Day); December 25th (Christmas Day); December 26th (Christmas Second Day), and such other days as the President of the Government may by proclamation declare as holidays.

Whenever any holiday falls upon Sunday, the Monday following is a legal holiday.

REGULATIONS: The U.S. Coast Guard strictly enforces the Harbour Pollution Act of 1924, prohibiting discharge of refuse and oil in navigable waters of the U.S. Virgin Islands.

Local Port Regulations are similar to those applying in U.S. Mainland Ports.

HEALTH, CUSTOMS, IMMIGRATION: Refer to Frederiksted.

CONSULS: Following countries have consular representatives in St. Thomas.

Belgium
Denmark
Dominican Republic
El Salvador
France
Great Britain
Haiti
Netherlands
Norway
Panama
Sweden

AIRPORT: Distance 2 miles. Connections with International flights from Puerto Rico and direct flights from New York and Miami.

GENERAL: *Gangway.* One aluminium gangway available which is 34 ft. long and 2 ft. 6 in. wide – made with skidding prevention strips only and therefore not recommended for use as a passenger gangway. There is a similar gangway that is owned and used on V.I. Port Authority facilities. Since these are the only gangways; they are made available to vessels on first-come-first-served basis.

Stores. St. Thomas should not be depended upon for large quantities of provisions or deck and engine stores, as practically all commodities are imported making prices higher than United States mainland ports and Puerto Rico. No regular Ship's Chandlers established in St. Thomas, V.I.

Storage Facilities. The West Indian Company Limited undertakes ordinary storage for a limited period of time in 8 transit warehouses, all 14 ft. high with a total floor area of 80,000 sq. ft., plus an additional 9,600 sq. ft. roof covered area. There is also a large uncovered area available for outside storage. Only limited cold storage facilities are available on The West Indian Company's Dock.

Ice. Small quantities may be obtained.

Laundry. Modern laundry service is available.

POLICE/AMBULANCE/FIRE: Police 915; Ambulance 774-1212; Fire 921. Port Authority 774-2250, 774-2333.

AUTHORITY: Virgin Islands Port Authority, Office of the Assistant Executive Director, Marine Division, P.O.Box 36, St. Thomas, Virgin Islands, U.S.A. 00801. *Contact:* Austin M. Monsanto, Marine Manager.

NOTES

Western Samoa

APIA: 13.50 S. 171.45 W. (See Plan Book)

PORT LIMITS: The Customs Act defines the port of Apia as follows: The limits of the said port of Apia shall be a circle of two miles radius from the Custom house now existing in Apia and the said port shall include all land, river, and sea included within that circle. The Shipping Act defines the limits of the port in similar terms using the Export Wharf as the centre of the two mile radius circle. Both of these features are shown on Chart 2211.

DOCUMENTS:
1 Clearance from previous port of call.
3 Crew Lists.
3 Passenger Lists.
2 Health Documents.
1 Manifest.
Bills of Lading.
Ship's Papers (stores and poisons).
List of Dangerous Goods.

PILOTAGE: 72 hours ETA is required, confirm 24 hours before arrival. Pilotage is compulsory for merchant vessels. Pilot boards 1.5 miles outside harbour on line of leading beacons. Pilot boards from harbour tug.

By night, in addition to usual navigation lights, Pilot boat carries standard identification, i.e. a red light on foremast with all-round visibility. Exemption from pilotage may be granted to Masters of vessels trading regularly to Apia, but pilotage dues are still payable.

ANCHORAGES: In 20 fathoms outside a line drawn between the 2 reefs and preferably on line of leading beacons. Bottom is coral.

RESTRICTIONS: No night-time or tide restrictions. Turning basin dredged to 36 ft. in 1972, extending to 1,200 ft. from each end of the wharf. Arrivals preferred during daylight hours.

MAX. SIZE: Shore bollards to take stern and bow lines for vessels up to 800 ft. in length. Max. draft 35 ft.

Buoy mooring for tankers up to 32,000 d.w.t. consists of 3 buoys with black and red vertical stripes, 1 ahead and 2 astern. Vessel also uses starboard anchor.

HEALTH: Doctor boards vessel on arrival alongside.

RADIO: ETAs should be sent 72 hours before arrival, and confirmed 24 hours before. Signals to incoming ships by radio or radio-telephone from Apia radio station 5WA. For radio, ships should call on 500 kHz and operate on 483 kHz. For radio-telephone, ships should call on 2182 and operate on 2162 or other available frequency as may be arranged once contact has been established. Apia maintains continuous service. Call sign "Apia Radio" repeated.

Apia Radio maintains continuous service, and the Harbour Master can be called on Channel 16 during normal working hours. The tug and pilot launch also operate on Channel 16 .

TUGS: 2 tugs available, *Pualale*, 425 b.h.p. (7 ton pull) and *Savaii*, 175 b.h.p.

BERTHING: Export Wharf – reinforced concrete wharf 604 ft. in length on the East side of inner harbour. Max. depth alongside 36 ft. All loading and discharging is carried out with ship's gear. No wharf cranes available. This wharf and all surrounding areas enclosed by fence is Customs area and all vessels trading to or from places outside Western Samoa must depart from or arrive at this wharf.

New wharf 604 ft. long, vessels up to 800 ft. may be berthed.

There is 250 ft. of berthing alongside the inner face of the Southern arm of the wharf for small ships in deep water.

There are no special Ro/Ro facilities.

Shore equipment: One 15 ton mobile crane. Two×20 ton forklifts. About 10×3 to 5 ton forklifts.

STEVEDORES: Arranged by ship's Agents.

MEDICAL: Advance notice to Agents preferable. Doctors and good general hospital where seamen may be admitted.

There is a private medical clinic and a private dental clinic. Both high standard.

TANKERS: Shell, Mobil, and B.P. operating in Samoa, and have own discharging facilities. Tanker terminal situated on West Reef. Discharge line is 6 in. diameter. Launch service may be provided between ship and shore at a small charge.

DENSITY: 1025 – but may alter considerably during rainy season.

TIDES: Mean high water intervals 6 hours 27 minutes, Spring range 3.8 ft., mean range 2.6 ft. Tidal stream normally slight, but after heavy rain outflow from rivers and streams can cause it to become quite strong.

The current across the harbour entrance about 600 m. off the reef can be variable, but is predominantly Westerly and velocities up to 4 knots have been reported but this is not normal.

FRESH WATER: Available at wharf from shore installation.

FUEL: Only light diesel fuel available.

FIRE PRECAUTIONS: Fire services available on wharf, station is 0.5 miles distant.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: No enforcements.

IDENTIFICATION CARDS: Not needed.

CONSULS: The New Zealand High Commissioner represents all British subjects; French Consul, Australian High Commissioner, Embassy of the Chinese People's Republic, South Korean Consul, West German Consul, United States of America Consul.

REPAIRS: Minor repairs only.

SURVEYORS: None.

TIME: GMT minus 11 hours. No alteration to clocks.

HOLIDAYS: No cargo on Sundays between 0300 and 2100 hrs. The recognised holidays are Christmas, New Year, Boxing Day, Good Friday, Easter Monday, Whit Monday, Anzac Day and Independence holidays from 1st June to 3rd June.

AIRPORT: 25 miles from Apia on Western side of Island. Regular and frequent mail and passenger services. Direct to Auckland or USA via American Samoa.

TELEPHONES: Police and public telephones near wharf and provisions are available for telephone connection to tourist vessels berthed at the wharf.

POLICE/AMBULANCE/FIRE: Hospital 21.212; Police 22.222; Fire 999 emergency or 20.404.

EMERGENCY CO-ORDINATION CENTRE: U.S Coast Guard, Pago Pago, American Samoa, 80 miles East of Western Samoa.

SHORE LEAVE: No restrictions.

BANKS: Bank of Western Samoa, P.O.Box 189, Apia, Western Samoa. Tel: 22 422. Telex: 258.

Pacific Commercial Bank (Affiliate Bank of New South Wales and Hawaii), P.O.Box 192, Apia, Western Samoa. Tel: 22 781. Telex: PCB 231.

STORING: See "Prelims" page viii.

1. Truck only.
2. N/A.
3. Yes.
4. Yes.
5. No regulations.
6. Yes.

SHIP SUPPLY SERVICE: The Marine & Shipping Division of the Ministry of Transport provides tug-boat services which are available for ship-to-shore transport of personnel and/or essential ship stores, sick crew members, etc., on application to the Secretary, Ministry of Transport.

GENERAL: *Supplies:* Provisions available. Deck and engine room supplies can be obtained in limited quantities.

Divers: No divers other than scuba divers are available, and skin divers may be recruited for up to 50 ft. diving.

Oil Pollution: The pumping of bilges, etc., within harbour limits is not permitted and *heavy penalties will be imposed for any breach.*

Garbage Disposal: The dumping of refuse of any kind within harbour limits is strictly prohibited. Properly covered receptacles will be made available and rubbish disposal vans will clear them as necessary. A small charge will be made for this service.

Charts: BA 1730 – Samoa or Navigation Islands.
BA 1339 – Plans in Samoa.
BA 2211 – Apia Harbour.

AUTHORITY: Government of Western Samoa, Ministry of Transport, P.O.Box 1607, Apia, Western Samoa. *Tel:* 23 700 and 23 701. *VHF:* Channel 16. *Telex:* 21 Malo Sx. *Contact:* The Secretary, Ministry of Transport. Peter Smith, Assistant Secretary Marine and Shipping, and Acting Harbour Master.

Yemen Arab Republic

GENERAL:

CIRCULAR: Extract from the Circular dated 21st June, 1975 from the Hodeidah Port General Corporation, Hodeidah, Y.A.R.

Information and General Condition:

1. *Payment of Tolls and Dues:*

All charges imposed herein are payable in cash, in advance except in the circumstances in which the General Manager of the Hodeidah Port General Corporation exceptionally agrees otherwise.

2. *Definition to Certain Terms:*

(a) "Vessels" shall deem to refer in the Regulations to every floating craft made to sail on water by its or without its own means, whether or not fit for navigation.

(b) "Working Day": Commences at 0600 hrs. and ends at 1800 hrs. Night: Commences 1800 hrs. ends 0600 hrs. following day. Weekend: Commences Thursday 1200 hrs. and ends Saturday 0600 hrs.

3. *Public Holidays:*

The following occasions are observed as Public Holidays, which commence from 1200 hrs. on the preceding day and end at 0600 hrs. following the holiday:–

1. Weekly Holiday: Friday.
2. Al-Hijra (Moslem New Year): *1st Muharram.
3. Maulid-El-Nabi (Prophet's Birthday): *12th Rabia Awal.
4. Al-Meiraj (Prophet's Ascension Night): *27th Rajab.
5. Al-Shaabania: *15th Shaaban.
6. Idd-El-Fitr (4 days): *1st to 4th Shawal.
7. Idd-El-Adha (5 days): *9th to 13th Dulhijja.
8. Revolution Anniversary: 26th September.
9. 13th June (National Holiday).
10. Labour Day (1st May).
11. Revolution Day (14th October).

*N.B.: For Hijra Calendar dates, the corresponding Georgian Calendar dates will be those proclaimed by the Government of the Yemen Arab Republic.

CIRCULAR: To Owners/Masters.

We quote below text of a circular dated 21st January, 1979, issued by the General Corporation for Ports and Marine Affairs, Hodeidah, for your information and necessary compliance:

"No vessel, having no workable derricks or winches of her own, shall be received or accepted.

Agents shall be responsible for said obligations and without any liability to the Port General Corporation, in all Yemen Ports.

Due to non-availability of discharging means of floating cranes at anchorage and non-guarantee of available shore cranes, advisable you ensure that all ships calling under your Agency should be fully equipped as required."

PILOTAGE: Pilotage is compulsory on all vessels irrespective of their size, on entry and departure.

FINES:

1. A minimum fine of Rials 500/– and not exceeding Rials 2,000/– for failing to hoist the flag of the Yemen Arab Republic on the highest mast of the vessel.

2. Rials 160/– for arrival at outer harbour without prior notification (at least 24 hours' prior notice is required).

3. Vessels attempting to enter the Inner Harbour without prior permit and without Pilot will bear all responsibilities against that in addition to a fine of between Rials 5,000/– and 10,000/–. This is also applicable on sailing.

4. Rials 500/– to 1,000/– for draining water onto the quays in addition to the responsibility for whatever may be caused against that.

5. Rials 500/– to 1,000/– for throwing garbage overboard.

6. Rials 500/– to 1,000/– for immobilising/repairing engines without prior permission from the Authorities.

7. In case a Pilot is called to take the vessel out but she fails to sail for reasons of her own or her Agents, the following expenses will be charged in addition to Pilotage fees:

(a) Pilot detention.
(b) Tugs' assistance.
(c) Unmooring fees.
(d) Any other expenses.

8. The Corporation also reserves the right to impose any fine considered for violating its rules and regulations.

HODEIDAH: 14.48 N. 42.55 E.

Also see "General" before first port.

FLAG: It is essential that from the time they enter Yemen territorial waters all vessels fly the Yemen Arab Republic flag and this should be flown continuously until they leave these waters on sailing. Failure to observe this courtesy may result in a heavy penalty. The design of the flag is red, white and black horizontal stripes of equal size with green star in centre of white stripe.

DOCUMENTS: On arrival 16 copies of Manifests of cargo for discharge are required and each must be endorsed with the word *Correct* by the *Customs Authorities* at the Port of Loading. It is imperative that at least 2 of the 16 copies of manifests on board the ship should be freighted copies, otherwise 2 additional copies, showing freight details should be airmailed to Hodeidah separately to arrive in advance of the vessel. The Master should also be in possession of 1 copy of each Bill of Lading and certificate to show vessel is not blacklisted.

PILOTAGE: Pilotage is compulsory and as the entrance of the Channel giving access to the Port cannot be observed from the port area itself it is essential that accurate ETAs be given to the Agent in order to avoid delays waiting for a Pilot.

Vessels will be piloted down a dredged channel of about 8 miles in length. The channel, which is buoyed with black starboard and red port buoys, is 7.5 m. deep and 100 m. wide.

Pilot boarding position: Lat. 14° 56′ N., Long. 42° 54′ E.

ANCHORAGE: Masters are also recommended to ensure that on arrival they anchor off the entrance to the new port to await the Pilot and do not anchor off the old port opposite the town some 5 miles to the South and which is still shown as being the Port of Hodeidah on some charts. Vessels anchoring in the wrong area may suffer some delay before they can be contacted and asked to proceed to the correct area. Masters should be advised to anchor at the outer anchorage in the following position: Lat. 14° 55′ N., Long. 42° 54′ E. Also see "Shipmaster's Report – May 1982".

RESTRICTIONS: The approach channel is dredged to 9.5 m.

MAX. SIZE: Max. draft 30 ft. Also see "Shipmaster's Report", dated May 1982.

HEALTH: All members of the crew must be vaccinated against yellow fever and cholera otherwise permission will not be given to disembark.

RADIO: Masters should also ensure that a radio watch is kept to receive calls from the Port Authorities. The Hodeidah Radio station is operative between 0600 and 1800 hrs. daily, the call sign is: 4WD or 4WD3 (short).

TUGS: 6 tugs, 375 h.p. – 1,800 h.p. Pilot launch 250 h.p. also available to assist.

BERTHING: The quay is 540 m. in length with 4 berths, the first 70 m. long, depth 6 m., the second, third and fourth are of 150 m. length and 8.5 m. depth. *Officially, ships berthing are restricted in length to 180 m. and to a max. draft of 26 ft.*

The quay is of concrete construction and is well founded, vessels being secured to bollards in the normal manner. Use of rat-guards is recommended. The quay is equipped with 4 electric cranes described as having a max. capacity of 5 tons. Floating crane of 75 tons capacity available.

There is also a dolphin berth for discharging of petroleum products, which is connected by submarine pipes to storage tanks near the port area. The depth alongside is 6 m.

STEVEDORES: All labour is provided by Agent's representative including winchmen and tally clerks, but winchmen are provided entirely at ships' risk.

Rates of discharge vary but are quite satisfactory and with bagged cargo the average obtained is 30 tons per hatch per hour. Night work is possible.

Vessels are expected to supply food on board to cargo supervisors, foreman, and tally clerks. It may be left to Master's discretion whether this is supplied, but if not the Agency will have to supply same and the cost will be debited to the vessels.

Working Hours: Normally from 0600 hrs. to 1100 hrs. and again from 1300 hrs. to midnight. Additional work outside these hours, including after midnight can usually be arranged if necessary, although this cannot be guaranteed. Any work after midnight is overtime.

MEDICAL: Hospitals at Hodeidah and Sanaa-Taiz.

FRESH WATER: Available; pumping rate 10 t.p.h.– 15 t.p.h.

FUEL: Small quantities of diesel oil available from Yemen Petroleum.

CONSULS: (and Embassies):

Algeria
China
Egypt
E. Germany
Ethiopia
France
Italy
Iraq
Korea
Kuwait
Lebanon
Libya
Saudi Arabia
Syria
U.S.S.R.
United Kingdom
U.S.A.
W. Germany
Yugoslavia

REPAIRS: Light repairs can be carried out.

SURVEYORS: Lloyd's Agency available.

AIRPORT: Flights to Sanaa. Also flights from the new Hodeidah International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest, Sunday being a normal working day. There are also a number of Moslem holidays. Work is usually possible on such days but cannot be guaranteed. Holidays for special occasions are also liable to be declared at short notice. Friday if worked 50% and public holidays 100% surcharge. During the Moslem fast period of Ramadhan lasting about twenty nine days, which again varies from year to year, work is slower.

Also see "General" before first port.

SHORE LEAVE: Allowed. The Master should prepare a list of persons wishing to go ashore as Agent has to issue I.D. cards.

REGULATIONS: It is strictly forbidden for crew and passengers on board to take photographs while a vessel is in the harbour approaches or secured to the jetty in harbour.

Any vessel which permits oil and/or water to be discharged into the harbour will be liable to a minimum penalty of US $500.

DEVELOPMENTS: A container-Ro/Ro quay is under construction. Also see "Report" below.

REPORT: Received August 1979.

Hodeidah Port is situated 5 km. away from the old town, built in 1961, the population of which is about 200,000. It was built on the Red Sea Coast, S.E. of Khour Ras Alkatheeb, 4 km. away from the town of Hodeidah.

Hodeidah port is built at a location safe from storms and strong winds. The port is under the administration of the Ministry of Public Works, managed by the Hodeidah Port General Corporation. It has a direct connection with the capital city of Yemen, Sana'a, by a modern highway and another connecting the twin capital Taiz.

The official characteristics of the port are given as an external pool, 10 m. in depth, where ships can anchor. A channel, minimum 45 m. wide, about one km. long and 7.9m. to 8.3 m. deep, enters into the inner pool. Maximum draft allowed is 25 ft. at HW. Buoy markings and signals for safe entry and departure are available The dimension of the inner pool is irregular, about 500 m.×400 m. Overall depth is 7.6 m. at LLW, except for 100 m. wide strip along the 300 m. berth where the depth is 8.5 m.

The port consists of a quay for loading and discharging and one special jetty for tankers. The total length of the quay is 570 m. forming 4 berths of 120 m., 150 m., 150 m. and 150 m. respectively. The quay can receive vessels up to 180 m. in length with a draft of 25 ft. at HW. The quay is equipped with 4 electric shore cranes of 5 tons maximum lifting capacity each and two mobile cranes each of 30 tons capacity.

Discharging speed for bagged cargo is between 250 tons and 300 tons per hatch per day. For general cargo the discharging speed is about 150 tons per hatch per day.

At present, there are 21,660 sq.m. of cargo storage floor space:

Shed No. 1	45 m.×60 m.	2,700 sq.m.
2	96 m.×60 m.	5,760 sq.m.
3	50 m.×60 m.	3,000 sq.m.
4	50 m.×60 m.	3,000 sq.m.
5	25 m.×60 m.	1,500 sq.m.
6	45 m.×60 m.	2,700 sq.m.
7	50 m.×60 m.	3,000 sq.m.

and several open storage yards for heavy machinery and equipment. There are fuel tanks with a storage capacity of 16,000 cu.m. connected to the oil jetty by means of a pipe-line system. A wireless station for communications, from ship to shore and vice versa, is also available.

Future Development: The development of Hodeidah Port includes:

1. Dredging:
   a. Deepening of the approach channel to 9.0 m. below MLW (Mean Low Water) with the provisions of a passing bay and deepening of the port basin to 9.0 m. below MLW.
   b. Deepening to a depth of 9.5 m. MLW alongside Berth No. 2 and No. 6 (completed).
   c. An area to the West of Berth No. 1 to a depth of 4.0 m. MLW.
   d. Reclamation of land to construct Berth No. 6.

At the end of 1980 Hodeidah port will have:

Berth No. 1, length 110 m., dredged to 8.0 m.
Berth No. 2, length 150 m., dredged to 9.5 m.
Berth No. 3, length 150 m., dredged to 9.5 m.
Berth No. 4, length 166 m., dredged to 10.0 m.
Berth No. 5, length 195 m., dredged to 10.0 m.
Berth No. 6, length 195 m., dredged to 10.0 m.
Oil berth for 15,000 d.w.t tankers dredged to 10 m.

2. Berth No. 6: 195 m. long berth with a 40 m. wide apron. The corner between Berth No. 5 and 6 could be used to handle Ro/Ro vessels. Berth No. 6 is designed for container ships of: 22,500 d.w.t., length 204.0 m., breadth 31.0 m., draft 9.2 m., container capacity 1,522 units.

One container crane of 30.5 tons capacity will be installed on Berth No. 6 and will be able to load and unload between 30/40 containers per hour.

Ro/Ro Corner: Ro/Ro ship 22,750 d.w.t., length 210 m., breadth 33.0 m., draft 9.1 m.

3. Slipway: Provision of a 500 ton slipway next to the mechanical workshop. Slipway will be able to handle vessels 32 m. in length, 10 m. wide and 3.2 m. draft.

4. Paved Storage Areas: The concrete paving of open storage areas behind the 40 m. wide apron will amount to approximately 80,000 sq. m.

5. Buildings and Other Services: Construction of service buildings will include offices of the Port Corporation, Customs, Labour, First-aid with canteens, wash places and toilets.

6. Oil Terminal: 2 new breasting dolphins and 2 mooring buoys for handling tankers up to 15,000 d.w.t. (completed).

7. Floating Craft: A new 75 ton self-propelled floating crane has been provided.

8. Cargo Handling Equipment: 8 high level boom cranes, 1 port type mobile crane, 10 forklifts, 10 tonne trailers with tractors, 3 Ro/Ro tractors with goosenecks and Ro/Ro trailers.

9. Grain Silo Complex: The project under construction in Hodeidah port consists of a 20,000 ton Silo and a 14 stall bagging plant which has a bagging capacity of 200 per hour. The whole installation has a through put of 160,000 tons per year.

10. Water Mains: These will be extended to Berth No. 6 and fire mains will be from sea water and maintained with a 70 m. head by hydraulic accumulator.

Special Uses:

Berth No. 4 – grain unloading (40% berth occupancy).
Berth No. 6 – containers (with 30.5 ton container crane).

Container capacity will exceed 300,000 tons per year but will depend on the capability to empty containers and create an equivalent to that of the shipping.

Ultimate capacity of Hodeidah port in 1980 with 6 berths will be as follows:

Berth No. 1	150,000 tons
Berth No. 2	200,000 tons
Berth No. 3	200,000 tons
Berth No. 4	200,000 tons
Berth No. 5	200,000 tons
Berth No. 6	300,000 tons
Ro/Ro	200,000 tons
Total	1,450,000 tons

Cargo must be carried by ships with a draft less than 9.2 m.

Arrival at Hodeidah/Ras Alkatheeb Ports:

Vessels arriving at Hodeidah Roads should anchor in the following positions inside Buoy No. 2.

Lat. 14° 55′ 58″ N., Long. 42° 53′ 53″ E.

Masters should radio or cable Agent the following information at least 24 hours in advance:

(i) Exact ETA.
(ii) Draft – fore and aft.
(iii) Quantity of cargo on board and distribution.
(iv) GRT, NRT and LOA (When vessel is calling for the first time).

Through Hodeidah Radio Station, Calling Sign: 4WD 500 kHz. (Frequency from 0500 hrs. up to 1700 hrs. GMT). 72 and 48 hours prior notice of arrival can also be given through Aden Radio.

Pilotage on entry and departure is compulsory. Normally, no pilotage is allowed after 1630 hrs., or before 0600 hrs. Hence vessels arriving in Hodeidah Roads after 1630 hrs. may not be piloted in until 0700 hrs. the following morning. Likewise, vessels which do not sail before 1630 hrs. may not be piloted out until 0600 hrs. the following day.

Supply of fresh water and shipchandlering is available.

Documents:

4 Copies of Cargo Manifest.
2 Copies of Freight Manifest.
1 Copy of Bill of Lading.

(These should be airmailed to Agent after departure of vessel from port of loading.)

11 Copies of Cargo Manifest.
1 Copy of Freight Manifest.

(To be handed over to Agent by Master on arrival of vessel.)

Port Formalities:

1. Doctor.
2. Immigration.
3. Customs.

FOLLOWING TO BE STRONGLY OBSERVED BY ALL MASTER/CREWS OF VESSELS CALLING AT HODEIDAH:

1. Sale of wines and spirits prohibited.
2. Discharging water onto quay and dismantling ships' engines at berth not allowed.

In addition to above, Masters/Crews should be advised to take serious note of all prohibitions stipulated in the Port Tariff, see "General" before first port – "Fines".

SHIPMASTER'S REPORT: May 1982.

I came in and berthed at No. 6 Berth at 8.5 m. draft and discharged via vacuvators direct into lorries and managing a rate of 3,000 t.p.d. Pilot reckoned 29 ft. maximum can be taken in.

Other points in "Guide" seem accurate, but with the chart BA 3050 being too small I cannot see many Masters bringing a large ship into the recommended anchorage position. I anchored 3 cables N.N.E. of the No. 2 Buoy in better water.

PURSER'S REPORT: August 1982.

Requirements:

1 Maritime Declaration of Health. (Any country's (preferably Arab) is accepted suitably amended).
1 Vaccination List (ship's form).
10 Crew Lists (ship's form).
2 Bonded Stores Lists (ship's form).
1 Crew Effects List (ship's form).

Sundry Customs and Agent's forms were brought aboard on arrival. These required the usual information regarding draft, fuel, water, and tonnages, etc.

Customs and Port Authorities were very particular that cargo tonnages were accurate as per manifest when completing forms.

Customs sealed both bond and beer rooms, but placed no restriction on quantities in bars and cabins with the proviso that alcohol was not sold or given to locals. An additional quantity of bonded items was allowed to be removed before sailing.

Courtesy Ensign: Supplied in the U.S.A. and not marked to show which was top. It should be flown with the red stripe uppermost.

Mail: The Agent advised that mail both in and out of the country was slow and unreliable.

Laundry and Chandlery: Both services available but not used.

Navigation: The Master advises that navigational marks could well change due to berth extensions and port improvements. A container crane is at present under construction.

SHIPMASTER'S REPORT: April 1984.

Pilotage: Ships can enter or sail out of harbour at anytime, if Agent makes strong request. All the buoys in the channel as well as the approaches including the Sea Buoy are lit.

Berthing: Observed a ship entering with 30 ft. draft and Pilot confirmed that vessels can enter up to 30 ft. draft.

Stevedores: Bagged cargo discharging rate increased to up to 30 t.p.h. provided that receivers are able to supply sufficient trucks in time.

The stevedores no longer request drinking water from the ship, as they drink bottled water supplied from shore.

AUTHORITY: Hodeidah Port Authority.

AGENT: The Hodeidah Shipping & Transport Co. Ltd., P.O.Box 3337, Hodeidah, Yemen Arab Republic. Tel: 2403/4/5. Cables: "Hodship". Telex: 5510 (Hodeidah) and 2218 (Sana'a). Answerback: "Hodship". Branches at Mocha, Saleef, Taiz and Sana'a.

MOCKA: 13.17 N. 43.10 E.

Mocka new port opened in June 1979, with equipment for loading and unloading.

BERTHING: 150 m. of quay for vessels of up to 26 ft. draft (Depth 27 ft). Vessels may berth simultaneously. Cargo is discharged direct onto trucks or onto open area. New sheds are under construction.

TUGS: 2 available.

FUEL: Not available.

TIME: GMT plus 3 hrs.

REPORT: Received August 1979.

The project of constructing Mocka Port has been in execution since April 1978. The construction was completed during April 1979 and the port was officially opened to International traffic in June 1979.

Location: Mocka is connected to Hodeidah by a road of 240 km. out of which 45 km. is gravel and will be surfaced during 1979 as programmed by the government. Mocka is also connected to the twin capital of the Republic, Taiz, by a road of 110 km.

Jetty: The port consists of a jetty of 150 m. in length and 35 m. wide with a draft of 8.5 m. during low tide. This jetty can accommodate 2 vessels at a time, each of 150 m. length, on both sides and a Ro/Ro vessel at the head. A protecting jetty for breakwaters is also constructed for controlling the force of strong waves. It is 750 m. in length and 15 m. wide with various depths from 5 m. to 3.5 m. This jetty is constructed for the purpose of protecting the main jetty and can receive coasters and lighters of aforesaid drafts.

Anchorage: The dimension of the manoeuvring area, for vessels securing at berth and departing from the main jetty, is 420 m. The length of the channel leading to the manoeuvring area is 2,000 m. with a draft of 28 ft. 5 in. during low tide, whereas the draft during high tide is about 30 ft. Vessels calling at Mocka should anchor at the following position: Lat. 13° 20′ 01″ N., Long. 43° 13′ 02″ E.

Storage of Cargo: The reclaimed area for storage of discharged goods consists of 300,000 sq.m.

Future Developments: There are plans for building other jetties together with protecting jetties in the near future.

Bunkers: Bunkers, at present, are not available at this port. Any vessel calling at this port is required to supply fresh water for drinking purposes to all labourers during stevedoring operations.

Radio: Vessels calling at Mocka are advised to contact Agent through Hodeidah Radio Station, call sign, 4WD, 500 kHz (frequency from 0500 hrs. up to 1700 hrs. GMT), as, at present, this port is not equipped with a wireless station. It is proposed to establish one during 1979.

SHIPMASTER'S REPORT: August 1980.

Vessel: 6,000 d.w.t., 104.0 m. LOA. Discharged 2,000 tons of RBD palm oil.

Port Limits: None defined, however vessel is in port limits and 'arrived' once anchored within the anchorage marked on BA Chart 1955.

Documents: 1 copy personal effects declaration, 1 copy stores list, 1 copy inoculations and vaccinations and at least 10 copies of cargo manifests, 3 copies of crew list.

Anchorages: Vessel anchored safely in a position with the North Fort Barge 103° True −1.74 miles. Vessel's max. draft was 20 ft. and there was 30 ft. of water below the keel at 1 hour before low water. It is inadvisable to proceed further South, especially at night due to the placing of unlit channel marking buoys by the port.

Pilotage: There are presently two berths, one on either side of a finger wharf. The Pilot boards at the anchorage and brings the ship alongside one of these berths. There are 3 Pilots in Hodeidah and 1 in Mocka.

Max. Size and Restrictions: Max. permissible draft is 26 ft. salt water and max. LOA permissible is 500 ft.

Radio: None. The port operates VHF on Channels 16 and 14. There are no fixed hours and the port radio is in operation only when the port wishes to communicate with the vessels.

Radar: None.

Tugs: 2 tugs assist vessels for berthing and unberthing. We were assisted by the 'Markaron' (2,000 h.p.).

Cranes: None. There are mobile cranes available with the prior arrangements of the ship's Agents. Otherwise ship's gear is mainly used.

Stevedores: None in the strictest sense. Labour is recruited by the Agents and made available on board.

Tankers: There is no facility for discharging petroleum cargo.

Density: 1025.

Fresh Water: Not available.

Fuel: Not available.

Fire Precautions: None.

Consuls: None.

Repairs: Not available.

Dry Docks: None.

Surveyors: None.

Watchmen: None.

Customs Allowances: Bonded stores are not sealed. Master is verbally informed not to make any issue from the bonded stores without the Customs permission. All officers and crew who declared their quota were allowed to keep same.

Repatriation: Possible, but local Agent has no knowledge of how to effect it.

Airport: None.

Time: GMT plus 3 hours.

Shore Leave: Allowed. The town is situated about 4 km. from the jetty. There is no entertainment that seamen can find in this town and it is not advisable to be ashore after dusk.

ID Cards: None are issued but ship's personnel going ashore have to carry their seaman's book or passport.

AGENT: See "Hodeidah".

RAS ALKATHEEB: 14.55 N. 42.53 E.

The Port of Ras Alkatheeb is situated 14 km. from the main city of Hodeidah and connected by a gravel road which is in the process of being resurfaced and broadened with two traffic lanes on the same alignment, thus providing a first class road transport link between Hodeidah and Ras Alkatheeb. Also see "Hodeidah".

BERTHING: The port has a berth 180 m. in length and 6 m. wide, pontoon type, with ships berthing on either side. This port can receive vessels with a max. draft of 26 ft. at high tide. The port also has a pontoon comprising of 60 m. in length and 16 m. wide with a draft of 14 ft. Vessels can be secured to barges and coasters with a draft of 14 ft. which can be connected to the shore, thus enabling ships to discharge directly onto waiting trucks. Said pontoon is mainly used for bagged cargo on direct delivery basis.

Presently, this port does not have shore crane facilities and all unloading is done with ship's own gear.

Storage and Delivery: Due to lack of storage facilities at this port, delivery at present is given directly under the hook.

SHIPMASTER'S REPORT: November 1980.

1. Port does not accept Vessel's Registration until vessel is anchored between Buoy No. 1 and No. 2. This as per the Port Radio VHF station.
2. Buoy No. 2 is placed about 6 cables N.N.W. of charted position.
3. Do not attempt entry at night since Buoys are unlit and there are many uncharted stranded wrecks visible only during daytime.
4. Tugs available: 4×700 b.h.p. and 3×1,800 b.h.p. Pilotage only during daytime.
5. Vessel berthed at Ras Khatib pontoon. Max. draft 8.0 m., total effective length of pontoon 270 m.
6. Port issues a directive to Agents giving estimated time to discharge. If not completed, port charges at the rate of 4 Rials/per metre/per hour of stay extended.
7. Distance from Ras Khatib berth to town 15 km. Only 10 to 15 shore leave passes given to vessel regardless of number of crew.
8. No chipping and scraping permitted but painting is allowed.
9. Fresh water inside port is $4/– per ton, at Ras Khatib $20/– per ton by barge.
10. Provisions available but expensive.
11. Repatriation possible but very difficult due to having to obtain permission from Saana (Capital).
12. Cargo work is fast, 260 tonnes of cement per gang per day. Normal shift 0730 – 1200 hrs. and 1500 – 2330 hrs.
13. As per "Pilot", there will be dredging carried out soon and also lighted buoys will be placed.
14. Ras Khatib light Fl. 3 sec. of very low power.
15. Yellow fever inoculation not compulsory unless coming from infected area.

SALEEF (Salif): 15.18 N. 42.41 E.

Saleef port is a natural port on the Red Sea, approximately 80 km. North of Hodeidah port. Two routes, one round the North end of Kamaran Island and the other around the South end provide suitable access to the harbour.

As prevailing winds are generally Southerly or Northerly, vessels are able to approach the berth from downwind. This is important as vessels will probably have to berth without tug asistance. Initially, mooring facilities are designed for 50,000 d.w.t. vessels and consists of a wharf head 20 m. wide, 93 m. long with two dolphins. A 10 m. wide trestle connects the wharf head to the shore. Facilities are designed to absorb the berthing impact of a ship approaching with a velocity component of 15 cm. per second perpendicular to the berth face and for a 50 tons mooring line pull.

Future developments: For further developments of Saleef port, a French consulting firm has been awarded the contract, as consultants only, to submit a report on future developments of this port.

SHIPMASTER'S REPORT: December 1979.

Acknowledgements: Most of the information has been gleaned from local Agency representatives and Capt. A. Saeed, Harbour Master.

Reference has been made to Red Sea Pilot and various BA Charts. Local written information is unavailable for the area concerned.

General: Salif lies some 60 km. North of Hodeidah, it is a natural deepwater harbour sheltered by Kamaran Island.

Since 1976 the port has enjoyed moderate expansion and can now boast a modern jetty capable of berthing ocean going vessels; other pontoon type berths are available, these being linked to the shore by small stone jetties. At present the port can accommodate two vessels of up to 200 m. length with a draft of 12 m.

Salif is geared for the export of bulk salt and the import of grain and some general cargo. In the near future a further pontoon type berth is due to come into operation to be used solely for the import of bulk cement. A bagging plant and silo have been constructed to handle the additional cargo.

This report is mainly directed to the facilities associated with the import of grain, however where possible relevant information has been included which could prove useful to other vessels trading in the area.

Documents:

6 Crew Lists with passport numbers.
2 Bonded Stores Lists.
2 Personal Manifests.
2 Vaccination Lists.
3 Copies Cargo Manifest.
Local inward forms made out on arrival.

Approaches: (BA Charts: 543 and 548). Recommend approaching around the North end of Kamaran Island, as mentioned in Red Sea and Gulf of Aden Pilot, page 390.

The lighthouses stand out well, but at night they are not lit (December 1979). The only difficulty in making Salif, in daylight, is passing to the South of N.W. shoal light, the channel at this point being about one mile wide. At night the lighthouses prove quite good radar targets, and the various islands etc. show up quite well. Once around the top of Kamaran Island course can be set down Kamaran Passage to the anchorage area off Ras el Salif. Charterers frequently advise that passage is possible South of Kamaran Island, however this is not advisable; the leads mentioned on the chart are very difficult to see and there is no room for error.

Anchorage: No specific area designated but anywhere in the vicinity of Salif Jetty. For vessels waiting for the wheat berth it is best to anchor about 0.75 miles West of Ras el Salif. Good holding ground in about 14 fathoms of water. For vessels with poor radar it would be best to anchor outside Kamaran Island until daylight, when passage can be made in safety.

Weather: See "Red Sea Pilot" for information. At Salif the wind usually picks up during the day and this can delay berthing if the strength is above Force 4.

Pilotage: Pilot boards in anchorage area from medium sized launch. Yemenese Pilot with limited English.

Daylight pilotage only.

Berthing: Vessels berth, at the bagging plant pontoon, head to wind. The pontoon consists of a flat topped barge made fast to a small stone jetty; it is well fendered with car tyres. The offshore anchor is used whilst coming alongside and a launch runs various ropes ashore to posts set on the land. Five ropes are required either end and it is necessary to join the first few together as considerable lengths are initially run. The bagging pontoon can only accommodate one vessel at a time. See "Shipmaster's Report – May 1982".

The general cargo and salt exporting jetty lies some distance to the South of the bagging plant. This pier can take one vessel of up to 200 m. in length. Facilities at this berth are an improvement over the pontoon, however for the import of grain type cargoes, it is not so efficient, it being necessary to bag the cargo by hand. Both berths can take vessels with up to 39 ft. draft.

Buoys are at present being laid to the North of the bagging pontoon and these could prove an obstacle for vessels berthing. The moorings are being laid to assist vessels making fast to the new cement pontoon (see "Projects").

Quarantine/Health Regulations: Doctor boards on arrival, either at anchorage or alongside. No health forms as such. Smallpox only vaccination certificates required unless vessel from infected area when Yellow Fever and Cholera certificates are needed. No derat facilities.

Customs: Usual Islamic laws in force. Bond not sealed and apparently no objection for crew to consume spirits/beer on board. On no account must alcohol be given/sold to local Yemenese.

Immigration: Passports are inspected on arrival. (Harbour Master acts as translator for Immigration Authorities.) Shore leave granted with passes for Salif area only. Special permission has to be given to proceed outside local area, i.e. Hodeidah.

For crew repatriation, passports are taken to Sanaa by Agent for necessary visas to be arranged.

Medical Facilities: One doctor resides in Salif, Yemenese and speaks English. He will attend the ship rather than the patient visiting him. The nearest hospital is in Hodeidah.

Port Operations (Bagging Plant): Foremen and workers are hard working. The foremen reside in caravans close to the bagging plant whilst most of the stevedores come from Salif.

The method of discharge is to load a number of diesel driven evacuators on deck and by various pipelines, these are connected to a storage hopper situated on the pontoon/barge. The hopper is connected to a small bagging plant and by means of conveyors the sacks are loaded onto road transport.

Discharge rates per 24 hours worked between 1,600 tonnes and 1,850 tonnes. Charter Party rate indicated about 750 tonnes per day. The takeaway rate from the hopper appears to be adequate with plenty of road trucks available. The grain is shipped immediately to different parts of the Yemen.

It is usual to carry sufficient bags to enable the complete discharge of the grain to go unhindered. The bags are baled and discharged onto the pontoon at regular intervals.

Ship's gear is required at each hold to sling the pipes that lead from the evacuators into the hatch. It is also required for discharging the gunnies and for loading the evacuators (1.5 tonnes). The evacuators appear reliable but spillage of diesel results during re-filling etc.

Fresh Water: Available but expensive. Supplied by road tanker at 15 tonnes a time, it is necessary to use ship's pump for pumping the water aboard. Agents require ample notice prior to supplying water.

Fuel: Heavy oil and diesel oil not available unless barged from Hodeidah.

Stores: Not readily available; fresh stores difficult to obtain.

Agency: The main Agency lies some 60 km. away by track, and the ship is attended by a runner who commutes between Hodeidah and Salif. Considerable delays result before ship's business can be completed and it is necessary for everything to be in writing; repatriation, in particular, is difficult for the organiser as well as the traveller.

Communications between Salif and Hodeidah are non-existent, a telephone line exists, but this is out of order, it is however possible to communicate directly through Portishead Radio and sometimes the only way to get messages out.

Local currency and American Dollars are obtainable from the Agents. It is difficult to obtain the money from the Agents and generally it is best to arrive with sufficient cash on board to cover any expenditure.

To arrange repatriation it is necessary to allow at least six days. Visas have to be obtained from Sanaa and tickets arranged. If pre-paid tickets have been sent from U.K., then they must arrive in ample time. The airport at Hodeidah has regular connections with Sanaa which in turn is linked into most air routes via Paris. Transportation from the ship to Hodeidah is by Land Rover or similar four wheel drive vehicle.

Port Regulations: Nothing in writing. The Harbour Master, Capt. Saeed, is the person to approach if anything required. Apparently Salif is designated a military zone and this is the reason no written information is available.

Gangway: The vessel only lies alongside for a distance of about 80 ft. amidships and consequently a pilot ladder is used instead of a gangway or brow. If this causes any difficulty, ship's lifeboat can be used as a ferry between gangway and shore.

Watchmen: Supplied by local Police/Army. They remain aboard during vessel's stay and keep pilferage to a minimum. They also keep close watch on any alcohol that may be obtained by local Yemenese.

Shore Leave: See "Immigration".

Garbage: No facilities for taking garbage away from the ship; best to dump waste food etc., whilst retaining cardboard boxes, and plastic containers.

Repairs: Possible to immobilise main engines, as once on the berth it is unlikely to shift. No repair facilities ashore.

Time: GMT plus 3 hours (no change).

Flag: Yemen Arab Republic Flag must be flown at all times. Red, white, black horizontal stripes with a black star in the white section.

Consuls: Situated in Hodeidah or Sanaa. Harbour Master available for Noting Protest, etc.

Tugs: None available for berthing though frequently tugs operate in the area towing barges, pontoons, etc.

VHF: Situated in port office but hours of working very flexible. The Harbour Master normally calls any vessel up shortly after anchoring.

Fire/Ambulance: None available.

Projects: A new pontoon berth, similar to the grain berth, is being constructed about 0.25 miles to the North. Silos have been erected close to the shore and are capable of storing 9,000 tonnes of finished cement. A bagging plant has also been constructed next to the silos. It is intended that cement be shipped, in bulk, and with evacuators discharged into the silos. This project is due for completion sometime in 1980.

SHIPMASTER'S REPORT: May 1982.

I was in Saleef recently with 39,127 tonnes wheat – ship 182.08 m. long. The following are changes to information in the Guide.

The barge – pontoon berth with bagging plant no longer exists and apart from cement boats all ships now berth at jetty by Salt terminal.

Minimum water I found there in 18 days' stay was 18.5 m.

Ship's gear must be used and grain is dumped on wharf and bagged in situ, being taken away by lorries. Rate erratic, between 900 t.p.d. and 2,000 t.p.d.

Vessel has to vacate berth for car carriers and salt loaders.

No shore leave permitted.

Bond is now sealed. No restrictions on what is kept out.

BANKS: National Bank of Yemen. Local currency: Dinar.

On presentation of passport-receipt, US$ (and only this currency) can be exchanged for Dinars (approximately US$3 for 1 Dinar).

It is very difficult to obtain US dollars in exchange for Dinars.

SHORE LEAVE: In Mukalla (as well as in Aden) when passing Customs Gate, passport is exchanged for receipt by the Immigration Officer on duty. When returning from shore leave this receipt is again exchanged for passport.

Note: It is difficult to make Officials understand that crew members and/or visitors from abroad are not in possession of a receipt, which makes a crew change extra time consuming (Charterer had to wait 3 hours before he was allowed to proceed to the ship).

SHIP SUPPLY SERVICE: See "Aden".

DELAYS: At present congestion may occur during the S.W. monsoon period.

In future congestion may occur as infrastructure of the new port leaves much to be desired (Roads to/in/from the port, direct delivery etc.).

GENERAL: *Transit Time Airmail Post:*

Mukalla-Europe: Minimum 2 weeks, maximum 3 weeks.

Europe-Mukalla: Minimum 2 weeks, maximum 3 weeks.

Agency: National Shipping Co., P.O.Box 8039, Mukalla, People's Democratic Republic of South Yemen. Cables: "Natship Mukalla" (via Aden Radio).

Importer: National Company for Home Trade, 5th Government Branch, Mukalla.

NOTES

Please also advise Shipping Guides Ltd.

Yugoslavia

BAR: 42.05 N. 19.03 E. (See Plan Book)

PORT LIMITS: Seaward limits of the port defines a line drawn between "Voluica" light and Ratac Point.

DOCUMENTS:

On Arrival:

2 copies Health Declaration.
1 copy General Declaration.
5 copies Crew List.
5 copies Passenger List.
5 copies Crew Personal Effects.
3 copies Stores List.
1 copy Animal Pets Aboard.
1 copy Certificate of Financial Insurance on Civil Liability for Oil Pollution – only foreign ships carrying more than 2,000 tons of oil.
1 copy List of Hazardous Cargoes loaded on board.

On departure:

5 copies Crew List, if any change.
1 copy Cargo Manifest for Loaded Goods.
List of Hazardous Cargoes, if loaded.

PILOTAGE: Advance notice 24 hours through ship's Agent. Pilot boat blue hull, white deck house, with letter "P" on each side. Pilot boards off West Breakwater. Use international signals to call Pilot. Pilot may also be contacted through Bar Radio on VHF.

ANCHORAGE: Safe anchorage West and N.W. off West Breakwater. Anchoring not allowed nearer then 0.5 mile off Breakwater.

RESTRICTIONS: Vessels enter/leave port by day and night. Tankers allowed only during daylight. Depth entrance 14 m..

No restriction on LOA and beam. Foreign nuclear ships enter only with special permission. Leaving or entering port for foreign tankers not allowed if not having said Certificate.

MAX. SIZE: Fully loaded vessels up to 14 m. draft.

RADIO: Bar-Radio, call sign YUW, 500 kHz and 447 kHz. Radio telephony on 2182 kHz on 2 meters band and on Channel 16.

Agents can be contacted through Bar-Radio on VHF.

TUGS: 2 tugs with twin 594 kW engine.

BERTHING: Berth assigned at Agent's request or Receiver's/Shipper's, both for liners or tramps, at the daily meeting of the Harbour Board.

2,500 m. of berthing space and able to accommodate up to 20 oceangoing vessels.

STEVEDORES: The Port Enterprise "Luka Bar" is the sole stevedoring company. Work is done in 2 shifts: first 0600 – 1400 hrs., second 1400 – 2200 hrs. Third shift can be ordered at daily meeting, paid as overtime.

MEDICAL: Medical care available at Medical Centre at Bar.

TANKERS: New oil berth can accommodate tankers up to 80,000 d.w.t., draft limit 14 m. Bunkers from local bunker station. Tank cleaning, pumping of slops and degassing not permitted in port.

Tankers must be ready to leave port at 30 minutes' notice, at any time and at request of Port Authorities.

CARGO HANDLING FACILITIES: Available for all kinds of general cargo, containers, pallets, Ro/Ro, bulk, fuel oil and chemical cargoes. Regular passenger service to Italy and from May – October to Greece.

Grain silos with 30,000 tons capacity with covered Vacuvator.

DENSITY: Sea water.

FRESH WATER: Available from hydrants on quay.

FUEL: Can be obtained from local bunker station. All grades available. A fuel barge may be available in the near future.

GANGWAY/DECK WATCHMEN: Available at Master's request.

OPENING/CLOSING HATCHES: Normally performed by crew, or as per Charter Party.

CARGO GEAR: *Mobile Shore Cranes:* 6×5/6 tons, 3×3 tons, 3×8 tons. Fork-lifts capable of handling containers, Vacuvators, 3 cranes for bulk cargoes. 1×40 ton container crane. If not agreed in C/P, loading and discharging is by shore cranes.

CUSTOMS ALLOWANCES: Yugoslav Customs Regulations apply.

IDENTIFICATION CARDS: Shore passes issued by local Police.

CONSULS: Same as "Rijeka".

REPAIRS/DRY DOCKS: Dry Docks at Shipyard "Veljko Vlahovic", Bijela, 36 miles from Port of Bar, capacity of about 130,000 d.w.t. and 35,000 d.w.t., available for all types of deck and engine repairs. Minor damage can be repaired while loading/discharging.

SURVEYORS: Representative of Yugoslav Register of Shipping at Tivat (80 km.). Bureau Veritas at Dubrovnik and Lloyd's Register at Split.

REPATRIATION: From Bar by bus, train (International Lines), and ship. From Airports Tivat, Titograd and Dubrovnik by plane.

TIME: Central European Time, GMT plus 1 hour. Summer time kept from March to October (date fixed annually).

SERVICES: Compass adjuster at Bijela (100 km.), RDF adjuster at Dubrovnik. Other electronics repairs via Split.

HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 13th, November 29th and 30th. Work can be arranged on Sundays and 2nd day of two-day holiday.

POLICE/AMBULANCE/FIRE: Police Tel. 92; Ambulance Tel. 94: Fire Tel. 93.

SHORE LEAVE: Allowed.

STORING: See "Prelims", page viii.

1. By truck.
2. Yugoslav Federal Regulations apply.
3. Yes.
4. Yes.
5. Yugoslav Customs Regulations apply.
6. Yes.

DEVELOPMENTS: See "Plan".

AUTHORITY: Lucka Kapetanija Bar, Obala 13, Jula 8, Src Gora, 85000 Bar, Yugoslavia. *Tel:* (085) 22-382 Harbour Master; (085) 22-733. *Telex:* 63188. *Contact:* Captain Vickovic Vukasin, Harbour Master.

AGENT: Jadroagent – Bar. Topolica b.b. P.O. Box 10, 81350 Bar. Cable: Jadroagent Bar. Tel: (085) 22194/5. Telex: 63141 Yu Jadrag.

DUBROVNIK (Gruz Harbour): 42.38 N. 18.07 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory. Pilot boards at a point situated approximately in centre of triangle formed by Kolocep Island, Daksa Island and Grebeni Rocks. Pilot boat may be contacted on VHF Channel 16.

ANCHORAGE: In about 22 fathoms in channel between Daksa Island and mainland. This anchorage is exposed to strong N.N.E. winds in Winter time.

RESTRICTIONS: Only port of Gruz is open to commercial traffic, the old port of Dubrovnik (within the city walls) can accommodate only yachts and small craft drawing under 9 ft.

MAX. SIZE: Max. length 230 m., max. draft 32 ft., no limits on beam.

RADIO: Dubrovnik Radio: *Telegraphy:* call sign YUX, working on 500 kHz and 447 kHz, (working 24 hours). Traffic list 0030, 0430, 0830, 1230, 1630, 2030 hrs.

Telephony: Working on 2182 kHz and 2615 kHz, (working 24 hours). Traffic list every odd hour + 20 minutes.

VHF: Listening Channel 16 throughout 24 hours and working on all Channels. Duplex Channel 23 with connection to national and international telephone network. All times are GMT.

TUGS: No permanently stationed tug boats, but can be ordered when necessary from other ports.

BERTHING: Berths for 5 ocean going vessels. 6 cranes from 1.5 to 25 tons lifting capacity.

CARGO HANDLING FACILITIES: The port handles some bulk cargoes (grain and bauxite) occasionally and in small quantities but is not specially equipped for handling these and other cargoes.

STEVEDORES: The port enterprise "Luka Dubrovnik" is the sole stevedoring company. Work is done in 2 shifts: first 0600 – 1300 hrs., second 1400 – 2100 hrs.

MEDICAL: General hospital and medical facilities available.

FRESH WATER: Available from hydrants on quay.

FUEL: Not available. Only oil for diesel engines in limited quantities. Heavy fuel can be delivered by coastal tankers from Split.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: If not performed by crew, stevedores.

CUSTOMS ALLOWANCES: About 40 cigarettes and limited amount wine/spirits per man per day.

CARGO GEAR: Although operations are performed usually with shore cranes ship must have efficient cargo gear and relative certificates.

IDENTIFICATION CARDS: Issued by local police.

CONSULS: Sweden: Konzulat Kraljevine Svedske, Zeljarica 7, Dubrovnik. Tel: 23144. Cables: Svensk.

Netherlands (Vice-Consul): Vicekonsulat Kraljevine Holandije, Gruska Obala 46, Dubrovnik. Tel: 24947.

REPAIRS: Small repairs only.

SURVEYORS: Bureau Veritas.

REPATRIATION: By bus, ship or plane from Dubrovnik International Airport.

TIME: Central European Time. GMT plus 1 hour. Summertime kept.

POLICE/AMBULANCE/FIRE: Police, tel. 92; Fire, 93; Ambulance, 94.

SHORE LEAVE: Allowed.

AUTHORITY: Lucka Kapetanija Dubrovnik, Gruska Obala 75, Dubrovnik. *Tel:* 23386. *Telex:* 27623 Yu Luckap. *Cables:* Luckap.

AGENT: Jadroagent – Dubrovnik. Gruska Obala 63, 50000 Dubrovnik. Cable: Jadroagent Dubrovnik. Tel. 23464 and 24464. Telex: 27514 Yu Jadrag.

KARDELJEVO (Formerly Ploce): 43.03 N. 17.26 E. (See Plan Book)

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at entrance of the channel within a circle of 3 miles radius from Point Visnjica. Pilot station on VHF Channel 16.

ANCHORAGES: Vessels are allowed to anchor West of the line which connects Kunova Cove on peninsula Peljesac with point Lat. 43° 03′ N., Long. 17° 24′ E. on land coast. Depth over 25 m.

RESTRICTIONS: Ship entering channel between Visnjica Point and embankment of right hand bank must keep in middle, leaving buoys to starboard. Recommended speed 5 – 8 knots. Also see "Tankers".

MAX. SIZE: Draft limited to max. 34 ft. 6 in. Length limited to 220 m.

RADIO: Nearest Radio Station Split Radio YUS – 2182 kHz and 2574 kHz. Radio station Dubrovnik Radio YUS – 2182 kHz and 2615 kHz.

VHF: Channels 14 and 16.

RADAR: No Port Radar service.

TUGS: One tug of 850 h.p., and one of 1,200 h.p.

BERTHING: Bosanska Obala (Berth Nos. 7 and 8): Length 227 m., drafts up to 31 ft. – no shore cranes.

Biokovska Obala No. 1 and 2 (Berth Nos. 4, 5 and 6): Length 368 m., drafts up to 32 ft., 7×5 ton cranes.

Gat Oslobodenja: North Side No. 3 (Berth Nos. 1, 2 and 3): Length 410 m., drafts up to 32 ft., 1×7 ton crane and 3×5 ton cranes. Head: Length 250 m. South Side No. 5 (Berth Nos. 20, 21 and 22): Length 507 m., drafts up to 34.5 ft., 5×10 ton cranes.

One floating crane up to 100 tons capacity.

BULK CARGO FACILITIES: Grain, ores and minerals by shore cranes equipped for grab discharge at Quay Nos. 3 and 5. Grain through feeders to railcars. Alumina silo (capacity 20,000 tons) at Quay No. 1 – length 140 m., draft 30 ft., with loading facilities. Coal handled by 5×10 ton travelling cranes, average discharge rate 250 tonnes/p.h.

SPECIALISED CARGO HANDLING FACILITIES: No berth specially equipped for handling containers, only by floating crane.

BRIDGES: No bridges to pass through.
STEVEDORES: Port Enterprise "Luka Ploce" Kardeljevo, is the sole stevedoring company. Work in 2 shifts: 0600 – 1400 hrs. and 1400 – 2100 hrs. Overtime possible.
MEDICAL: Medical service available. Nearest hospital at Mostar (64 km.), Dubrovnik (110 km.) and Split (110 km.).
TANKERS: Oil Terminal – Channel Vlaska: one berth: vessel's length – no restriction, max. vessel's beam – 27 m., max. draft – 9.20 m. No slop/deballast facilities. When wind blowing over 10 knots direction North-South, and over 14 knots East-West, vessels are not allowed to sail through Channel Vlaska to oil terminal. Navigation through Channel Vlaska is allowed only during daylight with assistance of 2 tug boats. It is not allowed to berth or anchor vessels less than 41 m. out of marked line, while other vessels sailing through the channel.

Storage:
6 tanks × 10,000 tons each for crude oil and heavy fuel oil,
3 tanks × 5,000 tons each for natrium hydroxide,
1 tank for special chemical products,
2 tanks × 2,500 tons each and 2 tanks × 1,300 tons each for petrol.

DENSITY: 1010 – 1030.
FRESH WATER: Available from quay. Rate 15 t.p.h. – 20 t.p.h.
FUEL: Fuel oil only. Delivery by tank trucks. Advance notice required.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: May be done by crew, otherwise by stevedores with extra payment.
CUSTOMS ALLOWANCES: About 40 cigarettes and reasonable amount wine/spirits per man per day.
IDENTIFICATION CARDS: Shore pass issued by local Immigration Office.
REPAIRS: Only small repairs.
DRY DOCKS: None.
SURVEYORS: Lloyd's, A.B.S., B.V. and Yugoregister at Split (110 km. from Kardeljevo).
CARGO GEAR: Although the port is equipped with shore cranes and a floating crane of 100 tons capacity, ships must have efficient cargo gear and relative certificates.
REPATRIATION: Possible by train or bus. By plane from nearest airports, Split (110 km.), Dubrovnik (110 km.) and Mostar (64 km.).
TIME: GMT plus 1 hour. Summertime kept.
POLICE/AMBULANCE/FIRE: Police, Tel: 058/79006; Ambulance, 058/79115; Fire, 058/79029.
TELEPHONES: Not possible to place telephones onboard.
SHORE LEAVE: Allowed.
DELAYS: Only occasionally for bulk carriers.
DEVELOPMENTS: Draft is to be increased to 50 ft. by 1985. A new dock and equipment for bulk cargo is also to be constructed by the end of 1986. Ships of 150,000 tons are to be accepted at that time.
GENERAL: Lloyd's sub-Agents: Jadroagent Kardeljevo.
AUTHORITY: Lucka Kapetanija Kardeljevo, Lucka Kapetanija, 58340 Kardeljevo, Yugoslavia. *Tel:* 058/79008. *Cables:* Lucka Kapetanija Kardeljevo. *Contact:* Captain Busurelo Aleksandar, Harbour Master.
AGENT: Jadroagent – Kardeljevo, Trg Marsala Tita BB, P.O.Box 111, 58340 Kardeljevo. Cable: Jadroagent Kardeljevo. Telex: 26239 Yu Jadrag. Tel: 058/79046 or 058/79117.

KOPER: 45.31 N. 13.44 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port are between "Debeli Rtic" (Punta Grossa) and Rt. Vilizan.
DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
8 Cargo Manifests.
2 Freighted Manifests.
2 Bills of Lading.
2 Store Lists.
1 Crew Effects List.
1 Cargo Gear Certificate.
1 Derat Declaration.
1 Health Certificate.

PILOTAGE: Pilot station may be contacted on VHF Channels 16 and 20 from 0600 hrs. until 2200 hrs. every day excluding holidays. Pilot boards 1 mile from entrance in roads or at anchorage. Definite notice to be sent by telex 24 hours before vessel's arrival in port area through its Agent in Koper. In case of bad weather, ship must wait for a Pilot at anchorage.
ANCHORAGES: Port area, depth 17 m., sandy bottom. Safe anchorages in case of S.E. wind near Rt. Vilizan and in case of N.E. wind near Debeli Rt. (Punta Grossa).
RESTRICTIONS: Vessels enter port by day and night, except tankers which enter during daylight hours and at nights in fair weather.
MAX. SIZE: General cargo and container vessels drawing up to 32 ft. and tankers with 40 ft. draft. No length restrictions.
HEALTH: Ship must have Health Declaration and in this case Pratique is automatic. In the event of any suspected disease or fever on board, Master must advise Harbour Master or Agent by VHF Channel 16 or by telegraph. Harbour Master's Office on VHF Channel 16 continuously.
RADIO: Communication on MW and SW through Rijeka Radio.
VHF: Communication on Koper Roads on Channel 16, 20 and 12. On Channel 20 it is possible to telephone outside the country.
RADAR: No service available.
TUGS: In area of old port, 2 available, 750 h.p. and 1,500 h.p. equipped for fire fighting.
BERTHING: 1,730 m. of operative quay with depths from 6 m. to 14 m. Berth Nos. 2, 8, 9 and 10 are equipped with shore cranes. On other berths handling is by ship's own gear.
CRANES: 5 shore cranes with capacity of 20 tons. 3 shore cranes are on Pier 8, 9, 10 and 2 on Pier 2. Mobile cranes: 4×20 tons.

Timber terminal is equipped with Portal crane of 8 tons. All harbour services are mechanised, i.e. performed by fork-lifts, trucks, transporters and other modern means.
BULK CARGO FACILITIES: Berths: 3 (1 berth for bulk cargo and 2 berths for liquid cargo).

Sea depth: 14 m.
Storage space: 25,000 sq.m.
Tanks: Wine 2,492 cu.m.
Edible oil and molasses 24,500 cu.m.
Chemicals 12,350 cu.m.
Phosphoric acid 450 cu.m.
Latex 1,320 cu.m.
Oil and oil derivates 114,900 cu.m.

The terminal can accommodate vessels up to 80,000 d.w.t. The goods can be handled both directly and indirectly in export and in import direction.

A new terminal for bulk cargoes on the port's pier No. 2 is under construction. The terminal will be primarily designed for unloading of ores and coal. The first stage (operative in June 1984) will enable the accommodation of larger vessels up to – 14 m., and the possibility of storage of up to 300,000 tons of cargo.

Terminal description: (1st stage) Quay length 200 m., depth 14 m., 2 elevators – capacity 2×400 t.p.h. Conveyor connection to the open store area for dispatching coal into wagons at the station with the corresponding equipment for warehousing and dispatching.
SPECIALISED CARGO HANDLING FACILITIES: 3 Ro/Ro berths for handling Ro/Ro traffic (up to 15,000 d.w.t.).

The container berth (No. 7, length 350 m., depth 36 ft.) is equipped with 1×40 ton container crane with annual capacity of 130,000 TEU. For handling containers the port has 5 straddle carriers for 20 ft. – 40 ft. containers. Containers stacking 2 high, 7 terminal tractors (Sisu) and various tractors, forklifts for handling empty containers, forklift truck for Ro/Ro handling (23 tons) and rubber tyred gantry for loading/discharging containers onto railway cars and 3 rubber tyred gantries for manipulation in warehouse.
BRIDGES: None.
STEVEDORES: Gangs ordered from "Luka Koper" who are stevedores, by Agents and forwarding Agents in Koper.
MEDICAL: Medical assistance and hospital available.
TANKERS: Tanker berth for crude oil with max. draft 40 ft., equipped with 3×8 in. arms.
FRESH WATER: Available from any pier. Rate of delivery about 15 t.p.h.
FUEL: None available.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: Italy.
REPAIRS: Small repairs can be carried out at Koper. In Izola, 2 miles from Koper, is wharf "2nd October". The repair service for containers is in the Port.
DRY DOCKS: In Izola for vessels up to 16,000 d.w.t.
SURVEYORS: In Koper – Jugoregister. In Rijeka or Trieste all representatives.
GANGWAY/DECK WATCHMEN: Available at ship's request.
HATCHES: If not performed by crew, then by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and 1 bottle of spirits per week and reasonable quantity of wine per man per day.
CARGO GEAR: 40 ton heavy lift shore crane and container crane without spreader (50 tons) available. Loading/discharging mostly effected with ship's gear.
REPATRIATION: By bus, by railway from Koper or by air from the airports.
AIRPORT: Ljubljana (Brnik) – 120 km. Rijeka – 100 km. Pula – 100 km. Roncki (Italy) – 80 km.
TIME: GMT plus 1 hour. Summertime kept.
HOLIDAYS: New Year's Days (1st, 2nd January), 27th April, May Days (1st and 2nd May), 4th July, 22nd July, 1st November, Republic Days (29th, 30th November).
POLICE/AMBULANCE/FIRE: Police No. 92, Ambulance No. 94, Fire No. 93.
TELEPHONES: From anchorage it is possible to telephone through VHF Channel 20. Telephones can be installed onboard at Berths Nos. 1a, 1, 2, 3, 4 and 5.
SHORE LEAVE: Allowed after clearing inwards (Free Pratique).
IDENTIFICATION CARDS: Shore pass issued by local police (without photograph).
REGULATIONS: None.
DEVELOPMENTS: In 1986 a grain silo with a capacity of 60,000 tons will be operative. Conveyor connection between silo and quay, capacity 1,000 t.p.h.

Bulk Terminal (2nd stage): Extension of the quay by additional 200 m., depth of the whole basin – 18 m. 2 loading bridges, capacity 2×100 t.p.h.

SHIPMASTER'S REPORT: October 1979.
Stevedores: Port works 5 days a week in 2 shifts; 1st shift 0600 hrs. to 1300 hrs.; 2nd shift 1400 hrs. to 2100 hrs.; a third shift may be worked from 2200 hrs. to 0530 hrs. Also possible to work 1st, 2nd and 3rd shifts on Saturdays and Sundays.
Pilotage: Pilot station contacted on VHF Channel 16 from 0600 hrs. to 2200 hrs. Vessels berthed alongside during these times. Pilots board about 1 mile from the entrance to the port or at the anchorage. Pilot vessel painted blue in colour and displaying large white 'P' on the bow. Pilots speak very good English. Vessels unberthed 0001 to 2400 hrs.
General: The use of cameras is prohibited within the port area.

SHIPMASTER'S REPORT: June 1981.

According to Pilot they do not have VHF in their office but use the set in the Harbour Master's Office. We found we could not contact the Pilots until after anchoring and when the Pilot boarded he said it was only because he happened to be in the Harbour Master's Office at the time.

Tankers always berth port side to and do not normally sail after dark as they have to move out of the channel stern first and then swing.

Moorings usually 4 head ropes and 1 backspring with similar aft. After ropes go to 2 buoys and require lashings. After backspring and forward moorings go to bollards ashore.

There is a telephone, for local calls, in the office on the jetty.

Use tug's lines berthing and ship's lines sailing.

Vessel is inspected by Harbour Master and they are very particular about ship's documents especially the Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage.

If wishing to visit Consul it is apparently easy to cross the border to Trieste but best to allow boarding Immigration Officer to examine your passport. A long gangway is required (no shore gangway) as jetty is low.

AUTHORITY: Lucka Koper, Vojkovo nabrezje 38, Yu-66000 Koper. *Tel:* (3866) 25-361. *Telex:* 34-110 and 34-168 Yu Luka. *Contact:* Commercial Department.

AGENT: Jadroagent – Koper. Vojkovo nabrezje 30, P.O. Box 60, 66000 Koper. Cable: Jadroagent Koper. Telex: 34234 Yu Jadrag.

PULA: 44.52 N. 13.50 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as Rijeka.
PILOTAGE: 48 and 24 hours' notice of ETA must be given to Agent. Pilot boards vessel off the breakwater. Merchant vessels bound for Pula must signal their name and port of departure to the signal station at Muzil.
ANCHORAGES: Vessels waiting for berth or Free Pratique can anchor in the outer harbour at about 0.4 miles West of the island S. Andrija.
RADIO: Coastal station Rijeka-Radio (call sign "YUR").
VHF: Communications with Agents and Port Authority through VHF on Channel 16.
TUGS: Up to 600 h.p. available from shipyard "Uljanik", otherwise from Rijeka.
BERTHING:

Gat Rijeka: North side length: 138 m., depth 20 ft.
South side length: 150 m., depth 17 ft.
Obala Ugljen: length 140 m., depth 26 ft.
Gat Ugljen: East side length: 160 m., depth 31 ft.
West side length: 140 m., depth 28 ft.
Obala Tv.Cementa: length 146 m., depth 20 ft.
Obala Uljanik: length 160 m., depth 22 ft., used only for discharge of steel plates.

CRANES: No shore cranes except one of 5 tons at Obala Tv.Cementa and one of 75 tons at Obala Uljanik.

A floating crane of 45 tons at shipyard "Uljanik".

Two mobile cranes of 17 tons and 20 tons respectively.

STEVEDORES: Port Enterprise "Luka" is the sole stevedoring company. Working 2 shifts: from 0700 to 1500 hrs. and 1500 to 2300 hrs. Saturdays, Sundays and holidays may be worked on overtime.
MEDICAL: Hospital and all kinds of medical assistance available.
FRESH WATER: Available from quay.
FUEL: Available by barge from Rijeka – advance notice required.
REPAIRS: Available from local shipyard "Uljanik" and "Crvena Zvijezda".
SURVEYORS: Lloyd's Register, Jugoregister, Norske Veritas.
GANGWAY/DECK WATCHMAN: Service available.
OPENING/CLOSING HATCHES: May be carried out by crew otherwise by stevedores on extra payment.
CUSTOMS ALLOWANCES: About 40 cigarettes and reasonable amount of wine/spirits per man per day.
CARGO GEAR: Loading/discharging by ship's own gear.
REPATRIATION: Possible by train, bus and air.
AIRPORT: At Pula.
TIME: GMT plus 1 hour. Summertime kept.
POLICE/AMBULANCE/FIRE: Police tel. 92; Ambulance tel. 94; Fire tel. 93.
IDENTIFICATION CARDS: Shore passes issued.
REGULATIONS: Speed limit: within a line joining Prostina Point (Point Kristo) and Kumpar Point vessels must proceed at a speed not exceeding 8 knots and within a line joining Andrija Island and Sv. Petar Peninsula at a speed not exceeding 5 knots.
GENERAL: Lloyd's Agents: Jadroagent-Rijeka.
AUTHORITY: Lucka Kapetanija-Pula, Obala M. Tita 18, Pula. *Tel:* 220-37, 276-46. *Telex:* 25251. *Cables:* Luckap Pula. *Contact:* The Harbour Master.

AGENT: Jadroagent – Pula, Obala Marsala Tita 14, 52000 Pula. Cable: Jadroagent Pula. Telex: 25210 Yu Jadrag.

RIJEKA (including Bakar, Omisalj, Urinj, Sepen and Rasa): 45.19 N. 14.26 E. (See Plan Book)

PORT LIMITS: Outer line of Anchorage area.
DOCUMENTS:

5 Crew Lists
5 Passenger Lists
3 Manifest of Dangerous Cargo (send cable before arrival with description)
3 Store Lists
2 Private Declaration
9 Cargo Manifests
3 Freight Manifests
2 Transit Manifests
2 Cargo Plans
2 Copies of Bill of Lading

Cargo and Freight Manifests and Cargo Plan with Hatch List if possible should be mailed to Agent from loading port.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards in the roads within anchorage area limit. Pilot on VHF Channels 8, 12 and 16.

For oil terminal at Omisalj Pilot boards 5 miles south of Rijeka Main Light. On request, Pilot will board tankers over 200,000 d.w.t. in the northern part of Kvarner at Lat. 45° 02′ N., Long. 14° 14′ E. approx.

Pilot available 24 hours. ETA to be sent 72 hours, 48 hours and 24 hours prior to arrival

ANCHORAGES: All vessels with exception of those loaded with dangerous or hazardous cargoes, must anchor in the zone enclosed by the following points:

a) Lat. 45° 20.0′ N., Long. 14° 22.7′ E.
c) Lat. 45° 15.1′ N., Long. 14° 27.1′ E.
b) Lat. 45° 17.5′ N., Long. 14° 20.0′ E.
d) Lat. 45° 18.4′ N., Long. 14° 28.5′ E.

Tankers and vessels with dangerous cargoes must anchor in the following zone:

a) Lat. 45° 17.8′ N., Long. 14° 28.0′ E.
c) Lat. 45° 14.1′ N., Long. 14° 29.4′ E.
b) Lat. 45° 15.1′ N., Long. 14° 27.1′ E.
d) Lat. 45° 16.1′ N., Long. 14° 31.8′ E.

APPROACHES: The access entrance to the Rijeka Port Basin is 250 m. wide and that of the Susak Port Basin is 45 m. wide.
HEALTH: To obtain Free Pratique 24 hours before arrival advise following details: number of crew and passengers, health conditions and possible infectious diseases. No person allowed to leave vessel until Free Pratique obtained.

RADIO: Rijeka Radio, call sign YUR 500 kHz, Radio telephone on 2m. band covering area of North Adriatic or by VHF Channel 16.
VHF: Port Authority on Channels 16 and 20. Tugs on Channels 16 and 8. Pilot on Channels 16, 8 and 12.
TUGS: 600 h.p. to 2,200 h.p. available.

BERTHING: General Cargo Facilities:
Rijeka Basin:
Gat Otokar Kersovani (The Otokar Kersovani Pier):

East: Length 150 m.
Depth alongside 7.30 m.
Head: Length 80 m.
Depth alongside 6 m.
West: Length 135 m.
Depth alongside 6.30 m.

This pier is mainly used for the accommodation and direct or indirect loading/unloading operations of smaller lots of general cargo.

Equipment: 2 dockside cranes of 1.5 tons capacity.

Ljubljanska Obala (The Ljubljana Quay):

Length 246 m.
Depth alongside 9.60 m. (31 ft. 6 in.)

By fitting appropriate quay fendering, this quay can accommodate vessels with maximum length of 200 m. and maximum draft 32 ft. 10 in.

It is mainly used for direct or indirect loading/discharge operations of larger lots of general or bulk cargo.

Equipment: 7 × 3 ton dockside cranes.

Gat Vladimir Nazor (The Vladimir Nazor Pier):

East: Length 195 m.
Depth alongside 8.50 m.

This quay is mainly used for direct or indirect loading/discharge operations of larger lots of bulk or general cargo.

By fitting appropriate fendering vessels of max. length 195 m. and max. draft 31 ft. 6 in. can be accommodated.

Equipment: 3×5 ton dockside cranes.

Pier Head: Length 84 m.
Depth alongside 7.5 m.
West: Length 169 m.
Depth alongside 8 m.

This quay is mainly used for direct or indirect loading/discharge operations of general cargo or smaller lots of bulk cargo by means of ship's cargo gear.

Gat Vladimir Gortan (The Vladimir Gortan Pier):

East: Length 120 m.
Depth alongside 7.30 m.
Head: Length 79 m.
Depth alongside 7.20 m.
West: Length 120 m.
Depth alongside 7.30 m.

The Pier is mainly used for direct or indirect loading/discharge operations of smaller lots of general or bulk cargo.

Equipment: 6 × 1.5 ton dockside cranes (three cranes on the East quay and three on the West quay).

Zagrebacka Obala (The Zagreb Quay):
East: Length 161 m.
Depth alongside 7.30 m.

This quay is mainly used for direct or indirect operations of general or bulk cargo lots.

West: Length 200 m.
Depth alongside 7.50 m.

This quay is normally used for loading/discharge of larger lots of general or bulk cargo. By fitting appropriate fendering a ship with max. length 180 m. and max. draft 31 ft. 6 in. can be accommodated.

Equipment 7 × 1.5 ton dockside cranes.

Splitska Obala (The Split Quay):
Length 158 m.
Depth alongside 6.25 m.

This quay is mainly used for direct or indirect/discharge operations of smaller lots of general or bulk cargo.

Gat "1 Maj" and Gat "29 Novembar" (The "1 Maj" Pier and the "29 November" Pier): These two piers within the Rijeka Port Basin, with the total quay length 450 m. and max. depth about 6 m., are used for the accommodation of passenger ships, car-ferries, fishing vessels and other smaller craft.

Trscanska Obala (The Trieste Quay):
Length 189 m.
Depth alongside 6.50 m.

This quay is mainly used for loading/unloading smaller volumes of general cargo, and is used occasionally for berthing and handling smaller Roll-on/Roll-off vessels.

Lukobran Rijeka (The Rijeka Breakwater):
Length 1,768 m.
Depth alongside 5.50 m. – 7.20 m.

A 10,000 d.w.t. floating dock is berthed along the breakwater quay. On the quay there is a port control centre with pilot station. The operational part of the quay is 700 m. long and is used for loading/unloading smaller lots of general cargo and for direct operations with bulk cargo and timber. A part of the quay is used for ship derat and for occasional minor repairs on ships.

Equipment: 4 × 5 ton dockside cranes.

Note: Almost all the quays and breakwaters are rail and road connected.

Susak Basin:

Obala 10.Rujna (The 10 Rujan Quay):
Length 240 m.
Depth alongside 6.50 m.

This quay is mainly used for direct or indirect operations of general cargo and timber.

Equipment: 7 × 3 ton dockside cranes.

Supilova Obala (The Supilo Quay):
Length 132 m.
Depth alongside 7.50 m.

Mainly used for loading timber by means of the ship's own cargo gear.

Gat Barcic (The Barcic Pier):
North: Length 106 m.
Depth alongside 8 m.
South: Length 106 m.
Depth alongside 7.80 m.

This pier is mainly used for the loading/discharge of smaller lots of general cargo or timber and for unloading smaller volumes of liquid cargo (wine, latex, etc.).

CRANES: Shore cranes with lifting capacities from 1.5 to 5 tons available at respective berths except at Gat V. Nazor – West side, Splitska Obala, Trscanska Obala, Supilova Obala and Gat Barcic where vessel's own gear must be used. Floating cranes of 30 and 100 tons. At shipyard "3.Maj" berth (20 ft.) 1 bridge crane of 300 tons.

CONTAINER FACILITIES: *Kontejnerski Terminal "Brajdica" (The Brajdica Container Terminal):* The Brajdica Container Terminal is located in the Eastern part of the Susak Port Basin at the mouth of the river Rjecina. It includes a 165 m. long quay with depth alongside 12 m. and a 60 m. wide Ro-Ro ramp.

Equipment: 40 ton container crane, straddle carrier, side loader, trailers, tugmasters, fork lift trucks, etc.

The terminal has about 60,000 sq.m. stacking area and a special container repair workshop.

Total annual capacity of the terminal is 40,000–50,000 TEUs. The terminal area is being constantly extended.

Ro/Ro vessels handled at Bakar (see below).

BULK CARGO FACILITIES:

Rijeka Basin:

Beogradska Obala (The Beograd Quay):
East: Length 110 m.
Depth alongside 7.8 m.

The quay is mainly used for working smaller vessels carrying general or bulk cargo.

West: Length 257 m.
Depth alongside 7.30 m.

The silo located on this quay has a 32,000 tons single storage capacity for grain and oleiferous seeds and is equipped with 2 ship loaders/unloaders with a total capacity of 400 t.p.h.

Vessels of maximum length of 250 m. and max. draft up to 34 ft. can be accommodated, provided that the ship lies 8–10 m. distant from the quay, berthed by dropping port bow anchor, stern line being moored to the buoy.

Gat Lole Ribara (The Lola Ribar Pier):
Length 160 m.
Depth alongside 7.90 m.

This pier includes a covered storage for fertilisers, single storage capacity 15,000 tons, and is equipped with the handling and bagging facilities for all types of fertilisers.

By fitting appropriate fendering vessels with max. length 180 m. and max. draft 32 ft. can be accommodated.

Susak Basin:

Lukobran Susak (The Susak Breakwater):
Length 320 m.
Depth alongside 6.50 m.

The breakwater quay is mainly used for loading/discharge of dry bulk cargoes and ships with max. length 180 m. and max. draft 31 ft. 6 in. can be accommodated. The ship must be berthed at a distance of 5 – 6 m. from the quay by dropping the port anchor with stern line moored to the breakwater.

Equipment: 6 × 5 ton dockside cranes.

Bakar:

Obala Podbok (The Podbok Quay):
Length 400 m.
Depth alongside 18.50 m.

Vessels with max. length 300 m. and max. draft 17.50 m. can be accommodated (170,000 d.w.t.). The quay is used for loading/discharging bulk cargoes such as iron ore, bauxite, coal, etc., rate up to 3,000 t.p.h.

Equipment: 3 ship unloaders (1 × 45 ton and 2 × 16 ton capacity). The stockyard storage capacity is 300,000 tons. A special conveyor system connects the bulk cargo terminal with the nearby Coke Plant on the West coast of the Bay of Bakar for unloading and delivery of coal to the Coke Plant.

Obala Goranin (The Goranin Quay):
Length 84 m.
Depth alongside 9 m.

This quay is used for loading coke into smaller vessels and for loading/unloading operations with general cargo stored in the Back-up Storage Facility "Skrljevo".

Ships of 160 m. length and max. draft 29 ft. 9 in. can be accommodated. To the West of the quay a new Roll-on/Roll-off berth is being constructed.

Equipment: 2 × 5 ton dockside cranes.

Also see "Shipmaster's Report" dated November 1979.

SPECIALISED CARGO HANDLING FACILITIES:

Sepen:

New terminal for LPG and liquid chemicals carriers at Sepen-Krk Island (about 8 nautical miles S.S.E.'ly from Rijeka port) operated by Dina – Petrokemija. It consists of three berths: 2 "T" concrete jetties and one concrete multi-purpose berth. Jetty "A" is for liquid gas carriers up to 15,000 cbm, max. draft 11.5 m. Jetty "B" is for chemical tankers up to 60,000 d.w.t., max. draft 15 m. Length of multi-purpose quay is 90 m., max. draft 6 m., no shore cranes. Loading arms (8 in.) for ethylene liquid, ethylene vapour, VCM liquid and VCM vapour are on berth "A". Loading arms (8 in.) for fuel oil, caustic soda solution and EDC liquid (plus EDC vapour 3 in.) are on berth "B".

Rasa:

Bazen Rasa (The Rasa Port Basin): The Rasa Port Basin is located some 30 nautical miles S.W. of Rijeka port in the naturally protected bay of Rasa which is 5 km. long, with the navigable channel about 40 m. deep.

The port facilities in the Bay include:

165 m. long quay, with 11 m. depth alongside, used mainly for loading/unloading sawn timber. The quay area includes about 150,000 sq.m. of open space and 40,000 sq.m. of covered storage space for timber.

Equipment: 3 × 5 ton dockside cranes.

Separate pier with a berth, 25 m. long and 7 m. deep enabling the accommodation of ships up to 100 m. in length; it is exclusively used for loading livestock. The livestock terminal also includes a stable for the acceptance of about 700 head of cattle at a time.

STEVEDORES: Port Enterprise "Luka" Rijeka is the sole stevedoring company. Working 2 shifts: 1st from 0630 to 1430 hrs., 2nd shift from 1430 to 2230 hrs. Saturdays, Sundays and holidays may be worked on overtime. Unloading of bulk cargo at the basin of Bakar during the first shift on Saturday is considered to be an ordinary working shift. Timber operations normally performed during first shift only.

MEDICAL: Two hospitals and all kinds of medical assistance.

TANKERS: At Bakar Basin, berths for tankers up to 80,000 d.w.t. stern to shore and up to 40,000 d.w.t. alongside quay (draft 32 ft.) loading refined oil products.

At Urinj – 5 miles East of Rijeka – 1 berth for tankers up to 200,000 d.w.t. discharging crude oil. Also used for loading of virgin naphtha shipments. Tankers moor stern to quay using both anchors. Depths of 17 m. marked by 2 buoys. Cargo hoses: 1 flexible floating hose of 20 in. with 2 ends of 12 in. each. For connecting hoses on ship's manifold a derrick or crane of minimum 5 tons S.W.L. required. Also see "Shipmaster's Report" dated February 1980.

At Omisalj (Krk Island) (Lat. 45° 13.4′ N., Long. 14° 32.2′ E.) – 7 miles S.E. of Rijeka – new oil terminal for tankers up to 350,000 d.w.t. (minimum size 40,000 d.w.t.) and with draft up to 27 m. Two "T" shape piers (steel platforms) for alongside berthing. Each berth is equipped with four unloading arms of 16 in. for crude oil discharge and 2 arms of 12 in. for bunker delivery. Fresh water available, rate 25 t.p.h.

DENSITY: 1020 to 1025 depending on place, season and weather.

FRESH WATER: Available from quay in any quantity.

FUEL: All grades of bunker available by barge – advance notice required.

FIRE PRECAUTIONS: If 2 tankers moored side by side in Bakar, tug required to stand-by. Tankers moored stern to quay must have towing line ready.

CONSULS: Netherlands, Sweden. Others at Zagreb and Belgrade.

REPAIRS: All kinds available.

DRY DOCKS: 3 Floating Docks: 5,600 tons, 12,000 tons and 24,000 tons lifting capacities.

SURVEYORS: Lloyd's Register, Bureau Veritas, American Bureau, Jugoregister.

GANGWAY/DECK WATCHMEN: Service available.

OPENING/CLOSING HATCHES: May be carried out by crew, otherwise by stevedores for extra payment.

CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litre wine and a reasonable amount of spirits daily per man.
CARGO GEAR: Although operations usually by shore cranes, ship must have efficient cargo gear and relative certificates.

REPATRIATION: Possible by train, bus and air.
AIRPORT: At Krk Island (28 km. from Rijeka).
TIME: GMT plus 1 hour. Summertime kept.
HOLIDAYS: January 1st and 2nd, May 1st and 2nd, July 4th and 27th, November 29th and 30th. Work can usually be arranged on Saturday, Sundays, January 2nd, May 2nd and November 30th from 0700 to 1400 hrs. on extra payment. If a holiday falls on Sunday the next working day becomes a holiday.

TELEPHONES: Connection possible upon special request.
SERVICES: Facilities for discharge of tank-washings at Bakar, compass adjusting.
IDENTIFICATION CARDS: Shore passes issued.
GENERAL: Lloyd's Agents, Jadroagent – Rijeka.
DELAYS: Waiting for some specialised berth occasionally experienced.
DEVELOPMENTS: The new "Dina – Petrokemija" terminal is under construction and upon completion of new plants will be able to handle other products (gases and chemicals). See "Plan Book".

SHIPMASTER'S REPORT: Urinj: February, 1980.
INA Petroleum Co. Berth: See "Plan".
Office: The Port of Urinj, telephone 41-022 ext. 250. Can be contacted via Rijeka Radio at any time.
Berth: The petroleum berth of Urinj (Lat. 45° 17′ N., Long. 14° 31.7′ E.) is situated 5 miles E.S.E. from the port of Rijeka. Its position is marked by a buoy whose characteristic is Fl.W. 3 sec. It is open 24 hours a day for commercial activities. The depth of water at this berth varies from 45 m. to 20 m. below the level of mean tides. The bottom is mud. Because of this it can accept tankers up to 200,000 d.w.t.
Documents on Arrival: The following documents are required on arrival:
5 Copies of a Crew List (full personal data, including birth place, date of birth, etc., are necessary).
5 Copies of Passenger List – if any
2 Copies of List of Ship's Stores
2 Copies of Manifest of Dangerous Goods – if any
2 Copies of Customs Declaration List
2 Copies of Transit Cargo Manifest
1 Cargo Manifest with extra copy for Customs.
Notice of Arrival: Vessels should give notice of arrival to their Agents via Rijeka Radio 48 hours and 24 hours in advance.
Approaching Directions: After passing Cape Jablanac a course of 060° leads safely to the tanker anchorage. The Pilot will board at anchorage area from a tug if the vessel is to proceed to the berth immediately.
VHF: Vessels equipped with VHF radio telephone should contact "Rijeka Pilot" on Channel 8 or "Rijeka Radio" on Channel 16 for berthing instructions.
Tugs: For berthing of a vessel the use of tugs is obligatory.
Gangway: Vessels should use their own port side gangway.
Manoeuvring: When the Pilot boards the vessel and forward tug is secured, both anchors (with one shackle in the water) should be ready for use. The stern mooring lines are carried toward the shore by a mooring boat. Usually 9 to 10 lines are used (6 from the vessel, and 4 from shore).
Connecting Hoses: After mooring operations have been completed, the connecting hoses will be brought alongside the starboard side of the vessel by a workboat. There are 2×12 in. hoses available, one for crude oil and one for products. Connecting and disconnecting of the hoses will be done by INA personnel, supervised by the Port Captain. The assistance of the ship's crew in operating windlasses, winches, etc. is required.
Note:
a) A minimum S.W.L. of 5 tons is required for the 12 in. hoses.
b) The vessel is responsible for good condition and effectiveness of the equipment.
c) Vessels are required to keep main engine on stand-by all the time during their stay in berth, therefore no repairs to the main engine of the vessel may be undertaken during berthing. Power must be kept on for possible adjustments of mooring lines, anchors, and derricks.
Discharging: When the connecting of the hoses is completed, and the ullage report completed, Chief Officer will report the readiness of the vessel for discharging operations. The vessel is required to discharge the cargo as quickly as possible. Max. discharging rate is about 6,000 t.p.h.
Sailing: After the discharging operation is completed, the vessel should leave the berth as soon as possible. The Master should keep in touch with the Port Captain who will despatch a Pilot and Authorities on time.
Deballasting: After arrival at anchorage or berth and Free Pratique has been granted, the Loading Master will take samples of the ballast water for quality checks. Permission to discharge ballast water overboard will be granted by the Port Captain only. If laboratory analysis is not accepted by the Port Captain, vessel must shift to the slop-discharging installation at Bakar. The "not accepted ballast water" must be discharged there through stern discharge line only. After tank cleaning and line-flushing, vessel will be returned to Urinj with or without ballast at Master's option.
Loading: INA Refinery produces several kinds of products.
Cargo Loaded: Clean unleaded virgin naphtha.
Density at 15° Centigrade −0.74.
Loading rate – average 1,500 cu.m.p.h.
Documents on Sailing: The following documents are required on sailing:
4 Copies of Crew List.
4 Copies of Passenger List.
2 Copies of List of Ship's Stores.
Free Pratique: To obtain Free Pratique by radio, vessels should send the following information to their Agent 48 hours in advance via Rijeka Radio:
The number of crew and passengers,
Health conditions and possible infectious diseases.
Note: No one is allowed to leave the vessel until Free Pratique is granted.
Medical: There are 3 well equipped hospitals in Rijeka whose medical staff is capable of giving full medical protection.
Fresh Water: There is an unlimited supply of fresh water available. It is supplied by a floating pipe-line attached to the Eastern signal buoy.
Fuel: All grades of bunker are available. Order must be placed 48 hours in advance.
Laundry: Laundry service has to be ordered immediately after arrival in order to ensure delivery of the clean laundry in time.
General: All kinds of repairs available by shipyard "Viktor Lenac".
There is a floating crane capacity up to 100 tons.
Dry docks accepting ships up to 60,000 d.w.t. also available.
Ship Supplies: In order to ensure timely supply of food and groceries vessel should place an order through the authorised stores (ship chandlers) immediately after or before arrival by radio.
Shore Passes: Shore passes are required for personal identification and serve as an entry permit to the terminal. Shore passes must be returned to the Immigration Office before sailing.
Transportation: During the time at the berth transportation of the crew and passengers from the vessel to the terminal is arranged by a shore launch from 0800 – 2400 hrs.
Lights: Manifold and poop mooring areas should be adequately lit to enable night mooring and discharging operations to be carried out with safety. Sea area around the ship also has to be properly illuminated.
Deck Watch: Deck watch must be maintained at all times while the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and to prevent unauthorised persons from boarding the vessel.
Action in Case of Emergency: In the event of a fire, oil spillage, or other emergency on the vessel, the emergency signal is 3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

SHIPMASTER'S REPORT: Bakar: November 1979.
Approaches: Entry to Rijeka Bay is made between mainland (Istra) and the island of Otok Cres. A small ferry runs between the two from a landing stage just North of Rt. Prestenice and another connects with Rijeka. A very conspicuous, red and white horizontal striped 700 ft. high chimney is situated about 1.5 miles West of Bakarski Zaliv and makes a good steering guide for the run across as the actual entrance is difficult to pick out being very narrow and blending in with the hills behind.
Anchorage: Initially we were ordered, by Port Authorities, to anchor 1 mile S.W. of the chimney but later requested to move closer to Rijeka for convenience in servicing vessel. Second anchorage 1.5 miles South of main breakwater. Depth of water both places 32 fathoms and we used 10 shackles cable on port anchor. Bottom is glutinous mud and despite Force 8, gusting 9 winds we held our position although many cargo ships dragged quite alarmingly. The normal winds for this time of the year (November) are the "bora", a cold strong N.E. wind which funnels down the mountains and can develop suddenly to gale force. We had unusually strong and prevalent S.E. winds during 10 days at anchor.
Communications: Pilot station listens on VHF Channel 16 and works Channel 8. Rijeka Radio was very easily contacted on VHF and proved of great help in connecting with Agents, Owners and Charterers. Rijeka Radio not quite as good for contact on W/T as does not seem to follow the times for listening as laid down. R/T proved difficult as well, due to his frequencies being same as other main radio stations.
Port Officials: Agent and boarding party boarded morning after arrival and cleared ship with very little difficulty, only normal representation required. Shore passes, made out by Agent, sent on board later same day. Permission to immobilise engines and lower lifeboats given by Harbour Master on arrival although this later cancelled due to approach of storm after 24 hours.
Shore Leave: It is possible to arrange for shore launches while at anchor to give shore leave but the service can be curtailed due to bad weather and in Winter could result in crew being stranded ashore. Last boat from the port being 2200 hrs. At the berth, no restriction on shore leave exists and there is an excellent bus service into Rijeka from the village of Bakar. Prices are comparable with UK and quality of goods similar. In Bakar itself is an excellent restaurant, family owned, which serves first class food in very nice surroundings. The Owner speaks perfect English.
Bunkers: Both intermediate and diesel oil is available by barge, price unknown but thought to be above average. Normally ships taking large quantities of bunkers would bunker at Augusta, Sicily.
Stores: Storing poses a problem due to several points. The access to the ship on the berth is difficult for large lorries as the extension to the wharf carried out over the past 3 years has wrecked the approach road to the face of the wharf and also the lorries if they make it to the wharf cannot get close alongside due to the conveyor belt and rails.

Storing at the anchorage also poses problems as there are no barges suitable for carrying large amounts and launches were used to bring the stores out to the ship but these can only carry a small quantity at a time. We had to load some large and heavy pieces of engine spares which had been sent from UK by lorry and these were transferred to a pontoon barge for delivery to the ship.
Crew Changes: Personnel were routed through Zagreb* mainly and this entailed a 4 hour drive from the airport to the ship, although it is possible to send people via Trieste which is a bit nearer. On arrival at Rijeka they have to see Immigration and are issued with shore passes. Wives and children should be entered on a passenger list and not included on the crew list as they get a special pass for 90 day entry.

*Whether this is normal routing or was Company's choice is not known.

Fresh Water: At anchor, limited water is available by tug but very expensive. On the berth, good quality water is readily available in any quantity required.

Cargo Handling: Berth has been extended and depth alongside increased to allow vessels drawing 17.5 m. to safely lie alongside although the 48 ft. 6 in. rock which was found previously at the Eastern end of the berth is still there according to the Pilot. (Approximate position of rock about 50 ft. off wharf and about 250 ft. from Eastern end). Berth is left in a very broken down looking state and lacks decent mooring posts at the Western end. Cargo is handled by 3 grabs (although only 2 were in use this call) 1 very large and the other 2 much smaller. Discharge rate on this call was averaging 30,000 t.p.d. with the major share being done by the larger grab which is at the Western end of the wharf. Cargo is either taken directly away by ore trains (if iron ore) or dumped onto back of wharf, or, if coke is taken direct to a coking factory on the other side of the bay by a covered conveyor belt. Storage or dumping facilities are very limited and this has a controlling effect on the discharge. When discharging iron ore, if insufficient trucks arrive and the stockpile is full, then discharge is on a stop/go basis and slow and also fully dependent on the trucks arriving regularly. This ship discharged 149,320 tonnes in 6 days as against a previous call experienced when 118,100 tonnes were discharged in 6.7 days. Maximum airdraft 16.5 m. on berth.

Stevedores were good and co-operation was good. Any damage caused was repaired before departure without causing any delay to the ship and the standard of repair was good.

Repairs: Besides the "3 MAJ" shipyard, there are quite a few smaller yards and workshops where repair work can be arranged.

Medical: There is a special clinic for seamen which opens at 1200 hrs. In attendance at that time is a general doctor who refers patients to the different specialists and usually entailed a visit next day to see those people.

Customs Allowances: On arrival, each man allowed 200 cigarettes and 0.5 litre wine/spirits during stay. Customs would allow an issue every 5 days of 200 cigarettes per man and 8 bottles of spirits for the ship.

SHIPMASTER'S REPORT: Rasa: October 1984.

Location: Lat. 45° 01.6′ N., Long. 14° 03.2′ E.

Documents: Same as Rijeka.

Pilotage: 48 and 24 hours' notice of ETA must be given to Agent. Pilot boards vessel off Traget Point (Lat. 45° 01′ N., Long. 14° 03.5′ E.). Sometimes Pilot boards off Ubas Point (Lat. 44° 56′ N., Long. 14° 04′ E.) by special arrangement. Pilot on VHF Channel 16.

Approaches: For obtaining Pilot off Traget Point, necessary to navigate through Zaliv Rasa Strait. This passage is easy during daytime, using the middle of the channel.

Anchorages: Off Traget Point with good sandy bottom and depths from 10 m. to 12 m.

Tugs: Not available.

Berthing: For berthing Pilot uses the starboard anchor for turning the vessel. There are 2 berths, 1 for loading livestock and 1 for loading general cargoes and special lumber from Austria. This berth is about 200 m. long with a depth of 10 m.

Cranes: 3 shore cranes of 5 tons and other equipment is available.

Stevedores: Port Enterprise "LUKA" is the sole stevedoring company. Working 2 shifts from 0730 – 1400 hrs. and 1500 – 1900 hrs. Saturdays, Sundays may be worked on overtime. Loading rate 2,500 CBM of lumber per day. (approx.)

Fresh Water: Available from quay.

Cargo Gear: Stevedores use shore cranes and ship's gear together.

Repatriation: Possible by bus to Rijeka or Pula and then by air or train.

Airport: Nearest airport at Pula.

Time: GMT plus 1 hour.

Identification Cards: Shore passes issued.

Telephones: Near to the berth through telephone centre.

AUTHORITY: Lucka Kapetanija.

Luka Rijeka (Port of Rijeka), Obala Jug. Mornarice 1, P.O.Box 146, 51000 Rijeka. *Tel:* (051) 33555 (Central), 23508 (Director General), 28886 (Commercial Director). *Telex:* 24165 Yu L R. *Cables:* Luka Rijeka. *Contact:* Zelimar Tomasic, Deputy Director General. Boris Pricard, Publicity Adviser.

AGENT: Jadroagent – Rijeka, Obala J.R. Mornarice 16, 51000 Rijeka, Cable: Jadroagent Rijeka, Telex: 24100Yu Jadrag, 24268Yu Jadrag.

SIBENIK: 43.44 N. 15.53 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot boards vessel at the entrance of St. Ante Channel, within a circle of 3 miles radius from Jadrija Lighthouse.

ANCHORAGE: Vessels waiting Pilot must anchor between Prvic Island and the shore if coming from the West, or between the South point of Zlarin and the shore if coming from the East, all in depths of 22 m.

In the Bay of Sibenik, vessels may anchor on the N.W. side of St. Ante Channel in depths of 30 m. – 40 m.

RESTRICTIONS: All vessels over 50 g.r.t. must apply for permission to enter St. Ante Channel by using International Code Signal "Z" by flag during daylight hours and a white light above a red light visible 2 miles all round or a sound signal (letter "Z" of morse code) during night hours. Vessels may enter channel only when authorised by a signal, 2 black balls vertically disposed by day or 2 green lights vertically displayed by night, made by the signalling station at Jadrija.

MAX. SIZE: Only draft limited. 33 ft. alongside in deepest berth.

VHF: Pilot has VHF available and maintains listening watch on Channel 14.

RADIO: None. Vessel may call Agent through Rijeka Radio and Split Radio.

TUGS: 1 of 750 h.p.

BERTHING:

Obala JRM: Length 274 m., draft up to 7 m. – no shore cranes.

Gat Vrulje: East side length 132 m., head 114 m., West side length 101 m., draft up to 9 m. – no shore crane.

Obala Dobrika: Length 225 m., depth 10 m.

Obala Rogac: Length 432 m., depth 10 m. Cranes: 2×7 tons, 3×5 tons.

Obala Sipad: Length 294 m., draft up to 7 m. – no shore cranes.

Obala Crnica: Length 90 m., draft 6.5 m. – no shore cranes.

Also see "Developments".

BULK CARGO FACILITIES: Ores and minerals (phosphate) at quays Rogac and Dobrika.

Obala Dobrika: Phosphate handling, capacity 400 t.p.h., storage capacity 1,000,000 tons.

STEVEDORES: Port Enterprise "Luka" – Sibenik and timber stevedoring company "Sipad".

Port works in two shifts: 0600 – 1300 hrs. and 1400 – 2100 hrs. Overtime possible 2200 – 0500 hrs.

Timber operations normally performed during first shift only.

MEDICAL: Medical service available including hospitalisation.

DENSITY: 1010 – 1025, depending on place, season and weather.

FRESH WATER: Available from quay.

FUEL: Diesel and Gas oil in small quantities.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores at additional charge.

CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litre of wine/spirits per man per day.

CARGO GEAR: General cargo and timber are handled using ship's gear. Ore and minerals by shore cranes fitted with grabs.

IDENTIFICATION CARDS: Shore passes given by local police.

REPAIRS: Small repairs only.

REPATRIATION: By train or bus and by air from Split Airport nearby, or from Zagreb or Zadar.

TIME: GMT plus 1 hour. Summertime – GMT plus 2 hours (March-September).

POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.

TELEPHONES: No facilities for placing telephone on board.

GENERAL: Lloyd's Sub-Agents – Jadroagent Sibenik.

DEVELOPMENTS: Vrultje (East): Bulk fertiliser loading plant under construction, completion expected 1985.

AUTHORITY: Lucka Kapetanija Sibenik, Obala Oslobodjenja 8, 5900 Sibenik. *Tel:* 059-24261. *Cables:* Kapetanija Sibenik. *Contact:* Captain Janes Lakos, Harbour Master.

AGENT: Jadroagent – Sibenik, Obala Oslobodjenja 9, 59000 Sibenik. Cable: Jadroagent Sibenik. Telex: 27323 Yu Jadrag. Tel: 22-570, 22-571 (After hours) 25-544.

SPLIT: 43.31 N. 16.26 E.

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
2 Store Lists.
3 Personal Effects Lists.
3 Cargo Manifests.
3 Bills of Lading.
1 Health Declaration.

PILOTAGE: Compulsory for vessels over 500 g.r.t. If vessel bound for Split, Dugi Rat or Trogir, Pilot will normally meet vessel 0.5 miles off the City Port Entrance, day or night, but on request Pilot will board a vessel S.W. of Razanj Lighthouse (Lat. 43° 19′ N., Long. 16° 25′ E.).

A vessel bound for Trogir may also take a Pilot 0.5 miles off Galera Light (Lat. 43° 28.4′ N., Long. 16° 11.5′ E.).

It is advisable to contact pilot station on VHF Channel 8, or via Split Radio on Channel 16, prior to arrival.

A vessel awaiting a Pilot can anchor South of City Port Breakwater.

ANCHORAGES: Vessels can anchor S.E. of City Port Entrance, 0.5 miles off the breakwater, in 40 m. depth, muddy bottom.

In case of very strong S.E. wind it is recommended to anchor in Southern part of Luka Milna (Lat. 43° 20′ N., Long. 16° 26′ E.) in 25 m. to 30 m. depth, sandy bottom.

RESTRICTIONS: Large tankers are handled in and out of the harbour during day time only. LPG carriers also enter port in day time only.

MAX. SIZE: No restrictions except draft. Maximum permitted draft for passenger ships in City Port (Southern Basin) 8.8 m.; in Northern Port for general/bulk cargoes 10.6 m. but for grain (Silo Quay) 11.3 m. and for oil tankers 11.9 m.

HEALTH: To obtain Pratique Health Declaration required. In event of any disease or fever contact Agents.

RADIO: All messages to Agent via Rijeka Radio (on HF), or via other Yugoslavian Coast Stations on MF radio telephony or MF radio telegraphy and VHF.

Answers to messages via Rijeka Radio only.

VHF: Split Radio Channel 16 (permanent watch). Pilot station Channel 8 (listening watch from 0700 hrs. to 2000 hrs. local time), tugboats on Channel 14.

TUGS: Normally ship's lines used. If tug's lines used 10% extra is charged.

BERTHING:
Northern Basin:
Northern Port: Continuous quay of total length 870 m. divided into 5 berths with the following permissible ship drafts: Berth No. 1, 8.5 m., Berth No. 2, 9.7 m., Berth No. 3, 7.3 m., Berth Nos. 4 and 5, 10.6 m., where general and bulk cargoes handled, mostly by shore equipment.

Cement factory "Partizan", Kastel Sucurac, length of quay 222 m., draft 8.2 m., cement in bulk mostly loaded.

Cement factory "Prvoborac" Sv. Kajo, quay length 274 m., draft 8.2 m., cement in bags only loaded.

"Jugovinil" factory Kastel Sucurac, quay length (dolphins) 80 m., draft 9.7 m., for LPG carriers only.

Silo Quay, Vranjic, length 110 m., draft 11.3 m., discharging/loading grain by multiport.

A. Vucicic factory, Vranjic, quay length 262 m., draft 7.3 m., where discharging asbestos and loading asbestos products. Shore crane and ship's gear used.

Southern Basin (City Port):
Breakwater Quay, length 230 m., draft up to 8.8 m.

Gat Spanjolskih Boraca (ex-Sv. Duje), total quay length 465 m., draft up to 7.9 m.

Gat Proleterskih Brigada, total quay length 350 m., drafts from 3.9 m. to 7.0 m.

City Port serves passenger ships and car ferries only.

CRANES: *Northern Port:* 2×7 tonne bridge cranes and 4×5 tonne gantry cranes. Floating crane of 60 tonne lifting capacity also available.
BULK CARGO FACILITIES: One quay (Silo Quay, Vranjic), length 110 m., draft 11.3 m. Max. height of discharging gear above sea level is 8.0 m. Max. loading/discharging rates 3,000 – 5,000 tonnes.
SPECIALISED CARGO HANDLING FACILITIES: One berth for LPG carriers (Jugovinil Factory Berth).
STEVEDORES: "Lucki prekrcaj i skladista" is the sole stevedoring company. Work in two shifts from 0600 – 1300 hrs. and from 1300 – 2000 hrs.
MEDICAL: No advance notice except in case of serious illness to be included in arrival cable. Hospital facilities available.
TANKERS: Two discharging berths alongside the quay. Discharge lines 6 in., 8 in. and 10 in.

Berth for small tankers, length 80 m., draft up to 7.0 m.

The other quay, length 150 m. (dolphins) and permitted draft 11.9 m.

Depending on type of cargo, average load/discharge rate is from 300 – 600 tonnes per hour.

DENSITY: Average density 1025.
FRESH WATER: Available at all berths. Order through Agent.
FUEL: Obtainable. Advance notice required.
CONSULS: Denmark, Italy, Netherlands and United Kingdom.
REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: One floating dock at Trogir, length 180 m. and one at Northern Basin, length 116 m.
SURVEYORS: Jugokontrola, Jugoinspekt, Jadroinspekt (Cargo Inspectors).

Lloyd's Register, American Bureau, Bureau Veritas and Jugoregister representing DNV, NKK and GL, Panama, etc.

GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores or ship's crew whichever to ship's advantage.
CUSTOMS ALLOWANCES: About 40 cigarettes and reasonable amount of wine/spirits for each crew member daily.
CARGO GEAR: Load/discharge mostly effected by shore gear.
REPATRIATION: All facilities available for crew changes.
AIRPORT: City centre to airport 23 km. 3 flights daily to Zagreb and Belgrade. From April 1st to October 31st direct flights to Rome, Paris, London and Zurich.
TIME: GMT plus 1 hour. Last Sunday in March clocks advanced 1 hour. Last Sunday in September clocks retarded 1 hour.
HOLIDAYS: January 1st, 2nd; May 1st, 2nd; July 4th and 27th; November 29th, 30th.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
SERVICES: Compass adjusting, radio/radar services and calibration of DF, divers for surveys/repairs, Lloyd's Sub-Agents (Jadroagent-Split), ship's laundries.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Shore passes issued.
AUTHORITY: Lucka Kapetanija, Obala Lazareta 1, 58000 Split. *Tel:* Spilt 48-062. *Telex:* 26496 (Yu Kap St).

"Luka Split", Gat Spanjolskih Boraca, 58000 Split, Yugoslavia. *Tel:* Split 589-299.

ZADAR: 44.07 N. 15.14 E.

DOCUMENTS/HEALTH/HOLIDAYS: Same as "Rijeka".
PILOTAGE: 48 and 24 hours' notice of ETA must be given to Agent. According these notices Agent arranges for Pilot to board on arrival. Pilot boat blue motor launch with large "P" on bow and "H" flag. Pilot contacted on VHF Channel 12 or 16.
ANCHORAGE: About 0.5 mile, 245° from green port light, (Fl. G. 2 sec.) on the North part of Zadar Peninsular. Average depth about 40 m.
MAX. SIZE: Zadar, passenger port, permissible draft 6.25 m. (20.5 ft.) Zadar-Gazenica, port for dry cargo, max. draft forward 6.60 m. (21.7 ft.) Aft 13.5 m. (44.3 ft.). Length 160 m. Also see "Tankers" and "Berthing".
RADIO: Rijeka Radio, "YUR" or Split Radio "YUS".
VHF: Information/Operations Centre Zadar listens on VHF Channel 16. Pilot listens on Channel 16 or 12.
TUGS: 1 tug 1,200 h.p. Large vessels use 2 tugs, with the additional tug coming from Split. Tugs normally join 200 m. – 300 m. from breakwater, vessel's lines usually used.
BERTHING: *Soya Bean Berth:* 1 berth for soya bean or grain with discharging equipment 400 t.p.h. Max. draft 11 m. (36.1 ft.)
CRANES: Heavy lift shore crane, capacity 100 tons.
STEVEDORES: Number of gangs required to be stated in usual notice of ETA.
MEDICAL: Advance notice not necessary, hospital facilities available.
TANKERS: Gazenica Port: 1 tanker berth max. draft 10.35 m. (34.1 ft.) forward, 15.0 m. (49.2 ft.) aft. Length of the ship is not restricted.

Floating barriers/booms available for vessels loading/discharging mineral oils.

DENSITY: Average density in the port – 1026.
FRESH WATER: Connections on piers, rate of delivery 8 – 15 t.p.h.
FUEL: Fuel available for coasters only.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally, but not compulsorily, carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes per person. Tobacco and liquor sealed in bond.
IDENTIFICATION CARDS: Needed. Issued by police.
CONSULS: None.
REPAIRS: Deck and engine repairs possible.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Zadar airport served by regular daily flight for Zagreb with connection on all international flights.
DRY DOCK: 1 floating dock for ships up to about 2,000 b.r.t. in Zadar. 1 floating dock for ships up to about 20,000 b.r.t. on Ugljan Island.
TIME: GMT plus 1 hour. Summertime kept.
POLICE/AMBULANCE/FIRE: Police, 92; Ambulance, 94; Fire, 93.
TELEPHONES: No facilities for placing telephones on board.
DEVELOPMENTS: Gazenica Port: A second berth for dry cargo is under construction.
AUTHORITY: Lucka Kapetanija – Zadar. Radnicka Obala 8, 57000 Zadar, P.P.182. *Tel:* 337-58, 223-44, 337-78. *Telex:* 27163 Yu Kap Zd. *Cables:* Lucka Kapetanija Zadar.

AGENT: Jadranska Pomorska Agencija, Filijala Zadar, N. Nodila b.b., Zadar. Tel. 23210, 23215. Telex: 27129 Yu Jadrag. Telegrams: Jadroagent Zadar.

ZELENIKA: 42.27 N. 18.35 E.

DOCUMENTS/HEALTH: Same as "Rijeka".
PILOTAGE: Pilot boards at entrance of the Bay of Kotor, near point Punta Ostro. In bad weather Pilot boards at anchorage.
ANCHORAGE: Good ground for anchorage S.W. of Zelenika, about 0.25 miles off port light in about 27 fathoms.
MAX. SIZE: Port of Zelenika damaged by earthquake and temporarily closed. Vessels berthing at the passenger quay at Herceg-Novi.
HEALTH: Radio Agent requesting Free Pratique, 24 hours before arrival. For vessels over 500 g.r.t. Pratique is given at the anchorage. For small ships and yachts, Pratique is given at Herceg-Novi.
TUGS: None. In cases of necessity can be ordered from shipyard at Bijela.
BERTHING: The berth is assigned through the Agents giving notice 24 or 48 hours in advance. At present there is berthing for small ships only at the passenger port at Herceg-Novi.
STEVEDORES: State stevedoring company.
MEDICAL: Nearest hospital at nearby town of Herceg-Novi.
FRESH WATER: Available from hydrant on the passenger quay at Herceg-Novi.
FUEL: Nearest bunker station is at Bar.
OPENING/CLOSING HATCHES: If not performed by crew, can be done by stevedores.
CUSTOMS ALLOWANCES: About 40 cigarettes and 0.5 litres wine/spirits per man per day.
CARGO GEAR: Loading, unloading performed with ship's gear.
IDENTIFICATION CARDS: Shore passes issued by local police.
CONSULS: None.
REPAIRS: Any kind of repairs including dry docking at nearby shipyard at Bijela.
DRY DOCKS: Floating dock lifting capacity 10,000 tons, LOA 184 m., length over keel blocks 165.6 m., inside free breadth 25.5 m.

Floating dock lifting capacity 33,000 tons. LOA 252 m., length over keel blocks 235 m., inside free breadth 44 m.

The yard is about 4 miles East of Zelenika. The yard has 1,300 m. of fitting pier.

REPATRIATION: By bus to Dubrovnik, and from there bus, plane or ship to main cities in Yugoslavia.
TIME: Central European Time. GMT plus 1 hour. Summertime kept.
HOLIDAYS: January 1st and 2nd; May 1st and 2nd; July 4th and 13th; November 29th and 30th. Work can be arranged on Sundays and on 2nd day of two-day holidays.
POLICE/AMBULANCE/FIRE: No direct connection, in case of necessity call Agency, Tel. (082) 81-456 Jadroagent or (082) 81-261 Jugoagent.
SHORE LEAVE: Allowed.
AUTHORITY: Lucka Ispostava Zelenika.

AGENT: Jadroagent, Medunarodna pomorska i saobracajna agencija, Poslovna jedinica, Bijela. Tel: (082) 81-456. Telegraphic address: Jadroagent Bijela.

Zaire Republic

GENERAL:

ETA: It is essential that any change of vessel's ETA should be transmitted sufficiently in advance in order to avoid short shipments of cargo.

Matadi is only a transit port where cargo is not stored in order to avoid congestion.

Imported cargo is immediately re-forwarded to the interior while export cargo is only brought to Matadi a few days before the ETA of the vessel for which it has been booked.

Therefore, in order to make the cargo available at Matadi, shippers need a notice varying according to the cargo concerned, but which cannot be less than 2 weeks as is the case for coffee.

Agents at Matadi and Boma have been instructed to inform Port Authorities latest 4 days before berthing of inward cargo tonnages.

Non compliance with this provision may result in berthing delay.

PILOTAGE: Vessel should cable ETA 24 hours before arrival to the Harbour Master. Cable address: "Maritime Banana" via Banana Radio.

Pilotage compulsory for all vessels over 500 g.r.t. bound for Boma and Matadi.

Ships bound for Matadi and/or Boma must take a Pilot at the pilot station at Banana (at the mouth of the Zaire River). Pilot station at Banana can be contacted directly by radio (VHF).

In order to increase the safety and to facilitate the navigation on the river the Regie des Voies Maritimes have decided that in case a vessel is not equipped with a VHF installation the Pilot will bring one on board, for which a charge is made.

The following rules must be observed at the request of the Regie des Voies Maritimes for embarking and dis-embarking of Pilots.

If gangway is rigged astern on the port side it is compulsory to use the pilot ladder.

If gangway rigged amidships on port side it is recommended that the pilot ladder is used in combination with the gangway.

Pilots requesting only the gangway do so at their own risk.

Theoretically sailing from Matadi/Boma is only authorised so far as vessel can reach Banana latest at 1800 hrs. since navigation on the Zaire river is normally limited to daylight hours.

With regard to the trim the pilotage services ask Masters to comply with following rules:

Maximum trim 13 ft. aft; 4 ft. forward.

DOCUMENTS: *Ship's Documents required on arrival:*

Clearance from last port.
7 Crew Lists.
3 Lists of Arms and Ammunition.
7 Passenger Lists.
1 List of stowaways.
2 Crew Declarations.
3 Lists of Ports of Call.
2 Stores Lists.
1 International Tonnage Certificate.
1 International Load Line Certificate.
1 Derat Exemption Certificate.
1 Cargo Ship Safety Equipment Certificate.
1 Certificate of Registry.
1 Radiotelegraphy Certificate.
1 Construction Certificate.
1 Certificate Form on Board.
Free Pratique.

Documents required for disembarking passengers and discharging cargo:

A. To be received by mail at least 8 days before ship's arrival:
(1). Cargo:
  3 Freight Manifests
  8 Cargo Manifests
  5 Copies of Bills of Lading
  6 Copies of Stowage Plans.
(2). Passengers:
  1 Accountancy
  3 Passenger Lists, for passengers for the port/or in transit.
B. To be received by ship's bag at ship's arrival at quay:
(1). Cargo:
  1 Freight Manifest
  4 Cargo Manifests
  3 Copies of Bills of Lading.
(2). Passengers:
  1 Freight Manifest
  4 Passenger Lists for passengers for the port and/or in transit.

It is most important that stowage plans be available before vessel's arrival. Vessel's operations are indeed delayed to the next shift if same are only remitted upon arrival.

DRAFTS AND CURRENTS: Drafts on River Zaire are actually as follows (September 1984):

Inwards: High Water: 25 ft. 00 in.
Outwards: High Water: 26 ft. 00 in.

The authorised drafts are notified regularly by the Port Authorities.

The currents of the river and from berth to berth as well in Matadi as in Boma vary and depend upon the high and low levels of the water with sometimes adverse currents and still waters as stated before.

For proceeding to Matadi and according to the season vessels must have at least a speed of 10.5 to 11 knots, especially to pass the "Devil's Cauldron" about 3 miles before Matadi. 12-13 knots or greater sometimes requested for a 10-15 minute period.

BRIDGES: *Bridge on River Zaire:* The Port Authorities and Bridge Constructors request vessels to whistle 3 times:

(a) when proceeding to Matadi at about 300 m. before passing the bridge.
(b) when sailing from Matadi at about 200 m. before passing the bridge.

This will enable constructors to stop work to avoid the falling of any kind of object on vessels when passing the bridge.

HEALTH: Ship's crew must have an International Certificate of Vaccination against yellow fever and cholera.

RADIO: Banana Radio = 9PA =

Provisory working hours available from the beginning of 1984.

Telegraphy medium waves: 0700 – 1400 GMT.

500 kHz.
Working frequency: 489 kHz.
Listening frequency: 480 kHz, 500 kHz.

512 kHz.
Traffic list each hour + 00.

Telegraphy short waves: 0700 – 1400 GMT.

Traffic list:	HH + 00	6491.5 kHz
	HH + 20	8445 kHz
	HH + 40	12660 kHz
	H + 00	17184.8 kHz
	H + 20	22431 kHz

Reserve frequency: 8546 kHz.

Listening on Channel 6, 8, 12, 16 MHz Channels 5, 6, 15.

Listening on 22 MHz Channels 3, 4, 9.

Each Channel is monitored for 1 minute on scanning system and this during 15 minutes following traffic list, (same frequency band as traffic list.).

Telex on request

Paired frequencies:

Code 34646 (This is not definite since it must be allocated by UIT)

9PA:	8714 kHz	Ship:	8353 kHz
	13078.5 kHz		12498.5 kHz

Telephony: 0700 – 1400 GMT

Listening:	2182 kHz	Answering:	2182 kHz
	4125 kHz		4125 kHz
	6215.5 kHz		6521.9 kHz
	8257 kHz		8780.9 kHz
	12392 kHz		13162.8 kHz
17 MHz after QRX in RTG 16522			17294.9 kHz
22 MHz after QRX in RTG 22062			22658 kHz

Telephony VHF 0700 – 1400 GMT

Channel 16. Simplex Channels. Duplex Channels (Public Service).

Remark:

1. At this moment no telephone connection possible but we accept telegrams in telephony.

2. *Other available frequencies for telephony 9PA*

9PA:	4357.4 kHz	Ship:	4063 kHz

	13181.4 kHz		12410.6 kHz
	17350.7 kHz		16577.8 kHz

3. *Radiobeacon: 0700 – 1400 GMT*

Frequency	: 315 kHz
Call sign	: BAN
Position	: 05° 53′ 24″ S. 12° 17′ 48″ E.
Power	: 1 KW.
Antenna	: Omnidirectional
Range	: 500 miles estimated.

Please report the range.

FUEL: Must be ordered from Petrozaire at least 48 hours before required. Normally supply of gasoil, light and heavy fuel is effected at Banana between buoys 12 and 14 ex-barges with: minimum quantity – 250 tons; maximum quantity – 800 tons (total barge quantity).

Smaller quantities can also be supplied in Matadi or Ango Ango.

STEVEDORES: The ONATRA (Office National des Transports) – public institution, has the monopoly of the handling, stevedoring and transit operations at the ports of Matadi and Boma.

At each berth the responsible "Pier Master" remains in constant contact with the First Mate during the whole operation.

Working shifts are as follows: 1st. shift: 0630 – 1430 hrs.; 2nd shift: 1430 – 2230 hrs. overtime; 3rd shift: 2230 – 0630 hrs. overtime.

Work must be ordered the day before vessel's arrival. However, if gangs are available, work can still be ordered the day of vessel's arrival but latest at 0930 hrs. during week days.

In principle no work is done on Sundays, holidays and during the night. If required same has to be ordered by writing 1 working day in advance before 1000 hrs. Port Authorities will then decide according to the situation at that time.

According to the situation of the Port, the Authorities can also order labour 24 hours per day Sundays and holidays included.

At Boma there is no third shift – however on special request, work can eventually be granted until 2400 hrs.

At Matadi work during third shift will only be ordered upon special request from vessel.

GENERAL: *Quay Practices:*

The Zaire courtesy flag must be hoisted by foreign ships during daytime.

In view of the proximity of the town, the use of whistles, sirens and similar signals is forbidden.

Safety nets must be put between ship and quay at each of the working hatches and beneath the gangway.

No rubbish whatsoever may be thrown overboard.

Official Language:

The official language used by the Port Authorities and Administration is French.

Cargo plans:

According to ONATRA's instructions, stowage plans of ships calling at Matadi/Boma must be issued in such a way that they show clearly where all goods loaded for Matadi/Boma in several ports are located. This enables ONATRA to have, at once, a clear view of each vessel and to study, before ship's arrival, the discharging/loading possibilities.

Those stowage plans must reach Agent before ship's arrival.

Vessel's loading/discharging operations will only start during the next shift if stowage plans are remitted upon vessel's arrival. A request can be made to shift the vessel to a more convenient berth depending upon the cargo concerned.

With regard to cargo loaded, ONATRA does not issue stowage plans and Masters should consequently be instructed to draw up stowage plans themselves for transmission to corresponding discharging ports.

It is customary not to moor ships at Matadi/Boma between 2200 hrs. and 0600 hrs. They remain at anchor.

Important Notices:

In connection with manifests for Matadi/Boma cargo:

1. Liner Terms Cargo:

According to the General Rules and Tariffs stowing, unstowing, loading, discharging rates are applied on weight/measurement, whichever is the highest irrespective of the freight unit.

The Port Authority ONATRA instructs therefore that:

a) The freighted manifest remitted to them must show three columns detailing respectively weight and volume and freight unit (freight tons) of each cargo/bill of lading.

b) At the bottom of each page a summing up of tonnage/weight, tonnage/volume and freight units (freight tons) should be mentioned.

c) The last page of the manifest shall contain a separate recapitulation of weight tons, volumes and freight units (freight tons) showing thus the respective totals of each item.

Corrections or additionals added by the Agent at Matadi/Boma by hand or with typewriter are not accepted by ONATRA.

ONATRA is fully implementing the regulations and, for vessels whose manifests are incomplete or incorrect, a penalty, which may reach 1,000% of the stevedoring costs (or 10 times) is charged.

2. F.I.O. Cargo:

The same information is to be supplied as for Liner Cargo but, in addition, the manifest and B/L must clearly mention that cargo is carried on free out terms.

FUEL: Must be ordered 48 hours in advance from Petro-Zaire. Bunkering takes place between Buoys Nos. 12 and 14. Gasoil, light and heavy fuel oil available. Barge capacity 800 tons, minimum order 250 tons.

MEDICAL: Doctor available for emergency only. No dental or hospital facilities.

TANKERS: Tankers remain at anchor between Buoy Nos. 12 and 16 on the river, anchorage being agreed upon by the Master and the local suppliers' representative who will have received the advice of the Pilot. Since there is no mooring buoy and in view of the strong currents it is recommended to use both anchors while main engine to remain on standby.

Cargo Operations: Tankers discharge into/load from cargo barges moored alongside either side. These barges (three in total) have a capacity of 1,650 long tons or 2.050 cu.m. and can receive the cargo at a rate up to 400 t.p.h. Under normal conditions the refinery will handle these barges per shift of 12 hours. Cargo operations are effected continuously day and night during Sunday and holidays, in shifts from 0600 – 1800 hrs. and from 1800 – 0600 hrs.

Sailing: Tankers sail without Pilot and may leave any time.

Moanda Terminal: To notify his arrival, Master to call mv "Afran Zenith" by radio. Vessel will then proceed to single buoy mooring berth with following particulars:

Depth 57 ft.
Position: Lat. 5° 57′ 50″ S.
Long. 12° 08′ 19″ E.

where loading will take place.

The storage tanker is moored in position:

Lat: 05° 57′ 30″ S.
Long: 12° 06′ 00″ E.

No tank-cleaning facilities. Barge available for dirty ballast reception limited to 2,000 cu.m. per trip which occasionally and on special request can be put at disposal by the refinery.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL: During stay of tankers at anchorage the discharge and/or loading operations are constantly supervised by representatives of the refinery, who are to be accommodated on board and to be provided with meals.

SHORE LEAVE: Shore leave is presently not allowed due to lack of communications; only in urgent cases a crew member may join one of the refinery tugs. There is no entertainment whatsoever ashore.

AUTHORITY: Office National des Transports, ONATRA.

AGENT: See "Matadi".

BANANA: 06.01 S. 12.25 E.

DOCUMENTS: See "General" before first port.

APPROACHES: In view of the strong current, and in view of the fact that the lights of the navigation buoys on the river do not always work properly, night navigation is practically impossible. Tankers, therefore, arriving at night, or in times of congestion, are recommended to anchor approx. 5 miles West of Moita Seca Light in approx. 10 fathoms, about 12 miles from Stella Buoy.

PILOTAGE: River can be entered direct from sea in deep water. Pilot (Not compulsory) will board vessel from 0600 hrs. with Authorities off Stella Buoy (Outer navigation Buoy No. 2) located in position:

Lat. 6° 02′ 00″ S.
Long. 12° 22′ 30″ E.

The position of the flare of the SOCIR Refinery at Moanda is:

Lat. 5° 57′ 51″ S.
Long. 12° 25′ 07″ E.

The flare is visible during day and night and may be a good bearing for vessels approaching river.

Sailing from "Stella Buoy" at 0600 hrs. vessels with a speed of up to 14 knots must pass Bulabemba before 1400 hrs. and vessels with speed in excess of 14 knots by 1500 hrs.

MAX. SIZE: Tankers up to 35 ft. draft may discharge at buoy moorings. Also see "Berthing – Commercial Port".

HEALTH: Quarantine Officer boards at sea buoy. Free Pratique usually granted as soon as Maritime Health Declaration completed. Valid cholera and yellow fever inoculations required for all crew members.

RADIO: *Tankers:* At least 3 days' notice required to Agent (ETA and draft only) and to Harbour Master, "Maritime Banana" (ETA only). It is necessary to transmit these notices via another shore station (e.g. Capetown Radio, Libreville Radio, etc.), as the Banana Radio Station can only be reached 2 days prior arrival. Close advice on changes in ETA necessary to prevent delays in waiting for Pilot and lighters.

Radio Banana (9 PA) – see "General" before first port for details.

BERTHING:

Commercial Port:

The commercial port consists of a landing space of approximately 2,000 sq.m. in front of a warehouse with approximately 2,500 sq.m. storing room.

ONATRA, the Port Authority, has no cranes and the port equipment is extremely limited. Any discharging and/or loading must therefore be done by ships' gear.

With a draft of more than 17 ft. (indicative) cargo operations to be performed at anchor between Buoys No. 12 and No. 14. Barges and gangs are then supplied on request.

With a draft of less than 17 ft. (indicative) vessel can berth at ONATRA wharf inside Banana Bay.

Length of the wharf: 75 m.

DENSITY: Brackish to salt.

FRESH WATER: Not available.

BOMA: 05.51 S. 13.03 E.

DOCUMENTS: See "General" before first port.

PILOTAGE: Port is situated on the right bank of river, about 44 miles above pilot station at Banana.

Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Sailing for Banana from 0600 hrs. till 1500 hrs. Sailing for Matadi from 0500 hrs. till 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating river varies between 20 ft. to 27 ft. according to local conditions and should be checked with Port Authority in advance.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera vaccinations and yellow fever inoculation certificates.

TUGS: 2 tugs of 200 and 300 h.p. available to assist berthing.

BERTHING: Total quay length 450 m. with 3 berths alongside. Depth of water at the quay 8 m. at low water. Maximum current at the berths is 3 knots.

STEVEDORES: See "General" before first port.

Port Equipment:

6 electric cranes on rails, capacity 3 – 6 tons.
2 steam cranes on rails, capacity 7.5 ton at 6 m. (5.0 ton at 10 m.).
5 banana conveyors.
1 electric crane, capacity 6 tons.
8 forklifts.
5 tractors and 40 trailers and carts.
1 Palmkernel elevator.
1 Automatic grab.
2 Hyster carry cranes.
7 barges, capacity 100 tons.
1 pontoon, capacity 75 tons.

FRESH WATER: Available from quays, not suitable for drinking.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: No facilities.

HOLIDAYS: See "Matadi".

GENERAL:

Exports: Logs and timber, plywood, veneerwood, coffee, cocoa, rubber, bananas, palmkernels, oils, cakes, about 8.8% of the total exports of the Zaire.

Imports: Various. About 2.5% of the total tonnage imported into Zaire.

Current at Quays: The currents of the river vary from berth to berth and depend upon the low and high level of the water with sometimes adverse currents and still waters.

Maximum speed at high level: 3 knots.
Minimum depth at the lowest level: 8 m.

AUTHORITY: Office National des Transport – ONATRA.

AGENT: Socomexas S.P.R.L. Aven. du Zaire, No. 119/F., B.P. No. 122, Boma, Republique du Zaire. Telephone: 267.

MATADI, (including Ango-Ango): 05.49 S. 13.27 E.

(See Plan Book)

DOCUMENTS: 7 days before arrival of vessel the following must be in the hands of the Agent:
4 Manifests (detailing explosives, general cargo, heavy lifts).
3 Stowage Plans.
6 Copies of Bills of Lading.
1 Freighted Manifest.
On arrival:
Maritime Declaration.
Ship's Register.
3 Crew Personal Effects Lists.
2 Stowage Plans.
1 Freighted Manifest.
3 Lists of Ports of Call.
7 Passengers Landed.
7 Passengers in Transit.
5 Crew Lists.
5 Crew Boys Lists.
2 Provisions Lists.
4 Individual Manifests.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Radio "Maritime Banana" 24 hours prior arrival giving ETA at Banana and requesting Pilot. Pilot boards at Banana Pilot station. Distance from Banana to Matadi about 75 miles. Sailing for Banana from 0600 – 1200 hrs. Sailing for Boma from 0500 – 1600 hrs.

RESTRICTIONS: Depth at bar 30 ft. Permissible draft for navigating Zaire River varies between 20 ft. and 27 ft. according to local conditions and should be checked with the Port Authority 3 days in advance.

MAX. SIZE: Controlled by draft in river.

HEALTH: Quarantine Officer boards on arrival. All crew members require valid cholera and yellow fever inoculation certificates.

TUGS: "Inga" 850 h.p., "Boma" 250 h.p., "Banana" 600 h.p. and "Soyo" 220 h.p.

BERTHING: At Matadi.
Pier 1 – 149 m.
Pier 2 – 161 m.
Pier 3 – 155 m.
Pier 4 – 158 m.
Pier 5 – 156 m.
Pier 6 – 176 m.
Pier 7 – 188 m. For full container vessels
Pier 8 – 149 m.
Pier 9 – 167 m.
Pier 10 – 143 m.
Minimum depth at Piers 8 and 10 is 10 m.
In addition there is a berth length 400 m. for barges.

At Ango-Ango: As a rule for discharge of flammable goods and explosives.

UNLOADING RATE: 800 tons to 1,000 tons of general cargo per day of 3 shifts.

CRANES:

32 Cranes (Electric and hydraulic) on rails	3 – 6 tons
1 Derrick Fixed	*50 tons (Pier 4)
1 Bridge Crane	5 tons
14 Cranes Electric	3 – 6 tons
2 Cranes Electric	10 tons

*Actual capacity 34 tons.

BULK HANDLING FACILITIES: Palm oil is stocked by 4 companies in Matadi, 3 of which have pipe-lines to a main quay. The palm oil installations of CCP are at Ango-Ango where ships must berth at Sep Zaire pier. Vessels handling Sep Zaire cargoes are given priority at this pier and in case of unavailability of berth, palm oil would be loaded by barge of 260 tons capacity at Matadi.

Palm kernel oil is also loaded at Berth Nos. 2 – 9 and Palm Oil at Berth Nos. 2 – 8 in Matadi.

P.L.Z. (Plantations Lever au Zaire) capacity	13,450 tons
AMATO-Freres	3,700 tons
MADAIL	2,340 tons
C.C.P.	3,627 tons

Cereals discharged by suction at No. 9 Berth. Rate 1,000 t.p.h.

BARGES/EQUIPMENT:
Barges:
2 Pontoons N.T. 41 tons each
8 Pontoons N.T. 75 tons each
1 Lighter N.T. 91 tons
2 Lighters N.T. 99 tons each
1 Tankbarge N.T. 279 tons
19 Lighters N.T. 339 tons each
1 Lighter N.T. 438 tons
11 Lighters N.T. 487 tons each
1 Lighter N.T. 514 tons
1 Lighter N.T. 522 tons
10 Lighters N.T. 557 tons each
2 Landing craft 875 tons each
Equipment:
28 Tractors and 242 trailers and carts
75 Forklifts with a maximum capacity of 4,000 kilos
1 Roller bridge 30 tons
3 Fork conveyors
34 Platforms × 20 ft.
6 Platforms × 40 ft. (Unilock)
3 Pushwagon tractors
Grain Elevators (Midema)

DENSITY: Fresh water.

STEVEDORES: See "General" before first port.

TANKERS: Discharge at Sep Zaire pier at Ango-Ango or Matadi. If lightening necessary before berthing, this can be effected at Ramler Buoy, 17 miles above Banana. No tank-cleaning facilities. No fresh water.

FRESH WATER: Delivery aboard the ship through valves and at each pier. Maximum daily capacity 200 tons. Delivery takes place according to the quantity asked for and usually during night.

Delivery cannot be done at the loading berth of Sep Zaire at Ango Ango.

Suppliers need 48 hours' notice. It is therefore highly recommended that Masters cable their needs well in advance to Agent and/or through Owners.

FUEL: See "General" before first port.

MEDICAL: Doctors and hospital facilities available.

REPAIRS: Small repairs possible at railway workshop.

HOLIDAYS: *Legal Holidays in Zaire – 1985:*

1st January	New Year's Day
4th January	Memorial Day
1st May	Labour Day
20th May	Anniversary of the M.P.R.
24th June	Money Day
30th June	Independence Day
1st August	Relatives' Day
14th October	Zaire Youth Day
27th October	3Z Day
17th November	Army Day
24th November	Revolution Day
25th December	Christmas

GENERAL: *Currents at the quays:*
The currents of the river vary from berth to berth and depend upon the high and low levels of the water with sometimes adverse currents and still waters. Difference between high and low level of the river is approximately 5.50 m.

Maximum speed at high level: 6 knots.

Minimum depth at lowest level: Minimum 8 m. at low water and minimum 10 m. at low water at the new Kala Kala quays.

Exports: Logs and timber (plywood, veneerwood), coffee, cocoa, rubber, copal, bananas, manioc, groundnuts, palm kernels, oils, cakes, fibres, cotton and copper.

Port Equipment and Accommodation: Matadi is the only Zaire port handling the despatch of export products originating from the interior and the import of products destined to Zaire (excluding Boma which is of minor importance and only serves the Mayumbe area).

About 90% of the tonnage in – and outward goes through Matadi at the head of the S.N.C.Z. railroad from Matadi to Kinshasa. The latter locality being a handling and concentration centre of the goods directed to or coming from Matadi.

DEVELOPMENTS: Container berth to be rebuilt.

SHIPMASTER'S REPORT: January 1981.
Documents and papers required on arrival Matadi:
7 Crew Lists.
2 Maritime Declarations of Health.
4 Passenger Lists (even if nil).
4 Ports of Call Lists.
4 Arms and Ammunitions Lists (even if nil).
4 Narcotic Lists.
3 Stores Lists.
2 Crew Customs Declarations.
1 Vaccination List (Cholera/Smallpox/Yellow Fever).
1 Animal List. (even if nil).
Following documents have to be shown to the Port Authorities:
Classification Certificate.
Ship's Register.
Derat Certificate.
Certificate of Tonnage Measurement.
Cargo Ship Safety Construction Certificate.
Cargo Ship Safety Radio-telegraphy Certificate.
Cargo Ship Safety Equipment Certificate.
International Load Line Certificate.
The official Log Book of the vessel and the Articles.

The number of crew written in the crew lists will be checked with the entries in the Articles.

Shore Leave: Each crew member receives a shore pass without particulars, which has to be returned before departure of the vessel. Fines will be imposed if shore leave pass is lost.

SHIPMASTER'S REPORT: August 1982.
As far as I could ascertain the only point in the Congo River where one can expect currents of 12 knots is in the "Devil's Cauldron" between Matadi and Ango-Ango. The rainy season is Jan./Feb. and the dry season June/July. The average current in the rainy season is 4 knots and in the dry 3 knots.

Tankers and other vessels who clear at Banana generally must go through the same procedure again at Ango-Ango or Matadi. A complete set of papers is expected as though it is the first entry into the country.

AUTHORITY: Office National des Transports – ONATRA, Port of Matadi. *Contact:* Mr. Mbelolo Bituemi-di-Kebi, Port Director.

AGENT: Socomexas, S.P.R.L., B.P. 83, Matadi, Republic of Zaire. Tel: 22.33 and 22.35. Cables: Socomexas. Telex: 20.415.

DARWIN: (Also see page 65). **(See Late Plans)**

BERTHING: No. 2 East (New Fort Hill Wharf) is now in use.
DENSITY: The usual water density of 1,025 kg./cu.m. may reduce to 1,022 kg./cu.m. during the wet season owing to river run-off.
FUEL: All grades of fuel up to 120cSt and a full range of lubricants available.

Darwin is the only port between Fremantle and Townsville which supplies HFO up to 120cSt. Longest possible notice required.
CONSULS: Honorary Consul-General for Japan: Mr. R. Morris, G.P.O. Box 1616, Darwin.

Honorary Consul for Germany (F.R.): Mr. R. W. Barth, G.P.O. Box 3329, Darwin.

EXMOUTH, W.A.: 22.20 S. 114.10 E. **(See Plan Book)**

SHIPMASTER'S REPORT: October 1984.

DOCUMENTS:

5 copies Crew List, 2 on Form M.S. 11.
2 copies Form 42A, Stores List (Ship's Bond).
1 copy Form 5. Personal Effects Declaration.
3 copies Form C & E 886. Dates and time of Departure from Overseas Ports of Loading.
*2 copies Form 0360. Health Report. 1 retained by Master.
Form 40. Application for Clearance.
Form QA3. Quarantine Notice and Declaration. If animals on board as cargo.
Form QA4. Quarantine Notice.
Form QA5. Shipmaster's Bond (Pink, Yellow). If ship's pets on board.
Forms in respect of Colonial Light Dues (if applicable).
*Forms obtained from Customs Boarding Officer on arrival.
Customs Officials, etc. board at berth.

PILOTAGE: Pilotage compulsory. Pilot boards 1 mile N.E. of jetty, from the line launch.
ANCHORAGES: 1.5 miles N.E. of jetty.
RESTRICTIONS: Berthing/sailing during daylight only. Berthing carried out at slack water.
HEALTH: See "General" before first port.
VHF: Port VHF system as such is non existent – consists of handheld portable set of very limited range, and generally during office hours only.
TUGS: None.
BERTHING: Straightforward approach from sea on recommended track to Learmouth. Reasonably deep water and no navigational hazards in vicinity of track.

Berth is a 'T' head jetty with a face 48.75 m. in length with mooring and breasting dolphins. Distance between outer dolphins is 320 m. Wharf decking is 6.1 m. above datum with depth alongside 12.0 m.
Berthing Operations: Berthing is usually starboard side to. Jetty is approached with bow slightly canted into berth and when approx. 100 m. off jetty, port anchor is let go to 1 shackle on deck and anchor dredged into berth. Forward slipline is sent away as soon as possible by mooring boat and when close enough, other lines sent by heaving line. It is essential to get either breastlines or springs ashore as soon as possible in order to hold vessel in position.

It may be necessary, once vessel is held alongside berth to change some of the moorings, as it was on this occasion. Final moorings as follows:
Forward:
1 Slipline (effectively 2 headlines).
1 Headline.
2 Breastlines (from starboard shoulder to bollard on inshore side of jetty).
2 Springs.
In addition port anchor on bottom, 1 shackle on deck.
Aft:
1 Sternline-slipline (effectively 2 stern lines).
1 Sternline.
2 Springs (from poop to North end of dolphin).
2 Breastlines (from aft maindeck to bollard on inshore side of dolphin).
A number of points arose from the mooring/unmooring operations:

Firstly, I am of the opinion that the anchor should be dropped further from the jetty, in order to assist the unmooring due to absence of tugs. This would be no problem if an offshore wind could be guaranteed, but the wind is invariably onshore. Secondly, mooring gangs are slow in getting ropes to their destination which proved to be the biggest hazard.

Care *must* be taken when mooring to ensure that the final ropes aft (in this case the springs) are on separate winches in order to clear the propeller as soon as possible – any delay when unmooring on an ebb tide could result in vessel drifting onto the aft isolated dolphin. The ideal time to unmoor would be on a flood tide and using the anchor to warp clear of the jetty. Unfortunately, things at sea are rarely done under ideal conditions, hence my comment regarding letting go the anchor sooner.

The mooring points on the jetty are themselves far from ideal, considering the strength of the ebb stream which can be compounded by a strong offshore breeze. Breast lines end up as very short, almost vertical leads, especially when light. In this case the vessel was partially ballasted prior to arrival, which somewhat alleviated this problem.

However, having made all the bad points about the berth, I must add that the shore staff were very co-operative and a fast discharge is normal.

Also see "Restrictions" and "Plan Book".

DISCHARGING: 1 line only. Permanent line on jetty connected to ship's manifold amidships with hoses. Shore line 300 mm.×1 km. Max. back pressure 150 p.s.i. High rate of discharge (up to 1,200 cu.m./hr. due empty shore tanks).

No water clearance required after discharge as line rests in Gas Oil.
Grades: As far as can be ascertained only Gas Oil delivered to Exmouth.
BALLAST: No tank cleaning or dirty ballast facilities.
DENSITY: 1025.
FRESH WATER: Very limited quantities available. Not available in dry season.
FUEL: Very limited quantities of Gas Oil.
REPAIRS: No facilities.
GENERAL: No contact with receivers (U.S. Navy). Liaison is with a Royal Australian Navy Officer on secondment to U.S. Navy.
Immobilisation of Engines: Not recommended due to strength of current and poor mooring facilities.
Stores, etc.: No laundry facilities. Very limited quantities of bread, milk, etc., available from local shops. Any large amounts of stores require to be ordered approx. 3 weeks in advance.

PORT BONYTHON, S.A.: (Also see page 91). **(See Late Plans)**

SHIPMASTER'S REPORT: November 1984.
Approaches: Recommended charts: BA 2389, 407; Aus. 136, 778, 777, 776. Passage up the Gulf is straightforward with fairly good radar echoes returned from the rather low lying coast. The lights of Whyalla and the flare at Bonython serve as useful guides.

The area is intensely fished and considerable interference may arise from concentrations of fishing vessels from Port Lincoln and Whyalla. All fishing vessels have been cautioned to keep clear of the Bonython Departure Channel but this instruction is largely ignored.
Documents: Normal port entry procedure and papers.
Pilotage: The Pilot boards from a yellow and blue hulled launch in a position 165°, distance 5 miles from Whyalla Entrance Beacon and the usual strict observance of IMO/SOLAS pilot ladder regulations is required. Ladder about 1.5 m. from water.

Pilots work Channels 16, 12 and 6 on VHF and the launch will approach from Whyalla itself. Once the Pilot is boarded, the vessel proceeds to the berth up the Western Channel, while loaded vessels depart from the newly marked departure channel with the Pilot disembarking at the Entrance Buoy.

Length of pilotage to first line ashore, about 1.5 hours.
Max. Size: See "Berthing".
VHF: See "Pilotage".

The name rhymes with "python" and the correct pronunciation will avoid embarrassment over the VHF.
Tugs: Two tugs are available (from Whyalla): "Taminga" 3,600 h.p. and "Turmoil" of 2,250 h.p. Despite my reservations, the Pilot assured me that they are perfectly adequate for pulling loaded vessels off the berth against the fresh onshore winds that predominate. Mooring boats are available for running lines to the dolphins.
Berthing: Consists of a new liquids handling terminal situated at the Northern end of the Spencer Gulf, about 9 miles from the port of Whyalla, in position Lat. 33° 01′ S., Long. 137° 47′ E., by the promontory noted on the charts as Stony Point.

The berth is designed to handle crude carriers up to 110,000 tonnes and LPG vessels up to 75,000 cu.m.

The oil handling facility has been in use for 2 years while the LPG facility has only come into operation within the last few months, this vessel being the second LPG ship to load there.

The berth consists of a "T" head jetty at the end of a 2.5 km. trestle.

Mooring arrangements are good and the berth is well fendered. See "Late Plans".

Within the next few months a 24 hour berthing operation will be put into effect although it is as well to obtain prior advice from the Agent since it occasionally suits their operation to berth vessels during daylight.

The Japanese company Idemitsu apparently invested a huge proportion of the cost of the project and it was at their insistence that the cargo lines are dedicated to their own product and with no cross-connection available.
Loading: Notice of Readiness is tendered and accepted at time of vessel being secured.

The maximum outreach of the loading arms is no more than 4.0 m. beyond the ship's side which necessitates the use of low extensions to the manifold. The arms also require a minimum distance of 2.0 m. between them and this precludes the simultaneous loading of 2 grades since they require a VRL to maintain an overpressure in their shore tanks.

At the moment LPG production is about 1,000 tonnes per day and they only envisage shipments every 6 weeks or so.

Quoted rates for the 2 products at the moment are 2,400 cu.m./hr. Our overall average was 890 tonnes/p.h. on each grade with occasional hourly rates up to 1,000 t.p.h.

It will be necessary to shift ship on changing grades to line up the chicksans/manifolds for the second grade.

Despite the length of pipe-line both products were cold. Butane at minus 4°C and Propane at minus 42°C.

Surveys are carried out on board but the final B/L figures are based on measurement of the shore tanks; on this occasion both sets of figures compared quite well.

Loading Arms: (Port Bonython)

LOADING ARMS						SHIP'S MANIFOLD REQUIREMENTS				
		Size		*Height above waterline*		*Height above deck or other obstruction*		*Set back to face of ship's manifold or reducer if requ'd*		
No.	*Service*	*Arm* (All 150 ANSI)	*Coupling*	*Max.*	*Min.*	*Max.*	*Min. below lower edge of manifold flange*	*From ship's side Max.*	*From ship's side Min.*	*Min. dist. between ship's manifolds*
1 2 3	Crude Condensate Ballast	12 in. 300 mm.	12 in. 300 mm.	20.24 m.	4.14 m.	Unrestricted, except for safe access.	0.56 m.	4 m.	1.65 m.	2 m.
4	Propane Liquid	6 in. 150 mm.	6 in. or 8 in. 150 mm. or 200 mm.	12.74 m.	3.14 m.		0.44 m.	3.2 m.	1.35 m.	2 m.
	Vapour hose connection	3 in. 75 mm.	3 in. 75 mm.							
5 6 7	Propane Liquid or Vapour	10 in. 250 mm.	10 in. or 12 in. 250 mm. or 300 mm.	18.24 m.	4.14 m.		0.53 m.	4 m.	1.5 m.	2 m.
8 9 10	Butane Liquid or Vapour	10 in. 250 mm.	10 in. or 12 in. 250 mm. or 300 mm.	18.24 m.	4.14 m.		0.53 m.	4 m.	1.5 m.	2 m.

Port Regulations do not allow the venting of tank vapours to atmosphere and in the event of a vessel arriving under inerts excess pressure will be vented to the shore flare. A charge for loss of product being made accordingly. Similarly, if they have doubts about contamination (ammonia) in the ship's tanks, this would also be led to the flare. Continuous sampling is done ashore.

It was not made clear whether a vessel would be asked to leave the berth to 'cool down' and it is thought that this would be a matter for discussion/decision on an individual basis. Tug hire, at 40,000 Aus. dollars per berthing operation is expensive.

The ship will be subjected to the normal D.O.T. inspection during her visit. They will not necessarily be carried out prior to loading. Very thorough, especially on safety gear, lifting gear and documentation.

We received excellent co-operation throughout at all levels and stages of the operation. Since this was only their second cargo they were, perhaps, taking particular care, but there is no reason to expect this co-operation to deteriorate in the future.

Also see "Fire Precautions".

Fresh Water: Available from the jetty or by barge; the local personnel do not advise taking any since it is most unpleasant (reportedly) to drink.

Fuel: Not available.

Fire Precautions: The terminal's safety regulations require the vessel to prepare a comprehensive loading plan which must include hull stresses for each stage of the operation.

Repairs: With the Whyalla Shipyard closed, these may be difficult to arrange.

Surveyors: Nearest Lloyd's Surveyor resides at Adelaide.

Gangway/Deck Watchmen: A substantial shore gangway is provided.

Strict security control is exercised throughout the complex and authorisation for visitors must be obtained. They are especially wary about intoxicated personnel boarding or leaving the vessel and may ask for a ship's Officer as escort.

Airport: There is a local airport which facilitates the delivery of spare gear, etc.

Storing: The local chandlers have a very good working relationship with the terminal personnel and there is little problem in loading foodstuffs and small stores/spares. The usual restrictions apply to the movement of metal objects.

There is a 1 tonne crane on the jetty (Eastern end) which may be used for storing.

Meat and fish prices are very good, together with most local produce. Beers other than the local South Australian brands may be difficult to obtain (coming from Adelaide) and are more expensive.

Shore Leave: Security will arrange for transport to and from the ship to the gate.

It is some 20 km. into town and the cost (one way) of a taxi is 30 Australian dollars. The Agent will be able to arrange a mini-bus service.

PORTLAND: (Also see page 101).

SHIPMASTER'S REPORT: November 1984.

Bulk Loading Facilities: Bulk grain at No. 1 and No. 2 Berths K.S. Anderson Wharf. As the shiploaders are fed by 1 conveyor belt, only 1 ship can be loaded at a time.

Bahamas

FREEPORT: (Also see page 117).

SHIPMASTER'S REPORT: December 1984.

Pilotage: Pilot boards from tug and requires pilot ladder about 10 ft. above water. There are no pilot boats.

Radio: With 5 day message Receivers require the following:

Name of vessel and call sign.
Deepest arrival draft.
Gross bbls. at observed temperature on arrival (estimated).
Average temperature in °F on arrival (estimated).
Expected discharge rate in bbls/hr. assuming unrestricted by shore facilities.
Maximum freeboard 55 ft.
No. and size of cargo manifolds.
No. of hours required to ballast.
Ship's loaded gross bbls. at 60°F less retained slops.
Ship's slop quantity on arrival load port indicating oil and water in bbls.
Indicate if Loading On Top (L.O.T.).
Which slop tank.
Indicate ship experience factor for last 5 cargoes excluding initial voyage after dry dock.
Was Letter of Protest noted, if so give brief details.

VHF: Channel 13 for working Pilots.

Tugs: Usually 2 tugs, 1 of which will put up 2 headlines and 2 quarter lines, the other just 2 headlines. Depends on weather conditions as to which tug is forward and which aft.

Belgium

ANTWERP: (Also see page 139).

REPORT: December 1984.

Bulk Handling Facilities:

1. Societe Generale des Minerais (S.G.M.)
Canaldock B.1 Berths:
LOA: No restriction (see remarks).
Draft: 54 ft. fresh water at berth (see remarks).
Beam: Discharge coal: No restriction.
Discharge ores: Crane Nos. 1 – 3 outreach 41.6 m. (see remarks).
Crane Nos. 4 – 5 outreach 49.0 m. (see remarks).
Clear height from waterline to top of hatch coaming:
Crane Nos. 1 – 3: 17 m.
Crane Nos. 4 – 5: 21 m.

2. Stocatra
(a) Hansadock Berths
LOA: No restriction (see remarks).
Draft: Alongside berth 43 ft. fresh water (see remarks).
Beam: No restriction (see remarks).
Clear height from waterline to top of hatch coaming: 16 m. for normal discharge.
(b) Delwaidedock Berths
LOA: No restriction (see remarks).
Draft: 55 ft. fresh water (see remarks).
Beam: No restriction (see remarks).
Clear height from waterline to top of hatch coaming: 24 m.

Remarks:

Drafts are based on fresh water.

For vessels over 270 m. (884 ft. 10 in.) LOA, drafts have to be reduced as follows:

LOA 270 m. (884 ft. 10 in.) up to 280 m. (917 ft. 8 in.): 6 in. per 10 ft. (3.05 m.) exceeding 270 m.

LOA over 280 m.: 6 in. per 10 ft. exceeding 270 m. and 3 in. per 10 ft. exceeding 280 m.

The maximum LOA allowed is 300 m.

The maximum beam in the Zandvlietlock is 45 m.

Sailing: Maximum draft allowed is 12.19 m. from Zandvlietlock.

Tankers: (Oil-gas-chemicals) – empty or loaded – not gasfree.

As from 1.11.1984 the regulations below and the tanker checklist are applicable.

Regulations:

14th August, 1984 – Royal Decree for the Assessment of the Minimum Requirements with which some Tankers, which intend to call at a Belgian port, have to comply. (Free translation) (*).

Article 1 § 1. The Owners and Operators, their employees, mandatories or representatives, of oil, gas and chemical tankers with a Belgian port as destination (loaded or in ballast but not yet free of vapours or dangerous residues) must notify the following information:

(a) Name and call sign of the vessel.
(b) Nationality of the vessel.
(c) The overall length and draft of the vessel.
(d) Port of destination.
(e) ETA in the port of destination or at the pilot station.
(f) General nature and quantity of the cargo.
(g) In case of carriage of chemicals in bulk, whether or not the vessel is in possession of a fitness certificate in accordance with the IMO Code for the construction and equipment of vessels carrying dangerous chemicals in bulk or in case the vessel carries liquefied gas in bulk, whether the vessel is in possession of a fitness certificate in accordance with the IMO Code for the construction and equipment of vessels carrying liquefied gases in bulk.
(h) Any defects or incidents which may affect the normal and safe manoeuvrability of the vessel, are detrimental to a safe and fluent navigation, or constitute a hazard to marine environment and surroundings.

§ 2. The Masters of such vessels can be put in charge of these notifications.

§ 3. When the destination of the vessels is a Belgian coastal port the data mentioned in §1 must be notified to the Maritime Control of Traffic of the Ostend Pilotage before Belgian territorial waters are entered. When the destination of these vessels is another Belgian port, this data must be notified to Flushing Radio before Belgian or Dutch territorial waters are entered.

Article 2 § 1. Before entering Belgian or Dutch territorial waters the Masters of the vessels referred to in Article 1 have to truthfully and accurately fill in the check-list to this decree and to hand a copy of it to the Pilot for his information.

§ 2. If additional copies of this list are requested by the competent Authorities they have to be transmitted to them without delay.

Article 3. During the navigation in territorial waters the Masters of the vessels referred to in Article 1 and which intend to call at a Belgian port or which have left this port have to:

(a) Notify the competent Authorities of all defects and incidents which are liable to reduce the manoeuvrability of the vessel under normal safe conditions, to detrimentally influence the safe and fluent navigation or constitute a hazard to the marine environment and surroundings.
(b) Establish as soon as possible a radio-telephonic communication with the appropriate coastal stations, preferably in VHF, more particularly with the nearest radar station – if it exists – and maintain this communication.
(c) Call upon the services of radar stations particularly in conditions of restricted visibility.

This decree will be effective on 1st November, 1984.

(*) This decree results from the directive 79/116/EEC of the Council of European Communities of 21st December, 1978, modified by the directive 79/1034/EEC of same council of 6th December, 1979.

Brazil

SANTOS: (Also see page 189).

BULK HANDLING FACILITIES:

Pellets: Length of quay 280 m., depth 13 m. with 3 warehouses, capacity 105,000 tonnes. Connected by belts and loaders, capacity 3,000 t.p.h., with automatic weighing machines. 2 hoppers with capacity of 500 t.p.h. and 800 t.p.h. each, permit simultaneous receival from wagons and trucks.

Pellets and Fertilisers: Stretch of quay from Warehouse 17 to Warehouse 20. 5 loaders of capacity 1,850 t.p.h. Stocks held in Warehouses 19 and 20, and Warehouses V, VI, X, XV and XXIII.

Salt: Stretch of quay in front of Warehouses 22 and 23. Electric cranes and belts provide capacity of 1,000 t.p.h. Stocks discharged to Warehouses XII and XVII, and a special wooden warehouse.

Grain: 3 terminals with unloaders and conveyor belts.

(i) 3 unloaders (270 t.p.h.) in front of Warehouse 9.
(ii) 2 unloaders (420 t.p.h.) between Warehouses 12-A and 13. Discharge to Paulista Mill.
(iii) 4 unloaders (540 t.p.h.) in front of Warehouse 26. Discharge to Codesp's silo.

Silo capacities: Codesp – 30,000 tonnes, Santista – 34,800 tonnes, Paulista – 20,000 tonnes.

Fertilisers: A quay, at Conceicaozinha, length 567 m. with 2 piers. Each pier is 283.5 m. long with a depth 13.5 m. minimum tide. Warehouse capacity 180,000 tonnes. 12 electric portico cranes, with grabs, and conveyor belts.

Coal: At Saboo, capacity 50,000 tonnes, serviced by electric cranes, grabs and conveyor belts. Rate 1,000 t.p.h.

Roll-on/Roll-off: 6 Ro/Ro berths in operation. For vessels with straight ramps – at Saboo Quay (Warehouse 29).

For vessels with angled or side ramps – at Saboo Quay (Warehouse 35).

CRANES:

Type	*No.*	*Capacity*
Cranes		
Electric portico	173	1.5 to 30.0 tonnes
On tyres	41	4.5 to 250.0 tonnes
On belts	5	6.5 to 11.0 tonnes
Conveyors/Piling up of containers	3	30.0 tonnes
Portainers	2	20 units/hr.
Transtainer	1	20 units/hr.
Transtainers on tyres	2	30.5 tonnes

EQUIPMENT:

Forklifts		
Common	271	2.0 to 23.6 tonnes
For rolls of paper	26	1.2 to 2.0 tonnes
For containers	3	37.0 tonnes
With buckets	7	1.8 tonnes
For inside containers	21	1.8 tonnes
Floating cranes	2	150 and 250 tonnes
Water barges	2	30 and 450 tonnes

DEVELOPMENTS: The following development goals for medium and long term:

Enlargement from the Valongo Quay to Paqueta 1.
Enlargement of the Container Terminal.
Construction of a Terminal destined for Roll-on/Roll-off operations.

Bulgaria

BOURGAS: (Also see page 213).

ANCHORAGE: Amend line 3 to read:

"Vessel ordered by Authorities to proceed to position Lat. 42° 39′ N.,"

SHIPMASTER'S REPORT:

Anchorage: Amend line 2 to read:

"Lat. 42° 39′ N., Long. 27° 56′ E. for clearance and Pilot. After clearance"

Canada

GENERAL: (Also see page 224).

REPORT: February 1985.

Herewith is an outline of requirements for chemical tankers which are scheduled to call Vancouver/British Columbia ports.

1. Vessel must have on board a valid non-Canadian Ship's Compliance Certificate.
2. Certificate of Fitness and date.
3. Provide Agents with 7, 4, 2 and 1 day's notice prior to arrival.
4. Advise Agents of the last 2 cargoes.
5. Advise of any cargo in transit (quantity and type).
6. Vessel is required, in Vancouver, to have a clear passage while transiting the First and Second Narrows Bridge – with a minimum of 1 mile visibility. Vancouver Traffic Centre will advise vessel accordingly upon arrival.
7. Canadian Coast Guard will attend on board upon arrival for safety inspection.

In the case that a vessel arrives in Vancouver with ammonia on board, the vessel is permitted to load propane as a second cargo, providing they are fully segregated.

PRINCE RUPERT: (Also see page 254).

SHIPMASTER'S REPORT: January 1985.

Berthing: Ridley Terminals Inc.: (Coal). Max. draft 22 m.

Chile

GENERAL: (Also see page 281).

SHIPMASTER'S REPORT: January 1985.
Painting: We called recently at Iquique – Antofagasta – Valparaiso – San Vicente. In *all* ports scraping and painting the hull only allowed after having received permission from Port Captain.
Containers: When more than 6 containers have been (re)loaded on deck the lashing of same are to be checked by Surveyor of Port Captain's Office. Surveyor at San Vicente insisted on chains, even when twistlocks were used and containers only single stacked.
Stability: Prior departure last Chilean port, stability particulars to be given to Surveyor from Port Captain's Office.
Time: Summertime is kept, GMT minus 3 hours.
Curfew: Only in Valparaiso.

PUNTA ARENAS: (Also see page 289).

SHIPMASTER'S REPORT: March 1985 (Research Ship).
Approaches and Pilotage: Report to Chilean Radio Station when 200 miles off.

The Pilot, a Chilean Naval Officer, boards/leaves via a warship. The Pilot brings his own charts. We did not have a suitable chart of Bahia Cook. On a future visit one should be obtained for a safe approach.
Berths: Either side of a 380 m. long pier. There is a Berthing Pilot, and because of the prevailing very strong winds in the afternoon and evening it is customary to use a tug aft.

Punta Arenas is a busy port.
Documentation:
10 Crew Lists (not all taken).
3 NIL Passenger Lists.
3 NIL Cargo Lists.
3 Lists of Personnel Disembarking.
2 Store Lists (Deck, Engine, catering).
2 Bonded Store Lists.
2 Crew Declarations.
1 Maritime Declaration of Health.
Officials: Extremely courteous. We were made to feel most welcome. The bond was not sealed. The Port Captain (Navy) visited the vessel on several occasions, and offered every assistance should any need arise.
Immigration: Shore passes are issued, and must be returned on sailing.
Fuel: Diesel was delivered by road wagon. This took most of the day, but saved having to shift the ship to the Oil Jetty – which would have taken all day.
Water: Laid on to the quay.
Provisions: Ship Chandler: Juan Carlos Carrasco Harris (Aguas Negras), Errazuri 455, Punta Arenas. Tel: 21549. Telex: 280056 Danep Cl.

Able to supply all our requirements, even to a medical oxygen bottle adaptor.

The quality of fresh fruit and vegetables was as good as U.K., in some cases better. Prices were similar. The chandler has a refrigerated store, thus items were delivered in prime condition. Even bananas lasted 2 weeks.
Prices: Unfortunately there is, at the moment, no Duty Free facility. In addition all items (and services) are subject to +20% VAT. This included fuel.
Laundry: Very good standard. Average price range (subject to the 20% VAT).
British Consul: Mr. Bill Matheson. Tel: 22325.
Repair Facilities: Not tried, but reported good.
Repatriation: No particular problems. There are flights daily. It is however a long haul back to the U.K., requiring a night stop over in Santiago.

The best hotel accommodation at Punta Arenas was very expensive. Alternative accommodation can be had at Mother Teresa's Home for Seamen at about £20 a night (but not usually single occupancy).

QUINTERO: (Also see page 290).

DOCUMENTS: 1 Certificate of Dues in respect of lighthouses and buoys.
MAX. SIZE: *Chilectra Andina Quay:* LOA 175 m., draft 32 ft.
Las Ventanas Chemical Terminal: Up to 40,000 g.r.t.
El Durazno Quay: LOA 96 m., draft 19 ft.
TANKERS: *S.B.M. Quintero Terminal:* Draft 25.5 m. (83 ft.)
Gas Berth: Max. draft 39 ft. Ship's head should lie on 285°.
R.P.C.: Max. draft 50 ft.
BULK HANDLING FACILITIES: *Chilectra Andina Quay, Las Ventanas:* Max. depth 19 m. at the head on the North side of the pier.

On the South side, max. LOA 160 m., draft 30 ft.
FRESH WATER: Available from Valparaiso, by barge.
SHORE LEAVE: Curfew in operation.
TIME: GMT minus 3 hours (October to March). GMT minus 4 hours (March to October).

Colombia

BUENAVENTURA: (Also see page 317)

The following amendments were received in December 1984.
PILOTAGE:

(a) Entry marked by channel having minimum depth of 3.25 fathoms low tide. Advisable enter channel or leave wharf 1 hour after low tide and 2 hours after high tide, restricting departure during any other periods, particularly when draft exceeding 20 ft. Entry to channel marked by Buoy No. 1 located at Lat. 03° 47′ 10″ N., Long. 77° 19′ 10″ W.

(b) 72, 48, 24 and 12 hours before reaching port, Master must cable separately to Agents and to Port Captain confirming hour of arrival Punta Basan (pilot station). Message to Agency must indicate, in addition to ETA, quantity of cargo destined for the port, number of disembarking or in-transit passengers, number of gangs required for operations, draft, mail for the port, if fresh or running water is required, fuel-oil, cash to Master or any other special requirements; whether special side of wharf is required for berthing, and whether dangerous cargo (explosive) or flammable cargo, and what quantity. Message to Port Captain must also indicate arrival time, quantity of cargo destined to the port, number of disembarking or in-transit passengers, mail, whether dangerous or flammable cargo is carried and in what quantity, and any other data that may be considered useful in accordance with International Regulations.

(d) Radio-telephone in pilot station of Punta Basan or La Bocana (opposite Punta Soldado). Characteristics: VHF Channels 11 and 16 every day from 0600 – 2400 hrs.

(f) Port has 8 Pilots.

(h) Pilotage compulsory.
ANCHORAGES: There are 3 additional anchorage zones and their use will be ordered from the Authorities.
MAX. SIZE: No restrictions on the length of vessel, depth alongside wharf approximately 12 ft. – 30 ft., under terms "not always afloat but safely aground", low tide.
HEALTH:

(c) Time-table for meeting vessel: Ordinary or regular time – ordinary time 0800/1200 hrs. – 1400/1800 hrs., overtime 0700/0800 hrs. – 1200/1400 hrs. – 1800/2000 hrs. Sundays and holidays, overtime.

(d) After 2000 hrs. and up to 0700 hrs. of following day it is not possible to make arrangements for meeting vessels, unless in emergency.
TUGS: Normally only required for berthing. Tug operation handled by Pilot. Generally tug service consists of pushing from stern or bow as required. When necessary to use ropes, they must be supplied by vessel. 2 tugs × 1,200 h.p. and 1 × 350 h.p.
BERTHING:

Berth	*Length*	*Depth at LW*
Shed No. 1	202 m.	12 ft.
Sheds No. 2 – No. 9	—	23 ft. – 25 ft.
New Pier	80 m.	30 ft.
	597 m.	17 ft. – 20 ft.

STEVEDORES: Port has at present time 80 gangs of 16 men each. The working hours during ordinary or regular time are from 0800/1130 hrs. and from 1400/1730 hrs. Overtime from 1200/1400 hrs. – 1800/2400 hrs. and from 0000/0200 hrs. 24 hours are worked with special request. No work from 2300 hrs. Saturday until 0700 hrs. Monday.
TANKERS: Independent oil pier with capacity to accommodate vessels of medium size. 4 × 8 in. hoses for discharge of petroleum products, and 2× 6 in. and 1× 4 in. hoses for unloading chemicals. Average rate of discharge of gasoline is 5,000 b.p.h. (approximately). Fuel oil and chemicals 1,500 b.p.h.
WATCHMEN: Service necessary both by Crew members' and Agents' personnel. There is an established body of watchmen named "Policia de Vigilancia Portuaria" (National Police); additionally, the steamship Agencies carry out this work with their own personnel on previous request by Master. The port has a port police body and Customs house guards which co-operate in vessels' watch.
CONSULS: Panama Tel. 2 22 50. Most countries have consuls in Cali – approximately 142 km. from Buenaventura.
AIRPORT: Located 18 km. from Buenaventura. Airport is small and is inactive. Agent in charge of the repatriation of a crew member must handle necessary connection in Cali or Bogota, where there are international airports.
POLICE/AMBULANCE/FIRE: A voluntary fireman corps in the city. Alarm, tel. 22222. Guard, tel. 23720. Fireman, tel. 15. Ambulance, tel. 22830, 22638/23708/24475. Police, tel. 22738.
GENERAL: Port is equipped with following shore cranes: 2 × 80,000 lb. capacity (mobile), 1 × 60,000 lb. capacity (mobile), 3 × 20,000 lb. capacity (mobile), 2 × 14,000 lb. capacity (mobile), and 1 × 10,000 lb. capacity (fixed).

Floating cranes: 1 × 45 tons capacity.

Lighters available: 3 with following characteristics:

Size Length/Width	*Capacity*	*Type*
24.40 × 9.45 m.	280 tons	Flat surface
34.40 × 7.60 m.	150 tons	Flat surface
38.80 × 10.60 m.	150 tons	Flat surface

CARTAGENA: (Also see page 319). (See Late Plans)

This information supersedes "Tankers" on page 319.

LOCATION: Cartagena is located on the Bay of Cartagena, North coast of Colombia, Lat. 10° 19′ N., Long. 75° 31′ W.

DOCUMENTS: Documents necessary for a petroleum tanker arriving at Cartagena are as follows:

1 copy Clearance (Despacho) from Last Port (if vessel was directed while en-route, Master's affidavit). Consular visa unnecessary.
1 copy Consular Dispatch.
4 copies Crew List.
4 copies Personal Effects Lists.
2 copies Ballast Manifest (Manifiesto de Lastre).
4 copies Stores List.

PILOTAGE: Pilotage is compulsory. If, on arrival outside the entrance to the channel leading to Cartagena harbour, a Pilot does not meet your vessel, you are to sound the whistle signal, 4 long blasts, and display International Code Flag "G" for a Pilot.

Vessels are not to pass each other in the channel leading into the harbour of Cartagena and inbound vessels are to give way to outbound vessels.

Vessels entering or leaving the port must have a Pilot on board, otherwise they might be subject to a fine for failure to comply with this regulation.

The vessel must sound 4 long whistle blasts so that it will be met by the Mooring Master inside the harbour and who will take it alongside immediately if berth is available. If the ship's Master sees that another ship is at the loading berth, he must anchor.

It will be necessary to deliver to the Mooring Master a report stating the exact time he arrived on board and left your vessel outside the channel. If, when inbound, the Pilot does not meet your vessel outside the channel, you are to note this fact on the Pilot's Report.

NAVIGATION AIDS: For information pertaining to Navigation Aids, you are invited to consult the latest edition of the Light List (H.O. III A) or equivalent British Light List; also the Sailing Directions covering the area.

RESTRICTIONS/MAX. SIZE:

		Refinery Terminal Max. – Min.	*Nestor Pineda Terminal* Max. – Min.
Size of vessel that can safely berth:	Length (ft.):	853 – 492	853 – 577
	Beam (ft.)	125 – 65	125 – 82
	Draft (ft.):	38	38
	d.w.t.:	85,000 – 12,000	85,000 – 25,000
Location of Terminals South of the City of Cartagena:		7 miles	5 miles
Latitude:		10° 19′ 09″ N.	10° 19′ 39″ N.
Longitude:		75° 30′ 42″ W.	75° 30′ 54″ W.
Distance from port entrance:		5.5 miles	6.5 miles
Least depth of water from Bocachica Channel to Terminal:		44 ft.	44 ft.
Depth of water at Terminal at Mean Low Tides:		40 ft.	40 ft.
Mean Tidal Range at Terminal:		1.5 ft.	1.5 ft.
Nature of bottom at Terminal:		Mud	Mud
Docking and unloading:		Night and day	Night and day

Also see "Berthing".

RADIO: Masters of vessels proceeding to the Cartagena Terminals are to send a radio notice at least 48 hours prior to arrival to the Agent at Cartagena; should be corrected promptly in the event of any change in the time of arrival.

The Agency, upon receipt of the arrival cable, will cable the vessel with pertaining instructions about the cargo, if not ready, or if the berth is occupied at the time of arrival by another vessel. In these instructions, the Agency will indicate the estimated docking time.

BERTHING: Ecopetrol owns 2 terminals on the Bay of Cartagena:
Refinery Terminal: The dock of the Refinery Terminal consists of a "T" loading platform with trestle connection to shore, 4 breasting dolphins and 2 mooring dolphins. These facilities are used for receiving crude oil, gas oil and white products and shipping refined products and spent caustic in tankers up to 85,000 d.w.t., either empty or partially loaded to a maximum draft of 36 ft.
Nestor Pineda Terminal: Consists of an isolated loading platform, connected to the shore by 7 submarine pipe-lines, 3 breasting dolphins, and 2 mooring dolphins. These facilities are used for receiving crude oil and shipping fuel oil and aromatics in tankers up to 85,000 d.w.t., either empty or partially loaded to a maximum draft of 36 ft.

The size of tankers entering Cartagena's bay is limited by the depth of the entrance channel (Boca Chica), which is limited to ships with a maximum draft of 38 ft.

Vessels are supposed to dock alongside the dock with bow and stern lines from both the port and starboard bow and stern.

To dock vessels over 2,000 d.w.t., Maritime and Port Authorities request the use of tugs. Tug costs are on the ship's account. It is recommended that 2 mooring lines be bent together on the starboard quarter. The Mooring Master boards the vessel about 0.5 mile from dock and remains aboard during the entire stay of the vessel at the dock. The Loading Master is to be supplied with room and meals on board.

LOADING/DISCHARGING:
Name of grades handled at Refinery Terminal:

	No. and Size of F.M.C. Tubular Arms	*Diameter of Pipe-line*	*Max. Pumping Rate – Barrels Per Hour*	*Max. Pump. Pressure psig.*
Crude Oil	3 – 12 in. × 60 ft.	20 in.	20,000	150
Fuel Oil	3 – 12 in. × 60 ft.	2 – 14 in.	5,000	150
Gasoline	3 – 12 in. × 60 ft.	18 in.	10,000	150
Kerosene-turbo	1 – 12 in. × 60 ft.	8 in. – 10 in.	2,100	150
Diesel	2 – 12 in. × 60 ft.	12 in.	7,000	150
Spent Caustic Soda	1 – 12 in. × 60 ft.	6 in.	2,000	150
Ballast Water	3 – 12 in. × 60 ft.	16 in.	20,000	150

Name of grades handled at Nestor Pineda Terminal:

	No. and Size of F.M.C. Tubular Arms	*Diameter of Pipe-line*	*Max. Pumping Rate – Barrels Per Hour*	*Max. Pump. Pressure psig.*
Fuel Oil	3 – 12 in. × 60 ft.	24 in.	10,000	150
Crude Oil	3 – 12 in. × 60 ft.	20 in.	20,000 (1)	150
White Products (2)	2 – 12 in. × 60 ft.	6 in.	1,500	150
Ballast Water	3 – 12 in. × 60 ft.	16 in	20,000 (1)	150

(1) From ship to shore facilities.
(2) Includes facilities for loading Aromatics (Benzenes and Xilenes).

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling in port. Vessels in ballast shall not have greater than 4 ft. trim difference between the fore and after draft. Dock Master requirements in this connection under normal weather conditions are interpreted as drawing approximately 14 ft. forward and 18 ft. aft.

The deballasting facilities are as follows:

In the Refinery Terminal the pipe-line to the shore installations is 2,835 ft. long and 16 in. diameter, 3×12 in. loading arms are available to a maximum rate of deballasting of 20,000 bbls.p.h. In the Nestor Pineda Terminal the pipe-line to the shore is 3,600 ft. long, and 16 in. diameter, also there are 3×12 in. loading arms to a maximum rate of deballasting 20,000 bbls.p.h.

No dirty or clean ballast, nor engine room, or pump room material must be pumped overboard while inside the port.

The Ship's Master should be fully aware of the Colombian laws and regulations pertaining to pollution of the environment and the sanctions derived from their infringement.

Extreme care must be taken to avoid spillage of oil or any other contaminants. In the occurrence of any spillage attributable to the crew's responsibility, immediate action must be taken in order to clean the affected areas. The costs of this action are on the ship's account.

There are strict legal regulations concerning pollution problems. Those responsible for this type of situation will be heavily fined by the Port Authority.

FRESH WATER: Fresh water is available only at Nestor Pineda Marine Terminal. This water is not recommended for drinking.

FUEL: Bunker C Oil, Marine Diesel and Diesel Oil are available only in the tanker anchorage area, from local suppliers.

GANGWAY/DECK WATCHMEN: An accommodation ladder shall be lowered on the port side upon arrival at the port.

SHORE LEAVE: Shore leave is granted to members of the crews of vessels calling at Cartagena. Before granting shore leave, the Master must address a letter to the Port Authority requesting permission to grant shore leave and must assume all responsibility for his men.

Crew deserters will be arrested by the local police and the vessel in all probability will be fined. Every precaution, therefore, is to be taken to prevent members of the crew from going ashore without permission from the Master. The Port Authority restricts, under penalty of fine, the boarding of any tanker while at the loading terminal by all persons except those having official duties to perform on board. Masters are to make sure that no unauthorised persons are permitted to come on board their vessel while at the terminal.

REGULATIONS: Ecopetrol requires that all vessels loading or unloading at their terminals comply with the following regulations:

a. Tankers must arrive in port with hose derricks rigged and mooring lines on deck.
b. During the time the tanker is at the loading platform a sufficient number of the ship's crew must be on duty to properly attend the mooring and hose lines; so that necessary changes can be promptly made.
c. The tanker must furnish one member of the crew to operate the ship's winch, which operation, however, is to be under the direction of the Loading Master.
d. The tanker's crew must handle all ship's valves.
e. The ship's officers must follow the instructions, in all aspects, from the Loading Master as to all the signals to be given to the shore loading stations. When the tanker is about to be loaded, a "stand-by" signal is to be given. The "Slow-down" signal must be given at least 5 minutes before the "Shut-down" signal.
f. In order to facilitate the above, the crew should be on deck immediately following the "stand-by" signal and preparations must start to unberth the ship on completion.
g. No ship will be berthed except under the sole direction of the Mooring Master.
h. While the ship is berthed, the propellers must not be moved; engines shall be ready for immediate use and steam, or power must be available to work winches and windlasses to meet emergencies at all times.
i. All instructions from the Loading Master, whether contained in these regulations or not, must be followed by the ship's officers and if not, all operations will be discontinued, and, if necessary, the ship removed from the loading berth until such time as the ship's officers comply with orders of the Loading Master.
j. No maintenance, or repair to the ship, such as welding, or any other hot work will be undertaken, while at the berth and which will endanger the safety of the installations, or equipment, owned by Ecopetrol.
k. When loading/unloading operations are complete, the crew shall endeavour toward clearing the facilities in the shortest period of time possible.

POZOS COLORADOS:

This information supersedes that given on page 321 and 322.

LOCATION: North coast of Colombia, approximately 6 miles S.W. of Santa Marta.

DOCUMENTS:

For the Port Captain:
1 Clearance for Last Port.
1 Voyage Report.
1 Crew List.
1 List of Passengers for Santa Marta.
1 List of Passengers in Transit.

Vessel Certificates: (These only need to be shown).
Registration Certificate.
Load Line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radiotelegraphy Safety Certificate.
Construction Certificate.
Cargo Handling Equipment Safety Certificate.
Oil Pollution Certificate (Insurance for US$1,000,000).

For Port Health Authority:
Derat Certificate.
Maritime Health Declaration.
Toxic Element Certificate.
Crew List with dates of vaccination.
List of Passengers for Santa Marta.
List of Passengers in Transit.

For Customs:
3 Cargo Manifests.
3 Crew Lists.
3 Lists of Passengers for Santa Marta.
3 Lists of Passengers in Transit.
3 Lists of Crew Personal Effects.
3 Lists of Provisions.
3 Mail Lists.

For Agencies:
1 Voyage Report (these only need to be shown).
2 Crew Lists.
2 Lists of Passengers for Santa Marta.
2 Lists of Passengers in Transit.
2 Crew Personal Effects Lists.
2 Lists of Mail for the Port.
4 Cargo Manifests.
4 Bills of Lading.
2 Cargo Stowage Plans.

PILOTAGE: Mooring Master will meet vessels approximately 1 mile seaward of terminal location. He will remain on board throughout the vessel's stay and should be provided with accommodation.

RESTRICTIONS: Docking only during daylight 0500 hrs. – 1600 hrs. Undocking 0430 hrs. – 1830 hrs.

MAX. SIZE: Berth in approximately 52 ft. of water and can accommodate vessels of up to 69,000 d.w.t. with max. draft 45 ft.

HEALTH: Port Authorities board with Mooring Master to enter ship and attend all formalities.

VHF: Permanent communications Vessel-Terminal with VHF Channels 16 and 6. National and International communications through "Empresa Nacional de Telecomunicaciones (Telecom)" 0800 hrs. – 2200 hrs.

BERTHING: The vessel will be berthed in the area surrounded by the 7 mooring buoys, in following order from for'd port side, passing round stern to for'd starboard side: No. 7, 1, 2, 3, 4, 5, 6. Vessels lie in berth on approximate due North heading; vessel's lines run by means of mooring launch to stern, quarter, and breast buoys. Vessels up to 20,000 d.w.t. require at least 5 good manila lines; vessels in excess of 20,000 d.w.t. require at least 12 good manila lines. These lines must be of not less than 120 fathoms in length each. Synthetic lines of equivalent strength may be used. Vessels equipped with wire mooring winches may use wires in lieu of fibre lines. The mooring requires use of both bower anchors, each having at least 150 fathoms of chain and be prepared to handle 5-ton lift on starboard side at ship's manifold. Because of rigidity of submarine hose, a small movement of vessel out of correct position could damage submarine equipment. Extreme caution must be exercised to ensure that vessel is correctly moored. During loading operation slack must be kept out of submarine hose by adjustment of vessel's anchor and lines.

TERMINAL REPRESENTATIVE: The Terminal has skilled personnel to represent its business on board and they will remain on board during all operations.

HOSES: Submarine hose 16 in. with 16 in. to 12 in. reducer for connection to vessel's 12 in. deck hose. For vessels not equipped with 12 in. deck hose, a 12 in. to 10 in. reducer is available. A 25 ft. length of 10 in. deck hose is also available for vessels not having a deck hose on board. Ship's crew perform all hose connecting, disconnecting, etc.

PUMPING: The Terminal is capable of receiving 15,000 bbls.p.h. if the vessel keeps pressure at an average of 100 lb./sq.in. (7 kg./sq.cm.).

CARGO HANDLING: Terminal is designed for loading and unloading Crude Oil or Products. Currently, it is used to unload white products (motor gasoline and virgin naphtha). The products must be transported and unloaded in segregated form. The total capacity of storage is 750,000 bbls.

BALLAST: The utmost care must be exercised by all tankers to avoid any contamination of the terminal bay waters, since the entire area is a developing tourist resort. This means that absolutely no deballasting or disposal of bilge water must take place in the bay. Shore deballasting facilities can handle up to 84,000 bbls. if ship provides advance warning.

FUEL: No bunkers available at terminal. Acquisition is possible at Cartagena (Colombia) located at Lat. 10° 19′ N., Long. 75° 31′ W. See "General" before first port.

MEDICAL: Doctor and hospital located at Santa Marta, throughout 24 hours.

CONSULS: No consular office in vicinity of terminal.

The following countries have consulates in Santa Marta:

		Phone
Costa Rica	Avda. Libertador No. 33-47	32199
Dominican Republic	Cra. 21 No. 15-99	32962
Ecuador	Las Villas 2a. etapa, Villa No. 15, El Rodadero	27590
Finland	Edificio de bs Bancos Oficina No. 605	35317
France	Calle 17 No. 2-56, Of. 212	32014
Guatemala	Calle 11 No. 1C-23 P. 8	34048
Netherlands and Sweden	Calle 15 No. 3-94	33403
Norway	Calle 11 No. 1C-23 Dpto. 306	33501
Panama	Calle 17 No. 2-56 Of. 416	34253
Peru	Calle 16 No. 1-92	33420

Other consuls located in Barranquilla, approximately 35 miles distant.

REPAIRS: Limited repair facilities available in Santa Marta, approximately 6 miles from terminal.

SURVEYORS: There are 3 petroleum inspection companies.

SHORE LEAVE: Through the ship's Agent, shore leave can be arranged, but sufficient crew must remain on board to handle emergencies. Most Maritime Agencies own 2 safety launches for vessel-shore-vessel routine.

GENERAL: No ships' stores.

AUTHORITY: *Operators:* Empresa Colombiana de Petreleos "Ecopetrol", Departamento de Coordinacion de Operaciones, Bogota, Colombia. Telex: 44 787. Tel: 85 67 97.

Estacion Pozos Colorados, Santa Marta, Colombia. Telex: 38 849. Tel: 7499, 7095.

Congo, Republic of

DJENO TERMINAL: (Also see page 326).

SHIPMASTER'S REPORT: September 1984.

Documents: Documents required: 3 each of Crew Lists, Vaccination Lists, Stores & Crew Declaration. 2 each of Passengers (or Nil) List, Birds and Animals, Narcotics, Arms and Ammunition. 1 Notice of Readiness. All paperwork carried out by Loading Master.

On departure, vessel steams slowly back to Pointe Noire while calculations and papers are completed on board.

Pilotage: Pilot and Loading Master boarded from pilot boat which has speed of about 20 knots.

On departure, the Pilot, Loading Master and Cargo Surveyor left using an inflatable dinghy. They prefer the ladder on the starboard side. The tug carries 2 inflatable dinghies.

Anchorages: For tankers waiting to berth at Djeno the indicated anchorage off Pointe Noire was found to be good with thick grey mud. Gear for mooring and hose connecting put on board from tug at anchorage. The tug then goes to Djeno to standby.

Tugs: There is a small buoy N.E. of the SBM and the tug moors there when not working.

Mooring: While mooring, tug is used to keep hoses clear.

Loading: Cargo Surveyor boarded while deballasting. Used combination accommodation ladder/pilot ladder on port side. Pilot, Surveyor and Loading Master stay on board.

Egypt, Arab Republic of

ZEIT BAY: 27.50 N. 33.02 E.

LOCATION: Zeit Bay Terminal is approximately 60 km. North of Hurgada.

ANCHORAGES: Waiting area centred on Lat. 27° 48.5′ N., Long. 33° 37.0′ E. Radius 1 mile. Depth ranges from 22 m. to 38 m., with 31 m. at centre.

Tanker should call "Marine Control" before approaching if necessary to drop anchor in the anchorage area.

Vessel is not permitted to anchor outside the anchorage area.

RESTRICTIONS: No night berthing; berthing should be completed before 1600 hrs.

MAX. SIZE: Max. 240,000 d.w.t. with 160,000 tons cargo. Minimum length of tanker approximately 550 ft. Maximum length decided by tonnage, but distance bow to manifold not longer than 650 ft.

RADIO: Tankers calling at Zeit Bay must send ETA message 72, 24, and 12 hours distant from the terminal to SUCO Head Office, telex 93455 or 92300 or 20477 Suco Un via any coastal radio station: Alexandria, Port Said, Suez and Kosseir.

ETA messages to SUCO should give the best estimates of ship's arrival time at the terminal. This ETA message should also include a definite statement of details of any equipment required from shore for connecting 16 in. floating hose, bearing in mind that such hose needs tanker to be equipped with crane, classed and certified to at least 10 tons capacity.

VHF: Master must call "Zeit Bay" 4 hours prior arrival on VHF Channel 16. If it is out of order, use Channel 12. Station is standing-by 24 hours/day.

BERTHING: SBM (Single buoy mooring). Cargo hose 16 in., ANSI type, with camlocks. Loading rate max. 6,000 tonnes/hr. Connection port side.

If cargo hose or connection is different, Master should contact SUCO Head Office 72 hours prior to his arrival at Zeit Bay stating the tanker hose and connection type.

Mooring facilities on tanker's bow should be ready prior to arrival.

Tanker must be on even keel and/or trimmed slightly by the stern, and have on board adequate ballast for manoeuvring.

BALLAST: Tankers calling at Zeit Bay should have permanent and/or clean ballast on board. Pumping ballast water overboard is completely prohibited by Governmental Authorities. If Master will require to deballast clean ballast during loading operations, letter should be submitted to the terminal that all bulkheads are fully tight and no leakages, to avoid any contamination. Master on behalf of Owners and/or Charterers will bear all costs and expenses for cleaning operations required to remove any pollution which might occur due to pumping ballast overboard, as well as a fine of US$15,000.

AUTHORITY: *Operator:* Suez Oil Company, 21 Orabi Street, Dokki, Cairo. Telex: 93455, 92300, 20477 Suco Un.

Ethiopia

ASSAB: (Also see page 440).

SHIPMASTER'S REPORT: February 1985.

Documents: No cargo documents whatsoever were received by Agent prior to ship's arrival. The day after arrival at the roads, the Agent came on board to collect a full set of cargo documents. This procedure seemed to be a fairly normal practice on ships other than regular liner ships and tankers arriving at Assab.

After having berthed, Authorities came on board to collect 5 Crew Lists, 3 Stores' Declarations and 3 Crew's Effect Declarations. Ship's Certificates were not examined. Ship's lockers with tobacco and spirits were sealed by Customs. Beer-store not sealed. No search of crew cabins.

Pilotage: Signal station working VHF Channels 16 and 14, giving berthing instructions and other information. Also signal station is most willing to pass any messages to Agents, etc.

Pilot boards ships on the roads approx. 0.5 miles off the breakwater. 2 Pilots are serving the port. This ship was handled by the Chief Pilot, who is very skilled in handling ships, making effective use of wind when berthing/unberthing/shifting ships in port.

Anchorages: Ship arrived on the roads 14th January, 1985 and was at anchor for 18 days. In that period the wind blew during the night with Force 4/5 from S.E., shifting E.S.E. Force 6/7 during daytime – often reaching Force 8. Holding ground good.

Restrictions: Draft restriction 33 ft., but Pilot advised me that 34 ft. has been handled. The problem is not the depth alongside the pier but a small patch of sand close to the breakwater, with a minimum depth over it of 35 ft. Ships with the deepest draft are berthed at Pier No.1 (The outer end of the Northern Pier).

Health: After arrival in roads, ships are called by a Quarantine Officer on VHF Channels 16/14, who asks relevant questions such as last port, crew members on board, if any sickness, gross/net tonnage. If satisfied with answers ship is granted Free Pratique.

Radio: Assab Radio (ETC) was impossible to use during voyage to Assab, and all messages were passed via Aden Radio (7OA). After having anchored at Assab Roads, Assab Radio did answer and arrival message and Notice of Readiness were sent via ETC.

Tugs: Tugs meet ships inside the breakwater. 1 tug built 1979 and 1 built 1981, respectively 1,200 and 1,400 h.p. Both of them are working very effectively. Large ships are normally berthed at Pier 1 or 2 – the outer ends of piers – bow heading out. An anchor is used to hold the ship's bow while tugs are pushing the ship into position. 1 larger tug and 1 smaller tug were seen in the port, but they were not in use during our visit.

Cranes: On the Northern pier there are 9 cranes, and on the Southern pier 7 cranes. All were electric cranes working well and well maintained. 2 of the cranes on each pier are 20 ton capacity and the others 6 ton. At least 3 mobile cranes were seen, one with capacity up to 60 tons.

Bulk Cargo Facilities: Bulk grain is discharged by grab to portable bag filling equipment on the pier . Capacity unknown. Simultaneously, dump trucks are used to carry bulk grain from ship to warehouse. 2 cranes are normally used and an outturn of 2,500 tons is said to obtainable.

Stevedores: Agents arrange gangs. Shifts worked: 0600 hrs. – 1400 hrs., 1400 hrs. – 2200 hrs., 2200 hrs. – 0600 hrs. It seems normal practice that all ships work around the clock with maximum possible gangs.

Density: 1023.5.

Fresh Water: Available but in very limited quantities, 10 to 30 tons per ship only. Quality said to be poor.

Watchmen: Gangway watchman compulsory. 1 watchman works from 0600 hrs. to 1800 hrs. The other from 1800 hrs. to 0600 hrs. Meals are to be supplied by ship.

Customs Allowances: Each crew member had 200 cigarettes and some had a bottle of spirits on arrival. No comments were made to this quantity.

Repatriation: Said to be possible. Local plane to Addis Ababa and from there international flight connections.

Shore Leave: Immigration Department issue a special shore pass, which is shown when passing the gate to and from the port.

Supplies: Ships should not rely on any supplies. At a local market, some supplies of fresh vegetables can be obtained, but most are of poor quality.

Delays: Depending on type of cargo. Army material seems to have priority over other cargo. Berth Nos. 1 and 2 are said to have been promised to ships with food aid.

Notice:

TO:
THE MASTER
M/V "...........................''
ASSAB

Assab Port Authorities: General Instructions to be followed:

1. The hours between 2400 and 0600 are curfew hours.
2. Any crew member going ashore should hold his passport or seaman's book together with a shore pass given by the Immigration Officer. Misuse or loss of a shore pass card will not only lead to payment of Birr 10.00 (Ten) per card but also strong measures will be taken upon the individual crew member who involves himself in such misuses.
3. Attempts to exchange foreign currency on black market leads to serious prosecution. Official bank exchanges are authorised. (Rate of exchange 1 US$=2.05 Birr.)
4. Ship's crew are not permitted beyond the following limits:
   - (A) The hospital to North East
   - (B) Starlite Hotel to the West, and
   - (C) The Agip Motel to the South West.
5. All crew's personal belongings should be shown in Crew Declaration. The Customs Authorities will inspect all individual cabins upon arrival and departure.
6. Rat guards should be fitted to all mooring ropes immediately after berthing. Contravention of this will incur a fine Birr 300.
7. Anchoring in Ethiopian Territorial Waters and generally from "T10" to "Ras Damera" is strictly prohibited. When entering territorial waters you must open your VHF Channel 16 and inform Naval Base of your identity.
8. Two hours before departure, "G" flag should be hoisted by day and vertical "Red White Red" should be lit by night, for Pilot.
9. Before sailing from our port you must institute a thorough search of your vessel to ensure that no unauthorised persons or stowaways are on board at the time of departure.
10. Any crew member found in illegal possession of harmful and toxic drugs or found circulating same directly or indirectly shall be seriously dealt with according to the penal code.
11. Diving, swimming and fishing within and or near by the premises of the harbour is strictly prohibited.
12. Photography within the port or around the town is strictly prohibited.
13. Smoking inside port area is strictly prohibited.

SIGNED:...........................
MASTER

Greece

AGIO THEODOROI: (Also see page 541).

(See Late Plans)

SHIPMASTER'S REPORT: December 1984.

Documents: Crew Lists must be IMO standard forms.

Pilotage: Oil Company has its own private Pilots. There are 4 Pilots stationed here, of which 2 are on call. Pilotage is compulsory. Pilot comes out by tug.

VHF: About 4 miles from the jetty, start calling "Pier Master Theodoroi", on Channel 14 VHF. He will give information about berthing and/or anchoring.

Anchorage: Reasonable safe anchorage Westward of jetty, about 3.5 cables from shore, in 20 – 25 fathoms of water.

Tugs: 4 tugs available.

Berthing: See "Plan". Ships always moor heading West, so only Berth "B" Inner is moored portside to. Each berth has 4 chicksans. Connections ranging from 8 in. to 12 in. Connecting and disconnecting is done by shore crew.

Fresh Water: Drinking water is also laid on to the jetty.

Provisions: Are available. Are brought alongside by tug for which a separate bill has to be signed.

Guatemala

PUERTO QUETZAL: 13.55 N. 90.47 W.

(See Late Plans)

SHIPMASTER'S REPORT: December 1984.

Limited operations commenced on 18th March, 1983.

Currently, services are provided with the following minimum organisation:

Port operations.

Maritime and Communication operations.

Financial and Administrative Services, and the additional personnel to provide other support services.

These offices operate in module buildings constructed for this purpose in the port area.

SERVICES TO VESSELS:

Right to berth.

Aids to navigation.

Service of pilot launch.

Pilotage.

Mooring, berthing, and vice versa.

Stay in port.

Anchorage.

PROTECTION WORKS: The sheltered area is formed by a major (West) breakwater 1,140 m. long, the minor (East) breakwater 307 m. long, and a secondary North Dock with a length of 367.54 m. These works ensure a minimum of rough water inside the port and maximum safety for vessels.

ACCESS CHANNEL: The access channel to the dock provides safety and facilitates entry and leaving of vessels to and from the sheltered area. It has a minimum width of 210 m. and a depth of 12 m. at the lowest tide.

MANOEUVRING BASIN: This offers safety and facilitates manoeuvring of vessels. It is circular with a diameter of 400 m., and a depth of 12 m. at the lowest tide.

BERTHING: The main quay, situated in the Eastern part, was planned as a multi-purpose terminal. It has a length of 800 m., and a free platform of 56 m. width. It includes a ramp 30 m. long and 25.5 m. wide, provided with two mooring devices at the sides with capacity of 100 tonnes, and with a predominant slope of one in ten for serving Ro/Ro vessels. It is located at the Northern extremity.

The whole quay is provided with rubber defences and bitts for mooring vessels. Its crown dimension is +4.5 m., and a depth of −11 m., giving a total of 15.5 m.

The South Quay has a length of 170 m., for berthing smaller ships. Its crown dimension is +4.5 m. and its depth is −5 m., giving a total of 9.5 m.

The Service Quay is 50 m. long and is for servicing small craft. Its crown dimension is +4.5 m. and its depth is −5 m.

Types of vessels handled:

General cargo.

Solid bulk cargo.

Containers.

Ro/Ro.

Barges.

Tourist passenger vessels.

STEVEDORES: Cargo handling services are provided by private concerns duly authorised by the UNECPA.

Ship's Agents and brokers arrange cargo handling with the stevedoring companies who in turn are authorised to provide such services.

The following services and direct cargo handling are available:

Receipt and clearance.

Loading and unloading.

Handling on quay.

Storage in the open.

STORAGE: It has been planned to place at the disposal of users a multiple use warehouse 90 m. long and 80 m. wide. This warehouse will have an area covered by metal structures and concrete walls, and fitted with fire-fighting equipment.

Attached to the warehouse will be a module housing the warehouse guard, Customs inspection, port checkers and wharfingers.

AIRPORT: There is an airport with capacity to receive any type of commercial aircraft 8 km. away.

There is also the runway of the Aeroclub de Guatemala and the installations of the Tourist Complex of Likin.

GENERAL: Puerto Quetzal is a terminal of the system of inter-ocean communication with the ports of the Atlantic, which are 406 km. distant by road and 443 km. by rail.

The new port is reached by land via the asphalted highway CA9 at a distance of 110 km. from the capital. There is also rail connection, and both means of communication connect with the country's network of roads and railways. The motorway from Escuinta to Puerto San Jose has yet to be built.

AUTHORITY: UNECPA, 7a Avenida y 4a. Calle, Zona 9, Building "74", Apartado Postal 206A, Guatemala City. *Tel:* 319133, 319101, 319152, 319082. *Telex:* 6134 Unecpa.

Port Offices, Direct Telephone: 717225.

SHIPMASTER'S REPORT: January 1985.

FRESH WATER: Said to be possible, ex road tankers. Very expensive.

PAINTING: No painting and/or scraping either on board or on hull can be done. Granting of permission takes at least 2 days.

Haiti

CAP HAITIEN: (Also see page 575). **(See Late Plans)**

REPORT: December 1984.

Documents: See "Port-au-Prince".

Approaches: New lighthouse on Pte. Pinolet seen at 30 miles.

Pilotage: Pilots boarded in Lat. 19° 48.8′ N., Long. 72° 10.9′ W. Pilots board from small launch, approx 5 m. long, with grey hull and yellow decking. The words "Pilote No. 1" painted in black on either side of white housing.

2 Pilots boarded – Senior Pilot/Port Captain: Eugene Magloire.

Restrictions: Channel very well marked – new beacons in positions as shown on "Plan". Least depth encountered in channel 10 m.

Radio: ETA telex sent via satellite to Agents. No radio station available.

VHF: Called pilot station on VHF Channel 16, 2 hours and 1 hour prior to arrival, but received no reply. Shortly before arrival at pilot boarding point, pilot station advised, on Channel 16, that pilot boat was coming out to our vessel.

Tugs: None. Small mooring boat takes heaving lines only ashore.

Berthing: Our vessel, 200 m. long, berthed at the Passenger Berth after swinging to starboard in the basin off the berth (depth 11 m.).

The berth is well fendered (Kleber fenders). Apart from main access to berth, there is also a footbridge for passengers.

Port has recently been reconstructed with modern berthing facilities, adequate mooring points, lighting, warehousing, open storage, etc.

Cargo Handling Equipment: Observed 1 conveyor, no cranes in evidence.

Regulations: Not permitted to take fruit ashore.

Authority: Autorite Portuaire National.

Honduras

LA CEIBA: (Also see page 578).

The following information should be read in conjunction with existing entry:

DOCUMENTS: In addition to those previously mentioned:

1 Copy of Derat Certificate.

Zarpe/Clearance from previous port.

14 Copies Cargo Manifest/Ballast Manifest.

3 Copies Bills of Lading.

All the original documents must be legalised by Honduran Consul at the port before calling at Honduras, and should be in Spanish language. If no Consul available, documents should be legalised by Consul of friendly nation or by Chamber of Commerce, stating the facts.

BERTHING: Berth available both sides of finger type pier, South side berth for side-door loading; North side for unrestricted operations.

CONSULS: None, however, American Consulate and those of other nations in Tegucigalpa, about 250 miles by road.

SURVEYORS: Lloyd's Agency in Puerto Cortes.

AIRPORT: International Airport "Goloson" with service daily to New Orleans and Miami, served by regular airlines.

GENERAL: *Labour:* Foreman US$3.50, workman US$1.50 per hour.

AGENT: Hondutours, Maritima y Transportes, Honduras, S.A., Edificio Comercial Maya, Tegucigalpa, Honduras. Tel: 32-16-57, 32-89-26, 32-89-30. Telex: 1251 Marhond Ho. Cables: Matra, Tegucigalpa.

Mailing Address: P.O.Box T-134, Tegucigalpa, Honduras.

PUERTO CASTILLA: 16.00 N. 85.58 W.

(See Late Plans)

DOCUMENTS:

2 copies Health Declaration.

Zarpe or Clearance from Last Port.

14 copies General Cargo Manifest of all cargo to be discharged in Puerto Castilla or Ballast Manifest.

10 copies Crew List.

10 copies Passenger/Negative Passenger List.

Derat Certificate, only if first call.

10 copies Stores List.

Mail Declaration (negative or positive).

3 complete sets Bills of Lading.

5 copies Hatch List.

15 copies Tally Books (prepared generally by Agent).

All original documents must be legalised by Honduras Consul at port before calling at Honduras, and must be in Spanish language.

If no Consul of Honduras available within 50 miles radius of port, documents can be legalised by statement from local Chamber of Commerce, stating the facts.

PILOTAGE: Not available, but vessel able to dock without such assistance.

ANCHORAGES: Once the vessel enters the bay, if no berth is available, she should anchor at a distance of between 0.5 mile – 1 mile from pier, and await boarding party in order to be granted Free Pratique.

RESTRICTIONS: Vessels may enter the port day or night, but are generally not visited by Authorities between 2000 hrs. and 0600 hrs., except in very special cases. Owing to remoteness of the port, Authorities have to be collected by Agent from villages within 30 miles radius of port.

MAX. SIZE: Vessels with draft up to 36 ft. can safely enter port and moor alongside pier.

HEALTH: Pratique granted after Port Authorities (including doctor) board vessel, between 0600 hrs. and 2000 hrs. Pratique granted if no contagious illnesses on board, otherwise quarantine restrictions imposed. No automatic Pratique when arriving from another Honduran port.

RADIO: Lantana Radio WOE, New Orleans Radio WNU, Limon Radio TIM, Balboa Radio NBA, Miami Radio WAX, messages routed via telegraph station Hondutel in nearby Trujillo, but not considered reliable.

Ship's radio not to be used in port except for communications with Port Authority. Vessel is fined if there is a violation.

VHF: Use Puerto Cortes Radio: Call Sign 'Cortes Radio', Channel 16, if Castilla Radio does not respond (Hours see "Puerto Cortes").

TUGS: None, not required.

BERTHING: The Agent and/or Port Authority to supply information as to berth, and time of docking. Departure should be effected when the despatch documents are on board and operations finished.

Pier: Made of concrete 150 m. long, width 38 m., depth 38 ft., used for all operations. Rubber/wooden fenders.

Directly adjacent to a paved area 300 m.×200 m.

Equipped with 2 open sided warehouses, each 3,000 sq.m.

Electric connections for 190 reefer containers.

CRANES: One each of 40, 50 and 70 tonnes capacity, mobile, on tyres.

TANKERS: Pipe-line for loading of African Palm Oil. A connection of 16 in. exterior diameter, 14 in. interior diameter, reducers available. Pumping rate 200 t.p.h. Storage capacity 20,000 bbls.

DENSITY: 1028/1030.

FRESH WATER: Water available at wharf, and of excellent quality, rate approximately 15 t.p.h.

FUEL: Only Diesel and Bunker "C" fuel available, 24 hours' notice required.

CONSULS: None in port. American Consulate and others in Tegucigalpa, 320 miles by road.

REPAIRS: No facilities.

SURVEYORS: Lloyd's Agency available locally.

GANGWAY/DECK WATCHMEN: Shore watchmen not usually required, and service left to the discretion of the Master.

HATCHES: On liners normally by crew with assistance of stevedores, otherwise according to C/P.

CUSTOMS ALLOWANCES: No restrictions, free use on board. Customs Officials check no sales to shore.

REPATRIATION: Facilities available for effecting repatriation in La Ceiba, by air.

AIRPORT: International airport "Goloson" in La Ceiba, 122 miles from port. Local airport connecting with La Ceiba daily, except Sundays and holidays, located in Trujillo, across the bay.

TIME: GMT minus 6 hours throughout year.

HOLIDAYS: 1st January; 14th April; 1st May; Maundy Thursday; Good Friday; Saturday at Easter; 15th September; 3rd, 12th, 21st October; 25th December. Cargo work can be arranged on those days, except Good Friday, and 1st May.

TELEPHONES: No telephones available in the area. Cable service available in Hondutel office.

SHORE LEAVE: Permitted without restrictions.

IDENTIFICATION CARDS: Must be shown to gate watchmen, when crew members come back on board, and are supplied by Agents.

CERTIFICATES: On first call, Registered Tonnage Certificate.

AUTHORITY: Empresa Nacional Portuaria (E.N.P.), Puerto Castilla.

AGENT: Maritima Y Transportes, S.A./Intermodal, S.A., Edificio Banco Atlantida, Suite No. 1101 – 1103, San Pedro Sula, Honduras. Tel: 51-17-73, 53-32-51, 52-25-11. Telex: 5634 Marhond Ho. Cables: Matra, San Pedro Sula.

Mailing Address: P.O.Box 991, San Pedro Sula, Honduras.

PUERTO CORTES: (Also see page 578).

(See Late Plans)

The following information should be read in conjunction with the existing entry.

BERTHING: Pier 1-A (molasses and bulk liquids), max. depth 32 ft. at rebuilt wooden T-Pier, in front of white and red painted tanks, between Texaco Pier and Banana Pier.

Pier 3: Under reconstruction, expected to be completed end 1985.

FRESH WATER: Water available at wharf face at 100 ft. intervals. Rate approximately 8 t.p.h. – 10 t.p.h.

FUEL: Only Diesel fuel and bunker "C" available, 24 hours' notice required for good service.

SURVEYORS: Lloyd's Agency available locally.

AIRPORT: Airport Ramon Villeda Morales at San Pedro Sula.

AGENT: Intermodal, S.A., 2a Calle, 1a. y 2a. Avenida, Puerto Cortes, Honduras. Tel: 55-03-90, 55-03-96. Telex: 8006 Inmodal Ho. Cables: Intermodal, Pto. Cortes.

Mailing address: P.O.Box 1535, San Pedro Sula, Honduras.

India

CALCUTTA: (Also see page 594).

SHIPMASTER'S REPORT: November 1984.

Pilotage: Accommodation is sometimes required for up to 3 Pilots transferring from Sandheads to Sagar or vice versa.

Radio Officer is required on standby during pilotage to send W/T messages as required by the Pilot.

Silting problems at Auckland Bar required a 0.4 m. reduction on published drafts November 1984. Situation not expected to improve.

Radio: Information on weather on 2000 m. not heard.

HALDIA: (Also see page 599).

SHIPMASTER'S REPORT: November 1984.

Pilotage: Ensure a boat rope is rigged; of good length and well down to the water and Pilot comes out in a small open boat, requiring a good lee and about 4 knots headway.

Also see "Calcutta – Late Reports".

Radio: See "Calcutta – Late Reports".

Tugs: Berthing at Haldia is critical in windy conditions. Tugs are under powered and have high freeboards. New tugs are ordered for 1986/7. Present set up requires clear understanding on Pilot's side controllable pitch ships where engines run continuously. Tugs slip wires unexpectedly on occasions.

Tankers: Tankers are sometimes berthed on the Iron Ore Berth inside the locked – in dock (11 m. alongside). Good pumping rates, up to 1,600 cu. m./p.h. Hose size 10 in., up to 4 connections. No night movements. If dealing with the India Oil Corporation, be ready for draft survey, independent quantity surveyor and a "standard" letter or protest. Also keep to hand all bunker/water information for arrival at previous port through to departure from present port, for end of passage and full away on passage plus port consumption/liftings.

KAKINADA: (Also see page 600).

AGENT: Gordon Woodroffe Limited, Cocanada Chamber of Commerce Building, Commercial Road, Kakinada – 533 007. Tel: Office hours 3042. After Office hours 3576. Telex: 491218 Wdrf In. Cables: "Woodroffe" Kakinada.

MADRAS: (Also see page 603)

AGENT: Gordon Woodroffe Limited, 36 Rajaji Salai, P.O.Box No. 42, Madras – 600 001. Tel: Office hours 510533 (8 extensions). After Office hours 427949. Telex: 416261 Gwmf In, 41420 Gwms In. Cables: "Woodroffe", Madras.

VISAKHAPATNAM: (Also see page 614).

SHIPMASTER'S REPORT: November 1984.

We presented Crew List (See Note 1), Passenger List, Stores List (Form 3), a Bonded Stores List (See Note 4), Drugs List (Morphine, etc.), Arms and Ammunitions List, comprehensive Customs List Form IV (See Notes 2, 3, and 5 below), Hidden Cavities Declaration List and Vaccination List.

Note 1: The Crew Lists must show passport or discharge book numbers. Not interested in dates of birth. The Immigration Officials issue passes for all on board who wish to go ashore (or just a few blanks, if only 4 or 5 people want to go ashore). These must be returned to Agent before sailing.

Note 2: Endeavour to obtain correct forms prior departing for first Indian port. A complete set of 4 is required for all subsequent Indian ports visited. Ensure that *all* paper money is declared, whatever the amount. (Undeclared currency, cigarettes, gifts, etc. confiscated). Rummage squads are thorough. Also ensure that the term "Dress materials and personal effects" is entered in Column 12 with other listed items.

Note 3: Currency – it is a fine-carrying offence to take high denomination notes ie. Rupees 20, 50, 100 and above, out of the country. Agents usually supply cash in 10 Rupee notes** or less.

Note 4: It is advisable to carry minimum sufficient bonded and slop chest items.

Note 5: Ensure that vessel sails with "travelling copy" handed to Master prior sailing first port for second port and so on for multi-Indian-port calls.

** Where foreign currency is changed ashore, a proper 'encashment certificate' with serial number must be obtained and details of passport given at time of exchange. The jetty duty Customs Official must be informed on return to ship and a supplementary currency declaration form C.B.R. CUS419 filled out showing amount exchanged and new balance of foreign currency in your possession. Both forms must be retained by exchanging person.

Also on arrival, the Health Officials carry out a "Marpol" inspection. (See overleaf.) There are many arrival and departure forms to be completed, including comprehensive pilot information forms. Have some detailed prior arrival to complete same as they are time consuming. Obtain blank sets if trading regularly.

Marpol Inspection:

Government of India
Port Health Organisation
Visakhapatnam
Sanitary Inspection of the Ship under Rule 83(i) of the
Indian Port Health Rules, 1955.

Date of inspection: Nationality:

Visakhapatnam.

Regulations: The taking of photographs in the harbour is not permitted. The placing of all cameras in the bond is advised, or a written notice posted.

AGENT: Gordon Woodroffe Limited, Diagonal Road, P.O.Box No. 8, Visakhapatnam – 530 035. Tel: Office hours 62629, 65932. After Office hours 62530. Telex: 495296 Gwvm In. Cables: "Woodroffe", Visakhapatnam.

Iran

BANDAR ABBAS: (Also see page 658).

RADIO OFFICER'S REPORT: December 1984.

Following schedule for opening and working hours has been brought to our attention by the operator of Bandar Abbas Radio.

Quote:

Notice to all ships' Masters in effect from 25th November 1984:

Abbas Radio/EQI will work on the following calling frequencies, GMT time and traffic lists.

From 0330 hrs. to 0830 hrs., Tx 8469 kHz, Rx 8 MHz (Channel 5/6). Traffic List at 0335 hrs – 0535 hrs. – 0735 hrs. GMT.

From 0730 hrs. to 1230 hrs., Tx 12700 kHz, Rx 12 MHz (Channel 5) and 16 MHz (Channel 5).

Traffic List at 0835 hrs – 1035 hrs. GMT.

From 1230 hrs. to 1430 hrs., Tx 6362 kHz, Rx 6 MHz (Channel 5) and 4 MHz (Channel 5).

Traffic List at 1235 hrs GMT.

From 1430 hrs. to 0330 hrs., Tx 4252 kHz, Rx 4 MHz (Channel 5) and 6 MHz (Channel 5).

Traffic List at 1435 hrs – 1635 hrs. – 1835 hrs. – 2035 hrs. – 2235 hrs. – 0035 hrs GMT.

Please observe the above table for your messages.

Unquote.

It has come to our attention, however, that contrary to the ITU "List of Coast Stations" the call sign instead of "EQI" is

EQI2 for 4 MHz.
EQI4 for 6 MHz.
EQI6 for 8 MHz.
EQI8 for 12 MHz.

Further deviation from the official published information is that the station works in the 8 MHz band on 3 frequencies. Its "CQ" tape runs on the indicated 8469 kHz, however, if a calling ship is heard the answer is given on a less powerful transmitter on 8469.5 kHz. Once contact is established on the ship's working frequency the station shifts to 8463 kHz. If long messages are held for the ship, this has been put on a tape and the ship will be instructed to listen on 8469 kHz again, to receive its traffic.

LAVAN ISLAND: (Also see page 672)

OPERATOR: Lavan Island is now operated by Iranian Offshore Oil Company (IOOC). References to LAPCO/IMINOCO on pages 672 – 674 are no longer valid as IOOC have taken over all operations.

LOCATION: Lavan Island is 13 miles long and about 2.5 miles wide. It is situated on the S.E. coastline of Iran in Lat. 26° 48′ N., Long. 53° 16′ E. (Island centre). The Island lies roughly East – West.

PORT LIMITS: Port area limits which are under the control of IOOC, extend between the following points:

Lat. 26° 47.5′ N., Long. 53° 22.0′ E.
Lat. 26° 46.4′ N., Long. 53° 22.0′ E.
Lat. 26° 47.5′ N., Long. 53° 19.4′ E.
Lat. 26° 46.8′ N., Long. 53° 19.4′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

EARLY SAILING PROCEDURE:

Notice to Masters – Early Sailing Procedure: In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing system is now in force.

The following documents are prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(A) Nos. . . . Originals & Nos. . . . Copies of IOOC Bill of Lading.
(B) Nos. . . . Originals & Nos. . . . Copies of IOOC Certificate of Origin and Cargo Manifest.
(C) Nos. . . . Originals & Nos. . . . Copies of IOOC Tanker Time and Loading Report.
(D) Nos. . . . Originals & Nos. . . . Copies of IOOC Report of Cargo and Ship's Ullages.
(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the "Bill of Lading" and "Certificate of Origin" forms as prior indicated.

Hand written copies of Items (C) and (D) will be passed to the Master for his reference.

In cases of disagreement on cargo figures, the Master may:

1. "Note Protest" by cable or telex.
2. Authorise the ship's Agent to "Note Protest" on his behalf.
3. Pass a written "Note of Protest" to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

APPROACHES: Charts covering the operational areas of IOOC are:

USHO 3647, 3648, 3650, 3660.
BA 2837, 2847, 2858, 2887, 2888, 3517, 3707.

PILOTAGE/NOTICE OF READINESS: Vessels must not enter the Port Limits without a Berthing Master on board.

Vessels should wait for the Berthing Master South of the Terminal Buoy, approximately 2 miles S.E. of the loading dock.

The Terminal operates a pilot launch and mooring launch for rope handling.

Pilot Room to be available and ready for the Loading Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.
(b) IOOC "Notice of Readiness" form.
(c) Combined Tug, Pilot, Berthing/Unberthing charge form.
(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affects cargo-worthiness or seaworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the IOOC Marine Superintendent will be final.

NAVIGATIONAL AIDS: *Warning:* The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Lavan Island Terminal Beacon: Located in Lat. 26° 48.1′ N., Long. 53° 21.3′ E. Fitted on top of a steel lattice tower 182 ft. above MLWIS. Light exhibited is Gp.Fl. (3) ev. 12 sec. vis. 15 miles.

Terminal Sea Buoy: Located in Lat. 26° 46.5′ N., Long. 53° 22.1′ E. A white can buoy with lattice tower and radar reflector. Light exhibited is Fl. ev. 5 sec. vis. 3 miles.

Salman Pipe-line Marker Buoy: Located in Lat. 26° 46.8′ N., Long. 53° 20.5′ E. A red can buoy with lattice tower and radar reflector. Light exhibited is Fl.R. ev. sec. vis. 3 miles.

Salman Pipeline Rear Beacon (Onshore): Located in Lat. 26° 48.0′ N., Long. 53° 20.2′ E. Fitted on top of a steel lattice tower 192 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

Salman Pipe-line Front Beacon (Onshore): Located in Lat. 26° 47.6′ N., Long. 53° 20.1′ E. Fitted on top of a steel lattice tower 115 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

The Salman Pipe-line lights in transit signify a vessel is over the Salman pipe-line. Anchorage is prohibited within the area covered by the vector outline of the range lights, 10° apart.

Rostam Radio Mast: Located in Lat. 26° 48.2′ N., Long. 53° 19.2′ E. A steel lattice tower, painted red, 408 ft. above MLWIS. Light exhibited is Occ. R. ev. sec. visible 20 miles.

Decca Mast – Station "Green South": Located in Lat. 26° 47.5′ N., Long. 53° 22.4′ E. A steel lattice tower, painted red and white bands, 336 ft. above MLWIS. Light exhibited is Fl.R. vis. 20 miles.

Flares: The following flares are highly conspicuous and tend to obstruct the other navigational aids:

Salman – Located in Lat. 26° 47.6′ N., Long. 53° 20.6′ E.
Rostam – Located in Lat. 26° 48.4′ N., Long. 53° 20.0′ E.
LDC – Located in Lat. 26° 47.7′ N., Long. 53° 21.0′ E.

Radio Beacons: The following radio beacons belonging to IOOC are situated onshore and offshore at the Company's Salman Oil Field:

Signal LD transmitted on 310 kHz. Located in Lat. 26° 47.6′ N., Long. 53° 23.0′ E.

Signal LA transmitted on 397 kHz. Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

RESTRICTED AREAS: Salman's Production Facility (Offshore):

Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

The above platform complex, approximately 76 nautical miles South of Lavan Island, is situated in the centre of the Salman Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil is delivered to Lavan Island from offshore oil fields by submarine pipe-line.

From the Salman production complex in Lat. 25° 32.0′ N., Long. 53° 09.1′ E. A 22 in. pipe-line running approximately 008° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.1′ E. From the Rostam production complex in Lat. 25° 45.5′ N., Long. 52° 54.5′ E. An 18 in. pipe-line running approximately 023° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.0′ E.

In addition to the above, a 14 in. submarine pipe-line has been laid from the Balal Oil Field (undeveloped) to Lavan Island. The pipe-line runs approximately 056° T from an offshore location in Lat. 26° 18.8′ N., Long. 52° 32.8′ E., to a shore location on Lavan Island at Lat. 26° 47.6′ N., Long. 53° 19.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

MAX. SIZE: Water depths, adjacent to the dock, at LW are:

Berth No. 1: 68 ft. 4 in. (20.83 m.)
Berth No. 2: 65 ft. 0 in. (19.82 m.)

Keel clearance required by the Terminal is 3 ft. 0 in. at all times.

Tonnage capacity of the loading dock is:

Berth No. 1: 200,000 d.w.t.*
Berth No. 2: 75,000 d.w.t.**

*Vessels in the range 200,000 d.w.t. – 225,000 d.w.t. may be accepted subject to prior approval from IOOC Management which is based on answers to a 14 point questionnaire.

**Vessels are accepted for Berth No. 2 based on tonnage, overall length (maximum 850 ft. = 259 m.), position of the manifold in relation to the bow, and always subject to a maximum loaded draft of 43 ft. 6 in. (13.26 m.). Vessels over 65,000 d.w.t. should always be cleared by IOOC prior to firming up a nomination.

Following is a table of maximum loads that different size tankers can have on board on arrival, and remain acceptable for berthing:

(a) The maximum size vessel that is acceptable for berthing in a fully loaded condition is 100,000 d.w.t. This refers to vessels nominated for bunkers only.

(b) The maximum acceptable arrival load for tankers in the range 101,000 d.w.t. – 120,000 d.w.t. is 90,000 tons (675MB±).

(c) The maximum acceptable arrival load for tankers in the range 121,000 d.w.t. – 170,000 d.w.t. is 85,000 tons (638MB±).

(d) The maximum acceptable arrival load for tankers in the range 171,000 d.w.t. – 225,000 d.w.t. is 70,000 tons.

This schedule to be used in conjunction with the standard 14 point questionnaire for very large crude carriers.

RADIO: Vessels nominated to load at Lavan Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Abadan Radio (EQZ) or Bandar Abbas Radio (EQI) or Lavan Radio (EQV).

IOOC Tehran. Telex: 212598 – 212346 – 212707 "Attn. Marsupt. Lavan".

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Lavan in GMT and last port.
CC Cargo(s) required and Bunker(s) required.
DD Deballast time.
EE Size and number of connections for cargo/bunker.

If bunker connection only one side of manifold, state location.

Lavan Radio Station, is operating on 500 kHz, call sign EQV, from 0530 hrs. – 1330 hrs. GMT.

IOOC tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Pourandokht I" when passing Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

Radio Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Lavan Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Smallpox and Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name of all ports called at during the last 30 days.
FF Master's Name.

Coastal Radio Station (EQZ) schedule and frequencies:

Schedule of Watch GMT (hrs.)	*Listening Watch Frequencies* (kHz)	*Transmitting Frequencies* (kHz)	*Receiving Frequencies* (kHz)	*Remarks*
Continuous	500	500	500	Distress Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405-535	Traffic Lists every 2 hours from 0105 to 2305 GMT.
0400 – 0700	8356 – 8374	8471	8474 – 8460	**Traffic Lists every 2 hours from 0405 hrs. GMT.
0700 – 0900	12534 – 12561	13069.5	12561 – 12689	
1000 – 1300	12534 – 12561	13069.5	12561 – 12689	
1400 – 1700	8356 – 8374	8471	8374 – 8460	
1700 – 1830	3178 – 4187	4294	4187 – 4231	

**During scheduled watches on HF while station (EQZ) is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according to their schedules of watch.

VHF: Lavan Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Lavan Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

BERTHING: Vessels should have the following equipment ready for use upon their arrival at the port:

a) Anchors, port and starboard, ready for letting go.

b) Ropes or wires, eight each end, not on automatic tension.

c) Derricks rigged if shore reducers or flexible hoses are required.

d) Manifold blanks removed and reducers fitted ready to connect 16 in. series 150 ASA loading arm flanges.

e) Accommodation ladder lowered together with the pilot hoist or pilot ladder.

Note: Berthing Masters will not board any vessel which does not present a clean safe means of access.

f) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.

The tanker loading dock is constructed of a loading platform in the centre of 4 two-sided jacket piled breasting dolphins, and 4 outlying two-sided jacket piled mooring dolphins.

The dock is 1,240 ft. (378 m.) long, and is connected to the shore by a trestle 1,764 ft. (538 m.) long.

The platform deck is 31 ft. 4 in. (9.55 m.) above Chart Datum (MLWIS).

Maximum reach of the loading arms above Chart Datum is:

Distance Manifold to Ship's Side	*Elevation*
10 ft. (3.05 m.)	76 ft. 6 in. (23.32 m.)
12 ft. (3.66 m.)	75 ft. 9 in. (23.09 m.)
14 ft. (4.27 m.)	75 ft. 0 in. (22.85 m.)
16 ft. (4.88 m.)	74 ft. 0 in. (22.56 m.)
18 ft. (5.49 m.)	72 ft. 9 in. (22.18 m.)

Rigid "Chiksan" hydraulically operated loading arms are situated on both sides of the loading platform.

Berth No. 1	4×16 in. for crude oil loading.
Berth No. 1	1×12 in. for product loading – (fuel & gas oil).
Berth No. 2	2×16 in. for crude oil loading.
Berth No. 2	*1×16 in. for naphtha loading.
Berth No. 2	1× 8 in. for product loading (fuel & gas oil).

* Gas oil can also be loaded through this arm.

All loading arms are fitted with a series 150 ASA American Standard outer flange with quick connection coupler.

The Terminal carries a full range of aluminium reducing spool pieces and flexible hoses (15 ft.×8 in.) for crude and product/bunker connections.

Shore gangways are provided for both berths, with a safety net for each gangway.

Fire wires must be rigged forward and aft, of sufficient strength to tow the vessel away from the berth in an emergency. The "eye" of the fire wire must be lowered to within 6 ft. of the water and maintained at this level at all times. The IOOC tugs are equipped with their own towing wires which will be shackled onto the vessel's fire wire.

Rat Guards: All ships berthed alongside must provide rat guards for the ship's moorings.

TUGS: Two modern diesel tugs of 3120 b.h.p. fitted with controllable pitch propellers and a bollard pull of 42 tons are stationed at the loading dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fighting capability, foam, dispersant and fire wires.

Both tugs are on instant readiness throughout the entire time that a vessel is alongside the loading dock. The tugs will answer emergency signals, or can be called on VHF Channel 12, or by telephone (Tel. No. 222).

LOADING: Tankers are loaded at Lavan Island alongside an "L" shape 2 berth jetty, approximately 2,000 ft. offshore. The loading platform is fitted with rigid hydraulic loading arms which have quick connection/release couplers attached to the end flange.

There are 4×16 in. arms on the South Berth (No. 1) for crude loading, and 2×16 in. arms on the North Berth (No. 2) for crude loading.

Crude oil is delivered to the loading platform by gravity through 2×36 in. lines from a 4,000,000 barrel tank farm (Salman), and from a 1,500,000 barrel tank farm (Rostam).

Flow rates under normal conditions, with only 1 vessel loading, are approximately, Berth No. 1 (4 arms) 52,000 bbls./hr., Berth No. 2 (2 arms) 32,000 bbls./hr.

Flow rates with a vessel loading at each berth are approximately, Berth No. 1 (4 arms) 40,000 bbls./hr., Berth No. 2 (2 arms) 24,000 bbls./hr.

The minimum flow rate is 15,000 bbls./hr. All vessels accepting nominations to load at Lavan Island must be capable of loading crude at rates above this figure.

The API of Salman Crude Oil is 34 and the API of Rostam Crude Oil is 35.

The temperature of Salman Crude Oil varies between 91°F and 78°F (Summer/Winter), and the temperature of Rostam Crude Oil varies between 85°F and 66°F (Summer/Winter).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the Consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal provided the Master issues a written request to the Loading Master upon arrival at the loading dock. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Masters should note that in cases of overloading the excess cargo cannot be returned to the shore line.

Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-Top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Salman or Rostam crude oil, provided agreement has been obtained from the Consignor.

Slops should be segregated in a special "slop tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the loading dock and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge en route to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

GENERAL CARGO: In addition to existing information:

The cargo mooring for general cargo vessels is located adjacent to the small craft harbour at the East end of Lavan Island.

The stern mooring buoy is located in Lat. 26° 47.1′ N., Long. 53° 23.2′ E.

The port anchor drop marker buoy is located in Lat. 26° 46.9′ N., Long. 53° 23.6′ E.

BALLAST: The Terminal does not have any reception facility for disposal of dirty or contaminated ballast.

TIDE: The mean range of tide is 3 ft. 9 in. (1.14 m.)

The extreme range of tide is 5 ft. 6 in. (1.68 m.)

The highest tide recorded is 7 ft. 3 in. (2.21 m.) above MLWIS.

The lowest tide recorded is 0 ft. 5 in. (0.13 m.) above MLWIS.

A chart reading automatic tide gauge is fitted on the loading dock.

MEDICAL: IOOC operates small clinics on the Island with resident doctors. This facility will be made available for emergency cases only.

FUEL:

Bunker Requests: Requests for information on bunkering should not be directed to IOOC. All questions relating to the bunker facility at Lavan Island will be handled by NIOC Marketing & Exports Division.

The address is: Marketing & Exports, National Iranian Oil Company, Talaghani Avenue, P.O.Box 1863, Tehran, Iran. Tel: 6151, ask for Marketing. Telex: 21-2514, 21-2613 and 21-2182. Cable Address: Naftmelli Tehran.

All other information regarding tank sizes, bunkers, etc., is the same as in the existing entry.

CONSULS: No consular representation is available at Lavan but the Embassies of most nations are situated in Tehran.

MARINE SURVEYS: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas and Abadan.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbasabad Avenue, Tehran – Iran. *Tel:* 624102-5. *Telex:* 212598, 212346, 212707. *Cables:* Falatghareh, Tehran.

Mail Address: P.O.Box 1434.

RAS BAHREGAN: (Also see page 674).

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:

Lat. 29° 43′ N., Long. 50° 00′ E.
Lat. 29° 43′ N., Long. 50° 12′ E.
Lat. 29° 40′ N., Long. 50° 10′ E.
Lat. 29° 40′ N., Long. 50° 24′ E.

Vessels must not enter this area without permission from the port control. Anchoring in this area is prohibited.

NAVIGATIONAL AIDS/PROHIBITED AREAS:

Two flares are located at:

Lat. 29° 50′ N., Long. 50° 15.8′ E.

Nowrouz production facility (Offshore) located in:

Lat. 29° 29′ 55″ N., Long. 49° 24′ 10″ E.

The above platform complex, approximately 50 nautical miles South West of Bahregan, is situated in the centre of the Nowrouz Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Bahregansar Production Facility (Offshore) located in:

Lat. 29° 56′ 23″ N., Long. 49° 50′ 58″ E.

The above platform complex, approximately 30 nautical miles West of Bahregan. This area, and 3 miles around it, is prohibited to navigation.

PILOTAGE: Vessels must not enter the Port Limits without a Mooring Master on board. Vessels should wait for the Mooring Masters approximately 2 miles off the SBM.

Prior Arrival: Vessels should have the following equipment ready for use upon their arrival at the port:

(a) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.

NOTE: Berthing Masters will not board any vessel which does not present a clean safe means of access.

(b) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.

(c) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

(d) Under normal conditions vessels will be moored using 6 ship's lines. In rough weather the number of mooring lines will be increased. Therefore each ship to be moored at Bahregan SBM Terminal must be equipped with at least ten good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Two of these mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must also have at least one good messenger line ready for immediate use; anchors, chains and anchor windlass must be in good condition. Vessels must be equipped to fit flanges of floating hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackles and booms to hoist the floating hose, a 5.5 ton lift from the sea to the ship's rail, in a safe, efficient and expeditious manner. If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform the vessel's Master and in such event the vessel shall not be brought into the mooring until facilities, lines, or gear are deemed satisfactory. In this connection, lines cannot be provided by the company.

(e) Before a ship is moored at MBM Terminal, she must be equipped with at least 9 good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must have both bower anchors ready for immediate use, each with a minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of letting one chain go out on the run while heaving in on the other chain. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the submarine hoses, a 5 ton lift from the floor of the sea to the ship's rail, in a safe, efficient and expeditious manner.

If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event the vessel shall not be brought into the mooring until facilities, lines or gear are deemed satisfactory.

On Arrival: Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.

(b) IOOC "Notice of Readiness" form.

(c) Combined Tug, Pilot, Berthing/Unberthing Charge form.

(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

MAX. SIZE: Water depths at the Terminals at LW are:
SBM 79 ft. (24.0 m.)
MBM 52 ft. (15.5 m.)

Keel clearance required by the Terminal is 3.3 ft. (1 m.) at all times.

Tonnage capacity of the Terminals are:
SBM 250,000 d.w.t.
MBM 45,000 d.w.t.

RADIO: Vessels nominated to load at Bahregan should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Abadan Radio (EQZ) or Bandar Abbas (EQI).

IOOC, Tehran. Telex: 212598 – 212346 – 212707. "Attn. Marsupt. Bahregan".

Arrival messages to be in the following format:
AA Name of ship.
BB ETA Ras Bahregan in GMT and last port.
CC Cargo required/cargo to discharge.
DD Deballast time/Ballast time.
EE Size and number of cargo connections.

Ras Bahregan Radio Station, is operating on 500 kHz, call sign BOC, from 0530 hrs. – 1330 hrs. GMT.

Ras Bahregan Radio maintain a listening watch on 2638 kHz. Vessel should commence calling "Bahregan" when passing Kharg Island.

Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.
AA Name of vessel and ETA Bahregan (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Smallpox and Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

VHF: Ras Bahregan Terminal maintains a listening watch 24 hours a day on VHF Channels 16 and 13.

Vessels should commence calling "Bahregan" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 13.

NOTICE OF READINESS: The ship's officer responsible for loading or discharging should give IOOC's Mooring Master at least 30 minutes Notice of Readiness to commence loading or discharging.

The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affects cargo worthiness or seaworthiness while under the jurisdiction of the Terminal. In all such situations of dispute, the decision of the IOOC Marine Superintendent will be final.

MBM: MBM Terminal is located 5 miles from coast at:
Lat. 29° 47′ 00″ N., Long. 50° 11′ 30″ E.

The MBM Terminal is connected by a 4.5 mile 18 in. diameter submarine pipe-line to Bahregan Terminal. Bahregan Terminal is located at:
Lat. 29° 49′ 30″ N., Long. 50° 15′ 47″ E.

TUGS: One modern diesel tug of 1,000 b.h.p. fitted with controllable pitch propellers is stationed at the Terminal and used for all manoeuvres.

The IOOC tug is equipped for fire fighting, using both water and foam through monitors situated on a fire fighting platform. IOOC tug is on instant readiness throughout the entire time that a vessel is moored at the Terminal. The tug will answer the emergency signal or by calling on Channel 13 VHF.

BERTHING: The Terminal operates a mooring launch and 3 small supply boats.

SBM: The SBM is designed to provide a safe mooring for tankers in most states of weather or sea. When moored to the SBM, tankers can load their cargo while weather-vaning about the Terminal. The moored vessel normally remains head into the wind and sea, riding at its most comfortable position. The SBM consists of a strongly constructed steel vessel securely moored in position by 6 sets of heavy mooring chains, each set is attached to a 3 pile template. The SBM is equipped with a Rotating Mooring Bollard, to which the tanker secures, a Rotating Cargo Manifold which carries the crude flow system from the SBM through the hoses, and a Rotating Balance Arm, which maintains the SBM on an even keel. These 3 components all rotate as one unit as the tanker swings with the sea or wind.

A submerged peripheral fender extending outward from the hull is provided to prevent damage to the floating hoses and SBM, should the tanker ride up against it.

MBM: Permanent mooring in the berth consists of 5 steel cylindrical buoys each fitted with a quick release hook to which the ship's mooring lines are attached by the company's mooring launches. The berth is laid out on a one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter, and 1 stern).

The mooring buoys are numbered 1, 2, 3, 4 and 5 starting with No. 1 East of the mooring and numbers running consecutively in a clockwise direction.

HOSES: The Terminal carries a full range of reducing spool pieces and flexible hoses for connections.

SBM: 2×16 in. floating hoses.

After the vessel is securely moored to the SBM, the service launch will tow the end of the floating hoses to a point on the portside of the tanker immediately below the tanker's cargo manifold. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons. The hoses are fitted with 16 in. flanges, and the company will provide reduction pieces to 14 in. or 12 in. or other sizes (as well as gaskets) as required to make connections to the ship's manifold. The hose connection is normally performed by IOOC's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

MBM: 2×10 in. submerged hoses.

After the vessel is securely moored, inside the MBM, the submarine loading hose must be lifted to the rail amidships. The 10 in. hose lift is 5 tons. Hoses are lifted by ship's gear on the starboard side. Ships should have manifold fittings aboard to allow connection of the flanges.

Tankers are loaded or discharged at this berth.

LOADING: Crude oil is delivered to the SBM through a 36 in. line and to the MBM through an 18 in. line from a 2,198,000 barrel tank farm.

Flow rate under normal conditions is approximately:
SBM (two hoses) 6,000 t.p.h.
MBM (two hoses) 5,000 t.p.h.

The minimum flow rate is 15,000 bbls./p.h. All vessels accepting nominations to load at Bahregan must be capable of loading crude at rates above this figure.

The initial loading rate is normally about 1,500 t.p.h. while the Loading Master and the ship's officer satisfy themselves that all is in order with the Terminal and the ship's facilities. As soon as this is done, the loading rate is increased to maximum or other rate as requested by the ship.

The API of Bahregan Crude oil is 26.0.

The temperature of Bahregan Crude oil varies between 62°F and 78°F (Winter/Summer).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal; provided the Master issues a written request to the Loading Master upon arrival at the loading terminal. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Master should note that in cases of overloading, the excess cargo cannot be returned to the shore line. Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Bahregan Crude oil, provided agreement has been obtained from the consignor.

Slops should be segregated in a special "Slop Tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the Terminal and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the Terminal. The ballast may be retained for discharge en-route to the next port, or discharged concurrent with loading, provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur. Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "Permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the Terminal, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

SURVEYORS: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas.

MEDICAL: Depending on the availability of the company Doctor, medical assistance can be provided. Although no hospital is available, in case of extreme emergency IOOC will arrange transport to nearby towns at the ship's expense and responsibility.

TIME: Standard zone time for Iran is GMT plus 3.5 hours. Daylight Saving Time advances clocks 1 hour from March through October.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran – Iran.

Cables: Falatghareh, Tehran. *Telex:* 212598 – 212346 – 212707. *Tel:* 624102-7.

Mail address: P.O.Box 1434.

SIRRI ISLAND:

The following supersedes the information given on page 675.

FLAG: The Iranian flag, green side uppermost, must be flown while the vessel is within territorial waters. Iranian territorial waters extend 12 miles seaward from the mainland and offshore islands.

LOCATION: The loading station is located in the South Eastern part of the island of Sirri at:
Lat. 25° 54′ N., Long. 54° 33′ 30″ E.

Landfall on the island presents no difficulty, by day or night, for vessels coming from the Strait of Hormuz or from one of the Gulf Ports. The Island gives a good radar echo at 17 miles.

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:
Lat. 25° 55.0′ N., Long. 54° 33.1′ E.
Lat. 25° 55.0′ N., Long. 54° 34.6′ E.
Lat. 25° 52.0′ N., Long. 54° 31.1′ E.
Lat. 25° 52.0′ N., Long. 54° 34.6′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

NAVIGATIONAL AIDS:
Warning: The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Sirri Island Terminal Light located in: Lat: 25° 54′ N., Long. 54° 33′ E. Light exhibited Fl. W. every 7 secs., visible 10 miles.

A lighted buoy, showing Fl. W.(3) every 12 secs. is visible 6 miles, and is located to the West of the South Eastern end of the island.

The flare located in: Lat. 25° 54.1′ N., Long. 54° 31.9′ E. is highly conspicuous and tends to obstruct the other navigational aids.

Masters may find it useful to refer to the following documents:

1. French Hydrographic and Oceanographic Department Charts No. 2172 and 6051.
2. French Nautical Instructions, Series L, Volume IV.
3. British Navy Hydrographic Office Charts No. 2837, 2887, 2832 and 3781.
4. Lights and Fog Signals Book, series L.

PROHIBITED AREAS: Papa Production Facility (Offshore) located in position: Lat. 25° 42′ N., Long. 54° 17′ E.

The above platform complex, approximately 18 nautical miles S.W. of Sirri Island, is situated in the centre of the Sirri "A" oil field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil from offshore oil fields is delivered to Sirri Island by submarine pipe-line, from Papa production complex.

3 pipe-lines running approximately 182°T to a shore location on Sirri Island at: Lat. 25° 53.4′ N., Long. 54° 32.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

PILOTAGE: Vessels must not enter the Port Limits without an IOOC Berthing Master on board.

Vessels should wait for the Berthing Master approximately 2 miles off the Loading Dock.

Vessels should have the following equipment ready for use upon their arrival at the Port:

(a) Anchors, port and starboard, ready for letting go.
(b) Ropes or wires, 8 each end, not on automatic tension winches.
(c) Derricks rigged if shore reducers or flexible hoses are required.
(d) Manifold blanks removed and reducers fitted ready to connect 20 in. series 150 ASA loading arm flanges.
(e) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.
Note: Berthing Masters will not board any vessel which does not present a clean safe means of access.
(f) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.
(g) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.
(b) IOOC "Notice of Readiness" form.
(c) Combined Tug, Pilot, Berthing/Unberthing charge form.
(d) Fire and Safety Regulations and No Smoking Notices for posting in approved locations.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal Dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

Also see "Tugs".

MAX. SIZE: The loading station is designed for docking and handling of vessels having a minimum length of 240 m. and a maximum length of 365 m. This normally restricts utilisation to vessels in the approximate size range of 80,000 d.w.t. to 330,000 d.w.t. The maximum authorized draft for these vessels is 24.00 m. (78 ft. 9 in.).

RADIO/VHF:
1. Vessels nominated to load at Sirri Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bandar Abbas Radio (EOI) or Abadan Radio (EQZ).

IOOC Tehran, Telex: 212598 – 212346 – 212707.
Attn. Marsupt. Sirri.

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Sirri in GMT and last port.
CC Cargo required.
DD Deballast time.
EE Size and number of connections for cargo.

Abadan Coastal Radio Station (EQZ) schedules and frequencies:

Schedule of Watch GMT (hrs.)	*Listening Watch Frequencies* (kHz)	*Transmitting Frequencies* (kHz)	*Receiving Frequencies* (kHz)	*Remarks*
Continuous	500	500	500	Distress Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405-535	Traffic Lists every 2 hours from 0105 to 2305 GMT.
0400 – 0700	8356 – 8374	8471	8474 – 8460	**Traffic Lists every 2 hours from 0405 hrs. GMT.
0700 – 0900	12534 – 12561	13069.5	12561 – 12689	
1000 – 1300	12534 – 12561	13069.5	12561 – 12689	
1400 – 1700	8356 – 8374	8471	8374 – 8460	
1700 – 1830	3178 – 4187	4294	4187 – 4231	

**During scheduled watches on HF while station (EQZ) is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according to their schedules of watch.

2. Sirri Island Station, is operating on 500 kHz, and 2182 kHz from 0400 – 0800 hrs. LT and from 1100 – 1400 hrs. LT.

3. Sirri Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Sirri Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

4. Sirri tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Sirri Tugs" when passing Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

5. *Radio Free Pratique:* Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Sirri Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Smallpox and Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

TUGS: 2 modern diesel tugs of 4,250 b.h.p. fitted with controllable pitch propellers and a bollard pull of 65 tons are stationed at the loading dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fighting capability, foam, dispersant and fire wires.

Launches: The Terminal operates a pilot launch and 2 mooring launches for rope handling.

NOTICE OF READINESS: The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affect cargoworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the Sirri Marine Superintendent will be final.

The vessel's Owner may bring in a Classification Surveyor, at his own expense, to conduct a survey.

BERTHING: *Port Facility – Tanker Dock:*
1. Vessels are ordinarily docked port side to the dock on a heading of 017°, at mooring piling equipped with "Yokohama" type inflatable fenders. Mooring lines are attached to 6 mooring pilings, equipped with quick-release hooks. The dock comprises a loading platform linked to land by a catwalk. All ships berthed alongside must provide rat guards for the ship's moorings.

2. Water depth, adjacent to the dock, at LW is 28 m.

3. Keel clearance required by the Terminal is 3 ft. at all times.

4. Connection and disconnection of the loading arms is performed by IOOC personnel, with the assistance of the vessel's crew. The vessel's cranes are not used unless absolutely necessary, as in the event of failure of the platform hoisting equipment. The loading arms are of 20 in. size, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges.

Vessels are advised to have their reducers attached to the loading manifold, ready for connection. Before connection is begun, the vessel will be connected to the arc system voltage equalising cable.

5. After the vessel is moored and Pratique issued, an IOOC representative responsible for loading and safety will reach agreement with the vessel as to loading conditions, possible flow rate, and quantities to be handled. The IOOC representative is on watch on the dock at all times. The Master of the vessel must provide him with all the information necessary to ensure proper completion of the loading process. The Master shall designate an officer to be responsible for loading and safety on board, in liaison with this representative, and a crew member who shall be permanently stationed near the manifold for direct communication with the dock. The Master shall be fully responsible for valve operations and safe loading on board. If necessary, the vessel may at any time request a reduction in the pumping rate.

When loading is completed, tank ullages shall be taken by an officer of the vessel, in the presence of the IOOC representative.

The Terminal shall furnish the vessel with samples of the crude loaded, taken by continuous sampling on the loading line. Such samples shall be numbered and sealed, and shall state the origin of the crude.

6. At the end of the loading process, the vessel shall notify the Terminal 0.5 hour, and again 10 minutes, before the planned stop loading.

LOADING: *Loading Facility:*
1. Tankers are loaded at Sirri Island alongside a 1 berth jetty, approximately 600 ft. offshore. The loading platform is fitted with rigid hydraulic loading arms which have quick connection/release couplers attached to the end flange.

Crude is loaded by 4×20 in. loading arms, 2 of which are also used for unloading dirty ballast water from the tanker.

2. The maximum loading rate is 15,000 cu.m./hr. The minimum flow rate is 15,000 bbls/hr. All vessels accepting nominations to load at Sirri Island must be capable of loading crude at rates above this figure.

3. The API of Sirri crude oil is 31.

4. The temperature of Sirri crude oil varies between 93°F and 86°F (Summer/Winter).

5. The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the Consignor.

6. A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal provided the Master issues a written request to the Loading Master upon arrival at the loading dock. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Masters should note that in cases of overloading, the excess cargo cannot be returned to the shore line.

Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

7. An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes (see "Early Sailing Procedure").

8. Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washing on board ship and treating these washings with chemicals. The result is that no oil is discharged into the sea and the oil separated is collected in a Slop Tank. With the written permission of Off-Taking Companies, the Terminal will "Load on Top" of such slops. To avoid pollution of the Gulf, this system is highly recommended.

9. Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge enroute to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

10. A 90,000 cu.m. storage reservoir enables vessels to discharge the dirty water ballast from their tanks into IOOC land installations, by means of two of the 20 in. handling arms in the dock installation.

EARLY SAILING PROCEDURE: Notice to Masters:

In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing system is now in force.

The following documents are prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(A) Nos........ Originals & Nos........ Copies of IOOC Bill of Lading.

(B) Nos........ Originals & Nos........ Copies of IOOC Certificate of Origin and Cargo Manifest.

(C) Nos........ Originals & Nos........ Copies of IOOC Tanker Time and Loading Report.

(D) Nos........ Originals & Nos........ Copies of IOOC Report of Cargo and Ship's Ullages.

(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the "Bill of Lading" and "Certificate of Origin" forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In case of disagreement on Cargo figures, the Master may:

1. "Note Protest" by cable or telex.
2. Authorise the ship's Agent to "Note Protest" on his behalf.
3. Pass a written "Note of Protest" to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

POLLUTION: It is the Master's responsibility to ensure that no garbage, refuse or liquid discharge is allowed to pollute harbour waters.

Adequate covers must be placed over all sanitary and galley discharges to prevent fouling the dock structure.

Ship's Masters are obliged to observe International Convention Laws concerning pollution of the sea.

Rules and Regulations establishing procedure for the Sea of Oman and the Gulf must be strictly observed by all Masters.

IOOC monitors the entire area within their field of operation, and will fully document and report back to NIOC any case of pollution for further action.

MEDICAL: IOOC operates a small clinic on the Island with resident doctors. This facility will be made available for emergency cases only.

TIME: Standard zone time for Iran is GMT plus 3.5 hours. Daylight saving time advances clocks 1 hour from March through to October.

SERVICES: The following facilities are NOT available:

Bunkers.
Laundry.
Fresh water.
Crew changes, shore leave.
Stores.
Repair facility.

GENERAL:

Surveyors: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas and Abadan.

Consuls: No Consular representation is available at Sirri but the Embassies of most nations are situated in Tehran.

Officials: Customs, Ports and Shipping, and Gendarmerie Officials are stationed on Sirri Island.

Maintenance: Maintenance work such as scaling and painting on deck or from the loading dock, is prohibited at all times while the vessel is alongside the loading dock.

WEATHER: From May to September, very hot and humid conditions prevail with temperatures reaching 47°C (117°F) and relative humidity ranging from 10% to 100%.

The winter months, from November to March, are mild and pleasant with minimum temperatures of about 4°C (39°F).

Throughout the year, the dominant winds are from the W.N.W., with winds of a force greater than 20 knots from November to March. This orientation is approximately 290° at Sirri. This wind, known as the "Shamal", blows particularly in the Summer during a period of 40 days (beginning of June to mid-July; in the Winter, it comes on abruptly and can reach 30 to 40 knots. Days of flat calm can be estimated at 10% of the year.

Note: Violent winds from the N.E., reaching 60 knots, have been observed in the Winter season.

Sea temperature varies from 71°F. (22°C.) in January to 93°F. (34°C.) in August.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran, Iran. *Tel:* 624102-5. *Telex:* 212598, 212346, 212707. *Cables:* Falatghareh, Tehran. *Contact:* Captain M. H. Salimzadeh, Head of Marine Operations.

Mailing Address: P.O.Box 1434, Tehran, Iran.

Italy

PORTO VESME: (Also see page 723).

SHIPMASTER'S REPORT: December 1984.

Porto Vesme is the name of the port and industrial complex. The local town is called Porto Scuso which may be better known to postal and telephone authorities.

Pilotage: Black pilot launch with VHF. Pilot carries portable VHF.

In strong N.W. winds Pilot requests vessels remain stationary, at pilot station, for boarding. Pilot disembarks West of Ghingetta Island, heading 340° using starboard side ladder.

Max. Size: Eurallumina Quay: Up to 12 m. draft permitted. (December 1984).

Tugs: One tug, nominal 1,400 h.p., is available at Porto Vesme. Other tugs available on order from Cagliari, etc.

Berthing: Very active rolling on Eurallumina Quay, fenders effective but strip all paint from hull. Local ships insert rubber tyres between ship and wooden faces of fenders. Long leads required on mooring lines to prevent breaking while rolling.

Fenders project at least 2 m. from wharf face, very difficult to swing gangway ashore causing delay. A brow may be more easily placed at first. Gangway or brow must have efficient rollers on ground.

TRIESTE: (Also see page 731).

SHIPMASTER'S REPORT: January 1985.

Dry Docks: There is a new dry dock, located at Arsenale San Marco. Our vessel was the first to use it, our dimensions being:

LOA: 255.0 m.
Moulded breadth: 35.3 m.
Moulded depth: 19.0 m.

Ivory Coast

ABIDJAN: (Also see page 735).

SHIPMASTER'S REPORT: February 1985.

Customs: It is advisable to declare all valuable goods such as television sets, video-recorders, video tapes, radios and binoculars, also soft drinks and beer, as it is common for Customs to impose fines of $1,000 – $2,000 if incorrect declaration is made.

The Ship's Stores List/Provisions List must also be correct otherwise fines will be imposed.

Kuwait

SHUWAIKH: (Also see page 862).

This information, received in January 1985, supersedes the entries for "Berthing" and "Cranes" on page 862.

BERTHING/CRANES:

Berth No.	*Overall Length* (m.)	*Depth Below ACD* (m.)	*Max. LOA of vessel allowed to berth* (m.)	*Max. Permitted draft* (m.)	*Cranage*
1	186.58	10.06	175	9.6	Grain elevator 250 t/hr. Grain elevator 150 t/hr.
2, 3, 4, 5	186.58	10.06	175	9.6	3 cranes×3 tons capacity (For each berth) 1 crane×6 tons capacity (For each berth)
6, 7	185.75	10.06	175	9.6	3 cranes×3 tons capacity (For each berth) 1 crane×6 tons capacity (For each berth)
8	211.51	10.06	200	9.6	Cement elevator 350 t/hr. 3 cranes×3 tons capacity 1 crane×6 tons capacity
9, 10	199.92	10.06	220	9.6	2 cranes×3 tons capacity (For each berth) 2 cranes×6 tons capacity (For each berth)
11	199.92	10.06	220	9.6	3 cranes×3 tons capacity 1 crane×6 tons capacity
12, 13	190.73	10.06	225	9.6	2 container gantry cranes 36 ton capacity under the spread. 1 jib crane, 30 tons capacity (For the 2 berths together)
14	199.92	10.06	220	9.6	3 cranes×3 tons capacity 1 crane×6 tons capacity
15	179.72	8.53	200	8.0	3 cranes×3 tons capacity
16, 17	199.92	8.53	220	8.0	2 cranes×3 tons capacity (For each berth)
18	199.92	8.53	220	8.0	3 cranes×3 tons capacity
F.H.1	181.08	6.7	180	6.0	3 cranes×3 tons capacity
F.H.2	155.69	6.7	110	6.0	2 cranes×3 tons capacity
F.H.3	199.77	6.7	220	6.0	3 cranes×3 tons capacity
F.H.3A	61.36	6.7	50	6.0	
14A	79.00	10.06		9.6	For Ro/Ro ships only

Note: There are 2 Dolphin Berths with depth alongside of 8.53 m. below ACD and capable of taking vessels up to 185 m. in length and 8.0 m. draft.

Entrance channel is 150 m. breadth and 8.53 m. depth (below ACD).

The Curvature of the channel has been recently widened, allowing vessels of 260 m. to pass through. Such vessels are allowed to berth provided that their draft is not greater than 9.6 m.

Closed Stores:

Store No.	*Area* (sq.m.)	*Store No.*	*Area* (sq.m.)
1	3,600	15	13,970
2	4,050	16	13,970
3	4,050	17	7,950
4	4,350	18	7,950
5	3,175	19	6,981
8	10,750	20	7,950
9	10,750	21	7,950
10	10,750	22	7,950
11	10,750	24	1,000
12	10,750	25	1,000
13	10,750	26	1,000
14	13,970	27	1,000

Total area of closed stores: 174,366 sq.m.

Covered Stores:

Store No.	*Area* (sq.m.)
7	10,000
23	5,250

Total area of covered stores: 15,250 sq.m.

Open Storage Areas:

Open Storage Area No.	*Area* (sq.m.)	
1	7,700	
2	7,000	
3	5,100	
4	8,800	
5	11,300	
6	6,700	
7	12,400	
8	16,600	
9	35,200	
10, 11	47,700	Container operation area for Berth Nos. 12 and 13
12	11,300	
13	56,300	
Areas North of Ghazali Street	262,500	

Total area of open storage: 488,600 sq.m.

Container Stacking Areas:

Container Terminal	120,000 sq.m.
New Extension	145,000 sq.m.
Total Container Stacking Area:	265,000 sq.m.

Libya

GENERAL: All ports: (Also see page 878).

DOCUMENTS: Not less than 7 copies of Crew and Passenger Lists. Other documents as required at each port.

Ship's certificates should be delivered to the Marine Inspection Office at the port.

PORT LIMITS/ANCHORAGES: As shown on Admiralty charts.

CONSULS: No Consuls at any port.

CUSTOMS ALLOWANCES: No spirits, wine or beer to be held out of bond.

TELEPHONES: All calls through Tripoli and Benghazi Coastal Stations – No calls allowed when the ship is alongside.

SHORE LEAVE: Crew members permitted ashore during daytime. Shore leave not permitted at oil terminals.

IDENTIFICATION CARDS: Shore passes issued and Seaman's Book to be kept at the gate at port entrance.

DELAYS: Delays in berthing and load/discharging can normally be expected.

Namibia

LUDERITZ: (Also see page 967).

The following information is in addition to that on page 967.

ANCHORAGE: Anchorage may take place inside the port limits between 0600 hrs. and 2200 hrs. or at any other time in an emergency.

MAX. SIZE:

Shearwater Bay Anchorage: No restriction.

Luderitz Harbour Anchorage: No length restriction. Draft 15 m.

Robert Harbour Anchorage: Length approximately 140 m. Draft approximately 7.5 m.

Alongside main jetty: Length normally approximately 95 m. Draft 6.0 m.

RADIO: ETA at least 72 hours in advance; unless in an emergency. Cables addressed to Harbour Master Luderitz.

VHF: Diaz Point Lighthouse, tel: 2249.

MEDICAL: Operating facilities are available. Air Ambulance Service is available. Port Health facilities exist.

CUSTOMS ALLOWANCES: Customs Regulations as per South African Customs and Excise.

POLICE/AMBULANCE/FIRE: Hospital, tel: 2266 or 2446.

SERVICES: No compressed air facilities are fitted on the jetty but portable compressors are available.

Low capacity salvage pumps are available.

SHIP SUPPLY SERVICE: An Off-Shore Ship Supply Service is operated by the South African Transport Services (Harbours) by means of a small tug and (occasionally) by means of a launch.

If the vessel does not have an Agent at the port, a deposit is required before the service will be rendered. The service is provided on a 24 hour basis, provided (except in an emergency) the necessary arrangements are made during normal office hours.

The tug has a capacity of approximately 3 tons and 24 passengers, but the capacity of the launch is severely limited.

The normal rendezvous position is approximately 3 miles N.E. of Diaz Point Lighthouse (Position of lighthouse: 26° 38.2′ S., 15° 05.6′ E.) but the tug, by special arrangement, will proceed further to seaward if required. The depth of water at the normal rendezvous position is 22 m.

GENERAL: *Basic weather conditions:* Winter: Variable winds; mainly Northerly; usually less than 20 knots. Occasionally Easterly wind in excess of 40 knots; but usually of very short duration (8 hours). Fog is prevalent; but only infrequently East of Angra Point.

FLUSHING: (Also see page 974). (See Late Plans)

LPG HANDLING FACILITIES:

Eurogas Terminal, Flushing East: The Eurogas Terminal is dedicated solely to storage and throughput of Liquefied Petroleum Gases and Chemical Gases.

Documents: Eurogas has been authorised by the Dutch Customs Authorities to prepare and complete all necessary Customs and transportation documents, which reduces waiting time to an absolute minimum.

Pilotage: In close co-operation with Eurogas, the shipping Agent and the Pilot, the harbour Authorities control the arrival and subsequent mooring in the Quarles Harbour.

Max. Size:

Vessel Size	*Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Facilities* *Refr.*	*Press.*
Jetty 1	213	38	9.5	×	×
Jetty 2	295	44	13.5	×	×
Jetty 3	110	12	5.0	–	×
Jetty 4	110	12	5.0	–	×

The harbour has a depth of 16 m. and is therefore accessible to all existing fully loaded LPG-carriers. Maximum drafts may also be dependent on the prevailing least depth in 'Het Scheur' and the near approaches to the jetties and are conditional on the agreed procedures and Port Authority requirements for the safe movement of LPG-carriers. For safety reasons loading/unloading can be stopped due to high wind forces depending on wind direction.

Berthing:

Jetty 1: At which inland barges and oceangoing vessels with a draft of max. 9.5 m., overall length of max. 213 m., a max. bow to manifold distance of 115 m., a max. stern to manifold distance of 108 m. and a max. beam of 38 m. can safely reach and leave and at which such vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm can accommodate:

– max. height +14.0 m. NAP (Nieuw Amsterdams Peil) which is comparable with approx. 11.5 m. above water-level at HW.

– minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.

– range out of centre loading arm parallel to berthing line approx. 5 m.

– range out of – and perpendicular on berthing line approx. 7 m.

Jetty 2: At which inland barges and oceangoing vessels with a draft of max. 13.5 m., overall length of max. 295 m., a max. bow to manifold distance of 150 m., and a max. stern to manifold distance of 150 m. and a max. beam of 44 m. can safely reach and leave and at which vessels can always lie safely afloat.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

– max. height +28.0 m. NAP which is comparable with approx. 25.5 m. above water-level at HW.

– minimum height −1.5 m. NAP which is comparable with approx. 1 m. above water-level at LW.

– range out of centre loading arm parallel to berthing line approx. 7 m.

– range out of – and perpendicular on berthing line approx. 12 m.

Jetty 3/4: At which inland barges and coastal vessels with a draft of max. 5 m., overall length of max. 110 m., a max. bow to manifold distance of 40 m. (Jetty 3), and 55 m. (Jetty 4), a max. stern to manifold distance of 50 m. and a max. beam of 12 m. can safely reach and leave and at which vessels can always lie safely afloat.

Jetty 4 is also suitable for small coastal vessels (max. deadweight approx. 1,500 tonnes), ship size depending on manifold allocation.

Loading and discharging shall normally be allowed to continue as long as the ship's manifold connection stays within the reach of the loading arm of Eurogas.

The reach of the loading arm shall be able to accommodate:

– max. height +14.0 m. NAP.

– minimum height −1.5 m. NAP.

– range out of centre loading arm parallel to berthing line approx. 5 m.

– range out of – and perpendicular on berthing line approx. 6 m.

Discharging: The Eurogas Terminal operates 24 hours a day, 7 days a week.

Eurogas and the independent surveyor check the facilities of the vessel and the quantity of the cargo before discharge commences.

Receiving Capacities at Various Jetties (all in cu.m./hr.)

	Into refrigerated tanks	*Into pressure tanks or to other jetties*
Jetty 1	1,000 (per tank)	500
Jetty 2	3,200 (per tank)	500
Jetty 3	—	500
Jetty 4	—	500

In order to minimise laytime on jetties, refrigerated propane and butane can be discharged simultaneously at Jetty 1 and 2.

Additionally, all pipe-lines on shore can be cooled down before the arrival of a vessel by means of separate cool-down lines. All jetties are equipped with vapour return facilities including a blower-system at Jetty 2.

Board/board transfers between all the jetties can be realised with or without the use of 2 heaters. These heaters have a capacity of 500 cu.m./hr. each, with a temperature differential of up to 47°C under all weather conditions.

Loading: 4 vessels/barges, three railcars and 4 road trucks can be loaded simultaneously with capacities as described below.

Railcars and road trucks are each loaded on a weighbridge. The consecutive loading of 2 products into 1 railcar/road truck can take place without disconnecting and reconnecting of loading arms and necessary shunting/shifting to another loading point.

Loading Capacities in cu.m./hr.	*Product.* *Refrig.*	*Press.*
1. From the refrigerated tanks:		
To Jetty 1 or 2 (per tank)	600	–
To Jetty 3 or 4	–	–
Via heater to pressure tank	–	500
Via heater to Jetty 1, 2, 3 and 4	–	500
2. From the pressure tanks:		
To Jetty 1, 2, 3 or 4	–	350
To each railcar loading point	–	120
To each roadtruck loading point	–	80

Storage: The terminal consists of 6 pressure tanks with a gross capacity of 3,369 cu.m. each, and 2 refrigerated tanks of 55,000 cu.m. each. Total capacity is therefore 130,000 cu.m.

The refrigerated tanks are constructed with double integrity steel inner tanks and a concrete outer wall capable of holding refrigerated product.

In the pressure tanks, chemical gases can also be stored.

Product List:

1. Refrigerated tanks: propane, butane and/or mixtures.
2. Pressure tanks: butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide, propylene.

Products for the pressurised storage are:

Spheres 1, 2, 3, 4, 5 and 6. Butane, isobutane, butadiene, butylene, isobutylene, cyclopropane, propane, propylene-oxide. Spheres 4 and 5 also propylene.

A. Pressure tanks: Product stored in tanks 1, 2, 3 and 6 shall have a vapour pressure of less than 13.5 bar gauge at 30°C.

B. Pressure tanks: Product stored in tanks 4 and 5 shall have a vapour pressure of less than 16.5 bar gauge at 30°C.

C. Refrigerated tanks: 2% mol. max. ethane content in propane was the design basis for the refrigerated system. The tolerances on the compressors and the cooling system are the technical limitations on storage of products with higher ethane contents.

Safety: E.S.D. systems (Emergency Shut Down systems)

Activated by:

(a) Gas detection system.
(b) Loading arms limit switches.
(c) Ship's E.S.D. system.
(d) Control-room.
(e) Local push buttons.
(f) General E.S.D. pressure storage fill system.
(g) Fill shut down (overflow).
(h) Shut down sendout system.

Gas Detection System.

Sensors located at:

(a) Annular space tanks.
(b) Fan intake.
(c) Roof tanks.
(d) Relief valves' exhaustline.
(e) Area general.
(f) Process area.
(g) Boiler house.
(h) Office heating air intake.
(i) Jetties.
(j) Existing pressure storage.
(k) Generators' area.
(l) Expansion-tank water/glycol system.

Firefighting: The terminal site has been equipped with all sorts of fire-fighting apparatus like:

– 45 waterguns, which can spray 1,600 litres per minute each over a distance of 70 m;

– sprinkler installations at all vital points;

– 2 separated pumping systems, to be sure of water supply under all circumstances; 1 at the harbour with 2 diesel-powered pumps with a total capacity of 2,000,000 litres water per hour, the other 65,000,000 litres at the pond which is constructed on the site.

– Eurogas has its own fire brigade, with a special fire-fighting truck which can also travel on rails. In this way every part of the terminal site and its perimeter can be reached with the greatest possible speed.

Operator: Eurogas Terminals C.V.

Head-Office: Van Vollenhovenstraat 3, 3016 BE Rotterdam. Tel: 010-366955. Telex: 25338.

Terminal: Frankrijkweg 4, 4455 TR Nieuwdorp. Tel: 01196-12820. Telex: 55684.

TERNEUZEN: (Also see page 984).

This information should be read in conjunction with entry on page 984.

BERTHING:

Dow Chemical:

Pilotage: Pilotage is compulsory for seagoing vessels, entering, leaving or manoeuvring in the harbour.

Dispensation may be granted by the Harbour Master.

Navigation Aids: The entrance of the harbour is marked by a fixed green and a fixed red light on top of piles on West and East side of the white leading-lights.

Night and day, the axis of the harbour entrance is marked by 2 synchronous interrupted white leading-lights (Iso. 2 sec.) located on the Southern harbour dyke. Bearing is 191°.

The green and red harbour-lights are located respectively 170 m. and 215 m. from the axis, indicated by the white leading-lights.

The minimum width of the harbour entrance on either side of the axis, measured at right angles, is 112 m.

Night and day the centre of the turning-basin, West of the Ocean Dock, is indicated by interrupted green leading-lights (3 sec. on, 1 sec. off). These lights are located on the Southern harbour dyke. Bearing is 211.5°.

The centre of the almost circular turning basin lies at the intersection of the green leading-lights and the Westward lengthened axis of the Ocean Dock. The radius of the turning basin is 200 m.

During fog, 2 sodium foglights are lighted underneath the green light of the harbour entrance.

One of these foglights is directed towards the Scheldt River, the other towards the harbour.

During the night and poor visibility, the piles, marking the harbour entrance are illuminated by flood-lights.

The shoal in the harbour, extending from the Southside of the Barge and Coaster Docks to further Southward is covered by 2 light-buoys, located on a water depth of NAP – 7.5 m. The line between the North Buoy (BRA 4 Qk., Fl., red) and the South Buoy (BRA 6, Iso. 8 sec., red) marks the Western boundary of the shoal.

Restrictions/Max. Size: The largest permissible length and/or beam are for:

Seagoing Vessels:	
In the harbour	Length overall 280 m.
Along the Ocean Dock	Length overall 280 m.
Along the B and C Docks	Length overall 140 m.
Inland craft	Length 140 m.
Push barges	Length 185 m. Beam 22.8 m. An additional length of 8 m. is permitted, provided that the max. length of the barge does not exceed 153 m. and the pushtug is lashed in the axis of the barge.
Lashed Barges	Length 110 m. Beam 22.8 m.

It is prohibited to enter the harbour with vessels or boats which:

(a) Do not have to load or unload in the harbour.

(b) Do not have to carry out any work.

(c) Are not equipped with a VHF radio, suitable for transmitting and receiving on Channel 3.

Dispensation from measurements and conditions as mentioned above can be granted by the Director of the Port Authority or his substitute. Dispensation can also be granted by the Harbour Master or his substitute except for the max. admittable length of 280 m. LOA.

The dredged bottom depths in the harbour are:

In the harbour entrance:	N.A.P. – 15 m.
In the turning basin:	N.A.P. – 16 m.
The Western Berths of the B and C Docks:	N.A.P. – 11 m.
B and C Dock Berth B-East:	N.A.P. – 9.5 m.
B and C Dock Berth A-East:	N.A.P. – 7.5 m.

The above mentioned bottom-depths are typical figures and certain deviations as a result of siltation can occur.

Information with regard to permitted draft can be obtained from the Harbour Master's Office or from the Traffic Control Station.

Ocean Dock:

For North and South the same depths and restrictions.

They are:

N.A.P. – 18 m.
Max. d.w.t. – 100,000 tonnes.
Max. Length – LOA 280 m.

In addition to the information given above, the following "General Directives" should be observed:

Time of berthing at, or departing from, the Ocean Dock depends on tidal conditions and max. d.w.t. or draft of each vessel and will be determined by the Pilot.

The maximum allowable draft of vessels is determined by the water depth at the Scheldt river entrance, at Scheur. At present maximum draft is about 43 ft. but new figures are published every month.

Berthing with ship's bow pointing to seaward is compulsory.

VHF: Dow Chemical Marine Department can be contacted by VHF-radio on Channels 6, 8, 13, and 34. Constant radio watch is kept on Channels 13 and 34.

Traffic controlled by Terneuzen Traffic Control Station, Tel: 01150-95651, Telex: 55482, VHF Channel 3, callsign: Radar Terneuzen.

The procedure of "Reporting in Writing" is also compulsory for inland craft, whereby the term of 3 hours also applies for the activities as mentioned below.

Masters of seagoing vessels and inland craft must report by VHF on Channel 3 to Terneuzen Traffic Control Station, call sign Terneuzen Radar, when:

(a) On the Western Scheldt River with destination Braakman Harbour and:

Ascending the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of buoy 22.

Sailing down the river: Entering the radio area "Radar Terneuzen" and in the neighbourhood of buoy 22.

(b) Entering or leaving the harbour.

(c) After berthing and before unberthing.

(d) Changing berth.

All traffic inside the harbour or harbour entrance is obliged to have the VHF radio tuned to Channel 13.

As necessitated by weather or other circumstances, the required number of tugs will be determined by the Harbour Master.

Seagoing vessels, having to carry signals in accordance with article 22 of the decree of the Ministry of Transport and Public Works, dated 12-31-1971 Nr. A-5/071054 (Regulations for Dangerous Goods) are not allowed to enter the harbour if the visibility is 500 m. or less.

Inland craft, having to carry the signals in accordance with article 10 of the decree of the Ministry of Transport and Public Works, dated 12-31-1971 (Regulations of Dangerous Goods) are not allowed to enter the Harbour if the visibility is 500 m. or less.

During approach under the above conditions vessels may be ordered by the Harbour Master, to berth or drop the anchor at a suitable place.

Dispensation from the paragraphs as provided above may be granted by the Harbour Master.

(a) Entering the harbour is prohibited if a red light is shown below the green and red harbour lights.

(b) Sailing out of the harbour is prohibited if a red light is shown below the green and red harbour lights.

Tugs: A seagoing vessel mooring, or leaving a berth has to be assisted by at least:

(a) 1 tug if the length overall is less than 100 m.

(b) 2 tugs with sufficient power if the overall length exceeds 100 m. unless the vessel is equipped with a functioning bow-thruster when only 1 tug is required.

(c) 1 tug only is necessary when leaving Berths B-West or B-East and when moored with the bow to the North.

Assisting tug must be attached to the towing lines on the seagoing vessel.

Berthing: A seagoing vessel calling at the Ocean Dock has to be:

(a) Moored with the bow in N.W. direction. Except as otherwise agreed by the Harbour Master.

(b) Turned away from the Ocean Dock.

A seagoing vessel calling at the Barge and Coaster Dock has to make its turn to starboard unless wind or other circumstances justify a different decision.

Masters must ensure that their vessels remain afloat under all circumstances.

Masters must moor their vessel in such a manner that the berth can be left without delay, unless decided otherwise by, or on behalf of the Harbour Master. At least 1 steel cable must be positioned on both the bow and the stern of the vessel. Each cable must be properly attached and adjusted for easy pick-up by a tug.

An intercom set and a telephone will be placed on board immediately after berthing. The intercom is for direct communication with the Loading Master.

Charges for the telephone will be made via the ship's Agency. The telephone number of the set placed on board depends on the berth where the vessel is moored.

The following numbers are in use:

A West:	01150 – 20819
A East:	None
B West:	01150 – 20820
B East:	01150 – 20821
C:	01150 – 20823
OD North:	01150 – 20825
OD South:	01150 – 20826
Scheldt Jetty:	01150 19637

Loading/Discharging:

Manifold Position:

The manifold position for ships bound for Terneuzen should be:

- about midships.
- 2 m. minimum from rail.
- 1 m. minimum above deck.
- Flange connection 6 in. minimum.

A well supported manifold is required and the space around and above the manifold should be free of obstructions.

Marine Loading Equipment:

LPG can be loaded and unloaded at the Barge, Coaster and Ocean Docks.

The following equipment is available:

(B and C-Barge and Coaster Dock: O.D.-Ocean Dock).

B and C A-West: 2 stainless steel loading arms for propane, nominal diameter 6 in. Minimum temperature –104°C.

1 carbon-steel loading arm for butane and propane, nominal diameter 6 in. With integrated vapour return line, nominal diameter 4 in. Minimum temperature –10°C.

B and C A-East: 1 carbon-steel loading arm for butane and propane, nominal diameter 6 in. With integrated vapour return line, nominal diameter 4 in. Minimum temperature –10°C.

B and C B-West: 1 carbon-steel loading arm for butane and propane, nominal diameter 8 in. With integrated vapour return line, nominal diameter 4 in. Minimum temperature –10°C.

B and C B-East: 1 carbon-steel loading arm for butane and propane, nominal diameter 8 in. With integrated vapour return line, nominal diameter 4 in. Minimum temperature –10°C.

B and C Dock C: 2 stainless steel loading arms for propane, nominal diameter 6 in. Minimum temperature –104°C.

O.D. South: 2 low temperature steel loading arms for butane and propane, nominal diameter 10 in. Minimum temperature –50°C.

O.D. North: 2 low temperature steel loading arms for butane and propane, nominal diameter 12 in. Minimum temperature −50°C.

Except for the carbon-steel loading arm on Berths A-West and A-East, all others are equipped with an emergency shut-off and disconnecting device and a firefighting nozzle, directed on the ship's cargolines' manifold.

On the Braakman Jetty a C-4 vapouriser and booster-pump are available for unloading C-4 from barges which do not have their own discharge facilities.

Propane can be unloaded with this booster-pump as well.

Nitrogen or methane supply from shore is necessary to produce enough over-pressure in the ship tanks, when unloading C3's.

Purging:

Purging of LPG vessels with nitrogen or methane can be carried out at the Barge and Coaster Docks. Maximum delivery rate of nitrogen is 2,000 N cu.m./hr., methane 1,800 N cu.m./hr.

Nitrogen can be heated to a temperature of +70°C to increase the drying effect of the vessel's cargo tanks which were waterwashed prior to the purge. Prior to loading LPG, vessels must meet the requirements as laid down in the "Guidelines for Cargotank Condition".

Conditions for Unloading Propane and Butane:

All refrigerated propane and butane vessels should arrive with tanks, over-pressure not exceeding 60 mb. to achieve maximum discharge rates.

Unloading of propane and butane is without vapour return.

Transfer Capabilities:

Discharge rates for refrigerated propane and butane are about 1,100 cu.m./hr.

Loading rates for refrigerated propane and butane are about 800 cu.m./hr.

Loading rates for pressurised propane and butane are about 250 cu.m./hr.

Storage:

Butane and propane are stored in refrigerated and pressurised tanks and loaded/unloaded at either ambient temperature or refrigerated. Refrigerated propane delivery is at −38°C and butane delivery is at −5°C.

LPG Storage Tanks:

2×50,000 cu.m. propane/butane fully refrigerated.

1×15,000 cu.m. butane fully refrigerated.

1×5,000 cu.m. butane pressurised.

2×3,000 cu.m. propane/butane pressurised.

Ventmasts must have clearly marked purge connections for either steam or nitrogen.

The vessel must have updated cargo-piping diagrams on board. Copies of drawings must be submitted to Dow on request.

Inspection – Visual Inspection:

Cargo tanks, pumps and refrigeration plants shall be easily accessible for inspection, and crew will upon request open the blinds, valves, drums, etc., as appropriate in accordance with vessel's safety practices.

Cargo Transfer Operations:

Loading or unloading will not start until the appropriate safety and operating procedures have been communicated by the Loading Master to the responsible ship's officer. The vessel must be securely moored alongside the jetty. If requested by the Loading Master additional mooring lines should be attached.

The Loading Master must be informed about the true set pressure of the cargo tank safety valves.

Non-used line ends must be blanked off. All bolt holes must be filled at all pipe connections.

Gas detection on board must be in good order. The Master must permit testing upon request. Master must allow the installation of additional shore gas detectors on deck during loading/unloading operations.

In case of inerted tanks and/or void-spaces, the Master is fully responsible for the necessary warning tags.

If a sprinkler test is requested by the Loading Master or Government Representatives, this must be permitted. If an ESD test is requested by the Loading Master or Government Representatives, this must also be permitted. Upon request the Master must state the valve closure time of his ESD system, to assure safe transfer at short ESD valve closing times. Dow reserves the right to the product transfer rates in order to keep the pressure, as a result of an activated ESD system, below the safety valve settings at no cost to Dow.

Pneumatic ESD connections for shore connections must be clearly marked.

(ESD = Emergency Shut Down.)

At the berth, the venting of gas through ventstacks is not permitted.

Upon request of the Loading Master, cargo pumps must be checked for proper functioning. Leakage of gas must not exceed a concentration of 30% LEL outside a circle of 25 cm. If the vessel's cargo compressors have to be used for loading or unloading operations, they will be tested as well. The Master must give full co-operation for these tests.

Fuel/Fresh Water/Stores: Dedicated bunkering facilities are not available.

Supplies of bunker oils, fresh water or large quantities of stores can be supplied with a barge alongside the vessel. In this case the cargo operations have to be interrupted for the time the barge is alongside. Depending on conditions in the port such operations will as a rule be limited to those vessels for which bunkering on the roads is legally not allowed. (LPG vessels with one or more cargotanks greater than 3,000 cu.m. in size and LPG vessels of over 15,000 cu.m. tank capacity in total.) Bunkering at the berth requires 24 hours' notice and will be co-ordinated by the Loading Master. Limited quantities of stores can be taken on board via the jetties.

If for bunkering or another reason a barge or boat has to moor alongside a ship already moored on one of our jetties, the Loading Master has to be informed 24 hours before the operation. Bunkering requests should be directed via the Agent.

With the permission of the Loading Master it is allowed to take cylinders with acetylene, nitrogen, helium, hydrogen, freon and oxygen from the jetty on board moored ships or to unload them. For hoisting the cylinders the specially made, blue hoisting-containers from Dow must be used. The cylinder valves must be protected by the screw-caps.

Operating of cranes is limited to those people who are authorised by Dow.

When hoisting general stores a net must be used.

Ballast: Slop oil or ballast water can in general not be received.

Tank cleaning of oil or chemical tankers is not permitted alongside the jetties. LPG vessels can be purged. Nitrogen and methane are available for purging purposes.

Vessels, moored at the Dow jetties, have to comply with international ship/shore safety checklist and the additional Dow Marine Safety Regulations.

Safety:

1. Fire/emergency: In case of Fire/emergency (including personal accidents).

(a.) Inform jetty operator.

(b.) Dial 94982, report name, position, emergency situation and required help.

2. Communication: Ship to jetty and Marine office by means of portable telephone or intercom on board. Telephone: dial 18920 ext. 2563 Marine office, ext. 3165 Loading Master.

3. Use of intercom: Push button and call operator or office. Release button and wait. Always mention your ship's name. (There are more ships alongside).

4. Emergency shutdown: Loading: To prevent overloading of ship's tanks and emergency shutdown can be carried out on deck by means of "the emergency shutdown switch" after which the shore-valve will immediately close.

5. Fire on board: Stop loading/unloading operations. Inform shore personnel.

6. Fire ashore or on other vessels: Stop loading/unloading operations. Make ship ready for departure. Wait for instructions.

7. Supervision: At all times during loading/unloading operations, adequate supervision must be carried out on deck and in the cargo-control room.

8. Tank cleaning: Tank cleaning or gas venting into the atmosphere alongside the jetty is strictly prohibited.

9. Deballasting: No deballasting of cargo tanks is allowed without permission of the Loading Master or his representative.

10. After loading: The loading arm will be blown with Nitrogen under pressure. You will receive approximately 3 cu.m. more.

Alarm signals: (Every Monday at 1200 hrs. there is an alarm test). Sounding of following signals:

Attention: 5 3 5 3 5 3 seconds: Stop cargo transfer, wait for instructions.

Evacuation: 1 1 1 1 1 1 seconds: Prepare ship for departure.

All clear: 20 seconds: Recommence operations (contact jetty operator). In case of loading: Loading will be stopped from: Ship/shore.

Nigeria

GENERAL: (Also see page 1026).

LOADING: *Oil Terminals:* A new regulation which took effect from 3rd December 1984, applies to all oil terminals in Nigeria. Vessels must load up to 90% of their deadweight. The remaining 10% being allowance for bunkers/water. Vessels are permitted to load part cargo at more than one terminal/port within Nigeria. This means that a vessel can load part cargo at one terminal and then complement loading at another terminal also within Nigeria. Vessels coming into Nigeria to load crude oil must arrive in ballast without part cargo from another country, otherwise such a vessel will not be allowed to load.

BONNY (Inshore Terminal): (Also see page 1026).

The following information was received in February 1985.

RESTRICTIONS: Berthing possible both day and night but this is dependent on the state of the channel lights.

The maximum draft to which a vessel can load at Bonny is governed by three factors *viz.*

1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at the present time Datum Depth is 10.2 m. (33 ft. 4 in.)

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances are as follows:

			ft.	in.
(January 1st – February 15th)	1/1-15/2	=	2	6
	16/2-15/3	=	2	9
	16/3-31/3	=	3	0
	1/4-30/4	=	3	3
	1/5-15/5	=	3	6
	16/5-31/5	=	3	9
	1/6-31/8	=	4	0
	1/9-15/9	=	3	9
	16/9-30/9	=	3	6
	1/10-15/12	=	3	3
	16/10-31/10	=	3	0
	1/11-15/12	=	2	9
	16/12-31/12	=	2	6

Thus it can be seen that the max. draft at any particular time is equal to:

Datum Depth plus Height to Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

		ft.	in.
Datum Depth	=	33	4
Height of Tide	=	+ 7	0
		40	4
Underkeel Clearance Allowance		3	9
Max. Draft	=	36	7

DEADFREIGHT: Due to draft limitation at Bonny Inshore, Deadfreight applies (when necessary). This means that the Terminal will obtain approval from the Minister of Petroleum and Energy for the Deadfreight.

Also see "General – Late Reports".

BRASS TERMINAL: (Also see page 1028).

(See Late Plans)

Following corrections received from Port Authority in February 1985 and supersedes information on page 1028.

NOTICE OF READINESS: Notice of Readiness will be tendered on arrival provided that vessel is ready to load in all respects and after Free Pratique has been granted. Lay time will commence 6 hours after acceptance of Notice of Readiness for vessels arriving within agreed ETA range or when loading commences, whichever is earlier.

LOADING: The line boat will tow the end of the floating hoses to the point below the tanker's port cargo manifold. The safe working load of the tanker's port derrick should be at least 7 tons.

Loading Operations can commence only after the Loading Permit is issued by the Customs Authorities, NNPC – Inspectorate and Navy Commander.

Ships are requested to load cargo as rapidly as possible by day and night in accordance with the terms of their Charter Party.

Ships are expected and nominations of vessels are accepted by NAOC on the understanding that ships will be able to accept a bulk loading rate per hour of not less than 10 per cent of the Summer d.w.t. of the vessel or at the optimum terminal loading rate, whichever is lower.

It is extremely dangerous to close ship's valves against the oil stream as such operation may create excessive pressure in terminal pipings and hoses.

Should damage result from failure to observe this precaution the Master of the vessel will be held responsible.

During the loading operations the following signals shall be displayed:

International Code Flag "B" during day-light.

A red light, visible all round the horizon at a distance of at least 2 miles.

Brass Blend crude oil loading temperature is reasonably constant as well as API gravity at approximately:

Brass Blend 85°F 40.00 API R.V.P.=Approx. 10.0

The loading rate is approx. 5,000 t.p.h.

Also see "General – Late Reports".

FUEL: Not available.

FRESH WATER: Available.

AUTHORITY: *Operator:* Nigerian AGIP Oil Co. Ltd. Head Office, 9/11 MacCarthy Street, Lagos. P.O.Box 1268, Lagos. *Tel:* 600880/9 (10 lines). *Cables:* Agipoil – Lagos. *Telex:* 21268.

District, New Base Mile 4 – Port Harcourt, P.O.Box 923. *Tel.* 300400/20 (21 lines). *Telex:* Agipoil – Port Harcourt.

Togo Republic

KPEME: (Also see page 1347).

SHIPMASTER'S REPORT: February 1985.

Location: Kpeme is situated about 15 miles East of Lome, and about 115 miles West of Lagos, Nigeria. The position of Kpeme Jetty is approximately Lat. 06° 12′ N., Long. 01° 31′ E.

BA Chart 1861, Cape St. Paul to Lagos Harbour, with Plan, "Rade de Kpeme".

Approaches: The Coast Eastward of Cape St. Paul is practically featureless, but good navigational marks are Port de Lome Breakwater, and Kpeme Jetty, which show well on the radar at distances of up to 20 miles. No dangers in the immediate approach from any direction. The occulting light on Kpeme Jetty Head is difficult to identify, and should not be relied upon, especially in hazy weather.

Documents: The Pilot deals with all port formalities, acting for Customs and Immigration. Documents required are as follows:

2 Crew Lists.
2 Stores Lists, including Bonded Stores.
2 Crew's Effects Declarations.
2 Lists of Ports of Call.
(For the last voyage or last 4 weeks, whichever is longer.)
2 Passenger Lists.
(If Nil, list should be made out with a "Nil" declaration.)

Under normal circumstances the Agent does not visit the vessel until after loading is completed, when he brings all documents and clearance for the ship. (The vessel usually unberths, and drifts off the berth to await arrival of the Agent by boat).

Pilotage: Pilot, sometimes with Assistant Pilot, boards at the Anchorage together with 2 mooring gangs, each under the supervision of a Foreman, who is in constant contact with the Pilot. 2 mooring boats are available to assist with mooring. The Pilots remain on board at all times whilst the vessel is at the Jetty. They have to be accommodated and fed.

Anchorages: The anchorage area is from 1.5 to 2 miles S.E. of Kpeme Jetty Head. Good holding ground, sand and mud; in about 20 m. of water.

Restrictions: All berthing and unberthing operations performed on an East going current only. (Due to the configuration of the berth.) If a vessel happens to be at the berth when a West going current should start, she will remain at the berth until such time as the normal East going stream re-establishes itself. In extreme cases berthing and unberthing could be accomplished with the assistance of 2 tugs from Lome.

Max. Size: Our vessel, (Panamax) LOA 228 m., breadth 32.2 m., is about the largest vessel handled by Kpeme. Largest vessel normally handled is LOA 220 m., but this vessel was accepted on condition that no cargo was to be loaded into No. 1 hold.

Also see "Loading".

Radio: The usual ETAs and requests for berthing prospects were sent to the Agents, (Office Togolais des Phosphates. Telex: 5214. Cable Address: Phospat Lome) but no replies were received at any time from them.

VHF: We called Kpeme Port Control on VHF from 2 hours before arrival, but no response was gained from the shore until the vessel had actually arrived in the anchorage.

Port Control calls on Channel 16, and works Channel 11. Takes all details of the ship, and any requirements on arrival.

Notice of Readiness: Notice of Readiness Time is taken as the time the vessel actually anchors, and within the confines of the Charter Party.

Berthing: From the anchorage, the vessel approaches the berth in a wide sweep, to arrive about 1 cable off the berth, heading in a Westerly direction, when the port anchor is dropped. This is paid out to full scope, then the starboard anchor is let go. A headrope is then led to the buoy on the bow. Meanwhile, a shore after spring wire is hove up on the after mooring winch. Using this and also the main engine, the vessel is manoeuvred into position. This also involves heaving up the port anchor and slacking on the starboard anchor cable, to end up with about 7 shackles on the port anchor and about 4 shackles on the starboard anchor. Vessel then ends up in position for the shiploaders, which is on a heading of about 190° and about 4 m. off a set of small hydraulic fenders which front the islands on which the shiploaders are constructed. The mooring gangs then complete the mooring with shore wires.

Loading: Loading is by 2 shiploaders of 1,300 tonnes/p.h. each. Max. airdraft from Datum to loaders is 15 m. Berth is dredged to 14 m. at Chart Datum. Max. draft allowed at the berth is 38 ft. (11.58 m.) With these various restrictions, large vessels must berth with practically full ballast, and careful deballasting whilst loading is necessary to ensure that the vessel remains within the acceptable limits of draft and airdraft. It has to be remembered that the berth is an open roadstead, and a considerable swell can sometimes run (up to 2 m.). The berth is designed to berth vessel's head directly into the prevailing direction of the swell, to reduce rolling as much as possible, even so, there is still an appreciable movement of the vessel, even with little swell running. Also due to the swell, it is very difficult to read the draft with any accuracy. However, the shore weighing facilities for the phosphate are very accurate, and no real problems were encountered in this direction. (B/L is based on weight recorded by loaders during loading. No draft surveys.)

Liaison with the shore is carried out through the Pilot. No other contact with Agents, etc., available.

Terminal staff friendly and very co-operative.

Unberthing: As soon as, or just before the completion of loading, the shore mooring gangs start to single up the shore moorings. As soon as all shore wires are let go, the vessel's stern starts to move away from the berth with the current. The starboard anchor is weighed and then the Port anchor. Whilst swinging clear of the berth, and weighing anchor, an eye should be kept on the port breast line buoy aft, as it can pass quite close to the stern as the ship swings. After the port anchor is aweigh, the vessel is moved a little way from the berth, and drifts waiting for the Agent to bring out the documents; which usually takes about 1 hour.

Medical: Basic medical treatment is available at Kpeme. Hospitalisation can be effected but it is necessary to go to Lome, where there are adequate facilities.

Fresh Water: Not available.

Fuel: Not available.

Repairs: No repairs can be carried out. If these are required, vessel would have to go to Lome, 15 miles to the Westward.

Repatriation/Airport: There is an International Airport at Lome, and repatriation can be arranged if necessary.

Shore Leave: Although not actually prohibited, shore leave is not really feasible, due to the fact that there are no facilities at Kpeme. Also there are no proper arrangements for a liberty boat to be laid on.

Storing: Fresh provisions are available in limited quantities. Rather expensive and of poor to fair quality. Orders taken by Port Control on vessel's first arrival.

Tristan da Cunha

EDINBURGH (Tristan Island): 37.03 S. 12.18 W.

SHIPMASTER'S REPORT: July 1983.

DOCUMENTS: Usual documents required for entry.

APPROACHES: Chart BA1769 Pilot Book Africa Vol. 2 to be used, local knowledge should be sought regarding weather.

Island is good radar target and may be seen visually at 20 miles in good weather.

PILOTAGE: Local Radio Officer will indicate safe anchorage by handheld VHF (Channel 16).

ANCHORAGES: Edinburgh anchorage is on N.W. side of Island. Town is difficult to observe as houses are very low. Leading marks are white triangles in field to right of crayfish factory.

Area most likely for large vessels has depth of 18 fathoms. Vessel to be wary of large amounts of kelp blocking intakes, etc.

In rough weather vessel would shelter to South of Island.

HEALTH: Any person suffering a cold will not be allowed ashore; if colds are prevalent aboard then no one will be permitted ashore.

RADIO: Radio contact made via Capetown who will arrange schedule.

BERTHING: Calshott boat landing (used for all landings) is small (40 ft. – 50 ft. long). Local knowledge required. 1 motor launch and several whalers available.

Tunisia

GABES (Ghannouche): (Also see page 1359).

SHIPMASTER'S REPORT: February 1985.

Vessel discharged anhydrous ammonia.

Bow-thruster: It is advisable to inform the Agent well in advance whether vessel is equipped with a bow-thruster or not. When negative, a second tug is required for large vessels, as only 1 tug, small and low powered, is available at Ghannouche. The second tug has to be ordered from Sfax (distance approx. 60 miles). This might cause delay in berthing if Port Control is not aware that the vessel does not have a bow-thruster.

Hoses: The shore connection now consists of a 10 in. 150 ASA hose. Due to the height of our manifold above the water (41 ft.) at 24 ft. draft, extra lengths of hose had to be provided by shore.

Maximum allowable pressure for hoses: 8 bars.

Discharge: Maximum shore receiving capacity approx. 600 tonnes/p.h. Receivers urgently requested us not to go beyond the 8 bars back pressure.

We discharged approx. 550 tonnes/p.h. at 7.5 bars back pressure, however, a few hours after commencement of the discharge, the plant requested us to reduce the rate to 400 tonnes/p.h. as they experienced problems with their compressors.

Turkey

HOPA: 41.28 N. 41.27 E.

PILOTAGE: Compulsory, service 24 hours a day. 1 mooring boat available.

TUGS: 2 tugs available.

BERTHING: 815 m. of berthing space, depths from 4 m. – 10 m. One berth for passenger vessels, one for general cargo vessels and one for ore/tanker vessels.

Storage: Open – 3,000 sq.m., covered – 28,950 sq.m.

CRANES: 6 cranes available. Capacities 4 tonnes – 25 tonnes.

Forklifts: 1×3 tonnes, 1×4 tonnes.

GENERAL: The breakwater is still under construction and offers little protection to berthed vessels. In bad weather, vessels are advised to put to sea.

DEVELOPMENTS: 2 new berths and a Ro/Ro facility are under construction.

AUTHORITY: Denizcilik Bankasi TAO.

Union of Soviet Socialist Republics

UST DUNAYSK: (Also see page 1405).

LOCATION: The commercial port of Ust Dunaysk is situated on the left bank of the Kilia inlet of the Danube. The port is open for navigation all the year round.

DOCUMENTS: See "General" before first port in U.S.S.R.

PILOTAGE: Compulsory. It is carried out during daylight. Pilot's waiting area for large sea-going vessels is within a radius of 2.5 miles of centre of a circle, whose centre has co-ordinates 45° 28′ N., 30° 01′ E.

ANCHORAGES: There are 2 anchorages near the port. One is for LASH-carriers, the other for large bulk carriers. There is a floating berth for mooring lighters.

RESTRICTIONS: Daylight entry only.

MAX. SIZE: Max. draft 11.5 m.

RADIO: Notice of Arrival – see "General" before first U.S.S.R. port.

VHF: Radio communication can be effected through the port radio station, some details of which are given in the table below:

	Frequencies (MHz)		*Type of transmission*	*Time of work*
Call sign	*working*	*calling*		
"Cooperation-13" (Port)	156.8 (16)	156.8 (16)	F3E	H24
"Harbour Master"	156.45 (9)	156.45 (9)	F3E	H24

TUGS: Unloading of lighters and towing of convoys along the river is carried out with tug assistance.

CARGO HANDLING: A floating crane of 50 tonnes capacity is used for the handling of cargo on large sea-going vessels. Bulk cargoes, mainly iron ore, calcinated soda, and grain are unloaded from large bulk carriers into small size river tonnage. The loading is carried out the same way.

FRESH WATER/FUEL: May be delivered to the Inner Roads by barges.

CONSULS. None.

REPAIRS: No facilities.

TIME: GMT plus 3 hours in Winter, GMT plus 4 hours in Summer.

GENERAL: *Chart:* Soviet Chart No. 971.

AUTHORITY: The Port of Izmail Authority, Postal address: 7, Port Street, Izmail, 272630, U.S.S.R. *Tel:* 9-04-06. *Cable:* Morport Izmail.

VOSTOCHNY: (Also see page 1408).

The following information was received from the Port Authority in December 1984.

LOCATION: The commercial port of Vostochny is situated in the Vrangel Inlet, on the North-Western coast of the Nakhodka Bay, in the Sea of Japan. Navigation at the port continues all the year round.

DOCUMENTS: See "General" before first U.S.S.R. port.

PILOTAGE: Pilotage in the port of Vostochny is compulsory. The services rendered by Pilots are carried out round the clock. In case the Pilot is not able to board a vessel due to bad weather, Master should follow recommendation given by the Pilot from the Pilot boat.

The port is equipped with a shore automatic vessels' movement control system (radio call sign "Kamensky-17").

ANCHORAGES: Vessels are allowed to anchor in the port Inner Roads, the Vrangel Inlet, after having obtained the Harbour Master's permission only.

RESTRICTIONS: There are no entry restrictions in regard to vessel's length. Vessel's speed should not exceed 12 knots while proceeding through the main fairway and 6 knots when approaching the Vrangel Inlet. Under all circumstances Master shall choose the vessel's speed bearing in mind current navigational conditions.

The mooring of vessels having deadweight of 10,000 tonnes and over and length of more than 150 m. in ballast is not allowed during winds having velocity 10 m./sec. and over.

MAX. SIZE: The maximum draft of vessels mooring at the Coal Pier is 15 m. and 9.7 m. when mooring at other berths.

HEALTH: A vessel having arrived in the port Outer Roads and having no contact with the shore may not need to go through the clearance formalities. Vessels, having arrived in the port Inner Roads (the Vrangel Inlet) irrespective of the fact that they are to carry out cargo handling or not, shall go through all the necessary formalities for the clearance of the ship both on arrival and departure.

RADIO: Notice of Arrival – see "General" before first U.S.S.R. port.

VHF: Radio communication can be effected through the Port Radio Station "Vostochny-Radio", some details of which are given in the table below.

	Frequencies (MHz)		*Type of transmission*	*Time of work*
Call Sign	*working*	*calling*		
"Vostochny-2"	156.8(16)	156.8(16)	F3E	H24
(Port controller)	157.775(95)	157.775(95)	F3E	H24

TUGS: Masters of vessels are to use minimum of 2 tugs when mooring/unmooring and shifting berths at the port of Vostochny. The use of a third tug is compulsory during absence of a tug-pusher when mooring/unmooring bow-towed barges.

The number of tugs and their horse-power is determined by a Pilot with the Master's consent.

BERTHING/CRANES: Berths of the port with depths of up to 10 m. are equipped to handle bulk, liquid, general and timber cargoes as well as various kinds of vehicles. There are also specialised systems for the handling of coal and containers.

FRESH WATER: Can be taken at berths or from lighters.

FUEL: Can be taken at berths or from lighters.

REPAIRS: No facilities.

DRY DOCKS: None.

HATCHES: Opening and closing hatches is carried out by dockers.

TIME: GMT plus 10 hours in Winter; GMT plus 11 hours in Summer.

GENERAL: *Charts:* Soviet Chart No. 700.

Provisions: Can be supplied to order.

AUTHORITY: The Port of Vostochny Authority, Postal address: P.O.Box Vrangel-1, Port of Nakhodka Area, Primorsky Krai, 692907 U.S.S.R. *Tel:* 3-71, 2-71. *Cables:* Port of Vostochny.

United Arab Emirates

AJMAN, Ajman: 25.25 N. 55.28 E.

PILOTAGE: Not available.

RESTRICTIONS: Dredging is taking place between the breakwaters. Work will commence at the S.E. corner of the Eastern Breakwater and proceed to the outer end Roundheads. The dredger will then move to the Western side. The 100 m. cut will then be completed to a depth of 7.2 m. below Chart Datum.

The following restrictions are imposed during operations:

(a) The port will be closed to all navigation during the hours of darkness – sunset to 30 minutes before sunrise.

(b) Transit priority will be given to vessels sailing outward from the port up to 0630 hrs. local time.

(c) Between 0630 hrs. and 0730 hrs. local time, priority will be given to incoming vessels.

(d) At all other times during daylight hours, vessels may arrive or sail as required but all must exercise extreme caution while passing the dredger.

The dredger will carry lights and shapes as prescribed for vessels of this class.

MAX. SIZE: Max. draft available 5 m. Approach Channel width 100 m.

BERTHING: Minimum 48 hours' notice required.

Total quay space 5,000 m.

4 transit sheds of 60 m. × 120 m. available alongside.

Before sailing, all vessels must obtain a Port Clearance Certificate issued by the Department of Port and Customs.

REPAIRS: A "gas-free" and "hot-work" certificate is required from vessels undergoing repairs to oil-tanks within port limits.

A surcharge may be imposed on vessels undergoing repairs or modifications where welding equipment, compressors, etc., are operated from the wharf. Permission to commence this work must be obtained beforehand from the Port Authority.

GENERAL: *Charts:* BA 2887, 3711. USHO 62390.

AUTHORITY: Department of Port and Customs.

United States of America

HUNTINGTON BEACH, California: 33.38 N. 118.00 W.

LOCATION: Approximately 1.3 miles off Huntington Beach as shown on United States West Coast California San Pedro Channel Chart 18746, published by the U.S. Department of Commerce National Oceanic and Atmospheric Administration.

A lighted Bell Buoy "2HB" is located 2,242 ft. from the spare buoy at the Western approach to the Seaberth. It is a private aid to navigation and is shown on the above chart.

PILOTAGE: Mooring Master will board the vessel in the Los Angeles area for an inspection and acceptance of the ship's mooring facilities. He then accompanies this vessel, after agreement, to the Seaberth. On repeat visits, he may join vessel at Seaberth area.

RESTRICTIONS: In addition to max. size, wind force, wave height and direction in conjunction with mooring lines, sizes, place limits on conditions for remaining in the mooring. When these conditions are approached or predicted the vessel will return the submarine hose to the seabed after flushing, as necessary, to avoid damage to the crude unloading facilities. The determination of these limitation conditions is made by the Mooring Master in conjunction with the Terminal Supervisor.

MAX. SIZE: Length 1,000 ft., beam 150 ft., draft 43 ft.

TUGS: A mooring vessel will run the ship's lines to the buoys and serves also as a first response Pollution Control Vessel. It has aboard, for immediate deployment, 1,000 ft. of 14 in. Expandi Boom.

BERTHING: *Mooring Multi Point:* Consists of 8 buoys. Water depth 50 ft. Tidal range 5 ft. to 6 ft. Bottom sand. Current max. 1.7 knots, excluding storm conditions.

Normal Mooring: Bow anchors and 7 buoys are used.

Mooring Equipment: Require 14 lines, either 9 in. synthetic or 1.25 in. wire rope minimum. Minimum length for 9 in. synthetic rope 720 ft. Minimum length of 1.25 in. wire rope on drum 1,200 ft. Both bow anchors serviceable with an appropriate length of chain for vessel's size according to Lloyd's or ABS requirement. Usual mooring conditions require 8 to 10 shackles of chain in the water.

To allow flexibility in the charter market or vessel availability, the 1,200 ft. wire rope on drum requirement can be reduced to 900 ft. provided 720 ft. is usable at the rail and a 2,500 h.p. to 3,000 h.p. tug is utilised, charged to the vessel's account. The tug will normally only be needed during the mooring operation if the vessel cannot slip its wire mooring lines off the drums. A tug, again, may be necessary for the vessel's account in unmooring.

If mooring wires are used, the synthetic tail or eye, if so fitted, must be in good condition and of 125 per cent breaking strength of the wire. The tail or eye, if so fitted, shall be connected to the wire with a Mandell Shackle or equal. A minimum pennant length of 60 per cent, if possible, is requested for ease of handling by the mooring vessel.

Mooring Gear: If ship's gear and winches preclude fast deployment of mooring lines a tug may be required. This applies primarily to vessels with hydraulic winches and is dependent on the size of vessels, sea and wind conditions.

General: The moorings at seaberth have been modified to allow handling of vessels up to 150,000 d.w.t. under certain wind, wave and sea conditions. This modification includes the repositioning of all buoys, increasing the size of the dip and riser chain to 3.125 in. and the installing of additional 5 ton anchors to supplement the 10 ton existing anchors.

No. 4 or D buoy, which is at the stern of the vessel, has 2×3.125 in. dip and riser sections and 4 shackles of 3.125 in. chain. Mooring lines to this buoy are doubled during each mooring operation. Weight has been added to each buoy to decrease the buoyancy. An additional buoy, No. 8 or H, was added to allow the moorings to be used by barges.

DISCHARGING: *Lifting Equipment Requirements:* Derrick that can be utilised to lift the 12 in. hose from the seabed and swing the hose to the ship's manifold. Minimum lifting capacity, 5 tons.

Products Received: Crude, Naphtha and other refinery requirements.

Discharge Rate: Maximum 22,000 bbls./p.h. through 8 or 9 lengths (200 ft. – 225 ft.) of hose, 12 in. diameter into 22 in. I.D. sealine. Emergency flush possible from cross connected 10 in. line from shore. Pumping distance to shore tanks 9,479 ft. Height to shore tank 3 ft. – 4 ft. Tank height max. 39 ft. 6 in.

Temperature Limitation at Rail: Maximum product, Crude or Fuel Oil temperature of 150°F.

General: Refinery will furnish the Mooring Master with pertinent information on crude pours and vessel charter conditions, e.g. pump rates or lay time, in order that the Mooring Master can be fully appraised of the Charter Party Terms and conditions. Deviations from the Charter Party Terms furnished, if not correctable in discussions with the vessel's Master, will be discussed via radio with the Supervisor of Pipe-lines and Terminals to determine if a protest should be filed.

FRESH WATER: Not available.

FUEL: Not available.

BALLAST: No facilities.

PORT ARTHUR: (Also see page 1625).

PILOTAGE: *Add:*

Gulf of Mexico Pilots

American Master Mariners licensed by the United States Coast Guard. They are experienced in handling vessels of all types and sizes, and have many years of experience in navigating the Gulf of Mexico.

GULF OF MEXICO PILOTS cover the entire Gulf and the Florida Straits. They are on call to board vessels wherever requested within the service area, on 48 hours advance notice.

REQUEST for service may be directed to:
GULF OF MEXICO PILOTS, 3741 Memorial Blvd., Port Arthur, Texas 77640. Cables: Gompilots. Tel: (409) 982-2961.

The GULF OF MEXICO PILOT will provide assistance and advise in heavily congested areas. He will utilise up-dated local knowledge of conditions peculiar to navigation in the Gulf of Mexico. He will assist with VHF radio communications, expedite arrivals and departures between the Gulf Ports resulting in savings of time and fuel, while easing the human-fatigue factor caused by the demanding duties of Shipmasters operating in unfamiliar environment and the continuously changing conditions therein.

Yemen, People's Democratic Republic of

ADEN: (Also see page 1738).

SHIPMASTER'S REPORT: March 1985.

Documents: See "Fuel".

Pilotage: Harbour Control was called on VHF Channel 16 two hours before arrival and again 4 miles off the fairway buoy. Information given from the Harbour Control regarding Pilot and berthing gave the impression of a well organised port. Night signal for a ship requiring Pilot is following: vertical lights, red-white-red.

Radio: From one week before arrival, radio messages were sent via Aden Radio (7OA) to Aden and Ethiopia. Radio Officer told me that Aden Radio proved to be easy and efficient to work with.

Fuel: Bunkering commenced immediately on arrival even before ship cleared by the Authorities. Authorities came on board just before departure to collect Crew Lists and Stores Lists. Crew's cabins were not searched and stores not sealed.

2 men from the Agents were on board to handle ship's matters.

Repatriation: 7 crew members were repatriated to Denmark, and 7 new crew members joined. Tickets for those to be repatriated were brought from Denmark with the joining crew. Crew change went smoothly.

Notices: Yemen Ports Authority – Port of Aden:

Masters are requested to assist the Port Authorities in controlling bumboat traffic as follows:

Bumboatmen and fishermen selling fish *may not* board ships without the written permission of the Master. Disregard of this rule renders the men liable to police action *after* the ship has left when evidence cannot be obtained from the ship. Masters can greatly assist the Authorities if they will ensure that they give written approval to bumboatmen and fishermen whom they have allowed to board the ship.

Port Officer, Aden.

To: All Masters of Vessels in Aden Port – From National Shipping Agency.

The undermentioned information is for your kind attention and guidance:

Immobilisation of Ship's Engines:

Please note that it is an offence to immobilise ship's engines WITHOUT written permission being obtained from the Yemen Ports Authority. To avoid heavy penalty, Masters are advised to forward their requests to us in duplicate, as ship's Agents, and should NOT immobilise ship's engines unless they are in possession of the written permission of the Yemen Ports Authority for the period approved.

Garbage Collections:

Appended below are extracts from Circular No. G/3/128 dated 25th January, 1984, of the Port Officer and Director of Marine Affairs, Yemen Ports Authority, Aden:

(a) Collection and removal of garbage from vessels is entrusted to persons authorised and licensed by the Yemen Ports Authority, Aden, and who work on a rota system.

(b) It is compulsory for a vessel staying in the harbour for a period exceeding 24 hours to avail itself of this service and fees will be collected per day **whether garbage has been collected or NOT.**

(c) Similarly it is compulsory for garbage collectors to call on vessels allocated to them daily unless other arrangements have been agreed with the Master of a ship. Any garbage collector who does not call on vessel allocated to him daily without prior agreement of the Master will not receive his fee that day if reported.

Note: Masters requiring special service for collection of extra garbage, i.e., refuse/wastes, etc., emanating from the cargo holds/engine room, etc., must put their written request in duplicate to us, as Agents, to arrange for the garbage collector to call on their vessel. The Master should also notify us in writing the charges agreed upon for the extra garbage with the Collector. This does not apply to U.S.S.R. vessels who are required to comply with the procedures below.

For Masters of U.S.S.R. Ships: Before applying for the collection of extra garbage, please first submit your written request in *4 copies* through the Agent for *approval* of the Resident Representative for U.S.S.R. ships. Please *do NOT* employ collection of the extra garbage before receiving this approval.

Scraping, Chipping and Painting in the Port:

Please note that as per instructions from Yemen Ports Authority, scraping, chipping and/or painting are *NOT ALLOWED* during vessel's stay in the port, unless prior permission is obtained from the Port Officer through us, as Agents. Any requests for the above must be forwarded to us in duplicate.

Shore Leave – Immigration Regulations:

All shore leave expires at 2300 hrs. and, therefore, all Masters, Ship's Officers, crew and passengers should be on board by this time. Overnight stay ashore is *not permitted.* Infringement of the above will be subjected to penalty and also delay to the ship.

Cash Advance to Master in Yemeni Dinars:

Cash advances required by Masters for payment to their crew in order to enable the crew to avail themselves of purchases from *Tax Free Shop,* require the following procedures to be complied with:

(a) Masters are required to render their requisitions in duplicate to the Agents during working hours together with 2 copies of Crew List.

(b) Either the Master or Chief Officer or Purser in person should have the requisition attested, stamped and signed by the Customs Officer before handing them to National Shipping Co. (the Agents).

(c) Together with the cash to Master the Agents will issue Purchase Certificates on Tax Free Shop.

(d) After completion of the purchases and 24 hours before vessel is due to sail, the Master should obtain *Purchase Clearance Certificate* from Tax Free Shop and hand it over to the Agents. This is most essential as against these Certificates only and after reconciling with the actual cash advanced, the Agents can accept the balance cash refund from Master.

Under the Exchange Control Regulations, it is an offence *not* to return the *UNUSED* Yemeni Dinars prior to sailing. Masters of vessels who received Cash Advance in Yemeni Dinars are advised to return *ALL* Yemeni Dinars remaining in their possession, to our representative who boards to clear the vessel, and ensure to obtain from him *on the spot* an official receipt of the National Shipping Company for the amount refunded, prior to departure of the vessel.

Victualling Allowance:

Free meals to Stevedores' Personnel/Watchmen.

Free meals are normally given by vessels by mutual arrangements between Masters and the Stevedores, to save time of the following persons who otherwise would have to go ashore for their meals:

One Tally Clerk per hatch working.
One Foreman.
One Cargo Supervisor.

It is left entirely to your discretion to supply free meals to the above mentioned personnel and the watchman or not. Kindly, therefore, note that we do *NOT* countersign or vouch expenditures.

Contacts on VHF: Masters of vessels can contact Agents on VHF (Channel 16) at any time during the *DAY* or *NIGHT* for any inquiries or services required. The Harbour Control also can be contacted on the same Channel.

Authorities: All in all the Port Organisation, Pilots, tugs and the Authorities gave us a good impression of the port.
